Dear Members Board of Forestry,

That's why I'm writing to ask that you protect Oregon's forests. Yet yes we must protect Oregon's Forest. Unfortunately saving the forests May pause some negative pull on rural communities were more people are employed in the destruction of fourth then is feasible if one wants to save Forest. The world is not what it used to be and will not be in the future what it is today. Yes we protect the forest for our children grandchildren in progeny into the future. Cutting logging in National Forest is very good and sustainable idea. Washington National Forest should only take place with dead or diseased trees. The forests are our last hope keeping nature and Wilderness alive for the future. We play a large part here in the face of global warning where we have less control. Baby with forest and fauna and Flora within and around is our first order of business it should be in the minds of all Americans regardless of socioeconomic group religious beliefs skin color or any other factor.
To be sure jobs lost or not to be scoffed at. The federal government needs to step up and provide retraining for anyone in any real community who has lost their job because America wants to save Forests.

Sincerely,

John Altshuler
