Good afternoon, `Thomas,
I was just notified we need to push off the source testing until week of Jan 24. Steve and Eric confirmed with Montrose yesterday they are available that week.
There are two reasons we have to postpone again:

1. The engineer from Chemithon (the manufacturer of the sulfonation system) who was supposed to be assisting with start up and running the process during source test, is out with COVID.
2. Two critical replacement parts for sulfonation were found damaged during the freezing temperatures at end of December. The replacement parts that have been ordered but were delayed in arriving from original expected date.

Everything else with the refinery is ready to go for source testing. We still expect to meet the Jan. 31 deadline required by our permit for completed source testing. Please let us know if there are any questions or comments and if we need to submit another extension.
Thank You,

Ricci Keller

Ricci,
I wanted to check in again regarding the testing schedule at your facility.
Thank you,
Thomas

Subject: Source test observation

Ricci,

If you could please let me know the schedule for the source testing this week. I would like to come out and observe some of the testing.

Thank you,

Thomas Rhodes
