Subject: HCP Board Decision: Comment on Habitat Conservation Plan
Date: Friday, October 02, 2020 10:32:26 AM

Dear Board Member Board of Forestry,

I understand that you're in the process of making a Habitat Conservation Plan for our state forests that could have an impact on western Oregon communities for decades to come. This is an immensely important decision, and I'm writing today to ask you to make sure that this plan ensures reasonable and reliable timber harvest.

The Oregon Department of Forestry has already reduced harvest levels to the point where there is not enough revenue to manage and protect our state forests. What's more, the Oregon Department of Forestry faces severe cash problems and the current plan would make it more reliant on our public tax dollars to stay afloat. Why would you consider a plan that dramatically decreases harvest and makes these problems worse?

Please protect our rural communities that rely on harvests from state forests for critical forestry and mill jobs.

Don't make a plan that decreases active management of our forests, putting jobs at risk and increasing the risk of catastrophic wildfires that put the health of firefighters and communities in peril.

Now is not the time to reduce harvest, cut jobs, and decrease revenue from state forests.

The state or Oregon needs a viable Department of Forestry. Continued reductions in active management will put ODF and Oregon at risk for what has occurred on federal lands. The consequence of this lack of active management, couldn't be more evident than what we have seen with wildfires in recent years. It's not good for our state lands or the state of Oregon. Do the right thing for our state. Provide the much needed leadership.

Thank you.

I appreciate your help,
Dave Rumker
