Survey highlights, background and methodology

2015 HIGHLIGHTS

- 87.89% of providers reported accepting new Medicaid patients.
- 88.95% of providers reported currently having Medicaid patients under their care;
- 1.5 out of 10 physicians plan to retire within the next 2 years.

BACKGROUND

The Oregon Physician Workforce Survey is the result of a public-private partnership between the Oregon Health Authority, the Oregon Medical Association, the Oregon Medical Board, and the Oregon Healthcare Workforce Institute. The 2015 survey is built upon years of Physician Workforce Survey experience that present findings on important changes in the physician population, practice environment, and delivery of services in the state. The partnership was built upon the work of the Oregon Medical Association, which conducted physician workforce assessments going back to the 1990's.

The survey is meant to produce information that will help understand the forces related to effective health care from a physician's perspective. More specifically, the Oregon Physician Workforce Survey assesses the impact of state and federal policies, identifies potential shortage areas both geographically and by sub-specialty.

Physicians are critical players in the delivery of health care. Understanding who they are, their practice activities, the environment in which they work, and the barriers and opportunities they see to providing care, helps inform short- and long-term planning for health care workforce needs. The findings from this study will help to guide health policy formation, meeting the needs of Oregon residents. As in previous versions, the survey seeks to:

- Provide reliable data on the current capacity of Oregon's medical community to deliver healthcare to Oregon consumers;
- Forecast the future capacity of the state's physicians;
- Identify barriers to physician participation in the Oregon Health Plan (OHP.)

The responses also identify reasons why practices close or limit their practice to certain payers such as Medicaid, Medicare, commercial and Worker's Compensation. It makes an effort to assess the ease or difficulty in obtaining services for Medicaid patients.

METHODOLOGY

For the 2015 Oregon Physician Workforce Survey, the number of questions was reduced by using information from the Oregon Medical Board licensing dataset.

The survey was sent to all licensed Oregon physicians meeting the following criteria:

- In-state practice address;
- Valid email address;
- MD and DO license types;
- Active license;
- Good standing; and
- No license limitations or restrictions.

Using these inclusion criteria, there were 11,878 eligible physicians who were surveyed. There were valid responses from 2,192 physicians, putting the response rate for the survey at 18.5% percent. This survey was conducted as a web-based survey only. The survey used a secure server and was built and deployed using Allegiance survey software. The survey was deployed November, 2015 and was closed to responses January, 2016.

After the survey was opened online and email invitations were sent, non-respondents were sent up to three email reminders. The response rate of 18.5% percent is comparable to web and email based surveys of physicians without incentives, and the response and non-response populations were similar in age, gender, regional distribution, and specialty.

Respondent demographics

Table 1: Respondent characteristics

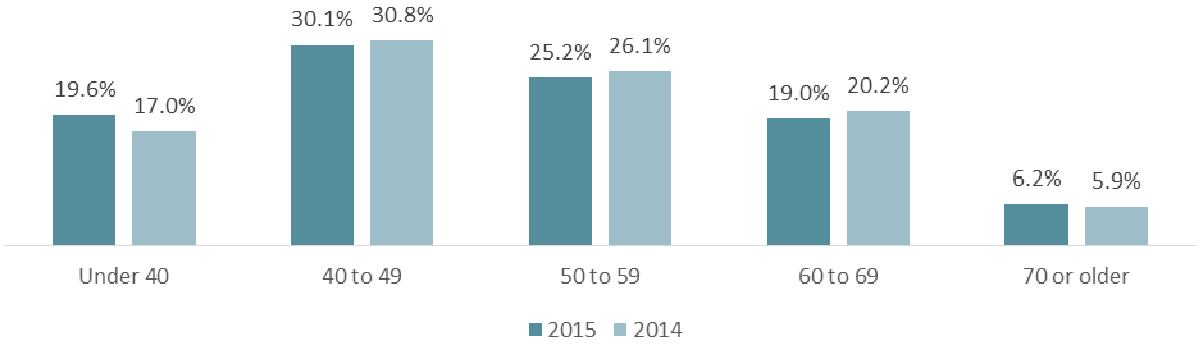
		2015 (n=1192)	2014 (n=2315)
Gender	Female	34.7%	35.5%
	Male	65.3%	64.5%
Age	Under 40	19.6%	17.0%
	40 to 49	30.1%	30.8%
	50 to 59	25.2%	26.1%
	60 to 69	19.0%	20.2%
	70 or older	6.2%	5.9%
Region	Portland Metro Area	50.3%	57.6%
	Mid-Willamette Valley	21.8%	19.4%
	Northwestern	2.8%	1.9%
	Southern	10.0%	8.6%
	Eastern	3.8%	3.2%
	Southwestern	2.2%	1.5%
	Central	9.1%	7.8%
Specialty Categories	General internal medicine	14.8%	15.8%
	Pediatric subspecialty	1.8%	1.6%
	Medical subspecialty	14.3%	17.5%
	Other	3.3%	7.3%
	Family or general practice	21.0%	15.7%
	Obstetrics and gynecology	5.6%	4.6%
	General pediatrics	5.9%	6.0%
	General surgery	3.3%	3.7%
	Neurological surgery	0.5%	0.7%
	Psychiatry	5.6%	5.3%
	Hospital based specialty	17.1%	14.8%
	Surgical subspecialty	6.8%	6.9%

GENDER AND AGE

Of the physicians who responded to the 2015 survey, 65.3 percent were male and 34.7 percent female. The final data has been age adjusted to be representative of teh total physician workforce demographic in the state.

In 2015, most respondents were 40 to 49 years of age, and 25 percent were 50 to 59 years of age (see figure 1.) 19.6 percent were under age 40, and 6.2 percent were 70 years of age or older.

Figure 1: Age distribution



RACE AND ETHNICITY

The respondents described themselves largely as White (88.8 percent), 6.7 percent as Asian, 0.8 percent as Black or African American, 0.2 percent as American Indian or Alaska Native, and 0.2 percent as Native Hawaiian or Pacific Islander. Of the respondents, 2.2 percent identified as Hispanic, Latino, or Spanish. These percentages differ from the distribution of responses to racial and ethnic data collection in the State of Oregon as a whole, especially in the case of ethnic self-identification; while only 2.2 percent of physician respondents report as Hispanic or Latino, 12.5 percent of Oregon's population so self-identifies.

Table 2: Oregon's physician self-reported race compared to Oregon's general population

Race/Ethnicity	2015 PWS	2014 Oregon
White	88.8%	87.9%
Black or African American	0.8%	2.0%
Asian	6.7%	4.3%
Native Hawaiian/Other Pacific Islander	0.2%	0.4%
American Indian/Alaska Native	0.2%	1.8%
Hispanic/Latino	2.2%	12.5%

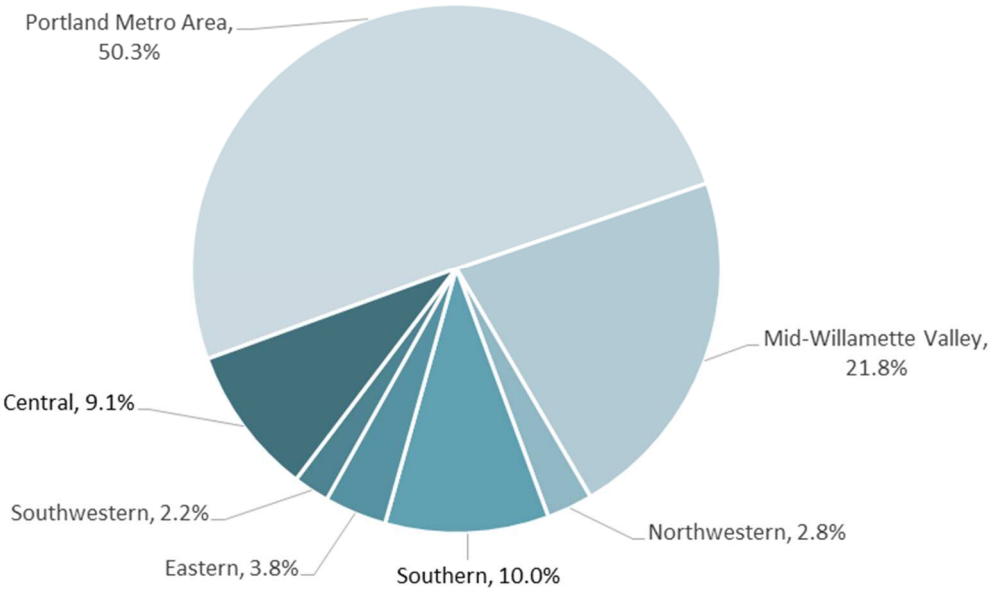
This table excludes "other" and "two or more" races. Percentages may not add up to 100.

Practice characteristics

PRACTICE REGION

The majority of physicians are in the Portland Metropolitan area, comprising 50.3 percent of respondents. More than 20 percent were from the Mid-Willamette Valley. The Central and Southern regions comprise 19.1 percent of respondents.

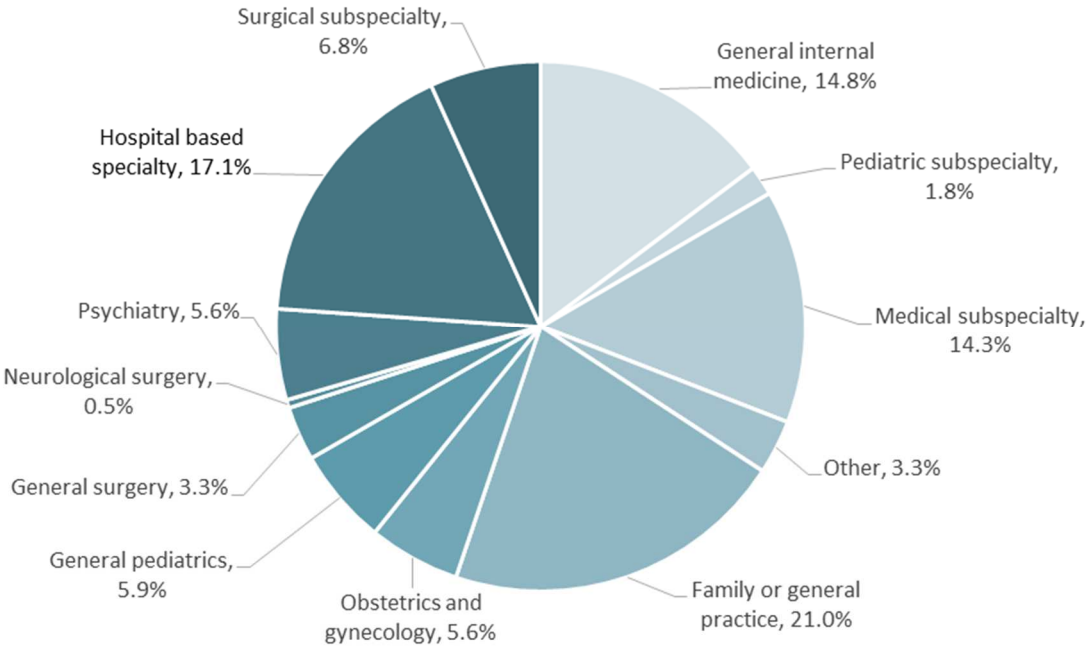
Figure 2: Physician by region



SPECIALTY

The 2015 Oregon Physician Workforce Survey collapses sub-specialties into 12 major categories. Family/general medicine specialists and hospital-based specialists are the largest groups responding, at 17.5 percent of the total each, followed by general internal medicine, at 16.1 percent of the total. Appendix C contains a crosswalk of both recoded, and the original groupings.

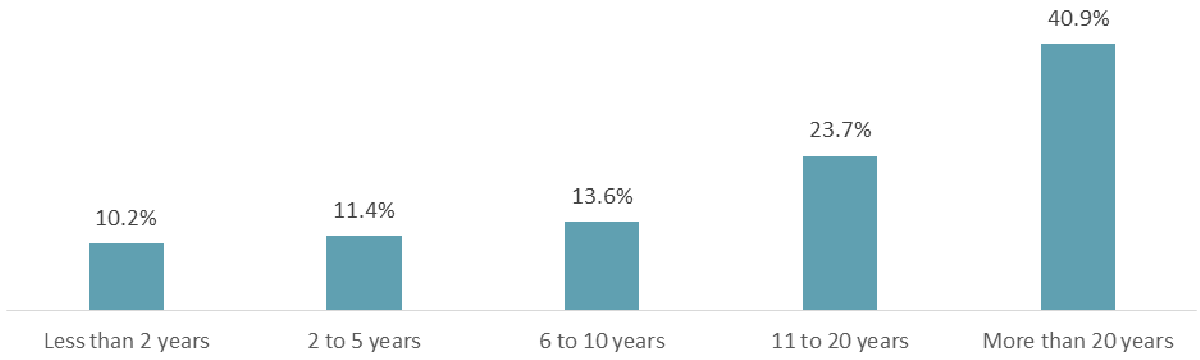
Figure 3: Specialty categories



Professional characteristics

YEARS LICENSED

Figure 4: Years licensed any state



EMPLOYMENT STATUS

Over half of the physicians are employees (53.1 percent.) Twenty-one percent were full or part owners in their practice. Less than nine percent were independent contractors.

In the Northwestern region, 61 percent of respondents are employees. Southern and Southwest areas of the state had the lowest percentage of physician-respondents who are employees. Figures 5 through 12 show the employment status of physicians in their primary practice within each region of Oregon.

Figure 5: Statewide

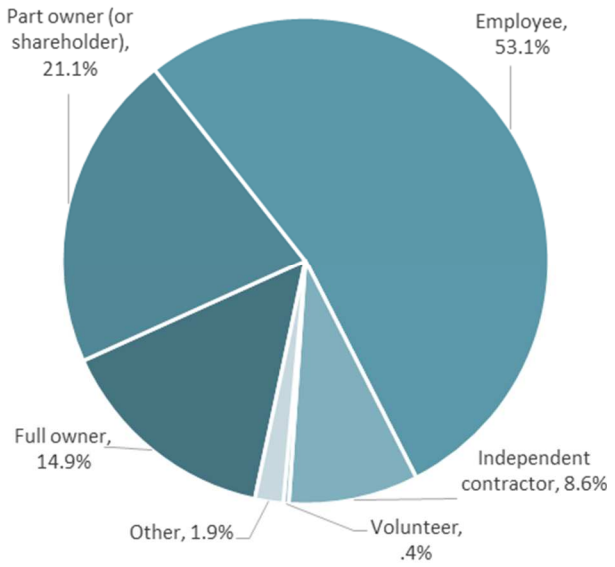


Figure 6: Portland Metro

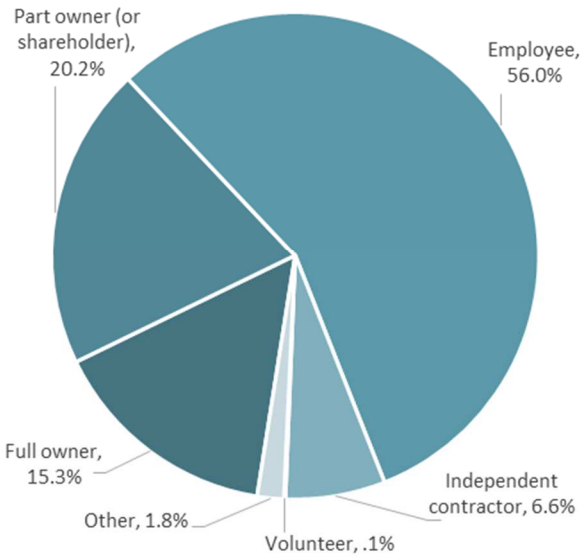

Figure 7: Mid-Willamette Valley

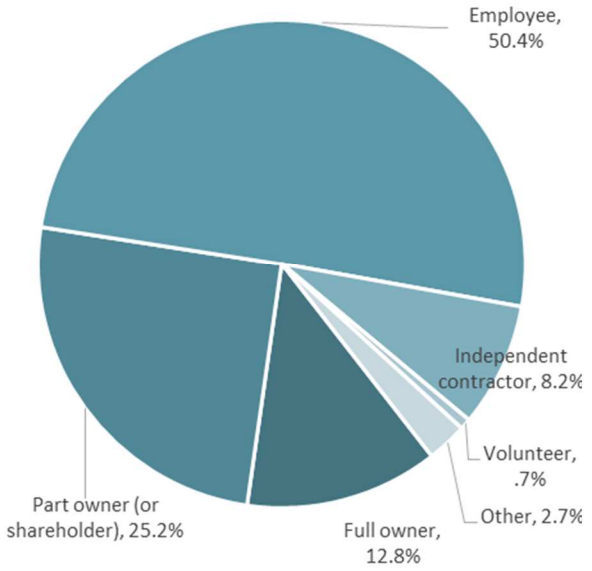

Figure 8: Northwestern

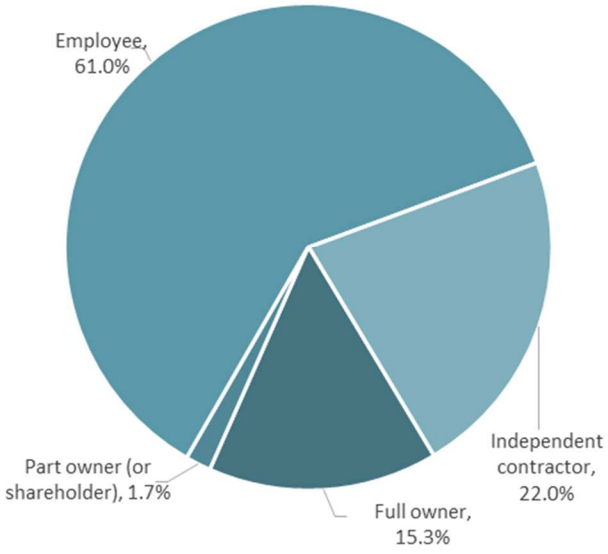

Figure 9: Southern

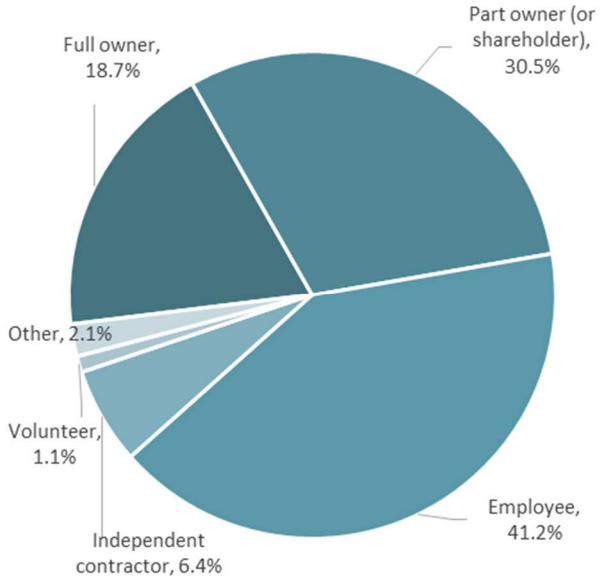

Figure 10: Eastern

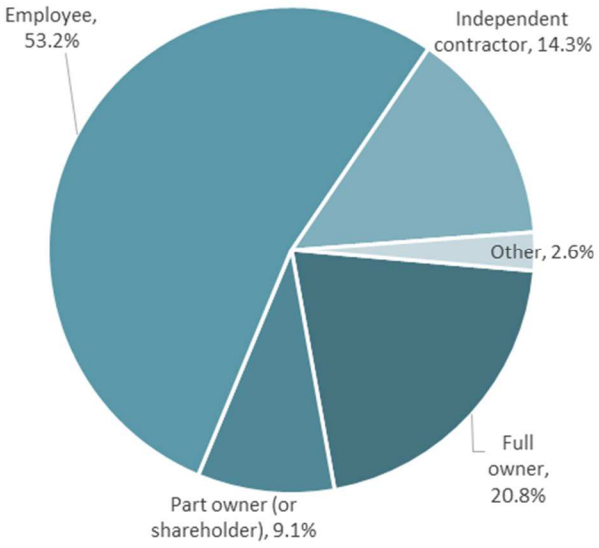

Figure 11: Southwestern

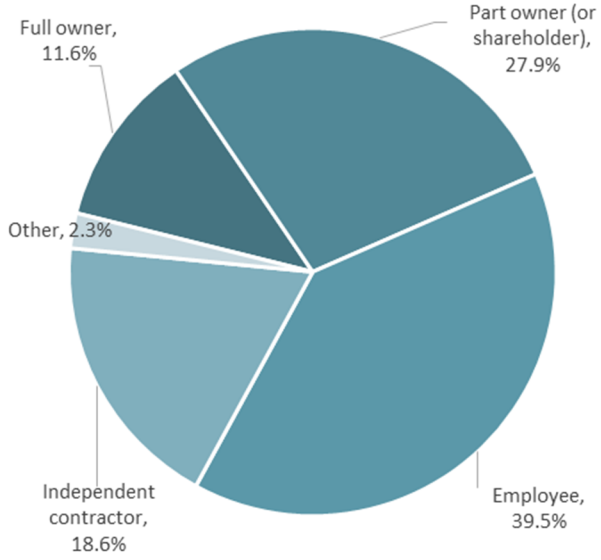

Figure 12: Central

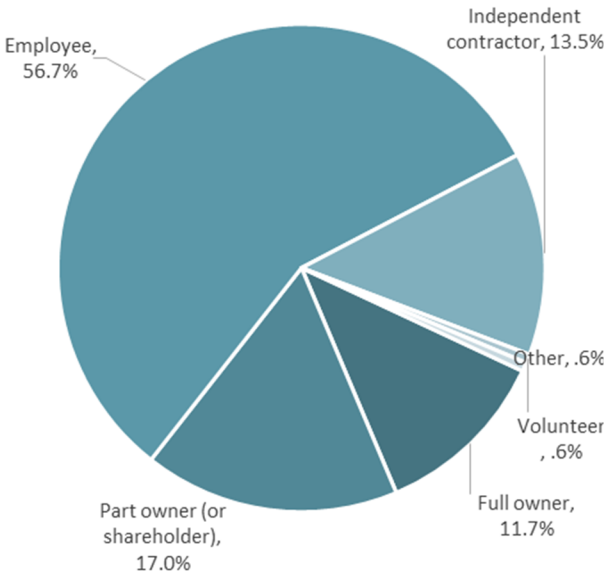
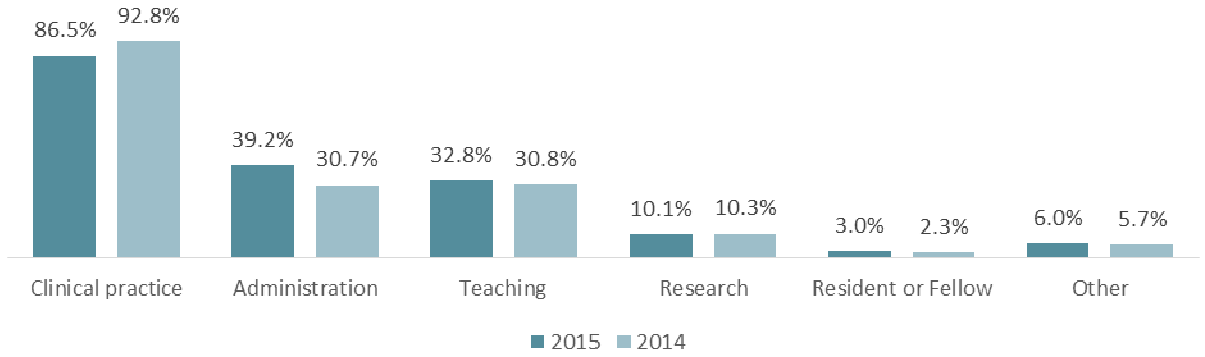


CURRENT PROFESSIONAL ACTIVITIES

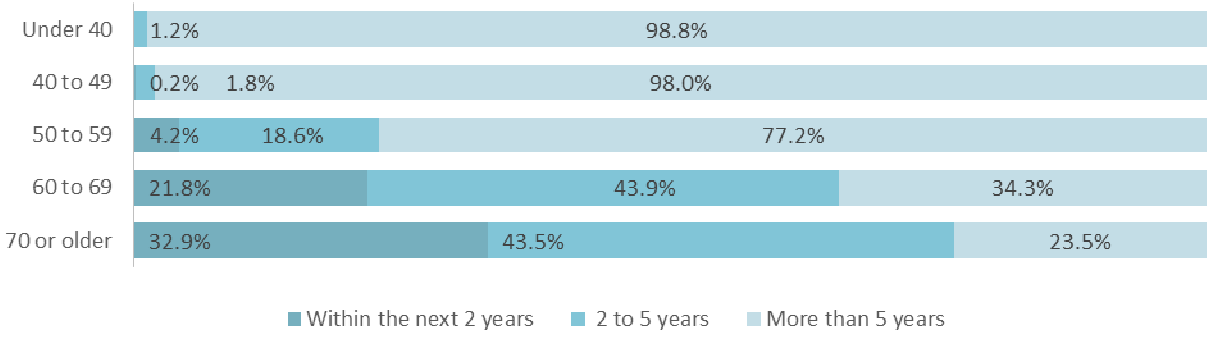
Respondents selected their primary professional activity from six categories: direct patient care, administration, research, resident or fellow, and teaching. Over 86 percent of respondents indicate they perform clinical practice related to direct patient care, consistent with previous results. More than 32 percent of physician-respondents report teaching in some capacity.

Figure 13: Professional activities



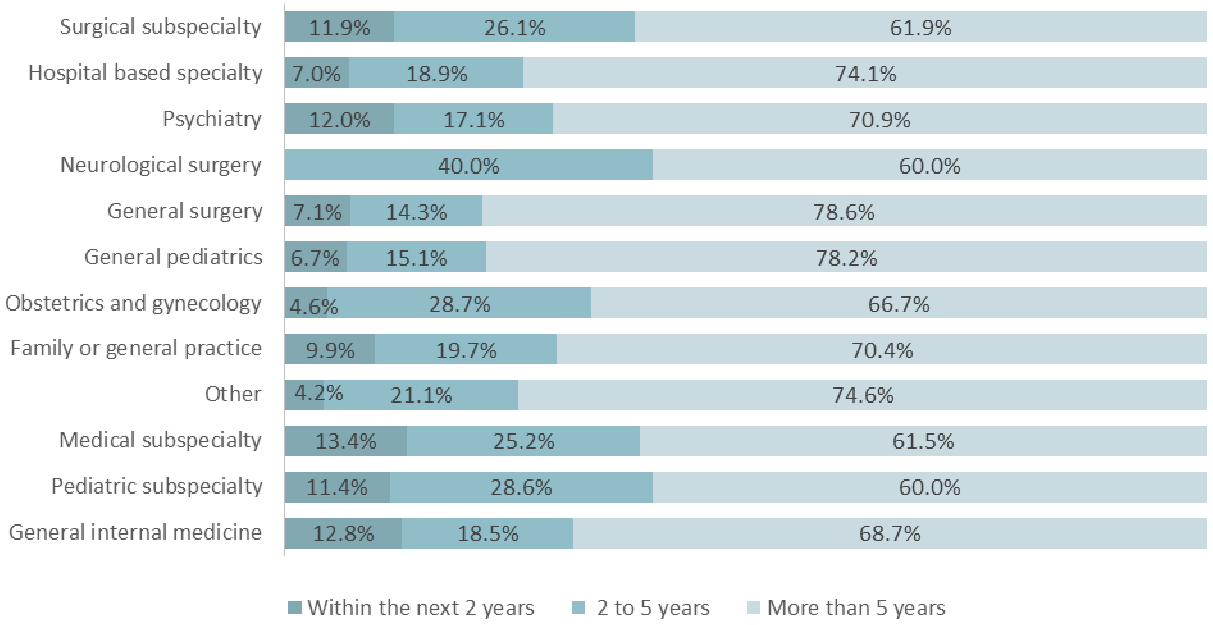
PHYSICIAN RETIREMENT PLANS

Figure 14: Retirement plans by age category



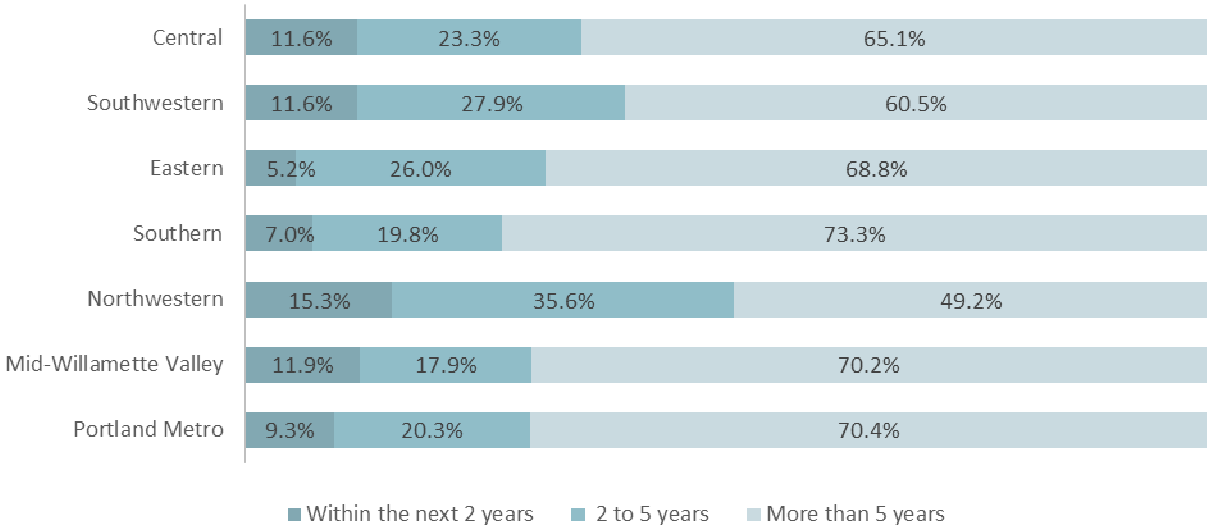
Physicians in the general surgery specialty show the highest percentage of those who intend to retire within five years. Two specialty groups, general pediatrics and obstetrics and gynecology, show about one out of three physicians have plans to retire within five years. General pediatrics and OB/GYN specialties have the lowest percentages expressing the intention to retire within the next two years.

Figure 15: Plans to retire by specialty



All regions see an increase in the percentage of physicians planning to retire in the next two to five years, compared to 2014 survey results. However, there is an increase in the percentage of physicians who do not plan to retire in the next five years, as well.

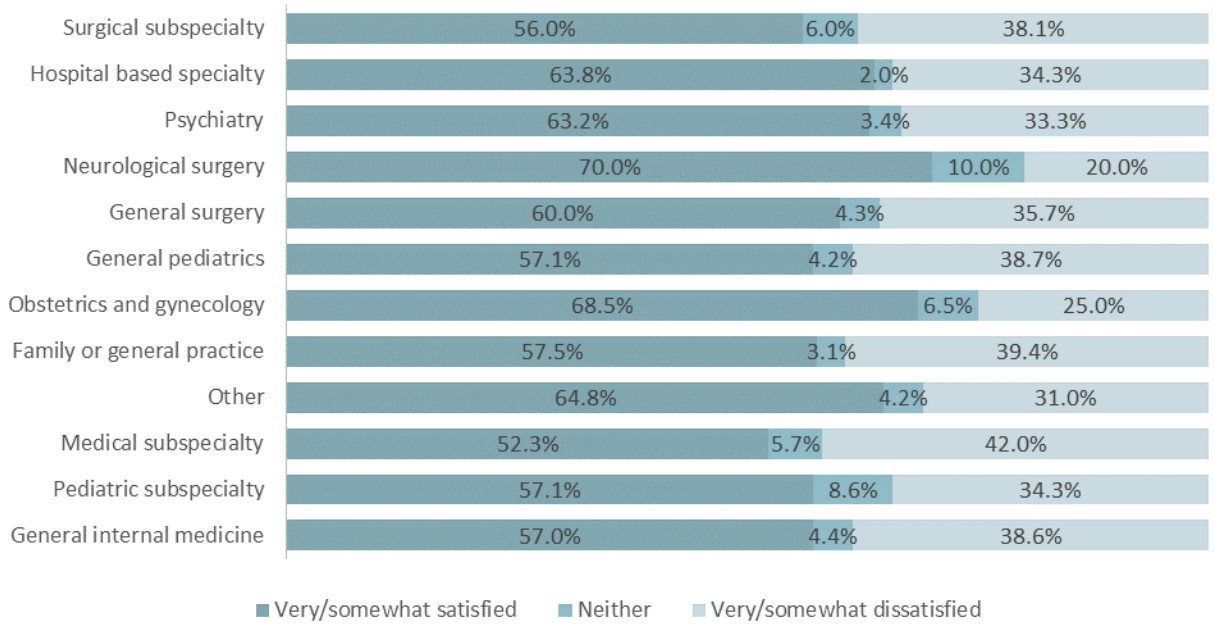
Figure 16: Plans for retirement by region



Professional satisfaction

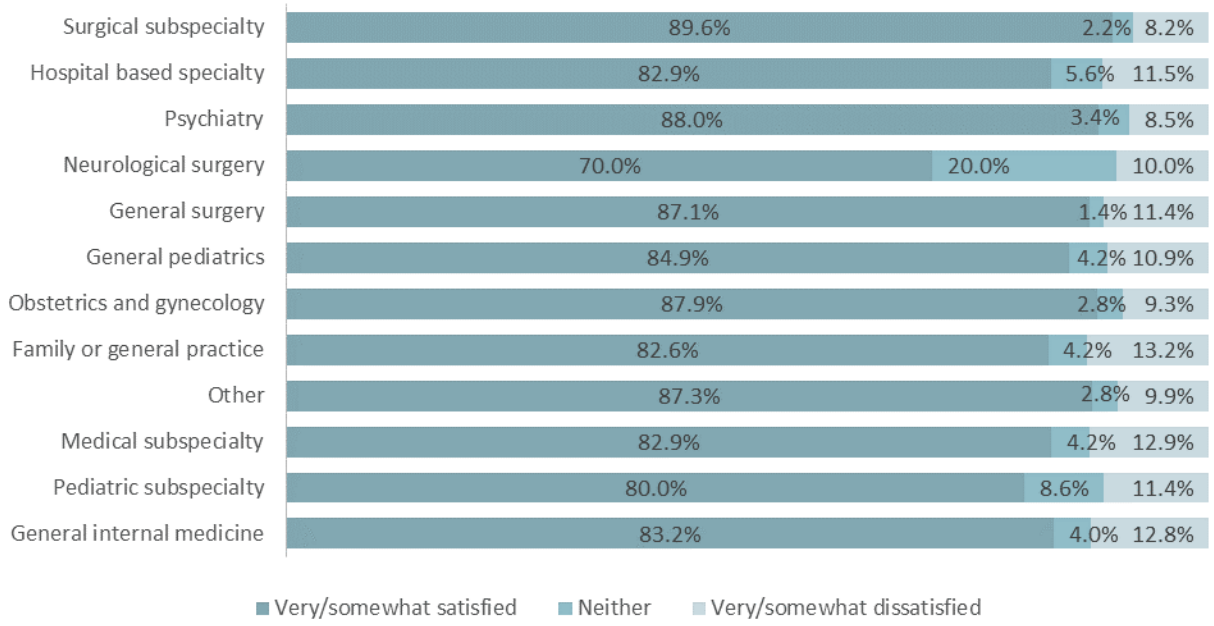
This survey includes three questions about career satisfaction. The first asks about satisfaction in the last 12 months; the second asks about respondent satisfaction with his/her medical career overall, and the third asks about the greatest source of respondent's professional satisfaction. The physicians specializing in neurological surgery report the highest level of satisfaction in the previous 12 months. Medical subspecialties report the lowest satisfaction.

Figure 17: Physician satisfaction over the last 12 months, by specialty

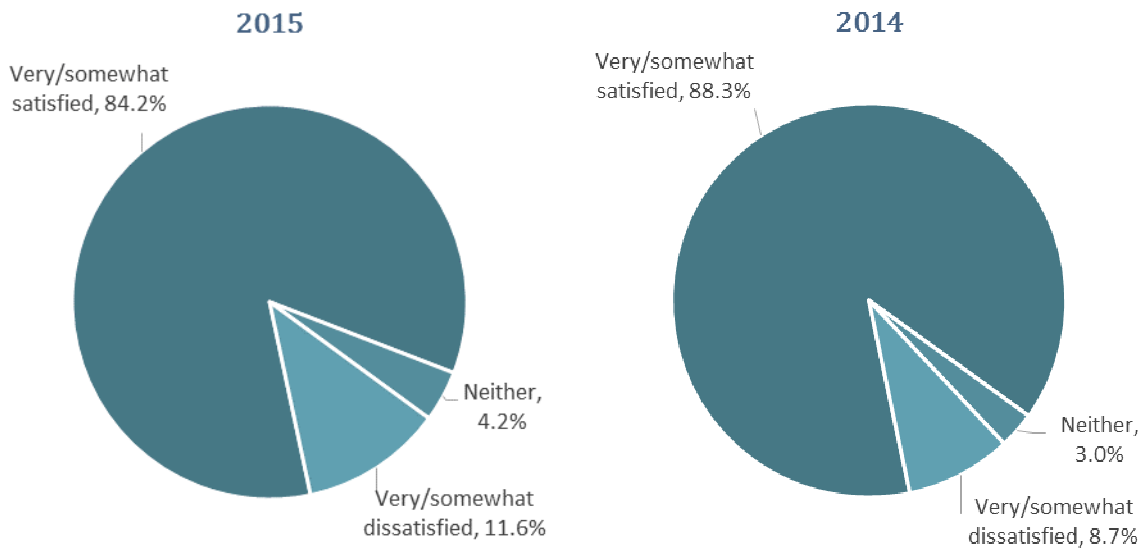


The differences between subspecialist groups become less pronounced when physicians are asked about their career overall. Surgical subspecialty and obstetrics/gynecology express the greatest level of satisfaction with their career overall. Psychiatrists and surgical sub- specialists report the least dissatisfaction in their areas.

Figure 18: Physician satisfaction with overall career, by specialty

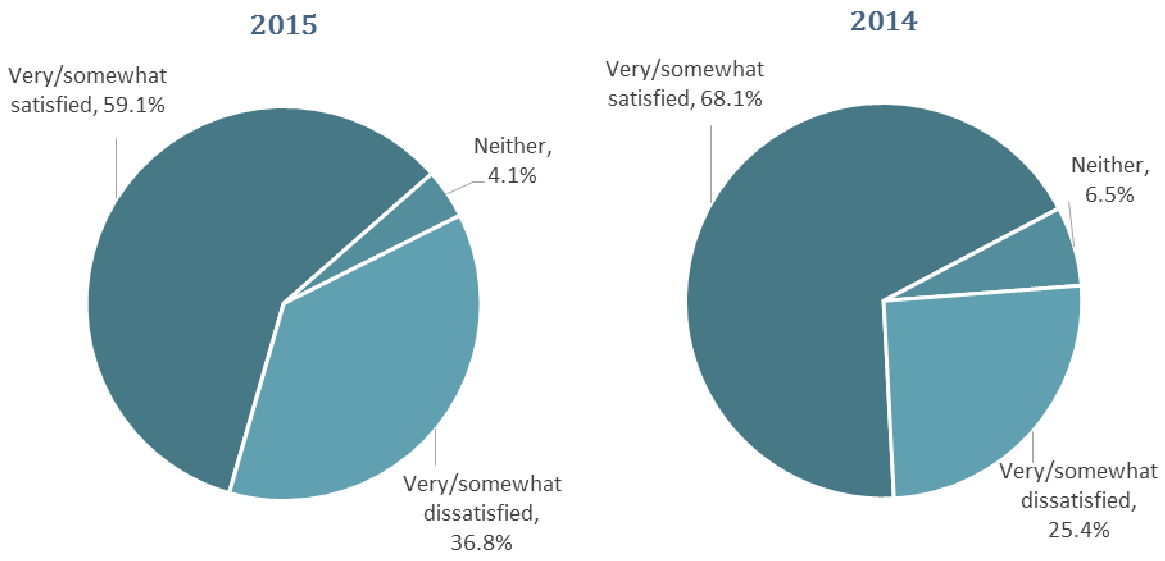


Figures 19 and 20: Career satisfaction overall, 2015 and 2014



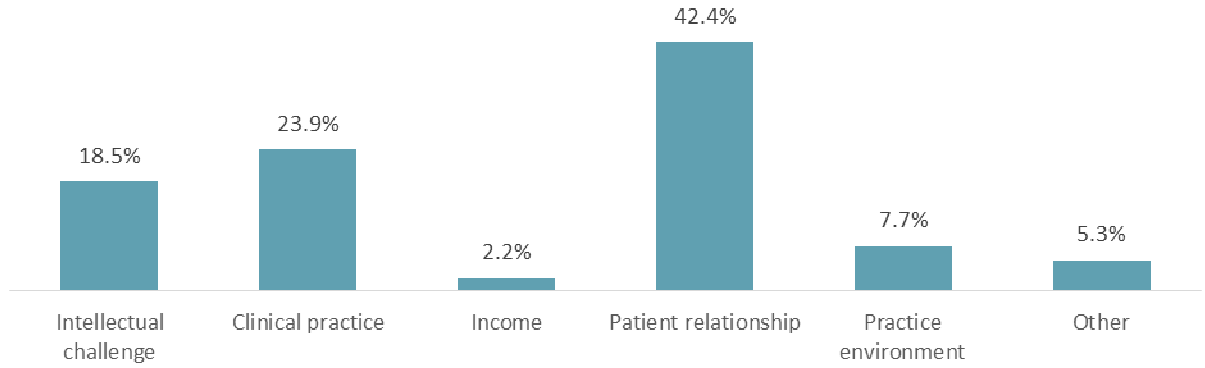
Physicians who report being somewhat or very satisfied with their careers declined in 2015, to 59.1 percent, compared to 68.1 percent in 2014. Similarly, the percent being somewhat or very dissatisfied increased from 25.4 percent in 2014 to 36.8 percent in 2015.

Figures 21 and 22: Career satisfaction in the last 12 months, 2015 and 2014



Physicians pointed to the patient relationship as their greatest source of satisfaction, reporting 42.4% in 2015. This is similar to previous years' survey results. Income ranked the lowest among categories at 2.2%.

Figure 23: Greatest source of satisfaction



Providing care

Overall, nearly 60 percent of respondents (59.2 %) report seeing established patients for non-urgent appointments in less than seven days. This varies from 33 to 48 percent by region. General pediatrics and general/family practitioners fare best in terms of a less than seven day wait for established patients, when compared to other sub-specialties.

Figure 24: Percentage of physicians reporting a less than seven day wait for non-urgent appointments for established patients by region

Figure 25: Percentage of physicians reporting a less-than-seven-day wait for non-urgent appointments for established patients, by specialty

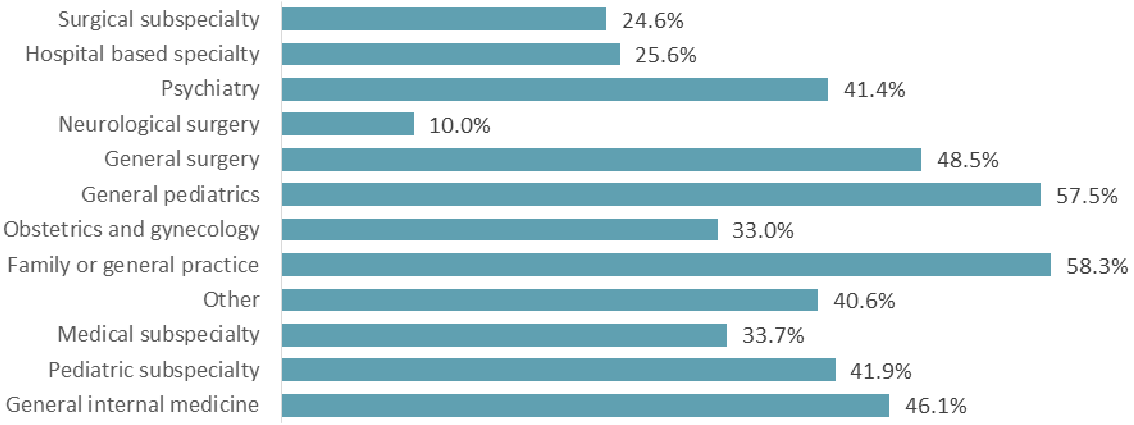


Figure 26: Non-urgent appointments needing two weeks or more to schedule by specialty

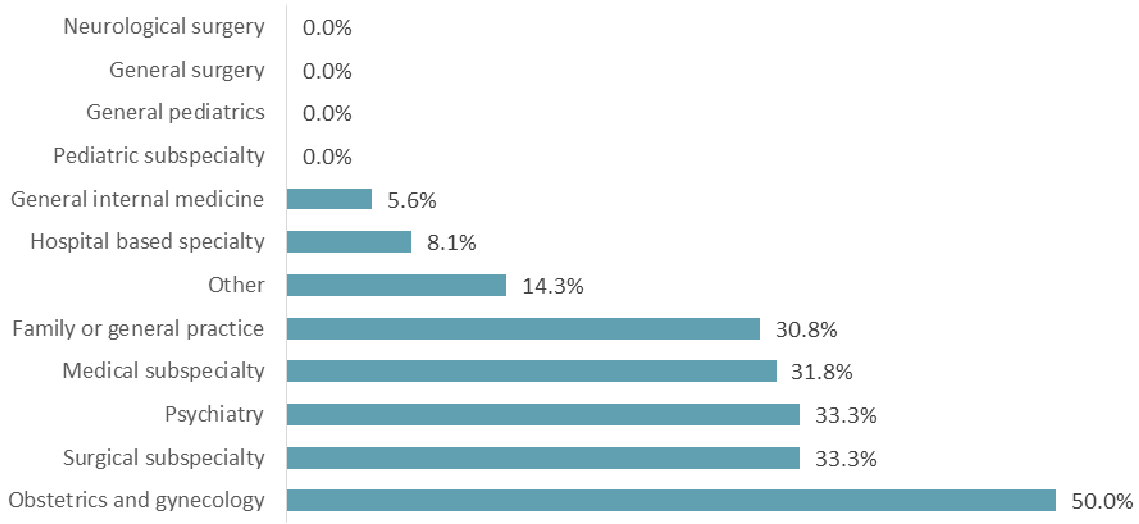

Physician time

Physicians are asked to give two estimates of the total amount of time spent in a typical week. One question asks about time spent in direct patient care, and the other asks about time spent in administrative tasks associated with patient care.

Figure 27: Hours spent in direct patient care in a typical week, all specialties

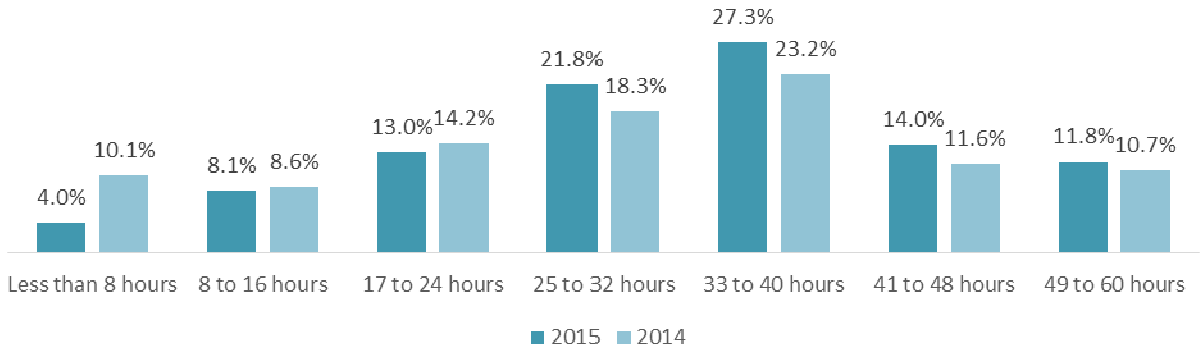

Figure 28: Hours spent doing administrative tasks associated with patient care in a typical week, all specialties

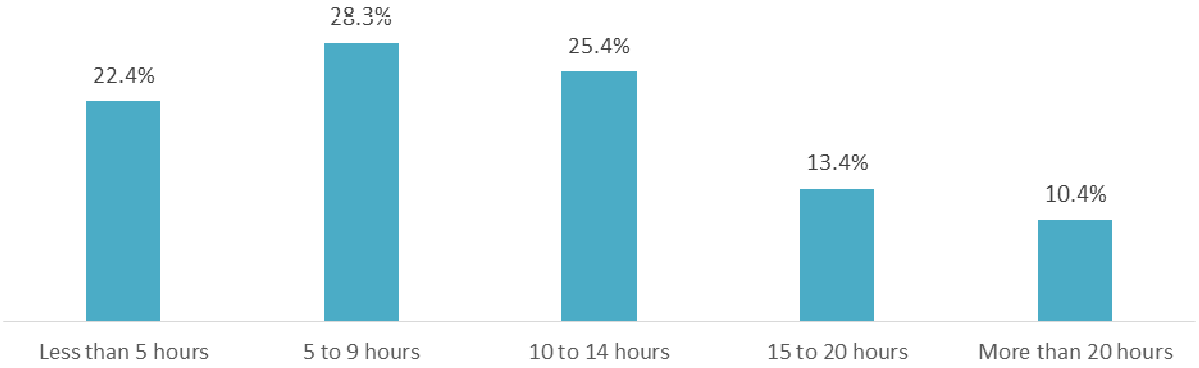

TAKING CALL

The percentage of responding physicians who report they take call continues to decline. In 2015, only 44.5% of respondent-physicians report seeing one or more patients a week as a result of call-taking. Nonetheless, at the high end, respondents seeing six or more patients remains fairly stable. In 2015 there was a slight decline to just under 17 percent. Excluding hospital-based specialties, medical sub-specialists and general internal medicine are most likely to see patients from taking call.

Figure 29: Average weekly patients as a result of taking call, all specialties

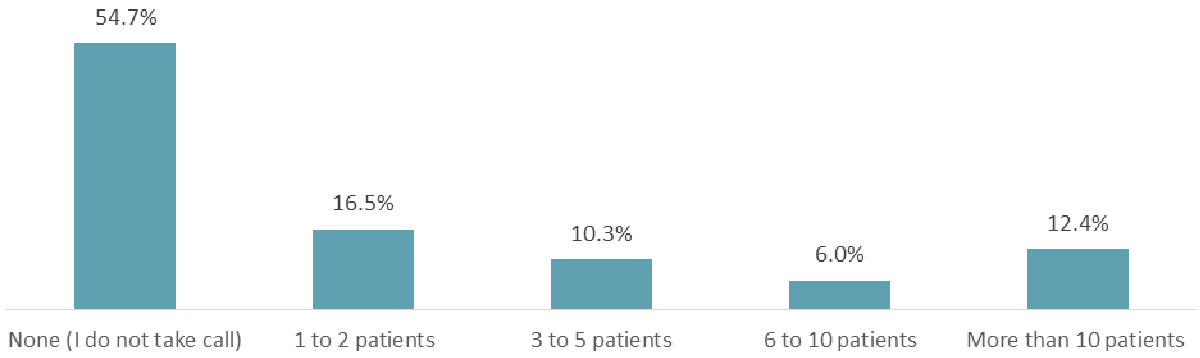

Figure 30: More than 6 patients per week as a result of taking call by specialty

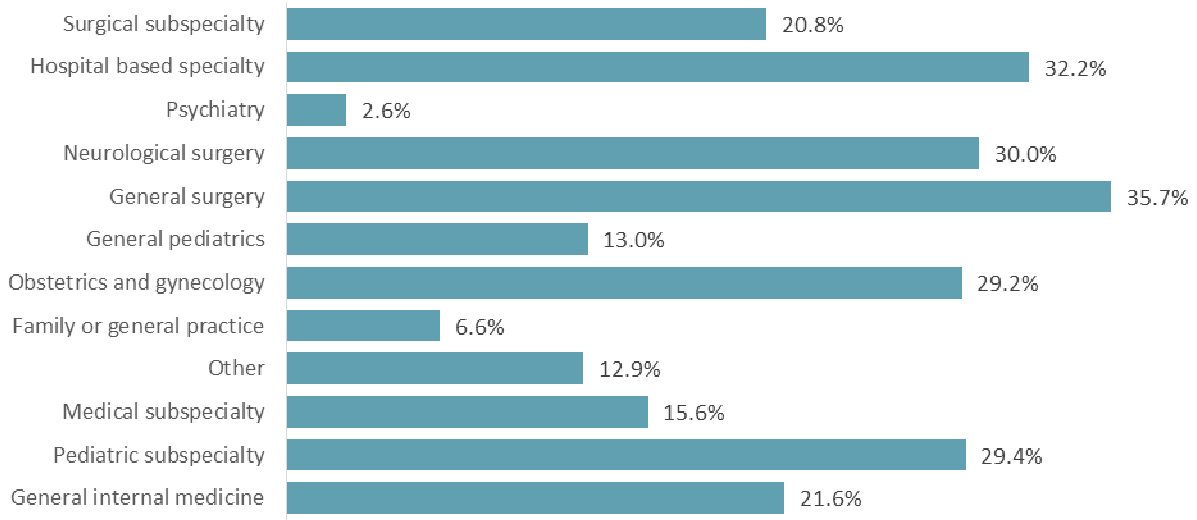
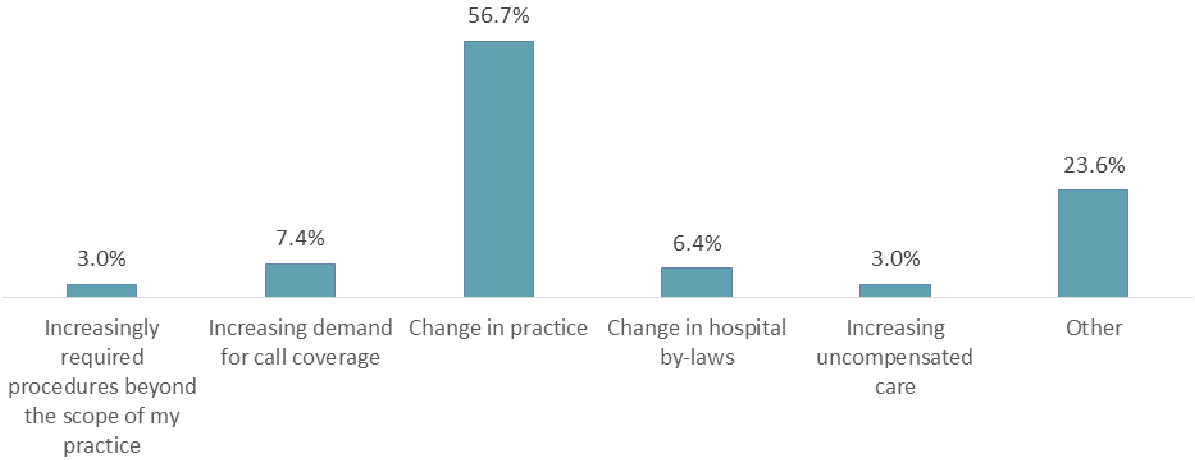


CHANGES IN HOSPITAL PRIVILEGES

Of the responding physicians, 10 percent changed hospital privileges in the previous 12 months. Physicians sometimes noted multiple reasons for changing, including those listed in Figure 31.

Figure 31: Reasons for changing privileges, all specialties



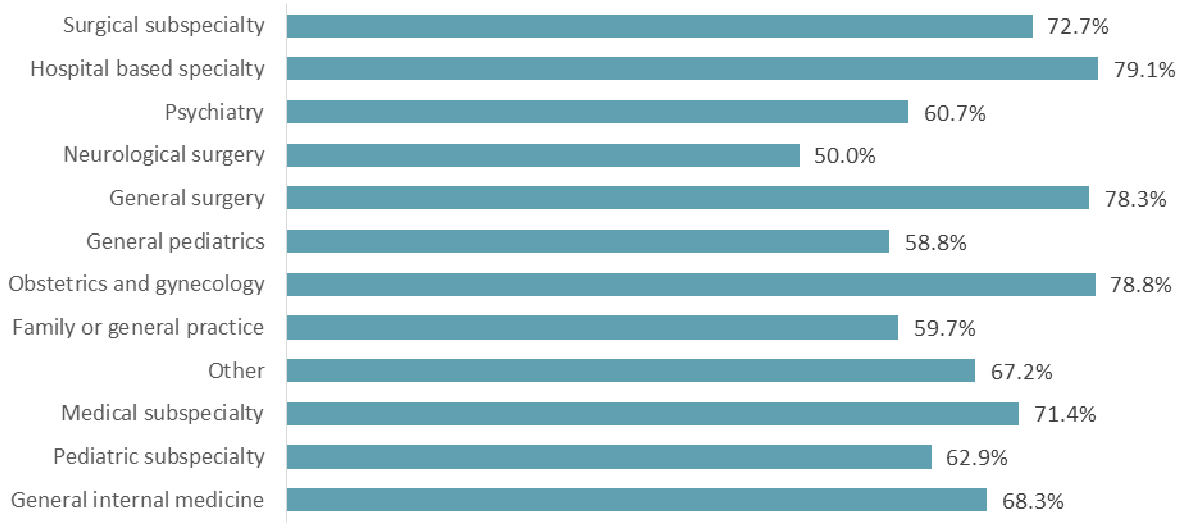
CHARITY CARE

Physicians were asked to estimate the number of hours in a typical month they spend providing charity care. Overall, 41.6% of respondents reported providing some charity care per month.

Figure 32: Overall charity care provided, all specialties

There continues to be considerable variation in the provision of charity care by specialty.

Figure 33: Percentage providing charity care, by specialty



PRIMARY CARE

In 2014 and 2015, the survey asked whether or not the respondents consider themselves a primary care physician.

The percentage of self-identified primary care physicians increased from 34 percent in 2014 to 37 percent in 2015. Among respondents, there is a sizable gap between male and female physicians who identify themselves as primary care physicians, as evidenced in Figure 35 below.

Regional distribution and distribution by specialty show a more complete picture of statewide identification by respondents.

Figure 34: Primary care physicians statewide

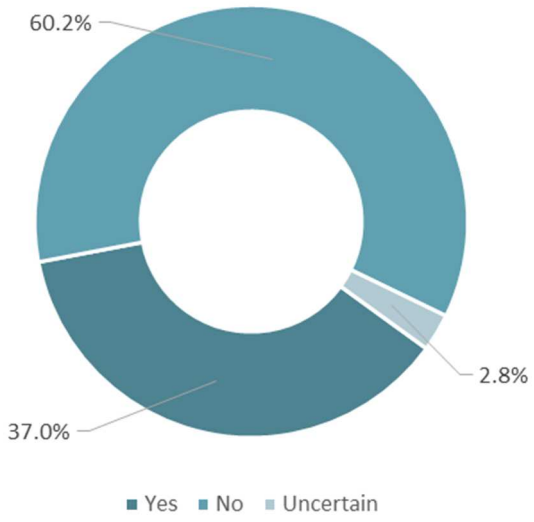


Figure 35: Primary care physicians by gender

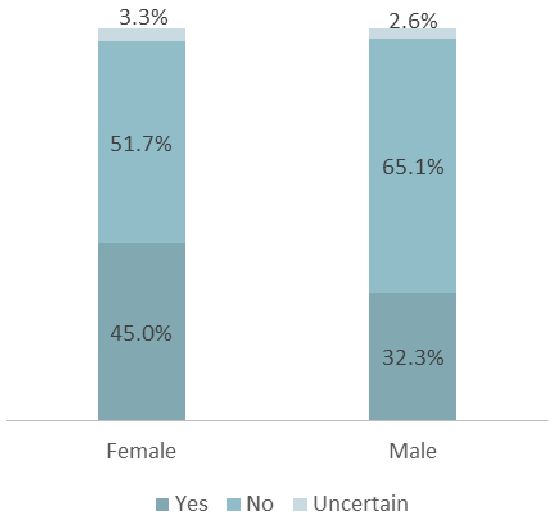

Figure 36: Regional identification as primary care physician

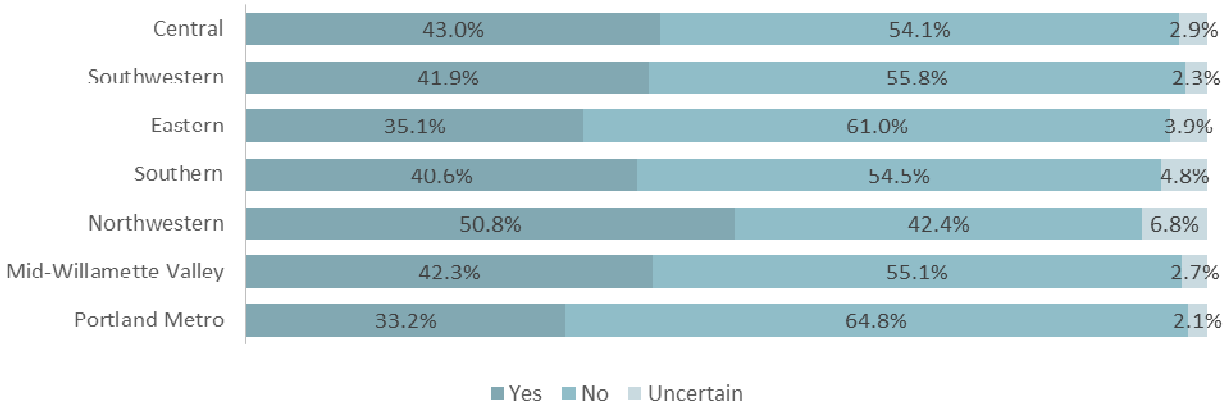

Figure 37: Identification as primary care physician, by specialty

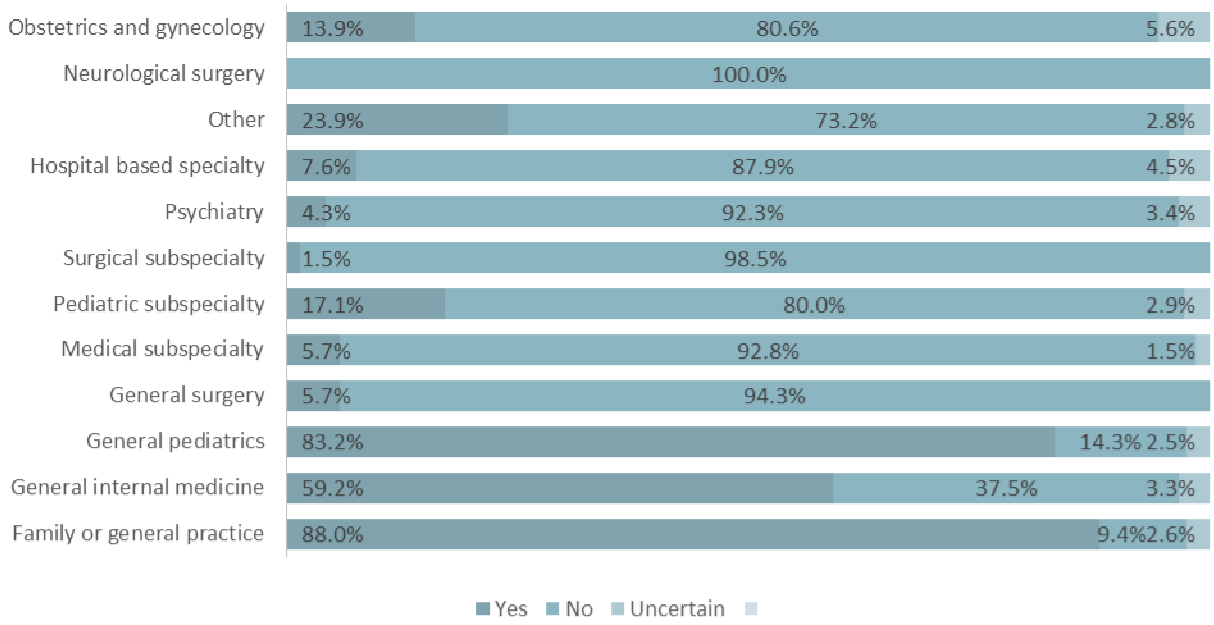


On most other characteristics (age, practice size, etc.), responses were clustered fairly closely together. See Appendix B for detailed tables.

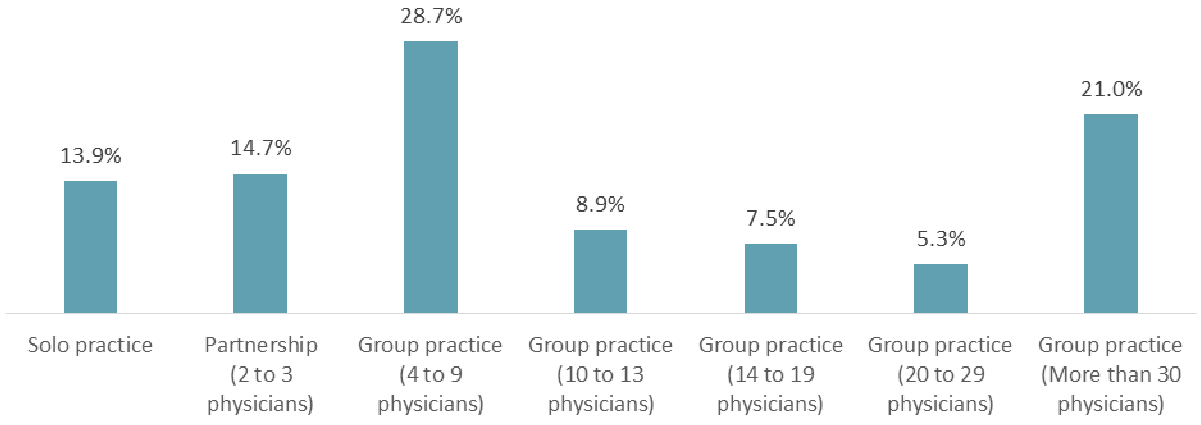
Practice characteristics (continued)

Practice characteristics are broken into three areas: size, organization, and patient volume. Physicians are also asked about second practice location and volume, if any.

PRACTICE SIZE

Statewide, the most commonly reported practice size are group practices of 4 to 9 physicians (28.7%), similar to previous reports. As one might expect, solo practices remain most common in the Eastern region (26 %) and are least common in the Portland Metro area (12.2%) and Central Valley region (12.8%.) Respondents who work in a solo practice continues to decline. From 2006 to 2015, solo practice went from 19.8 percent of respondents to 13.9 percent of respondents.

Figure 38: Practice size, statewide



PRACTICE ORGANIZATION

Most of the physicians-respondents practice in single specialty practices (61.6 percent.)

Figure 39: Practice organization, statewide

PATIENT VOLUME

Respondents who identify as family practice physicians and pediatricians see the highest volume of patients weekly; 27.2 percent of family practice physicians and 22 percent of pediatricians report seeing between 75 and 100 patients weekly. This is an increase from 2014.

Figure 40: Average weekly patient volume, all specialties

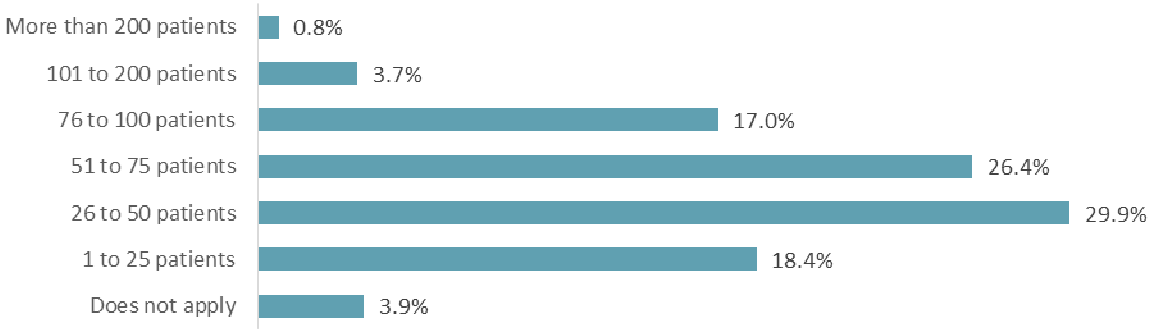


Figure 41: Average weekly patient volume, primary care physicians vs. non-primary care physicians

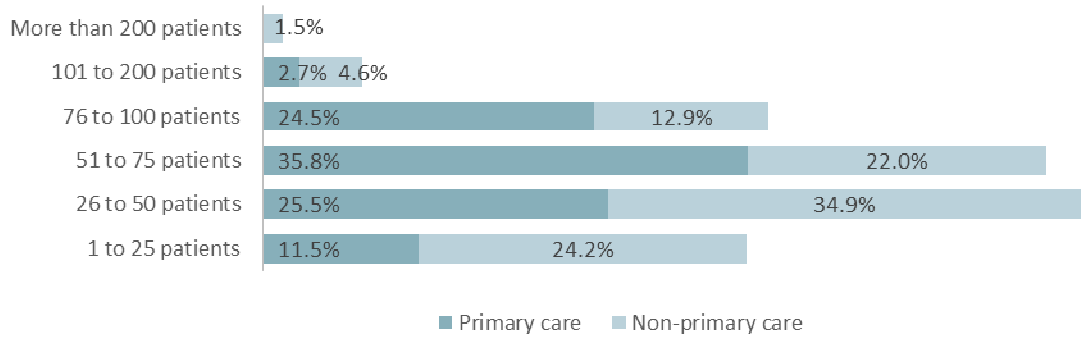


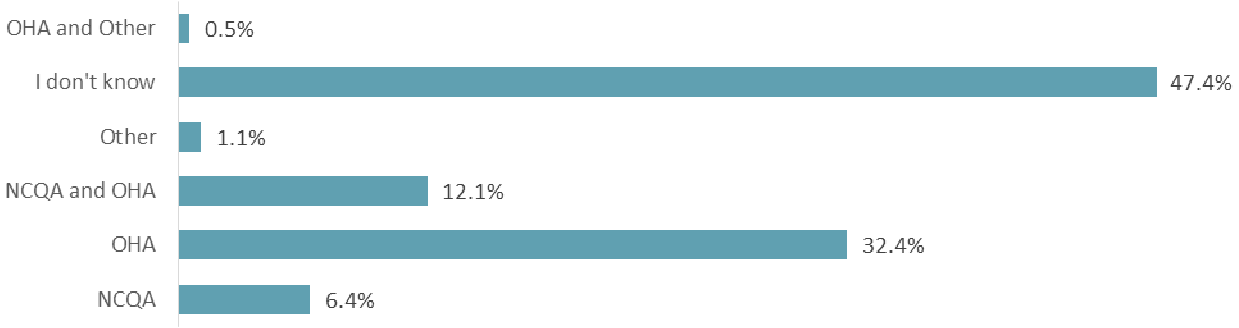
MEDICAL HOME STATUS

In 2014 and 2015, participants were asked if their practice had formal medical home/patient-centered primary care home recognition, and if so, which organizations granted recognition. They were also asked if their practice was seeking such recognition.

Figure 42: Statewide formal medical home/patient-centered primary care home recognition

Most respondents do not know which organization recognizes their medical home/patient-centered primary care standard practice.

Figure 43: Statewide formal medical home/patient-centered primary care home: recognizing organizations



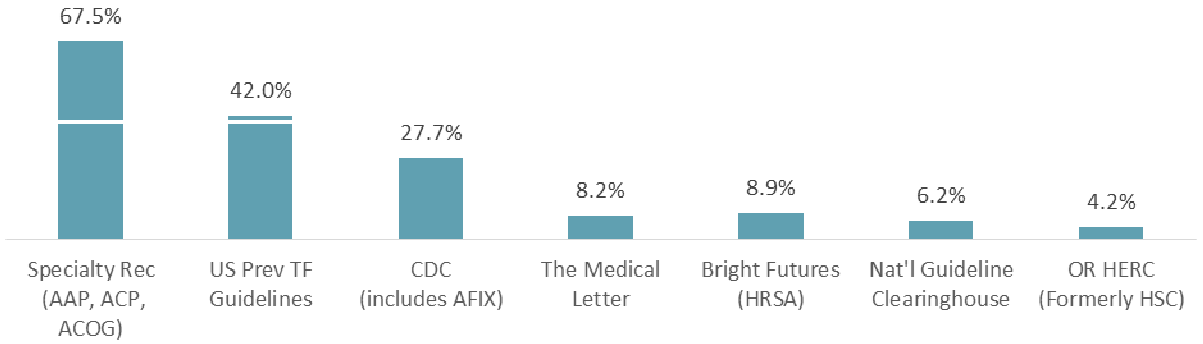
For the remainder, those without medical home recognition status, are asked if they are seeking recognition. Results are below.

Figure 44: Statewide formal medical home/patient-centered primary care home recognition sought

USE OF PRACTICE GUIDELINES

For the 2015 survey, respondents are asked to identify current practice guidelines in place. Statewide, the breakdown is as follows:

Figure 45: Practice guidelines Statewide



Payer acceptance

A key series of questions asked in the Physician Workforce Survey are about acceptance of specific payer types. In 2015, physicians are asked if their practices are closed, limited or completely open to acceptance of Medicare, commercial, Worker's Compensation, and Medicaid as insurance payers.

Physicians who indicate they limit, or are closed to specific payer types, are asked a series of questions about the factors affecting those decisions.

MEDICARE

Figure 46: Acceptance of new Medicare patients 2004-2015

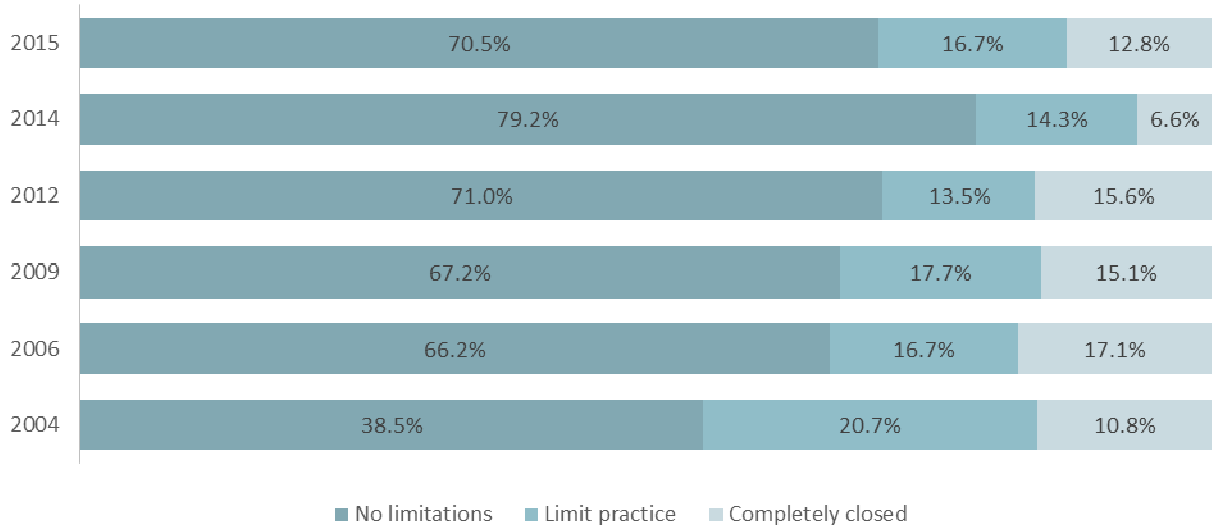


Figure 47: Acceptance of Medicare patients, by specialty

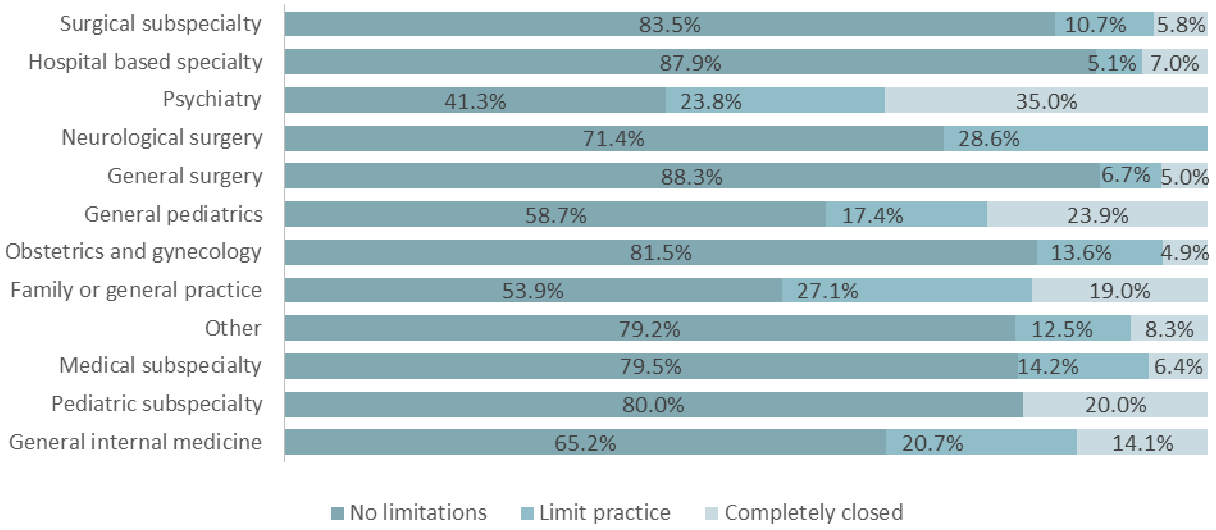

Figure 48: Acceptance of Medicare patients, by region

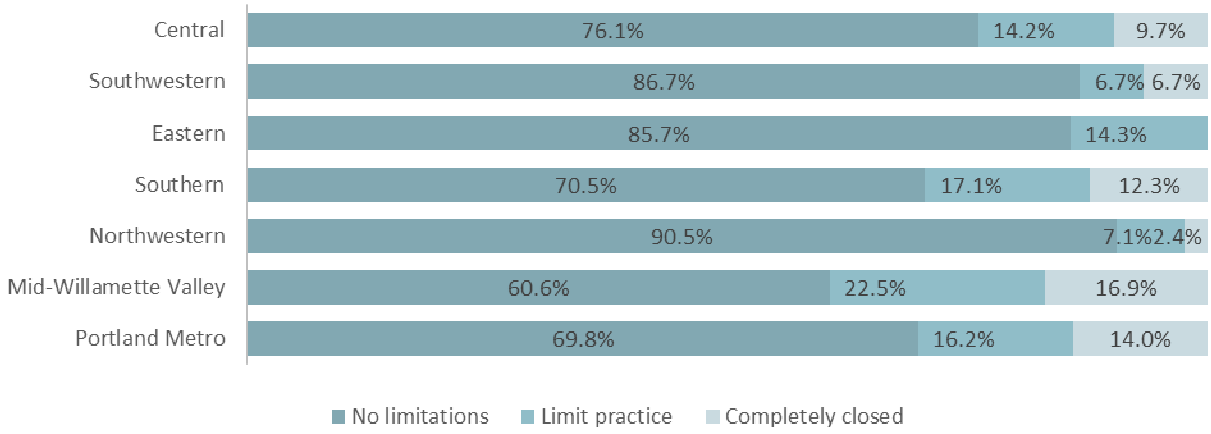
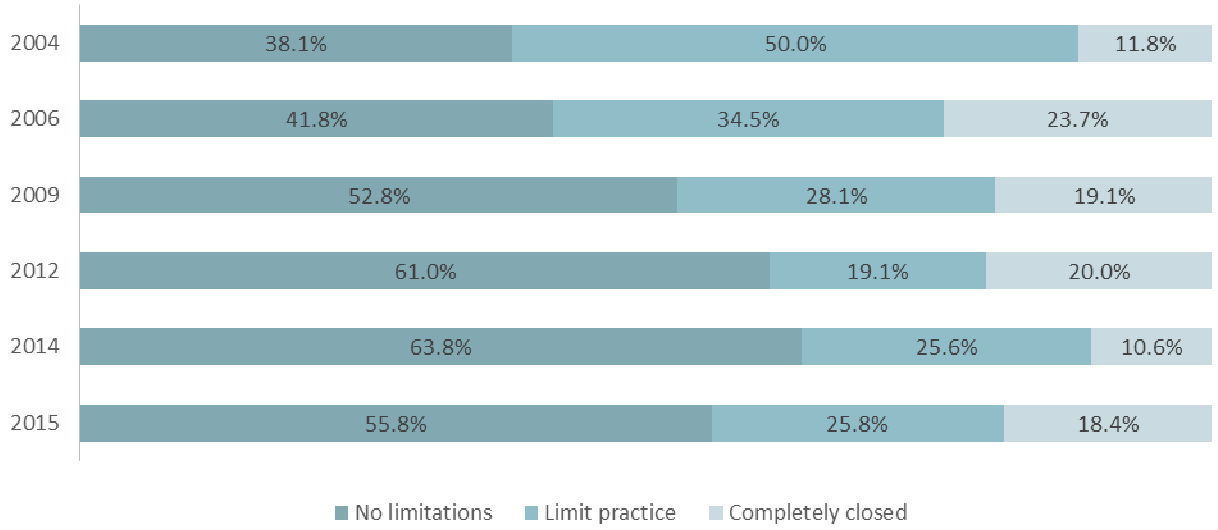


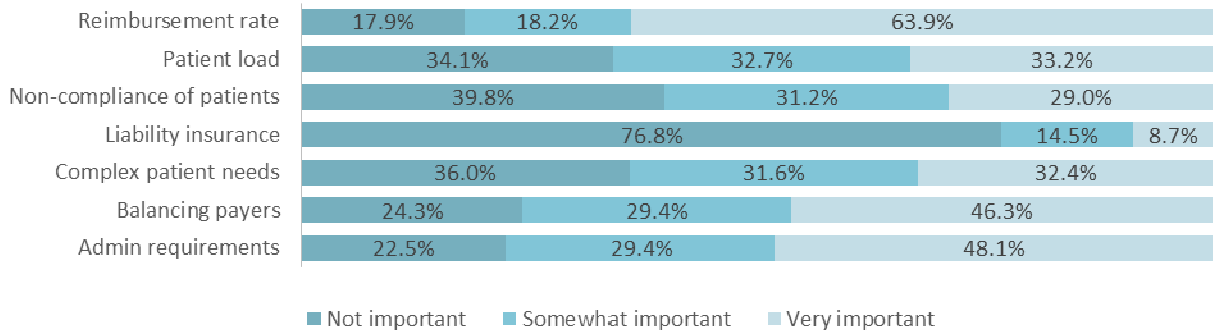
Primary care physicians are most likely to restrict Medicare. While the percentage of primary care physicians completely closed to new Medicare patients has dropped from about 24% in 2006 to 10.6% in 2015, this is similar to the 2004 figure of 12%. However, the percentage of completely open practices has increased.

Figure 49: Primary care acceptance of new Medicare patients, 2004-2015



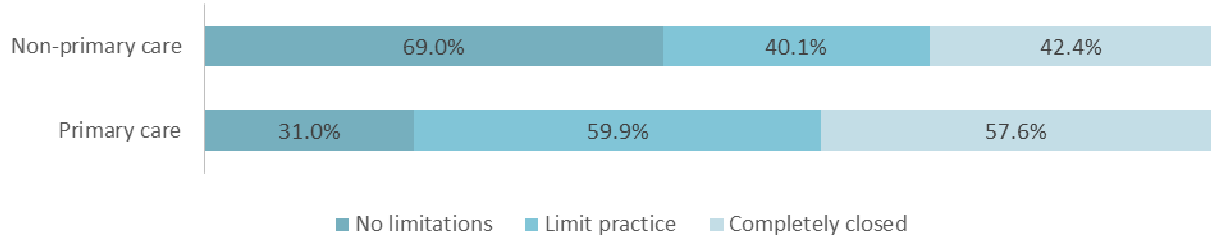
Those who report their practice is completely closed, or are limiting acceptance of Medicare as a payer, are also asked about the factors in their decision to limit Medicare. By far, the most important factor identified is reimbursement rate, followed by administrative requirements, and then, the need to balance payer mix (Figure 50.) This is consistent with 2006 and 2009 results.

Figure 50: Factors in the decision to limit Medicare



As noted below, primary care physicians are more likely to restrict Medicare acceptance. Figure 51 compares primary care physician acceptance of new Medicare patients to non-primary care respondents.

Figure 51: Primary care vs. non-primary care acceptance of new Medicare patients



COMMERCIAL INSURANCE

4.7 percent of responding physicians report they are completely closed to commercial insurance. The pediatric and neurosurgical specialties are most likely to be open with no restrictions; family practice and psychiatry are most likely to limit commercial payers. About 11 percent of physicians work in practices that restrict acceptance of new commercially-insured patients (all figures exclude hospital-based specialties.)

Figure 52: Acceptance of new commercial insurance patients, 2009-2015

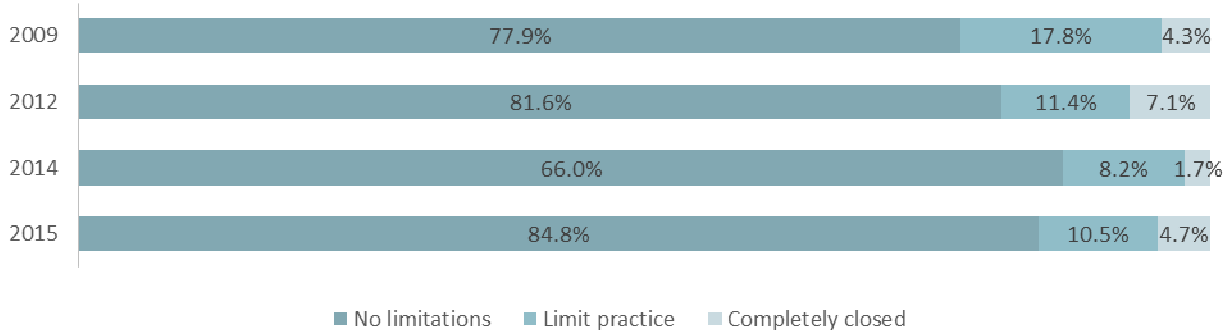


Figure 53: Acceptance of commercial insurance as a payer, by specialty

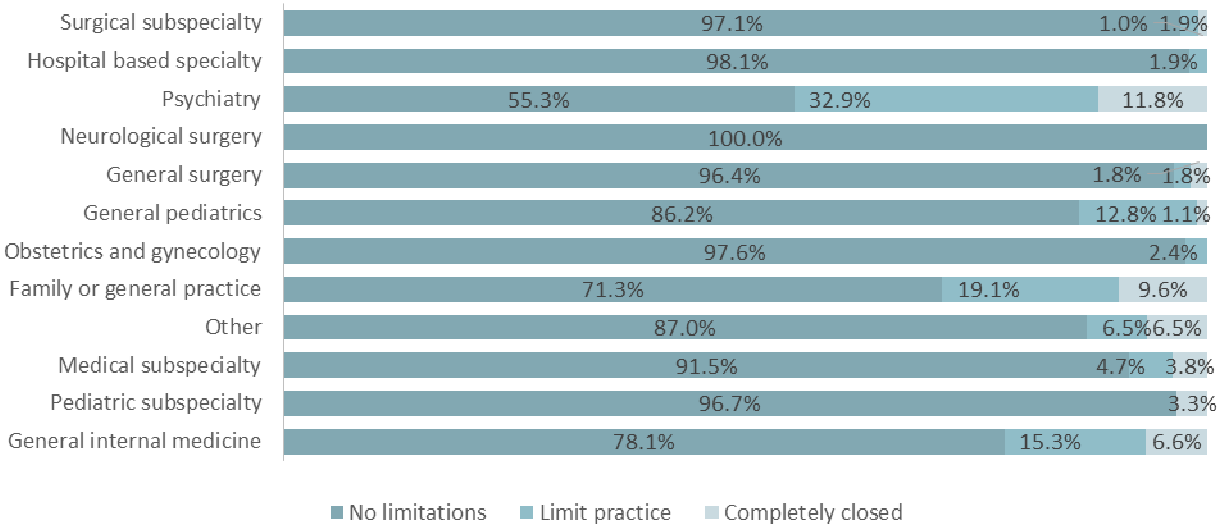

Figure 54: Acceptance of commercial insurance as a payer, by region

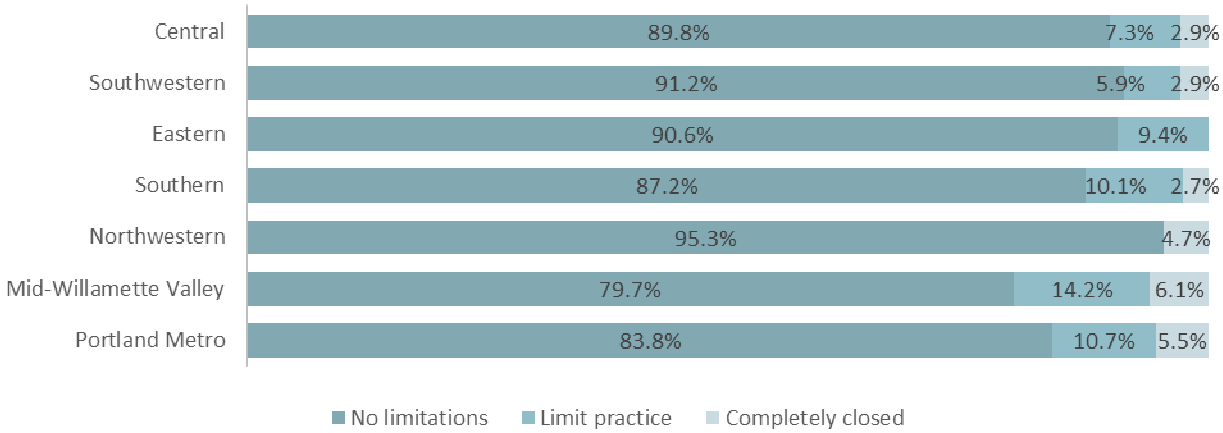

Figure 55: Acceptance of new commercial insurance patients, 2009-2015

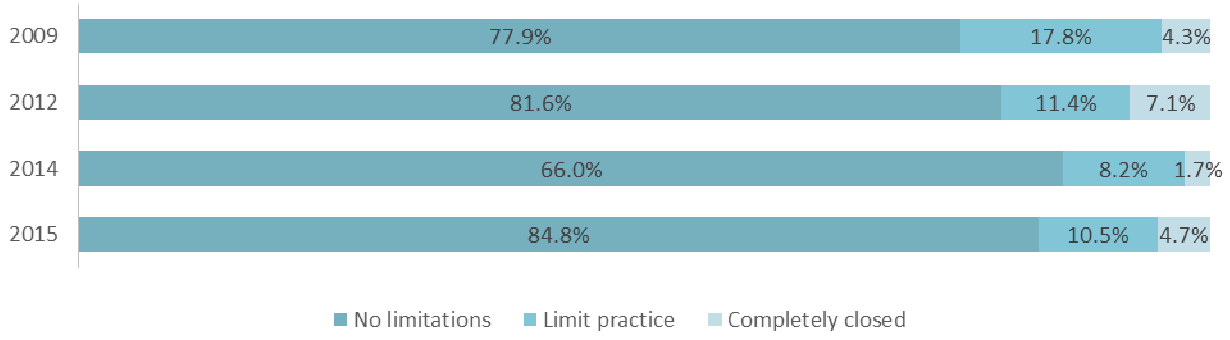

Figure 56: Primary care acceptance of new commercial insurance patients, 2009-2015

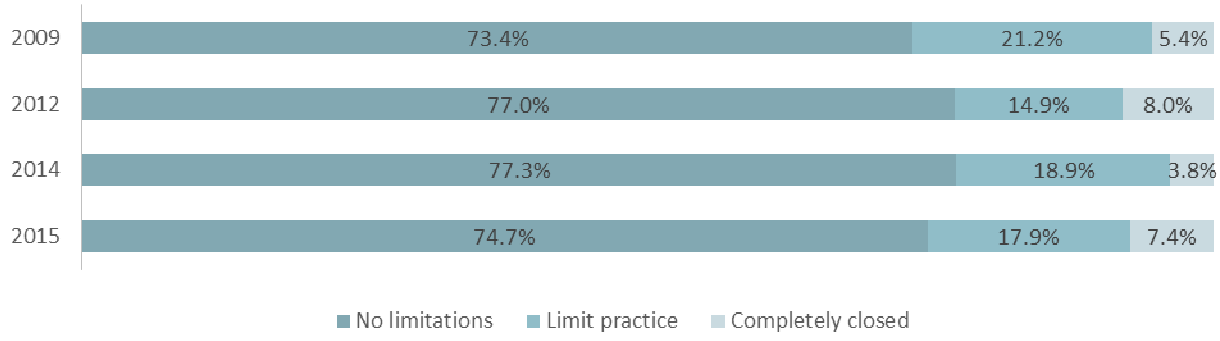

Figure 57: Factors in the decision to limit commercial insurance

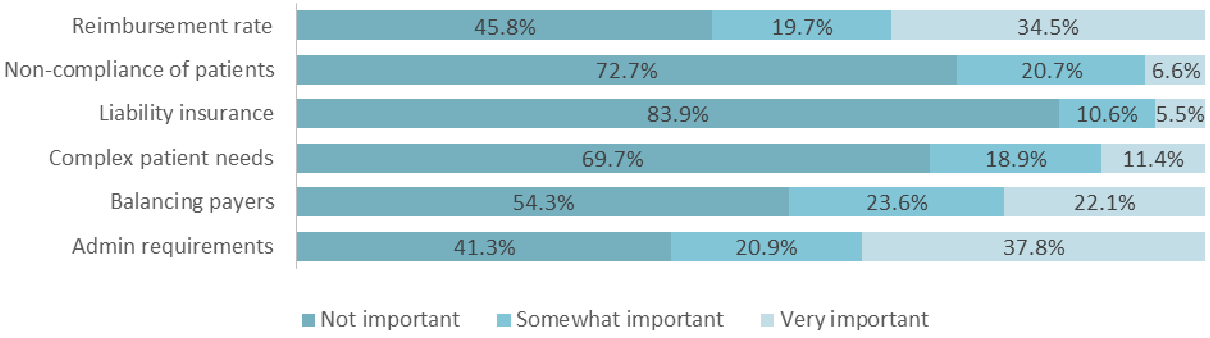

Figure 58: Primary care vs. non-primary care acceptance of new commercial insurance patients

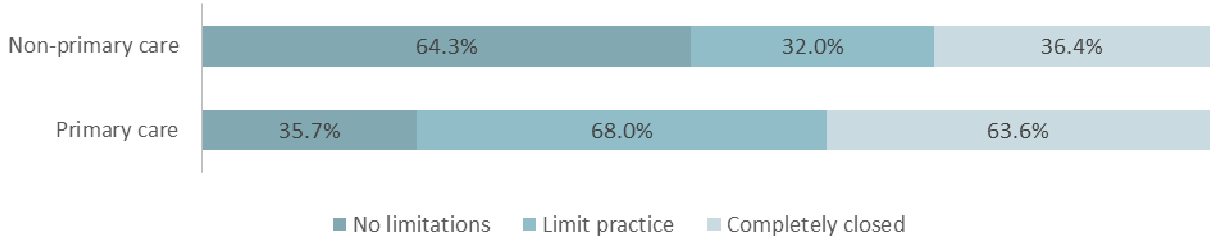

WORKER'S COMPENSATION INSURANCE

About 60 percent of responding non-hospital specialist physicians report they are completely open to Worker's Compensation as a payer in 2015, and 28.1% report being completely closed. Pediatric sub-specialists and the neurosurgical specialty are most likely to be open with no restrictions.

Psychiatrists and OB/GYNs are most likely to restrict this payer as shown in Figure 59. Figure 60 also describes acceptance of Worker's Compensation by region.

Figure 59: Acceptance of Workers' Compensation as a payer, by specialty

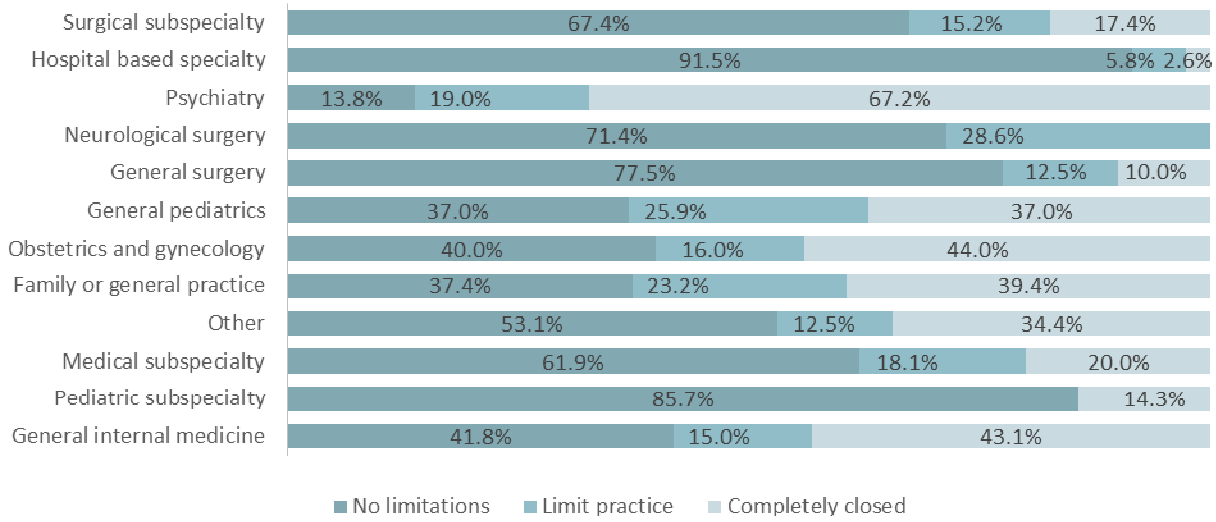

Figure 60: Acceptance of Workers' Compensation as a payer, by region

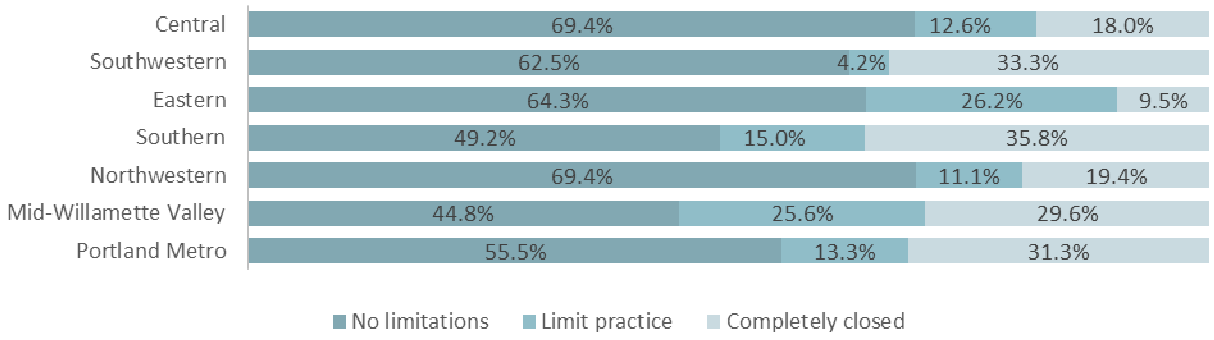

Figure 61: Factors in the decision to limit Worker's Compensation

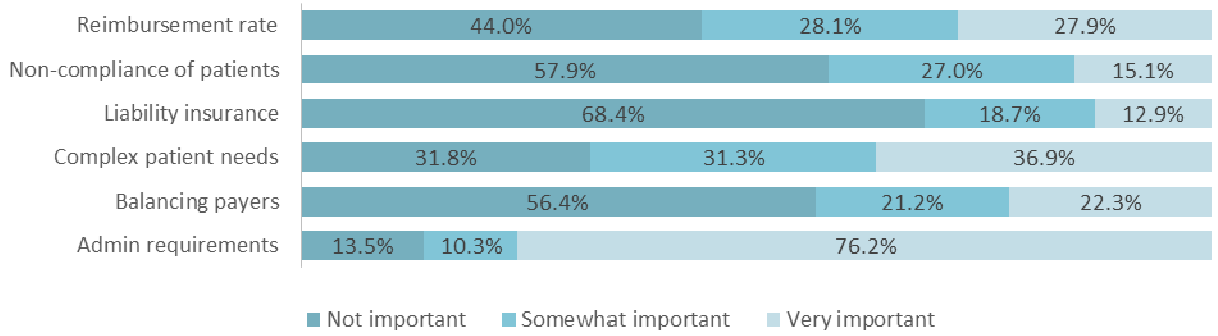

MEDICAID

In 2015, 12.2% of respondents report being completely closed to new Medicaid patients. 88 percent of physicians reported being open (with or without limitations) to Medicaid patients.

There is broad variation by specialty, with OB/GYNs, hospital based specialties, and general surgery being the top three specialties accepting Medicaid patients without any limitations. Figure 64 describes acceptance of Medicaid by region.

Figure 62: Acceptance of new Medicaid patients, 2006-2015

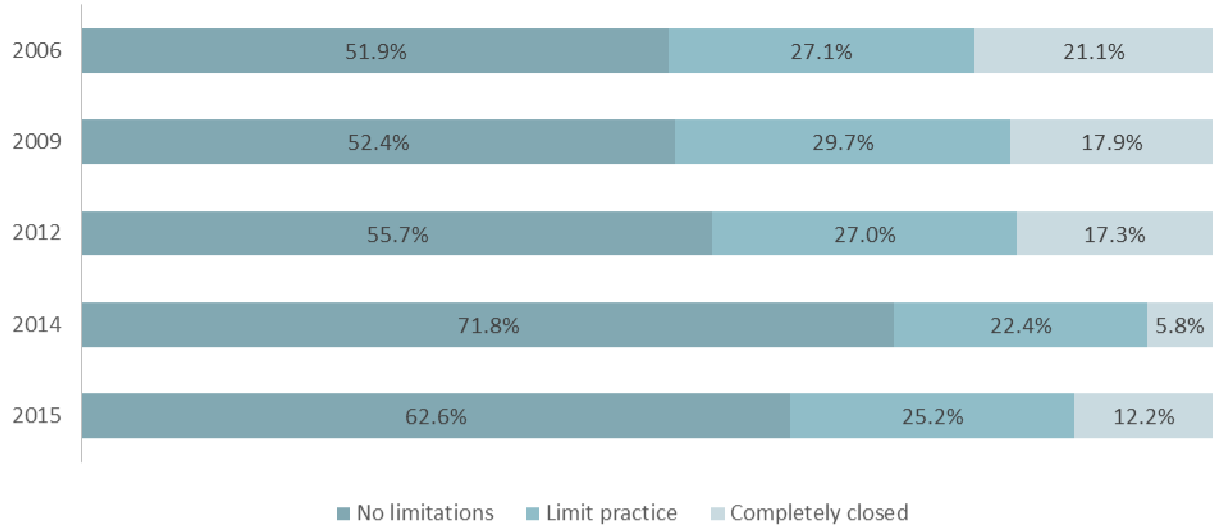

Figure 63: Acceptance of Medicaid by specialty

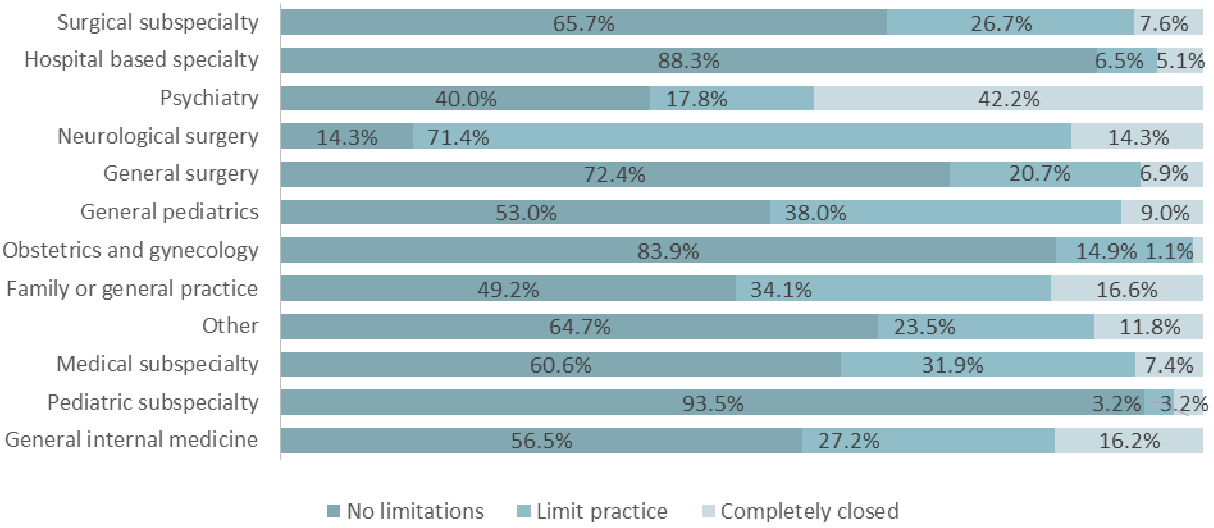

Figure 64: Acceptance of Medicaid by region

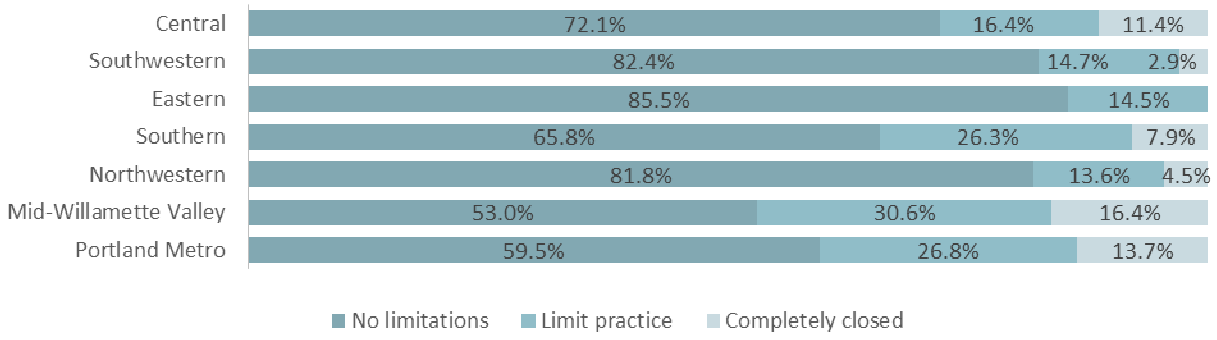

In 2015, the percentage of physicians accepting new Medicaid patients with no limitations decreased from 2014. However, Medicaid patients currently under care (89.9%) for all physicians is similar to 2014. Reimbursement rates are reported to be the most important reason for physicians to close their practice to new Medicaid patients, with balancing payers ranking second.

Figure 65: Primary care acceptance of Medicaid, 2006-2015

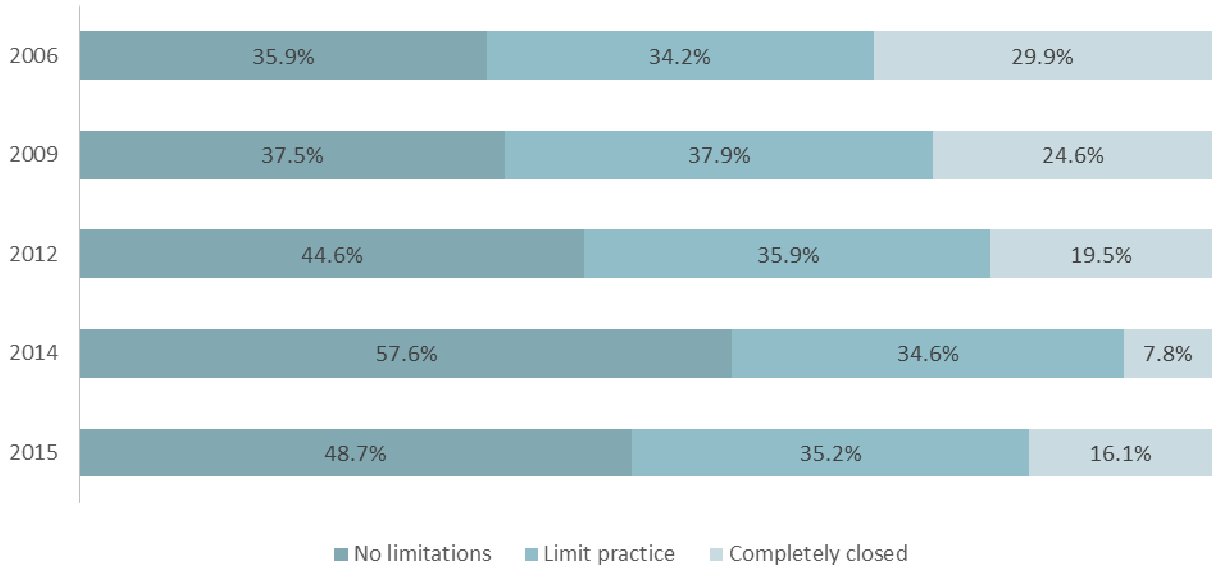

Figure 66: Primary care vs. non-primary care acceptance of Medicaid

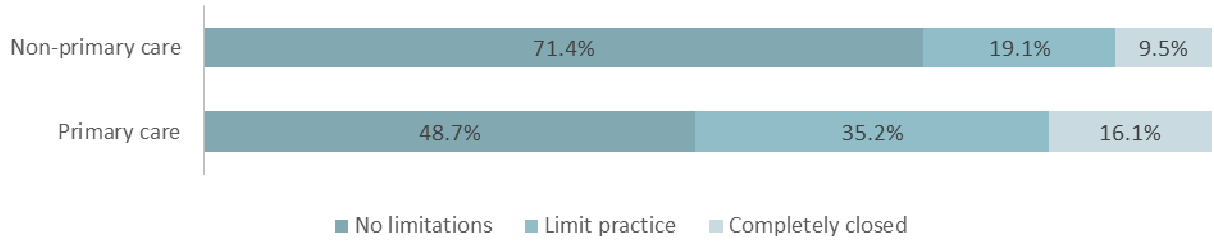

Figure 67: Reasons for not accepting Medicaid

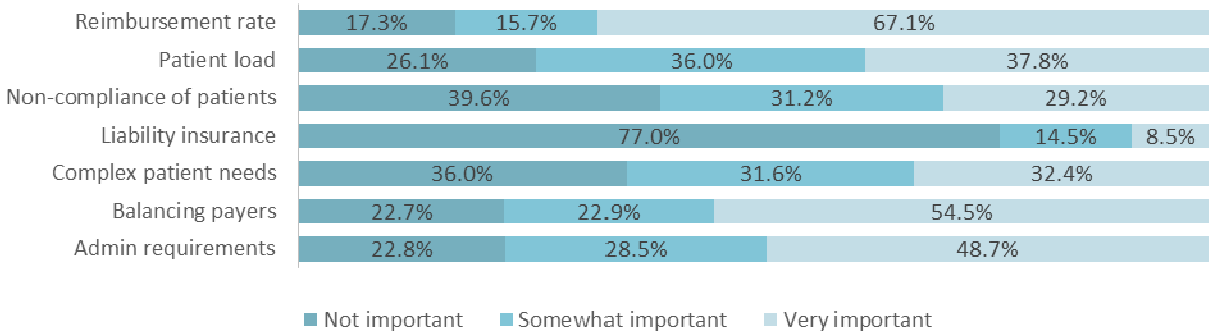

ACCESS TO SERVICES FOR MEDICAID PATIENTS

Figure 68: How often are you able to refer to specialists?

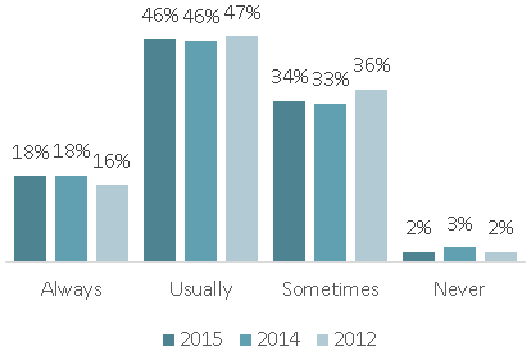

Figure 69: How often are you able to obtain ancillary services?

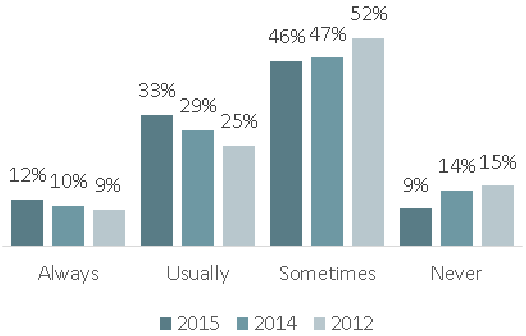

Figure 70: How often are you able to obtain a non-emergency hospital admission?

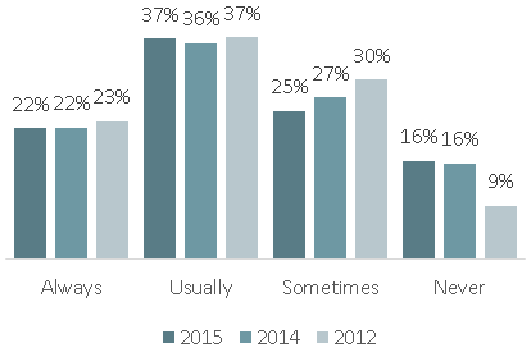

Figure 71: How often are you able to obtain diagnostic imaging services?

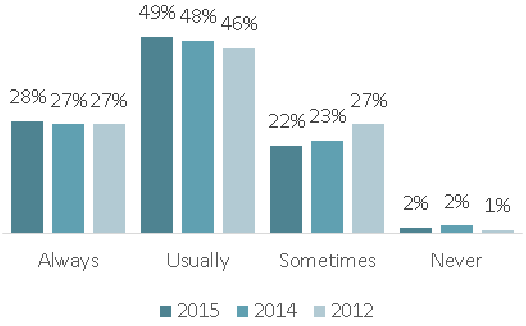

Figure 72: How often are you able to obtain inpatient mental health services?

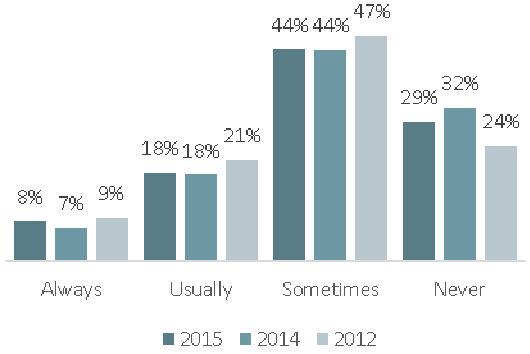

Figure 73: How often are you able to obtain inpatient substance abuse services?

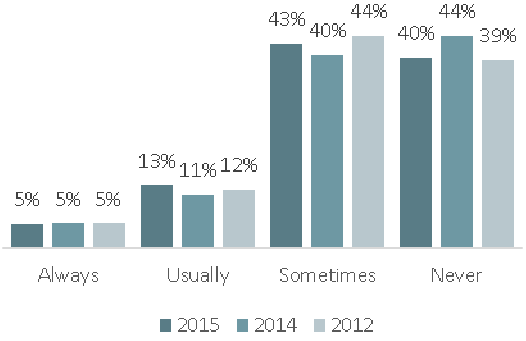

Figure 74: How often are you able to obtain outpatient mental health services?

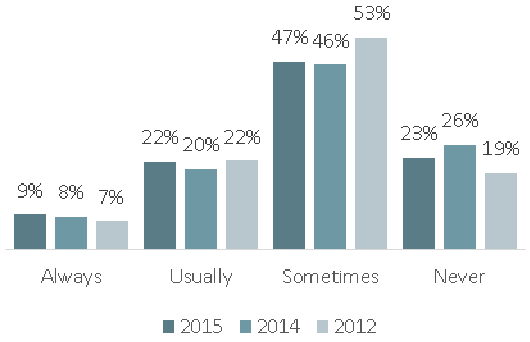

Figure 75: How often are you able to obtain outpatient substance abuse services?

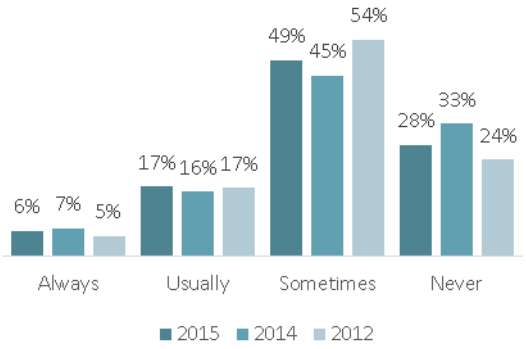
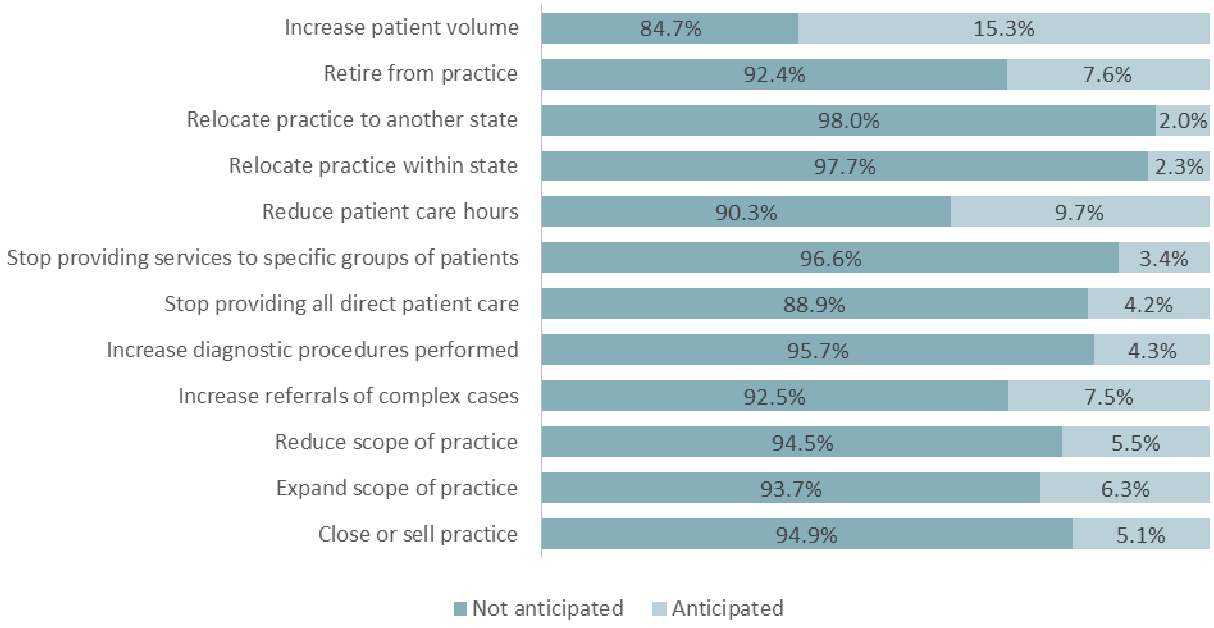


ANTICIPATED PRACTICE CHANGES

In this survey year, respondents ranked increasing patient volume, reducing patient care hours, and retiring as the top three likely changes.

Figure 76: Anticipated practice changes in the next two years

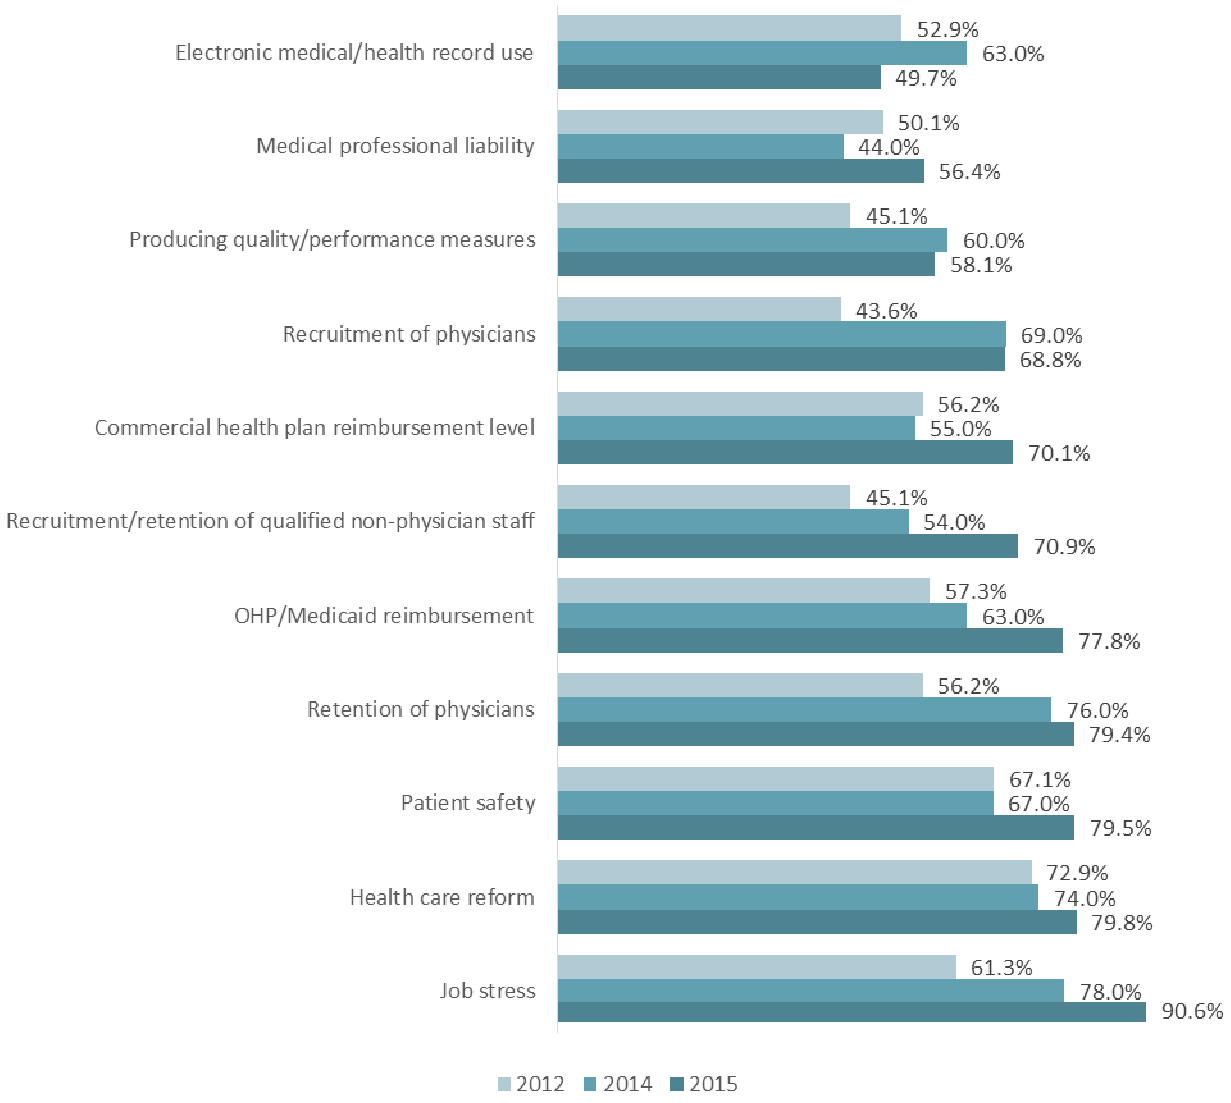


Healthcare issues

Physicians were asked to rate the importance of several issues related to the practice of medicine and health policy. Figure 77 exhibits the percentage of physician-respondents rating each of the issues as very important.

While most topics were repeated in 2014 and 2015, some were not. Figure 77 below lists the issues, based on the percentage saying the topic is very important.
In 2015, job-related stress dramatically increased. Concerns about Medicaid reimbursement increased from 63 percent in 2014 to 78 percent in 2015. Concerns about impacts of health care reform, and recruitment and retention of physicians are also among the top concerns.

Figure 77: Importance of health policy issues and issues related to the practice of medicine, 2012-2015



OREGON MEDICAL MALPRACTICE REINSURANCE PROGRAM

About a third (33.5%) of physicians report that they do not know if they participate in the program or not. Seven percent reported participation. See Appendix B for detailed data tables.

RURAL PROVIDER STATE INCOME TAX CREDIT PROGRAM

Responses to this question generally reflected the Malpractice Reinsurance program: 15.8 percent of respondents report they receive this tax credit.

PHYSICIAN WORKFORCE SURVEY 2015

Dear Colleague:

We need information that only you can provide. The Oregon Medical Association (OMA), in collaboration with the Oregon Health Authority (OHA), the Oregon Healthcare Workforce Institute (OHWI) and the Oregon Medical Board (OMB) are conducting a survey.

Survey results allow us to replace anecdote with evidence when presenting physician workforce information to the Governor's office and to the Legislature. The data you provide by responding to this survey will help us better understand not only what is most important to you, but also how the physician workforce, including physician well-being, is changing in Oregon.

The reliability of these results depends on you. Every completed survey is important. Please take 15 minutes to complete the survey. The 2015 Physician Workforce Survey is being conducted online, and because of our partnership with the OMB we are able to reduce duplication of information collected.

If all of your practice or employment is outside Oregon, please indicate this on the first question of the survey. If your clinic manager is a better source for some of the clinic-based questions, please feel free to consult with him or her.

As always, your responses are completely confidential. The reports from the surveys are posted here http://www.oregon.gov/oha/analytics/pages/workforcesurvey.aspx

Thank you for participating in this survey. If you have any questions, please contact Rusha Grinstead at: rusha.grinstead@state.or.us or (503) 602-9214.

1. Does your professional time involve any direct patient care in Oregon?
   {Choose one}
   ( ) Yes
   ( ) No
2. Have you retired?
   {Choose one}
   ( ) Yes
   ( ) No
3. When do you plan to retire?
   (Mark only one.)
   {Choose one}
   ( ) Within the next 2 years
   ( ) In the next 2 to 5 years
   ( ) More than 5 years from now
4. If your primary specialty is family medicine, general medicine, or ob/gyn, do you currently provide maternity care?
   (Mark only one.)
   {Choose one}
   ( ) Does not apply. I am not a family medicine, general medicine or ob/gyn practitioner.
   ( ) Yes, only prenatal and post-partum care, not deliveries
   ( ) Yes, deliveries, as well as prenatal and post-partum care
   ( ) No
5. Do you consider yourself a primary care physician?
   {Choose one}
   ( ) Yes
   ( ) No
   ( ) Uncertain
6. Do you work as a hospitalist?
   {Choose one}
   ( ) Yes
   ( ) No
7. Which of the following are part of your current professional activities?
   (Mark all that apply.)
   {Choose all that apply}
   ( ) Clinical practice
   ( ) Administration, not related to direct patient care
   ( ) Teaching
   ( ) Research
   ( ) Resident/Fellow
   ( ) Other (please specify) [ ]
8. In the last 12 months, how has your satisfaction with the following aspects of your medical career changed? (Mark one response on each row.)

   Your overall income
   {Choose one}
   ( ) Satisfaction has increased
   ( ) No change
   ( ) Satisfaction has decreased

Your relationship with patients
{Choose one}
( ) Satisfaction has increased
( ) No change
( ) Satisfaction has decreased

Your relationship with co-workers
{Choose one}
( ) Satisfaction has increased
( ) No change
( ) Satisfaction has decreased

The balance between work and personal life
{Choose one}
( ) Satisfaction has increased
( ) No change
( ) Satisfaction has decreased

The amount of time you have with patients
{Choose one}
( ) Satisfaction has increased
( ) No change
( ) Satisfaction has decreased

Your ability to provide patients with the best possible care
{Choose one}
( ) Satisfaction has increased
( ) No change
( ) Satisfaction has decreased

9. How satisfied have you been with your medical career overall? (Mark only one.)
{Choose one}
( ) Very satisfied
( ) Somewhat satisfied
( ) Neither satisfied nor dissatisfied
( ) Somewhat dissatisfied
( ) Very dissatisfied

10. How satisfied have you been with your medical career in the last 12 months? (Mark only one.)
{Choose one}
( ) Very satisfied
( ) Somewhat satisfied
( ) Neither satisfied nor dissatisfied
( ) Somewhat dissatisfied
( ) Very dissatisfied

11. What is the greatest source of your professional satisfaction? (Mark only one.)
{Choose one}
( ) Intellectual challenge
( ) Clinical practice
( ) Income
( ) Patient interaction
( ) Practice environment
( ) Other (please specify) [ ]

12. Which of the following best describes your primary practice setting: (Mark only one.)
    {Choose one}
    ( ) Private clinic or office
    ( ) Community clinic/public health clinic
    ( ) University/college health service clinic
    ( ) Hospital-based ambulatory care clinic
    ( ) Inpatient care
    ( ) Emergency department
    ( ) Urgent care clinic
    ( ) Nursing facility
    ( ) Other (specify) [ ]
13. What is the zip code at your primary practice location?
    {Enter text answer}
    [97]
14. What is the size of your primary practice? (Mark only one.)
    {Choose one}
    ( ) 1 physician
    ( ) 2-3 physicians
    ( ) 4-9 physicians
    ( ) 10-13 physicians
    ( ) 14-19 physicians
    ( ) 20-29 physicians
    ( ) 30 or more physicians
15. How is your primary practice organized? (Mark only one.)
    {Choose one}
    ( ) Single-specialty practice
    ( ) Multi-specialty practice
    ( ) Other [ ]
16. What is your employment status at your primary practice? (Mark only one)
    {Choose one}
    ( ) Full owner
    ( ) Part-owner (or shareholder)
    ( ) Employee
    ( ) Independent contractor
    ( ) Volunteer
    ( ) Other (specify) [ ]
17. Who is your employer? (Mark only one)
    {Choose one}
    ( ) an independent clinic
    ( ) a clinic affiliated with (but not owned by) a health system
    ( ) a clinic that is wholly owned by a health system
    ( ) a hospital
    ( ) a health system
    ( ) an agency that contracts with a health system or hospital
18. In a typical week, how many patients do you see in your primary practice setting? (Your best estimate is fine. Mark only one.)
    {Choose one}
    ( ) Does not apply
    ( ) 1 to 25 patients

( ) 26 to 50 patients
( ) 51 to 75 patients
( ) 76 to 100 patients
( ) 100 to 200 patients
( ) More than 200 patients

19. In a typical week, how many **new** patients do you see in your primary practice setting? (Your best estimate is fine. Mark only one.)
{Choose one}
( ) 1 to 25 patients
( ) 26 to 50 patients
( ) 51 to 75 patients
( ) 76 to 100 patients
( ) 100 to 200 patients
( ) More than 200 patients
( ) None

20. On average, how many calendar days are normally required to schedule a non-urgent appointment for new patients at your primary practice? (Your best estimate is fine. Mark only one.)
{Choose one}
( ) Same day
( ) 1 day
( ) 2 days
( ) 3 days
( ) 4 to 6 days
( ) 7 to 14 days
( ) 15 to 21 days
( ) 22 to 30 days
( ) 31 to 45 days
( ) 46 to 60 days
( ) More than 60 days
( ) Does not apply

21. On average, how many calendar days are normally required to schedule a non-urgent appointment for **established** patients at your primary practice? (Your best estimate is fine. Mark only one.)
{Choose one}
( ) 1 day
( ) 2 days
( ) 3 days
( ) 4 to 6 days
( ) 7 to 14 days
( ) 15 to 21 days
( ) 22 to 30 days
( ) 31 to 45 days
( ) 46 to 60 days
( ) More than 60 days
( ) Same day
( ) Does not apply

22. Do you determine which payers (insurers) your primary practice accepts?
{Choose one}
    ( ) Yes
    ( ) No
    ( ) Does not apply
23. To what extent is your primary practice accepting new worker's compensation insurance patients? (Mark only one)
{Choose one}
    ( ) Completely closed to all new worker's compensation insurance patients.
    ( ) Limit practice.
    ( ) No limitation, practice is open to all new worker's compensation insurance.
    ( ) I don't know
    ( ) Does not apply
24. How important was each of the following factors in the decision to limit or close your primary practice to new worker's compensation insurance patients? (Mark one response for each row.)

    Administrative requirements associated with worker's compensation insurance
    {Choose one}
        ( ) Not Important
        ( ) Somewhat Important
        ( ) Very Important
    Need to balance payer sources

33. Do you see patients at more than one practice/clinic location in Oregon?
{Choose one}
( ) Yes
( ) No
34. What is the zip code at your second Oregon practice location?
{Enter text answer}
[97]
35. In a typical week, how many patients do you see in your second practice setting?
(Please provide your best estimate. Mark only one.)
{Choose one}
( ) 1 to 25 patients
( ) 26 to 50 patients
( ) 51 to 75 patients
( ) 76 to 100 patients
( ) 101 to 200 patients
( ) More than 200 patients
36. In a typical week, how many hours do you spend in direct patient care at all of your practice locations?
{Choose one}
( ) Less than 8 hours
( ) 8 to 16 hours
( ) 17 to 24 hours
( ) 25 to 32 hours
( ) 33 to 40 hours
( ) 41 to 48 hours
( ) 49 to 60 hours
( ) More than 60 hours
37. In a typical week, how many hours do you spend doing administrative tasks associated with inpatient and/or outpatient care (e.g., charting, phone calls, referrals, paperwork, etc.) at all of your practice locations?
(Your best estimate is fine. Mark only one.)
{Choose one}
( ) Less than 5 hours
( ) 5 to 9 hours
( ) 10 to 14 hours
( ) 15 to 20 hours
( ) More than 20 hours
38. In a typical week, how many patients do you see in the hospital/emergency department setting (e.g., not phone consults) as a result of taking call? (Mark only one.)
{Choose one}
( ) None (I do not take call)
( ) 1 to 2 patients
( ) 3 to 5 patients
( ) 6 to 10 patients
( ) More than 10 patients
39. In the last 12 months, have you changed your hospital privileges? (Mark only one.)
{Choose one}
( ) Yes
( ) No

40. Did the reason for changing hospital privileges include: (Mark all that apply.)
{Choose all that apply}
    ( ) Increasingly required procedures beyond the scope of my practice
    ( ) Increasing demand for call coverage
    ( ) Change in practice
    ( ) Change in hospital by-laws
    ( ) Increasing uncompensated care
    ( ) Other (Specify) [ ]
41. Do you currently have Medicaid/Oregon Health Plan (OHP) patients under your care? (Mark only one.)
{Choose one}
    ( ) Yes
    ( ) No
    ( ) Don't know
42. How often are you able to obtain access to the following for your Medicaid/OHP patients when you think it is medically necessary? (Mark one response for each row.)

    Referral to specialists (if you are a specialist, referral to other specialists)
    {Choose one}
        ( ) Always
        ( ) Usually
        ( ) Sometimes
        ( ) Never
    Ancillary services such as physical therapy, home health, etc.
    {Choose one}
        ( ) Always
        ( ) Usually
        ( ) Sometimes
        ( ) Never
    Non-emergency hospital admission
    {Choose one}
        ( ) Always
        ( ) Usually
        ( ) Sometimes
        ( ) Never
    Diagnostic imaging services
    {Choose one}
        ( ) Always
        ( ) Usually
        ( ) Sometimes
        ( ) Never
    Inpatient mental health
    {Choose one}
        ( ) Always
        ( ) Usually
        ( ) Sometimes
        ( ) Never

Outpatient mental health
{Choose one}
( ) Always
( ) Usually
( ) Sometimes
( ) Never

Inpatient substance abuse
{Choose one}
( ) Always
( ) Usually
( ) Sometimes
( ) Never

Outpatient substance abuse
{Choose one}
( ) Always
( ) Usually
( ) Sometimes
( ) Never

43. Which of the following Clinical Practice Guidelines do you routinely use?
(Mark all that apply)
{Choose all that apply}
( ) US Preventive Task Force Guidelines
( ) National Guideline Clearinghouse
( ) Bright Futures (HRSA)
( ) The Medical Letter
( ) The Centers for Disease Control and Prevention, includes AFIX
( ) Specialty recommendations, for example, AAP, ACP, ACOG
( ) Oregon Health Evidence Review Commission (formerly Health Services Commission)

44. Thinking about your primary practice over the last 12 months, how often have you been able to:
(Mark one response on each row)

Work as part of a multi-disciplinary team to care for your patients?
{Choose one}
( ) Always
( ) Usually
( ) Sometimes
( ) Never

Get your patients the social service or community resources they need?
{Choose one}
( ) Always
( ) Usually
( ) Sometimes
( ) Never

Coordinate effectively with other health professionals who care for the same patients?
{Choose one}
( ) Always
( ) Usually
( ) Sometimes
( ) Never

45. The Oregon Health Authority is working with Coordinated Care Organizations (CCOs) to provide health services for people insured by Medicaid. How much do you know about CCOs?
(Mark one)
{Choose one}
    ( ) Nothing
    ( ) Very Little
    ( ) Some
    ( ) A Great Deal
46. Does your practice, medical group, or employer, contract with a CCO to provide care to Medicaid patients?
{Choose one}
    ( ) Yes
    ( ) No
    ( ) Don't Know
47. Does your practice have formal medical home recognition?
{Choose one}
    ( ) Yes
    ( ) No
    ( ) Don't know
48. Is your practice currently seeking medical home recognition?
{Choose one}
    ( ) Yes
    ( ) No
    ( ) Don't know
49. Do you know if your practice plans to seek Medical Home recognition in the future?
{Choose one}
    ( ) Yes
    ( ) No
    ( ) Don't know
50. Which organization granted recognition?
{Choose all that apply}
    ( ) National Committee for Quality Assurance
    ( ) Oregon Health Authority: Patient-centered Primary Care Home
    ( ) Don't know
    ( ) Other (please specify) [ ]
51. In a typical month, about how many hours do you spend providing charity care?
(Your best estimate is fine. Mark only one.)
{Choose one}
    ( ) No charity care hours
    ( ) 1-10 hours
    ( ) 11-20 hours
    ( ) 21-30 hours
    ( ) 31-40 hours
    ( ) More than 40 hours
    ( ) Don't know

52. Do you currently receive the Oregon Medical Malpractice Reinsurance Program (also known as the Medical Malpractice Insurance Subsidy)? (Mark only one.)
{Choose one}
    ( ) Does not apply. Not a rural practice.
    ( ) Yes
    ( ) No
    ( ) Don't know.
53. Do you currently participate in the Rural Provider State Income Tax Credit Program?
{Choose one}
    ( ) Does not apply. Not a rural practice.
    ( ) Yes
    ( ) No
    ( ) Don't know.
54. If Medicare reimbursement for physicians declines, which of the following actions will you take? (Mark only one.)
{Choose one}
    ( ) Will accept all new Medicare patients
    ( ) Will limit acceptance of new Medicare patients
    ( ) Will not accept any new Medicare patients
    ( ) Will drop all Medicare patients
    ( ) Undecided
55. Do you currently have patients with a Serious Persistent Mental Illness (SPMI) patients under your care? (Mark only one.)
{Choose one}
    ( ) Yes
    ( ) No
    ( ) Don't know
    ( ) Other [ ]
56. How often are you able to obtain access to the following for your patients with a Serious Persistent Mental Illness (SPMI) when you think it is medically necessary? (Mark one response for each row.)

    Referral to specialists (if you are a specialist, referral to other specialists)
    {Choose one}
        ( ) Always
        ( ) Usually
        ( ) Sometimes
        ( ) Never
    Ancillary services such as physical therapy, home health, etc.
    {Choose one}
        ( ) Always
        ( ) Usually
        ( ) Sometimes
        ( ) Never
    Non-emergency hospital admission
    {Choose one}
        ( ) Always
        ( ) Usually
        ( ) Sometimes
        ( ) Never

Diagnostic imaging services
{Choose one}
( ) Always
( ) Usually
( ) Sometimes
( ) Never

Inpatient mental health
{Choose one}
( ) Always
( ) Usually
( ) Sometimes
( ) Never

Outpatient mental health
{Choose one}
( ) Always
( ) Usually
( ) Sometimes
( ) Never

Inpatient substance abuse
{Choose one}
( ) Always
( ) Usually
( ) Sometimes
( ) Never

Outpatient substance abuse
{Choose one}
( ) Always
( ) Usually
( ) Sometimes
( ) Never

57. Thinking about the next 12 months, rate the importance of each of the following issues for physicians:

Electronic medical/health record use
{Choose one}
