WORKING DOCUMENT

VISION
Triple Aim for Oregon:

Improve the lifelong health of all Oregonians	Increase the quality, reliability, and availability of care for all Oregonians	Lower or contain the cost of care so it is affordable to everyone

Expanded description in development

Potential metric areas:

1) Health/functional status (e.g. health-related quality of life)
2) Domains of health care and health promotion (e.g. exercise and nutrition)
3) Risk status or risk behaviors
4) Disease burden (e.g. incidence or prevalence of major conditions)
5) Mortality (or years of potential life lost, healthy life expectancy, etc.)

Potential data sources:

List current & future sources, by metric

Expanded description in development

Potential metric areas:

1) Patient-centeredness/care tailored to you (e.g. patient experience of care measure from CAHPS, clinical metrics)
2) Safety (e.g. hospital-acquired infections)
3) Effectiveness/care that works (e.g. receipt of recommended preventive care)
4) Efficiency (e.g. hospital readmissions)
5) Timeliness (e.g. initiation of prenatal in the first trimester)
6) Access (e.g. children with a primary care visit in the last year;)
7) Appropriate end-of-life care
8) Equity
9) Community engagement

Potential data sources:

List current & future sources, by metric

Expanded description in development

Potential metric areas:

1) Per capita cost
2) Preventable ED visits and hospitalizations

Potential data sources:

List current & future sources, by metric
