Subject: Worried about our state's economy
Date: Thursday, September 03, 2020 8:10:11 AM

Dear Members Board of Forestry,

Logging is good for the environment. It greatly reduces the chance of wildfires, and provides new growth food that deer and elk need. Logging is 100% renewable and sustainable. It is really a green industry. Please do not put through these extreme regulations. Our economy, the health of our forests, and wildlife benefit greatly from logging.

That's why I'm writing to ask that you protect Oregon's forest industry and 60,000 family-wage jobs Oregonians need now more than ever.
Why would the Board of Forestry even consider a state Habitat Conservation Plan that does not reflect any concern or understanding of rural county's financial condition or needs?

Please remember the mill workers who count on fiber from state forests. Please remember that rural communities in western Oregon rely upon the revenues from timber harvests to fund schools, libraries and other critical services. Please do the right thing.

Let's manage our forests with our children and grandchildren in mind - making sure our forests and the communities nearby will be healthy and thriving decades from now.

Sincerely,

Jeremy Marshall
