Applicant Information

Applicant Name: Jackson County Coordinated Care Organization, LLC

Form of Legal Entity: Jackson County Coordinated Care Organization is established as an Oregon Limited Liability Company (LLC). CareOregon will manage the LLC, with Patrick Curran of CareOregon named as the initial manager. CareOregon is the single member of the LLC and it is registered at CareOregon's office in Portland: 315 SW Fifth Avenue, Portland, Oregon, 97204.

State of Domicile: Oregon

Primary Contacts: Patrick Curran

Address: 370 Superior Ct, Ste 280

City, State, Zip: Medford, OR 97504

Telephone: Patrick Curran at 503-416-1421

Fax: Patrick Curran at 503-416-3723

E-mail Address: Patrick Curran at curranp@careoregon.org

Name and title of the person(s) authorized to represent the Applicant in any negotiations and sign any Contract that may result: Patrick Curran, Manager and Authorized Representative of Jackson County Coordinated Care Organization, LLC

By signing this page and submitting an Application, the Authorized Representative certifies that the following statements are true:

1. Applicant does not discriminate in its employment practices with regard to race, creed, age, religious affiliation, sex, disability, sexual orientation or national origin, nor has Applicant or will Applicant discriminate against a subcontractor in the awarding of a subcontract because the subcontractor is a minority, women or emerging small business enterprise certified under ORS 200.055.

2. Information and costs included in this Application will remain valid for 180 days after the Application due date or until a Contract is approved, whichever comes first.

3. The statements contained in this Application are true and, so far as is relevant to the Application, complete. Applicant accepts as a condition of the Contract, the obligation to comply with the applicable state and federal requirements, policies, standards, and regulations.

4. The undersigned recognizes that this is a public document and will become open to public inspection, except as described in Section 7.8.

5. Applicant has followed the instructions provided and has identified any deviations from specifications within its response. Applicant confirms that any instructions or specifications that it felt were unclear have been questioned in advance of this Application.

6. Applicant acknowledges receipt of all addenda issued under this RFA, as listed on OHA's web portal.

7. If awarded a Contract, Applicant will be required to complete, and will be bound by, a Contract described in this RFA. Applicant agrees to the Core Contract terms and conditions in Appendix G, except to the extent Applicant has timely requested a change or clarification or filed a protest in accordance with the RFA.

8. If awarded a Contract, Applicant will meet the highest standards prevalent among Medicaid health plans in Oregon.

9. Applicant and its Affiliates complied with the Code of Conduct in Section 7.15 of the RFA in connection with the RFA.

10. Applicant accepts the terms and conditions for OHA's web portal, as posted on the web portal.

11. Applicant will negotiate in good faith regarding the statement of work for the Contract.

key management or executive staff, or major shareholders over the past three years on matters relating to payments from governmental entities, both federal and state, for healthcare and/or prescription drug services.				

Medicaid Assurances for Appendix B - Provider Participation and Operations Questionnaire

ATTESTATION	Yes	No	Yes, Qualified	Explanation if No or Qualified
Assurance B-1 – Emergency and Urgent Care Services: Applicant will have written policies and procedures and monitoring systems that provide for emergency and urgent services for all Members on a 24-hour, 7-days-a-week basis. The Applicant will communicate these policies and procedures to providers, regularly monitor providers' compliance and take any Corrective Action necessary to ensure provider compliance. (See 42 CFR 438.114 and OAR 410-141-3140]	☒	☐	☐	
Assurance B-2 – Continuity of Care: Applicant will have written policies and procedures that ensure a system for the coordination of care and the arrangement, tracking and documentation of all referrals and prior authorizations to other providers. The Applicant will communicate these policies and procedures to providers, regularly monitor providers' compliance and take any Corrective Action necessary to ensure provider compliance. [See 42 CFR 438.208 and OAR 410-141-3160]	☒	☐	☐	
Assurance B-3: Applicant will have written policies and procedures that ensure maintenance of a record keeping system that includes maintaining the privacy and security of records as required by the Health Insurance Portability and Accountability Act (HIPAA), 42 USC § 1320-d et seq., and the federal regulations implementing the Act, and complete Clinical Records that document the care received by Members from the Applicant's primary care and referral providers. Applicants will communicate these policies and procedures to Participating providers, regularly monitor Participating providers' compliance with these policies and	☒	☐	☐	

ATTESTATION	Yes	No	Yes, Qualified	Explanation if No or Qualified
procedures and take any Corrective Action necessary to ensure Participating provider compliance. Applicants will document all monitoring and Corrective Action activities. Such policies and procedures will ensure that records are secured, safeguarded and stored in accordance with applicable Law. [See 45 CFR Parts 160-164, 42 CFR 438.242, ORS 414.679 and OAR 410-141-3180]				
Assurance B-4: Applicant will have an ongoing quality performance improvement program for the services it furnishes to its Members. The program will include an internal Quality Improvement program based on written policies, standards and procedures that are designed to achieve through ongoing measurements and intervention, significant improvement, sustained over time, in clinical care and non-clinical care areas and that are expected to have a favorable effect on health outcomes and Member satisfaction. The improvement program will track outcomes by race, ethnicity and language. The Applicant will communicate these policies and procedures to providers, regularly monitor providers' compliance and take any Corrective Action necessary to ensure provider compliance. [See 42 CFR 438.200 and 438.240; OAR 410-141-0200]	☒	☐	☐	
Assurance B-5: Applicant will make Coordinated Care Services accessible to enrolled Members. The Applicant will not discriminate between Members and non-Members as it relates to benefits to which they are both entitled. The Applicant will communicate these policies and procedures to providers, regularly monitor providers' compliance and take any Corrective Action necessary to ensure provider compliance. [See 42 CFR 438.206 to 438.210; and OAR 410-141-3220]	☒	☐	☐	
Assurance B-6: Applicant will have written procedures approved in writing by OHA for accepting, processing, and responding to all complaints and Appeals from Members or their Representatives that are consistent with Exhibit I of the Appendix G "Core Contract". The Applicant will communicate these policies and procedures to providers, regularly monitor providers' compliance and take any Corrective Action necessary to ensure provider compliance. [See 42 CFR 438.228, 438.400 – 438.424; and OAR 410-141-3260 to 410-141-3266]	☒	☐	☐	

ATTESTATION	Yes	No	Yes, Qualified	Explanation if No or Qualified
Assurance B-7: Applicant will develop and distribute informational materials to potential Members that meet the language and alternative format requirements of potential Members. The Applicant will communicate these policies and procedures to providers, regularly monitor providers' compliance and take any Corrective Action necessary to ensure provider compliance. [See 42 CFR 438.10; OAR 410-141-3280]	☒	☐	☐	
Assurance B-8: Applicant will have an on-going process of Member education and information sharing that includes appropriate orientation to the Applicant, Member handbook, health education, availability of intensive care coordination for Members who are aged, blind and/or disabled and appropriate use of emergency facilities and urgent care. The Applicant will communicate these policies and procedures to providers, regularly monitor providers' compliance and take any Corrective Action necessary to ensure provider compliance. [See 42 CFR 438.10; and OAR 410-141-3300]	☒	☐	☐	
Assurance B-9: Applicant will have written policies and procedures to ensure Members are treated with the same dignity and respect as other patients who receive services from the Applicant that are consistent with Attachment 4, Core Contract. The Applicant will communicate these policies and procedures to providers, regularly monitor providers' compliance and take any Corrective Action necessary to ensure provider compliance. [See 42 CFR 438.100, ORS 414.635 and OAR 410-141-3320]	☒	☐	☐	
Assurance B-10: Applicants will provide Intensive Care Coordination (otherwise known as Exceptional Needs Care Coordination or ENCC) to Members who are Aged, Blind or Disabled. The Applicant will communicate these policies and procedures to providers, regularly monitor providers' compliance and take any Corrective Action necessary to ensure provider compliance. [See 42 CFR 438.208 and OAR 410-141-3405]	☒	☐	☐	
Assurance B-11: Applicant will maintain an efficient and accurate billing and payment process based on written policies, standards, and procedures that are in accordance with accepted professional standards, OHP Administrative Rules and OHA provider Guides. The Applicant and	☒	☐	☐

Re: Letter of Support for Jackson County CCO, LLC becoming a Coordinated Care Organization

To Whom It May Concern:

This letter is in support of CareOregon, Inc. dba Jackson County CCO, LLC (JCCCO) becoming a Coordinated Care Organization (CCO). The principal owner of JCCCO has demonstrated a commitment to the health and well being of residents in Jackson County through creative and innovative strategies and community engagement. It is no surprise that they would be at the forefront of seeking to implement a CCO to integrate medical, behavioral and dental health services in our community. JCCCO's stated goal is to achieve a healthy population, through extraordinary patient care for everyone, and at reasonable costs, shared by all. This is to be accomplished by focusing on quality primary care services with appropriate coordination with the systems that provide physical health, mental health, chemical dependency, dental, and long-term care. These are challenging and laudable goals which are worthy of our support.

Asante, a healthcare system with two hospitals and physician partners, support the collective efforts and goals of Jackson County CCO and expect to play an active role in the transformation of the delivery of health care in Jackson County.

Sincerely,

Marvin D. Haas
Chief Administrative and Finance Officer

To Whom It May Concern:

This letter is provided to CareOregon in support of their OHA application to develop and operate a CCO in Jackson County, Oregon. We have worked with CareOregon for many years, and find them to be uniquely suited to stimulating both transparency and collaboration among members of our provider community. In addition, CareOregon has been the one contractor that routinely stimulates innovative service delivery modalities, which we believe will be essential to the success of the CCO concept.

PrimeCare's membership consists of 481 doctors of medicine, podiatry, and nurse practitioners. We currently serve as the referral network for contractors in Jackson, Josephine, Klamath and Curry Counties, as well as the entire primary care base for Jackson County. We will continue to do so for any bona fide CCO contractor that follows the principles of community collaboration and transparency as outlined by our Legislature and OHA.

To date, CareOregon has more than amply demonstrated that their intentions are to follow, and build on, those principles. We highly recommend your positive review of their application.

Please feel free to contact me with any questions you may have. The CCO concept is an exciting demonstration of what communities working together may accomplish, and we are more than interested its progress and outcomes.

Sincerely,

Michael R. Bond, MBA
Chief Executive Officer

Re: Letter of Support for Jackson County CCO, LLC becoming a Coordinated Care Organization

To Whom It May Concern:

On behalf of the patient, staff, and board of directors of La Clinica del Valle, I am writing in support of CareOregon, Inc., dba Jackson County CCO, LLC (JCCCO), in their effort to become a Coordinated Care Organization (CCO). La Clinica has worked with CareOregon for many years and we can attest to their commitment to improving the health and well being of Jackson County's residents. We have been impressed with their creative and innovative strategies to improve the health of our community. It is no surprise to us that they are at the forefront in CCO implementation in our region, and we are confident that they will successfully integrate medical, behavioral and dental health services to achieve the triple aim goals of health care transformation.

JCCCO's stated goal is to achieve a healthy population by providing extraordinary patient care for everyone at a reasonable cost. This is a goal we share in common. La Clinica pledges to work with JCCCO to create a primary care system of the highest quality in our region, one that effectively coordinates with other medical providers, mental health, chemical dependency, dental, and long-term care.

La Clinica is a federally qualified health center with eleven service sites in Jackson County, five of which are school-based health centers. We fully support the goals of Jackson County CCO and expect to play an active role in the transformation of the delivery of health care in Jackson County. If you have any questions about this letter, please contact me at bjohnson@lcdv.org or by phone at 541-512-3151

Sincerely,

Brenda Johnson

Re: Letter of Support for Jackson County CCO, LLC becoming a Coordinated Care Organization

To Whom It May Concern:

This letter is in support of the formation of the Jackson County Coordinated Care Organization (JCCCO). CareOregon, Inc. dba Jackson County CCO, LLC is the principal owner of JCCCO and has demonstrated a commitment to the health and wellbeing of residents in Jackson County through creative and innovative strategies and community engagement.

JCCCO's stated goal is to achieve a healthy population, through extraordinary patient care for everyone, and at reasonable costs, shared by all. This is to be accomplished by focusing on quality primary care services with appropriate coordination with the systems that provide physical health, mental health, chemical dependency, dental, and long-term care. These are challenging and laudable goals which are worthy of our support.

Engagement of the Jackson County providers of care has begun in earnest and their continued engaged support is critical in order for the JCCCO to be at the forefront of integrated medical, behavioral and dental health services in our community. Because the JCCCO is a community driven endeavor, the Jefferson Regional Health Alliance will participate with the JCCCO, and its members, and the community, to convene and incubate the formation of the Clinical Advisory Panel and the Community Advisory Council.

We, the Jefferson Regional Health Alliance, as an organization formed to support and create collaborative efforts toward improved health for southern Oregonians, support the collective efforts and goals of Jackson County CCO and expect to play an active role in the transformation of the delivery of health care in Jackson County.

Sincerely yours,

John Forsyth MD
Chair
Jefferson Regional Health Alliance

Re: Letter of Support for Jackson County CCO, LLC becoming a Coordinated Care Organization

To Whom It May Concern:

This letter is in support of CareOregon, Inc. dba Jackson County CCO, LLC (JCCCO) becoming a Coordinated Care Organization (CCO) operating in Jackson County.

Care Oregon, the principal owner of JCCCO, has demonstrated a commitment to the health and well-being of residents in Jackson County through creative and innovative strategies and community engagement. JCCCO's stated goal is to achieve a healthy population, through quality patient care for everyone, and at reasonable costs. This is to be accomplished by focusing on quality primary care services, with appropriate coordination with the systems that provide physical health, mental health, chemical dependency, dental, and long-term care.

JCCCO is built on local leadership of the CCO by the primary entities in the local health care system. Leadership from these different organizations will focus on collaboratively reducing costs and improving quality of care for the Medicaid population in the county. This will lead to local solutions determined by the local delivery system. At the same time, Care Oregon will provide administrative support and expertise to the CCO. As a well-established managed care health organization in the state of Oregon, Care Oregon can provide training, technical assistance and competent administrative management.

Jackson County, as the Local Mental Health Authority and Community Mental Health Program with responsibility for the provision of mental health services to the Medicaid population in the county, supports the collective efforts and goals of Jackson County CCO and expects to play an active role in the transformation of the delivery of health care in Jackson County.

Sincerely,

Don Skundrick, Chair
Board of Commissioners

Community
HEALTH CENTER

May 30, 2012

Bruce Goldberg, M.D.
Director
Oregon Health Authority
500 Summer Street, NE, E-20
Salem, Oregon 97301-1097

Dear Bruce:

By this letter, please be formally advised of Community Health Center's support for the Application that is being submitted pursuant to RFA-3402 for the creation of a fully compliant Coordinated Care Organization in Jackson County, in partnership with CareOregon, Inc. dba Jackson County CCO (JCCCO). Community Health Center has participated in the local Coordinated Care Organization planning process in Jackson County since the time of its initial convening and will enjoin the evolving JCCCO model and structure as a *major component of the health care delivery system*, pending final local decision-making regarding contractual language, fiscal arrangements, and governance determinations.

Community Health Center was founded in 1972 as the result of an extensive, community-based, grass-roots effort, and exists today as a federally qualified health center that enjoys tax-exempt status pursuant to IRS 501(c)(3). The exclusive charitable mission of Community Health Center has remained unchanged for forty years, and that is *to promote the health of low-income, working uninsured, and other vulnerable children and adults in Jackson County, Oregon.* As we work arduously to attain our mission, we have found CareOregon to be a creative, capable, and meaningful partner – one who has worked with us, side-by-side, for fifteen years, to transform the health care system with the singular goal of improving health outcomes for our most vulnerable neighbors. CareOregon has worked with us through their *Care Support and System Innovation Program* and *Medical Home Program* and we simply trust their ethics and genuine contributions to the health care community.

We believe that the Oregon Health Authority can do no better than to include an entity of CareOregon's stature among the ranks of its certified Coordinated Care Organizations. Working together, we believe that we can establish an exemplary Coordinated Care Organization that will improve health outcomes and service delivery systems while concurrently constraining the pace of health care cost inflation.

Respectfully submitted,

Margaret M. Crowley, MPH, RN
Executive Director

June 1, 2012

To whom it may concern:

As Director for Senior and Disability Services Rogue Valley Council of Governments, I am administratively responsible for Aging and People with Disabilities (APD) services in Jackson and Josephine counties. In this capacity I am happy to write this letter of support for the Jackson County Coordinated Care Organization (JCCCO).

Our APD staff provide Medicaid, SNAP, and other benefits for low income target populations. In addition we provide a number of non-Medicaid services including Oregon Project Independence and the Food & Friends Meals on Wheels programs. Over the years we have worked closely with the member organizations forming the JCCCO. We are excited about the new opportunities that the establishment of the JCCCO will bring to all of us to better serve Oregon Health Plan participants in Jackson County.

We are impressed by the commitment of those entities forming the JCCCO to making health transformation succeed in Jackson County. We have already begun discussions with Care Oregon around how our two organizations can collaborate more effectively to support those individuals whom we currently serve in a joint capacity. Our agency is fully committed to working closely with all of the JCCCO partners in this venture to help achieve the triple aim set forth in HB 3650.

Sincerely,

Donald O. Bruland

Re: Letter of Support for Jackson County CCO, LLC becoming a Coordinated Care Organization

To Whom It May Concern:

This letter is in support of CareOregon, Inc. dba Jackson County CCO, LLC (JCCCO) becoming a Coordinated Care Organization (CCO). The principal owner of JCCCO has demonstrated a commitment to the health and well being of residents in Jackson County through creative and innovative strategies and community engagement. It is no surprise that they would be at the forefront of seeking to implement a CCO to integrate medical, behavioral and dental health services in our community. JCCCO's stated goal is to achieve a healthy population, through extraordinary patient care for everyone, and at reasonable costs, shared by all. This is to be accomplished by focusing on quality primary care services with appropriate coordination with the systems that provide physical health, mental health, chemical dependency, dental, and long-term care. These are challenging and laudable goals which are worthy of our support.

As a provider of substance abuse prevention, education and treatment in Oregon for more than 40 years, the Addictions Recovery Center fully supports the collective efforts and goals of Jackson County CCO and expects to play an active role in the transformation of the delivery of health care in Jackson County.

Sincerely,

These are challenging and laudable goals which is worthy of our support.

As the director of a large non-profit chemical dependency treatment center for over 30 years I am grateful to have participated fully in CareOregon's development of an application to become a CCO. They have demonstrated a solid understanding of the importance of alcohol and drug treatment services and supports in the delivery of a comprehensive health care system capable of meeting the goals of the triple net. I fully support their application and will be an active partner with them in serving the comprehensive health care needs of Oregonians.

Résumé

David E. Ford

March 2003 to Present

CareOregon President and CEO 2003 to Present

Medicare and Medicaid Health Plan of 165,000 Members.
Financial turnaround and repositioned to become a leader for care innovation and public policy for serving the uninsured.

April 2002

Principal, Health Commons

Clients:

Asset Management, Palo Alto, CA: Venture Capital firm. Restart and reposition a software venture investment
Community Health Plans of Washington: Product Line Extension
Premera, Seattle: Network assessment for triple tiered PPO Product introduction
MedStar and National Medical Center, Columbia, MD: Cost Containment evaluation and plan for their HMO, Helix Health
University of MD, Baltimore County: Business Plan development for their Institute of Program Development and Evaluation

June 1999 to April 2002

AMERIGROUP, Mid Atlantic Region, CEO and President

Turned around a 120,000 member Medicaid book of business acquired from Prudential at 106% Medical Expense Ratio to 83% in year 1 and 78% subsequently.
Principle regions were Baltimore and Washington DC.

1992 -1998

Northwest Region President and CEO: Series of Acquisitions and Consolidations; Continuous role but sequential organizations.

1998: **Aetna** acquired NYLCare. Facilitated the integration with Aetna staff and systems. Invited to stay, but opted for exit package after six months.

1996: **NYL Care**, NW Regional CEO. NY Life acquired ETHIX. Only Regional CEO to remain after 2 years. Grew PPO only business, to insured, ASO, and PPO enrollment to 330,000 covered lives. Bid and was awarded the State of Alaska account of 83,000 active and retired lives. Administered the active members in Seattle and syndicated the Retiree members within

the NYLCare System. Implemented the set up, from award to operational readiness, in 4 months

1992-1996: ETHIX NW: President and CEO of 156,000 member PPO including 64,000 Washington Teamsters. Created virtual fully capitated Medicaid HMO by contracting with Regence to front a license, out-sourced claims administration and organized a unique community-risk-base provider network. Started with 14,000 Members and grew to 90,000 full risk members.

1979-1991 **Blue Cross and Blue Shield Experience**

1984-1991: **Blue Cross of WA and AK**, Seattle, Vice President of Health Care Systems.
Managed Provider Contracting for all lines of business including HMO and PPO and all nursing managed care including concurrent review, utilization and case management.
Established first PPO's, the Prudent Buyer Plans, in Washington and Alaska.
Reestablished Hospital 'fair payment' contracts.

1983: **Washington Physicians' Service**. Seattle Vice President for Health Care Systems. Project manager for Statewide 13 Organization hospital contracting project for all the Blue Shield Plans. First in 60 year history.

1979-83: **Medical Service of Eastern Washington**. Vice President of Health Care Systems and VP Personnel. Provider relations and established cost containment program, strategic planning. Key extensive involvement in legislature for changing hospital regulation laws.

1976-1979 **SAFECO Life and Health**

Plan Manager: Spokane, WA. Innovative Primary Capitated HMO. All Sales through Brokers and Consultants, Managed Physician Advisory Council, Provider Contracting and Claims Operations.

Marketing Representative: Woodland, CA. Marketed HMO through the Woodland Clinic. Won various marketing awards and trips for sales achievements. Promoted and transferred to Spokane, WA.

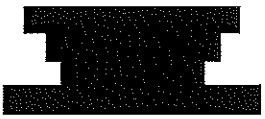
Education:

BA in American Studies, University of CA, Davis 1973
Masters Study in History and Philosophy

Military:

Infantry Lieutenant: Civil Affairs Officer, South Vietnam 1971

CAROLYN J. (FRITZ) RANKIN



PROFESSIONAL EXPERIENCE

- **CAREOREGON, INC.,** Portland, OR – 2003 to present

  Chief Operations Officer/Chief Financial Officer for non-profit corporation providing health care benefits for over 100,000 Medicare and Medicaid recipients

  - Instrumental in financial turn-around of organization with annual revenues of over $350 million and 200+ employees
  - Responsible for finance, IT, claims, customer service, human resources, and facilities.
  - Managed implementation of QCSI software for claims processing and related case management, bringing claims operations in house
  - Formed new subsidiary corporation for Medicare line of business, becoming licensed by CMS and State of Oregon as health care services contractor in record time
  - Purchased and remodeled 11-story building for operations and relocated all employees

- **RANKIN ASSOCIATES,** Seattle, WA 98102 - 1993 to present

  Principal in firm providing financial consulting, project management and software sales and implementation, including

  - Consulted with top management in corporate restructuring, refinancing, profitability analysis, and systems review in commercial airline industry
  - Worked with management and legal representatives in corporate reorganizations and liquidations
  - New venture financial planning: designed and produced proforma financial statements; designed management and compliance reporting; met with investors and/or regulators to discuss proformas
  - Project management: developed detailed plans for systems implementations, managing time and budget constraints of clients installing fully-integrated financial and manufacturing systems, including materials resource planning and scheduling features
  - Complete system review: identified key business requirements and strengths and weaknesses of current and alternative systems; developed action plan for migration
  - Manufacturing system implementation management: trained personnel in defining bills of materials, fixed and variable costs, overhead and burden
  - System design: evaluated workflow and system controls, to identify internal control vulnerabilities, life cycle of system
  - Data conversions: mapped and assisted programmers in moving clients from legacy systems to new systems with different databases and data structures
  - Cost accounting system design: designed systems to comply to applicable GAAP, Medicare, Medicaid, CHAMPUS and IRS rules; assured fully-absorbed inventory costing compliance

- THE SIMPSON & FISHER COMPANIES, INC., Seattle, WA 98101 - 1990 to 1993

  Chief financial executive for parent and two subsidiary corporations, Westminster Lace and Yankee Peddler, operating 37 specialty retail stores with 250 employees with annual sales of $15 million. Designed and implemented automated financial systems, cash flow forecasting, and store profit and loss statements. Developed Plan of Reorganization under Chapter 11 of U. S. Bankruptcy Code.

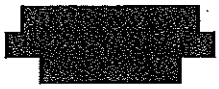
Rod A. Meyer



Qualifications: Experience in management, systems administration, and application development perspectives of information technology. I have successfully held positions of Director, Systems Programmer, Programming Manager, and Application Developer in an Information Technology environment. I have also demonstrated the ability to work closely and effectively with individuals at all levels of an organization on a variety of projects.

Experience: Director of IS (September 2002 – present)
CareOregon, Inc., Portland, Oregon

- Responsible for all management aspects of the Information Systems department consisting of a team of IS professionals with expertise in data analysis, desktop support, system networking, phone systems, systems administration, systems coordination, applications programming, web development, PC's and systems operations.
System: Microsoft Window XP and 2000, SQL Server 2000, SAS, MapInfo, EZCAP

Sr. Systems Developer (March 2000 – August 2002)
CareOregon, Inc., Portland, Oregon

- Involved in the installation, implementation and maintenance of a managed care system, EZCAP, that includes modules related to eligibility, provider data, customer service, case management, and an internet based module, EZNET, for referral entry and eligibility inquiry.
System: Microsoft Window 2000, SQL Server 7, SPSS, SAS, MapInfo, EZCAP

Director of Information Technology (Jan 1998 - March 2000)
Pacific Heritage Administrators, Portland, Oregon

- Responsible for all management aspects of the Information Systems department consisting of a team of IS professionals with expertise in networking, phone systems, systems programming, systems coordination, applications programming, PC's and systems operations.

- Responsible for the complete retooling of all information systems to administer business as a dental and health TPA administering only partially self funded groups with individual and aggregate stop loss limits. Prior to this the company had operated primarily as a risk bearing insurance organization.

- Also was required to design and implement a complete replacement of the group and individual billing system (Groupfacts) because of Y2K considerations. This system not only replaced, but greatly improved on the previous system in terms of improved turnaround on group bills, COBRA bills, id cards and reporting.
System: IBM ES9221-150, VSE/ESA, CICS, VTAM, UNIX, Sybase

Sr. Programmer Analyst / Systems Programmer (Oct 86 - Dec 1997)
Pacific Heritage Assurance, Portland, Oregon

- Responsible for all systems programming and administration functions for a mainframe system running VSE/ESA, VSE/SP, POWER, VTAM, CICS, VSAM, SDF, ICCF, and associated system enhancing and monitoring software such as CA-RAPS, CA-DYNAMT, BIMEDIT, CA-SORT, BMC SUPEROPTIMIZER CICS, FAQS, EXPLORE, VSAMTUNE, VSAMLITE, COMPAREX, CICS WINDOWS, and EASYTRIEVE Plus.
- Responsible for all administration functions relating to a development environment consisting of Software AG products: ADABAS, NATURAL, PREDICT, CONSTRUCT, SMA, NATURAL SECURITY, and NATURAL VSAM.
- Also responsible for all functions relating to a major claims processing software system, CLAIMFACTS, including installation of new releases, maintenance, interfacing with other systems, and modifications as necessary.
- Have designed, written, and maintained online systems software using CICS Command Level COBOL and SDF, including a comprehensive group definition system, DATACARDS.
- Primarily responsible for two major hardware upgrades: IBM 4331 to IBM 4361 and IBM 4361 to IBM ES9000.
System: IBM ES9221-150, VSE/ESA, CICS, VTAM

Project Leader/Programming Manager (Nov 85 - Oct 86)
American Guaranty Financial Corp., Portland, Oregon

- Primarily responsible for implementation, maintenance, and modification of a major life insurance software package, PALLM, consisting of approximately 700,000 lines of code and 60 online VSAM support files.
- Developed an online interface to the XEROX 4050 laser printer for controlling and calling forms overlays without making major modifications to existing batch programs.
- Temporarily managed a team of four programmers, two data entry clerks, and a PC specialist.
System: IBM 4381, VSE/SP, CICS, VTAM, BTAM

Programmer Analyst (Sep 81 - Nov 85)
American Guaranty Financial Corp., Portland, Oregon

- Designed, written, installed and/or maintained online systems using CICS Command Level COBOL, including Accounts Payable, Agents Advertising, Annuities, Mortgage Loan, and Check Numbering Control.
- Supplied CICS and batch system support to several service bureau clients including auto leasing, pension savings, and resort management companies.
System: IBM 4341, DOS/VSE, CICS, BTAM, VSAM

Applicant Name: Jackson County Coordinated Care Organization, LLC

Service Area Table

Service Area Description	Zip Code(s)	Maximum Number of Members- Capacity Level
Jackson County	All zip codes in Jackson County: 97497, 97501, 97502, 97503, 97504, 97520, 97522, 97524, 97525, 97526, 97527, 97530, 97535, 97536, 97537, 97539, 97540, and 97541.	JCCCO is requesting unlimited capacity in Jackson County.

Jackson County Coordinated Care Organization, LLC
Appendix A – CCO Criteria Questionnaire

A.I. Background Information about the Applicant

A.I.a. The Applicant is Jackson County Coordinated Care Organization, LLC (hereinafter JCCCO), an Oregon limited liability corporation. The Applicant will notify the Oregon Health Authority (OHA) in the event of a name change.

A.I.b. CareOregon, Inc. (hereinafter CareOregon) is the sole Affiliate associated with this entity's application.

A.I.c. JCCCO intends to begin serving the Medicaid population effective September 1, 2012.

A.I.d. In accordance with HB 3650 Section 8(4), a health care entity may not unreasonably refuse to contract with an organization seeking to form a coordinated care organization if the participation of the entity is necessary for the organization to qualify as a coordinated care organization. The Applicant is not invoking alternative dispute resolution with respect to any provider.

A.I.e. The Applicant does not request changes to desire to negotiate any terms and conditions in the Core Contract other than those mandated by Medicaid or Medicare.

A.I.f. The proposed service area for JCCCO is all of Jackson County, Oregon. The proposed Jackson County service area includes the following zip codes: 97497, 97501, 97502, 97503, 97504, 97520, 97522, 97524, 97525, 97526, 97527, 97530, 97535, 97536, 97537, 97539, 97540, and 97541.

A.I.g. The Applicant's primary office will be located at 370 Superior Court, Suite 208, Medford, Oregon, 97504.

A.I.h. Only Jackson County is included in the service area. Please refer to Provision A.I.f above for the zip codes. JCCCO is collaborating with all major delivery systems in the region.

JCCCO's affiliate, CareOregon, has an agreement with the Oregon Health Authority (OHA) as a Fully Capitated Health Plan. The agreement allows Members to seek medical services as required by ORS 414.153.

JCCCO will partner with Jefferson Behavioral Health (hereinafter JBH), to provide mental health services to JCCCO Members. JBH has the Mental Health Organization contract in a five-county region which includes Jackson County.

Currently JCCCO and its partners are working to obtain Memoranda of Understanding with Jackson County and the Rogue Valley Council of Governments, and the Jackson County Commissioners have provided a Letter of Support for JCCCO.

A.I.i. JCCCO's affiliate, CareOregon, currently has a contract with OHA as a Medicaid Managed Care Organization. CareOregon expects that their current contract with OHA will terminate, as they apply to the Jackson County service areas only, immediately before the effective date of the JCCCO's CCO contract.

As a JCCCO partner, JBH brings a history as one of the original MHOs selected under OHP. JBH's current leadership has 20 years of managed care experience.

A.I.j. As mentioned above, JCCCO's affiliate, CareOregon, has a current MCO contract. CareOregon expects that the current contract will terminate, as they apply to the Jackson County service areas only, immediately before the effective date of the JCCCO's CCO contract. The Entity (Applicant) has not been purchased, merged, acquired, or otherwise undergone any legal status change since October 1, 2011.

A.I.k. The Applicant does not include more than one current MCO.

A.I.l. JCCCO is proposing to keep CareOregon's current MCO service area of Jackson County.

A.I.m. JCCCO's affiliate, CareOregon, is not currently licensed as an insurer with the Oregon Insurance Division, but is currently contracted with the OHA as a managed care organization for the Oregon Health Plan. CareOregon has a Medicare contract through its affiliate Health Plan of CareOregon with the Centers for Medicare and Medicaid Services. CareOregon has significant experience working with people who have Medicare and Medicaid, and will bring that expertise to the CCO in 2014.

A.I.n. JCCCO's affiliate, CareOregon, has had a Medicare contract with the federal government since 2006 through Health Plan of CareOregon, a wholly-owned subsidiary. It operates two plans; one is a dual-eligible Special Needs Plan (D-SNP) for people with Medicare and Medicaid, and the other is for people with Medicare only. The service area for these plans covers nine counties throughout Oregon (Multnomah, Clackamas, Washington, Columbia, Clatsop, Marion, Polk, Jackson, and Josephine counties). CareOregon Advantage, the marketing name, has more than 8,000 Members, 7,000 of whom are enrolled in the D-SNP, called CareOregon Advantage Plus.

A.I.o. JCCCO's affiliate, CareOregon, through its wholly-owned subsidiary Health Plan of CareOregon, has a current certificate of insurance as a licensed Health Care Services Contractor through the Department of Consumer and Business Services Insurance Division (NAIC number 12277).

A.I.p. JCCCO's affiliate, CareOregon and the community partners have demonstrated experience in the following areas:

(1) In 2005, CareOregon developed a program called CareSupport and System Innovation (CSSI) which has funded project-based payments of more than $3 million per year with the specific goals of achieving the Triple Aim and addressing the six aims of the Institute of Medicine: equitability, safe, effective, efficient, timely, and patient-centered care. CareOregon has also introduced outcome and Member experience-based payments to its primary care and hospital contracts based on improving safety, health outcomes as measured by HEDIS, and Member experience as measured by CAHPS. We plan to expand and update these alternative payment arrangements in collaboration with the Jackson County community.

(2) CareOregon has always coordinated the delivery of chemical dependency services, and is actively working with JBH and Jackson County Mental Health to develop an integration strategy that both enhances coordination and care and is not disruptive to the CCO Members. CareOregon also has experience in several programs of co-location and integrating physical and behavioral health, and will be working with partners to develop a comprehensive strategy to integrate dental services for the entire CCO Membership, especially the enhancement of access for children and reducing the incidence of early caries development. CareOregon has developed a pilot program in conjunction with the state for long-term care services which uses a team approach led by a nurse practitioner and focuses on home-bound patients. This experience will help develop a partnership with the local Area Agencies on Aging and other community-based long-term care providers. Integration initiatives among community partners in Jackson County include cooperative agreements between JCMH and the FQHCs in the county to provide psychiatric care and behavioral health interventions in community health clinics. Jackson County mental health and addictions providers work closely together and have established a co-occurring disorders group to staff cases, address system problems, coordinate care and promote workforce development towards joint competencies in both chemical dependency and mental health treatment. There has been strong participation by a collaborative of physicians, as well as mental health and chemical dependency providers in a performance improvement continuing education process to address prescribing practices for both opioid and psychotropic medications. JCCCO sees this as an area for continued impact because of the severe health disparities seen for people who have major mental health and substance use challenges.

(3) JCCCO has already begun to actively work with the local community, through the Jefferson Regional Health Alliance (JRHA), to identify specific areas of community need and opportunity. JRHA recently has convened and facilitated a group of providers serving Jackson County's Medicaid population, including hospitals, physicians, clinics, mental health providers and chemical dependency providers, in order to share health care data and identify areas for a collective effort to reduce costs and enhance care. Members of this group are

working with CareOregon on an active project to identify high-cost, high-needs Members and deploy community health workers, who will be linked to others in similar positions throughout the state. This group also provides a forum to integrate health care needs identified through hospital and public health community needs assessments. The data indicates some patterns of care and health care use. Certain aspects of illegal drug use and patterns of emergency room use require specific strategies that will be unique to this county and will build on previous community efforts to address these issues. JCCCO will work closely with the Jackson County Health Collaborative which will have a role in creating the CAP for the CCO.

A.I.q. Please see attached document **1e. Resumes - JC CCO.**

A.I.r. Please see attached document **1f. Organizational Chart - JCCCO.**

A.I.s. JCCCO is not deferring any supporting documents, tables or data that are part of the Technical Application.

A.II – Community Engagement in Development of Application

JCCCO has engaged multiple stakeholders in the development and writing of this application, including the local public health and mental health authorities, county government, local physician organizations, hospitals and health systems, federally qualified health centers, chemical dependency and substance abuse providers, long-term care agencies and SPD, as well as several individuals who have expertise in health improvement, health care and systems. We believe one of the strengths for this CCO is that the service area is limited to Jackson County only. Our Governing Board, Clinical Advisory Panel (CAP), and Community Advisory Council (CAC) each will have broad local representation. We will provide the tools and information needed for local leaders to transform our community health system and achieve the Triple Aim in a manner that fits the needs and culture of Jackson County and its residents.

Section 1 – Governance and Organizational Relationships

A.1.1. Governance

A.1.1.a. JCCCO's proposed Governing Board will include representatives from the following:

- CareOregon
- Asante Health System
- Providence Health & Services
- PrimeCare
- Jefferson Behavioral Health (JBH)
- Jackson County Mental Health Services
- Addictions Recovery Center
- Community Health Center
- On Track, Inc.
- La Clinica del Valle
- A member of the CAC
- Local practicing clinician
- Community member(s)

JCCCO also hopes to engage a member of the Jackson County long-term care community in CCO governance. We will provide the names of Governing Board Members at the time of the Readiness Review. Though CareOregon is the sole owner, JBH and many of the participating providers will be sharing in financial risk, including

capitation or other risk mechanisms, and we therefore believe that this structure meets the intent of the CCO legislation and also emphasizes diverse community involvement.

A.1.1.b. The proposed CAC Membership will be selected by a committee composed equally of county representatives from Jackson County government, Members of the CCO Governing Board and others; with consumers representing a majority. The CAC will meet at least quarterly, and will undergo a thorough and community-based selection process, guided by the Governing Board, to ensure broad participation and commitment. JCCCO is currently exploring the idea of defining a joint CAC for Jackson County which would work across multiple CCOs in Southern Oregon in order to minimize the use of limited community resources.

A.1.1.c. The relationship of the Governing Board with the CAC will help ensure transparency, accountability and that the Governing Board understands and considers the CAC recommendations. The Governing Board will include at least one CAC Member. The CAC's health improvement plan will be submitted to the Governing Board and serve as a population health, health care system, and health services strategic plan for JCCCO and guide its health transformation investments and activities. JCCCO has agreed to allocate a community health improvement investment fund of one million dollars to address the Triple Aim and specific needs and recommendations of the CAC.

A.1.1.d. The Membership of the CAC and Governing Board will include individuals who have experience living with severe mental illness, advocates for this population, and/or behavioral health providers. The CAC will also include Members who have experience with long-term care services and supports. We will leverage the experiences and expertise of local community health centers, the mental and public health authorities, and others to assure appropriate support for meaningful engagement of this population.

A.1.2. Clinical Advisory Panel

A.1.2.a. JCCCO does intend to establish a CAP. Its goal will be to ensure an input method for developing best clinical practices across the CCO's delivery system and will include all providers, facilities and representatives from other community partners in the service area. The CAP will report to the CCO Governing Board, where best practices will be developed and shared. The CAP will also identify and resolve system issues across providers that are impacting effective and efficient coordination of clinical health outcomes.

A.1.2.b. This provision does not apply to JCCCO.

A.1.3. Agreements with Type B Area Agencies on Aging and DHS Local Offices for APD

A.1.3.a. JCCCO's affiliate, CareOregon, has a long history of effective relationships and collaboration with local service providers including Type B AAA and APD offices. These relationships have been built and maintained by CareOregon and its community mental health programs and providers.

JCCCO is in active dialogue with the Rogue Valley Council of Governments (RVCOG), which represents Aging and People with Disabilities (APD) and provides Medicaid, SNAP and other benefits for low-income target populations. JCCCO and RVCOG are currently working through provisions of the MOU and expect to have it completed by the readiness review. Their Letter of Support is attached.

A.1.3.b. As JCCCO expands its contractual relationships to include the full spectrum of health care services, new MOUs will be developed to support the evolution towards an integrated health care system. We are in active discussion with the local Mental Health Authority and the Rogue Valley Council of Governments and are

currently working through the details of the new MOUs. JCCCO will use OHA's website to guide us in this process and appropriate MOUs will be provided at the Readiness Review.

A.1.4. Agreements with Local Mental Health Authorities and Community Mental Health Programs

A.1.4.a. JCCCO has worked closely with its partners and the Local Mental Health Authority and the Community Mental Health program to develop this application and to design a comprehensive and coordinated mental health delivery system. There is strong commitment to sustaining the County's mental health safety net services throughout the CCO development. Blended funding is necessary to support coordinated services for both Medicaid and indigent populations and maintain the network of services and supports that currently exists in the county for those with mental illness. We are in the process of developing an agreement between the CCO and the county regarding coordination of services funded through the global budget and those funded from other sources for individual Members.

JCCCO's partner, JBH, works directly with CMHP AMHI Leads, County ENCCs and County Crisis workers on a regular basis to coordinate care for Members in all intensive services: acute care, residential settings and in state hospitals. JBH tracks 320 regional AMHI Members throughout their enrollment period, in all levels of care, in and out of our region to assure they are getting the right services for the right amount of time. JBH enters all tracking info into the AMHI Statewide E-Submission tool required by AMH and links these high risk Members to resources, consultation, collaboration, and problem solving with CMHP staff on a daily basis.

JBH coordinates all referrals to residential care and to the state hospital. They approve and process each referral to send to the most appropriate program in the state based on the LOCUS and the recommendations of their treatment team. JBH also works with other MHOs and residential providers to advocate for the Member's needs, while remaining a contact for the receiving MHO and provider throughout the referral. JBH visits with Members in residential facilities to ensure that they are getting the services they need and want and works with the Member, CMHP and treatment team to assist with discharge planning and finding most appropriate step down possibilities.

JBH hosts a monthly AMHI meeting in which regional county AMHI leads, ENCCs, crisis workers, QA staff, and residential program managers discuss AMHI initiative, progress, successes, concerns, resources, and collaborative problem solving. JBH also performs quarterly utilization reviews in each of the eight AMHI residential facilities in Southern Oregon using chart reviews, and meets with Members, facility staff and responsible CMHP AMHI lead/ENCC to discuss individual progress and plans for discharge.

JBH Adult Services staff also works, as needed, with the CMHP crisis and utilization staff, in weekly meetings at a regional Behavioral Health Unit to coordinate care for JBH Members and qualifying regional indigent Members that are in crisis.

A.1.4.b. Currently the discharge process from a state hospital takes 5-30 days from the designation that the patient is ready to transition (RTT). AMH's expectation is that MHOs and CMHPs transition Members out in 30 days or less once Member is deemed ready to transition. According to co-management guidelines that will be in effect starting July 1, 2012, MHOs/CMHPs (and presumably at some point, the CCOs) become partially financially responsible for the Members cost of care at the state hospital if they stay longer than 30 days RTT.

The state hospital process is considered only when a Member in acute care cannot be discharged because no other resources are appropriate. JBH Adult Services manages all referrals to the state hospital. The JBH coordinator and the responsible CMHP AMHI lead/ENCC track each Member in the state hospital in conjunction

with JCMH staff. The JBH coordinator is notified by the three state hospitals (Oregon State Hospital, the Portland Campus of OSH, and Blue Mountain Recovery Center in Pendleton) of all interdisciplinary team meetings for our Members and ensures that the responsible CMHP gets the schedule of meetings.

JBH and CMHP attend each IDT meeting to participate in treatment planning, assist with coordination of care, provide information to the current team about previous treatment progress and to help the Member work towards discharge. JBH and CMHP are available to staff at all three state hospitals to assist with care coordination for our Members. Each month at the IDT, the team discusses discharge readiness.

When a Member is ready to transition they are deemed "RTT" and the discharge process can begin. The state hospital staff sends JBH the referral packet usually within three days of when the Member was made RTT, but it occasionally takes up to a week to get the information. JBH distributes the referral to the identified level of care within three days of receiving the referral. It is expected that the residential program schedule a screening with the Member within five days of receiving the packet. Depending on the level of care and geographical area the Member is being referred to, it could take up to 90 days for a vacancy to open up. For example, Secured Residential Treatment Facility (SRTF) level of care currently has two openings in the entire state and those programs are reviewing several referrals. Some SRTF waitlists are long and are closed to referrals. If the Member is requesting to go to a metro area, they might wait 90 days for a bed.

Supported housing resources in the metro areas are twelve months long. JBH regional beds usually run at capacity, but do not get enough referrals to maintain a waitlist. Other factors like Member choice and guardian choice can delay a discharge from the state hospital as well. If a Member is being discharged to independent living this process can happen more quickly but still takes time to coordinate. The state hospital staff has to start the process for the Member's resources (OHP and/or SSI) to be reinstated. JBH/CMHP staff schedule follow up appointments and coordinate for case management for housing or other immediate needs in the community. State hospital staff arranges for transportation and 14 days of medications. JBH and/or CMHP follow up and have regular contact with Member in the community.

The Member is often provided with assertive community treatment, Strength-Based Case Management, Supported Employment, Peer Specialists and other intensive community supports to help in the transition back to their community. Thirty days is usually a manageable time frame to coordinate a discharge from the state hospital.

JCCCO's partner, Jackson County Mental Health, is actively involved in discharge planning with state hospital and residential providers for both adults and children. A well established and comprehensive range of foster care, transitional and supported housing allows for supervision and support for those transitioning from long-term psychiatric care. Appointments for ongoing psychiatric care and other treatment as needed are established prior to discharge. Comprehensive case management and community based supports also assist individuals transitioning to a lower level of care. Through the AMHI program, JCMH has demonstrated its ability to successfully move people out of residential settings in a timely manner through ready access to its continuum of services. The AMHI Coordinator at JCMH will be the contact for CCO Members to work with facilities to plan for discharge, and ensure needed services for ongoing care are in place to allow discharge within the expected time frame.

A.1.4.c. JCCCO will work with the CMHP to support a unified, 24/7 crisis response system for all Jackson County citizens. Through contract, the county crisis response system will provide crisis response, assessment and intervention for JCCCO Members. Concerns regarding the crisis needs of JCCCO Members will be addressed and resolved through the JCMH Crisis Manager. JCMH participates in regular committees with law enforcement, courts, corrections and juvenile justice. Information regarding community crisis needs and system improvement for the county crisis system will be communicated between JCCCO and JCMH through JCMH and county representation within the CCO Governing Board. The Public Safety Coordinating Council in Jackson County has

established a mental health subcommittee to address community plans for individuals in the community who have had multiple police contacts with law enforcement and to enhance the current community crisis response system to expand mobile crisis response and allow for interventions outside hospital emergency departments. It is anticipated that the CCO will be actively involved in supporting these efforts.

Regarding Behavioral Health, the safety net clinics have employed and borrowed behavioral health providers included in their PCPCH models that enable coordination of care. A relationship with JBH and Jackson County Mental Health Dept. also provides coordination and access to services in existing community delivery models. Additionally, further coordination will be performed through CareOregon Medical Benefit Assurance Unit for arrangement of services outside the CCO area when needed and available through CareOregon's state-wide network. Please see Provisions A.4.1.a and A.4.1.b above for additional details regarding JBH's contributions to coordinating with Community Emergency Service Agencies.

A.1.5. Social and Support Services in the Service Area

A.1.5.a. JCCCO recognizes that to carry out the Triple Aim, we must develop and maintain meaningful relationships with social and support service providers. These organizations include but are not limited to DHS CAF Field Offices, OYA, Dept of Corrections, school districts, ESDs and higher education, DD programs, Tribes and tribal organizations, housing, community-based family and peer support organizations, and others.

JCCCO's partner, JCMH, is actively involved in several collaborations and partnerships with DHS Child Welfare, the courts, community corrections and juvenile justice. Jackson County Corrections and Mental Health recently received a grant to fund a community mental health worker in the Corrections department. This person will work with a collaborative team to provide community outreach and engage individuals with serious mental illness and those with co-occurring substance abuse disorders in implementing wellness recovery action plans and supporting them in living safely in the community.

A.1.6. Community Health Assessment and Community Health Improvement Plan

A.1.6.a. Local healthcare providers, public health, community health leaders and others have a unique opportunity to work together to assess the health needs of Jackson County, which includes health status indicators (including leading causes of death, disability and associated risk factors) for the population, access to clinical health services, and health equity and disparities. JCCCO is committed to utilizing existing resources and collaborating with community partners to better understand our health, gather further information to help identify and address disparities, and enhance community health promotion and prevention efforts.

The JCCCO CAC will initially draw on existing resources and community needs assessments done by local partners such as the hospitals, community behavioral health and public health departments. The CAC will also solicit input from the Jackson County Health Collaborative and community based organizations regarding local health needs. Building on these efforts, and in coordination with Members of the Health Collaborative, the CAC will develop surveys and host focus groups to engage community input on the needs and strategic opportunities of Jackson County and the health needs of diverse populations. Specific focus groups will gather information from identified groups with special health care needs such as seniors, those with mental illness and chemical dependency. Local outreach workers and organizations specifically serving the Hispanic/Latino populations will assist in identifying culturally and linguistically specific needs and proficient strategies to effectively address those needs.

At a minimum, the Community Health Needs Assessment (CHNA)will:

- Ensure that the health care needs of the consumers and the community are being addressed

- Identify health status, needs and disparities associated with race, ethnicity, language, health literacy, age, disability, gender, sexual orientation, insurance, and geography
- Assess whether the provider network and points of access are sufficient to meet the needs of our community
- Identify preventive care practices to be utilized by JCCCO
- Guide the community health improvement plan, which will serve as a strategic population health and health care system service plan for JCCCO

The CAC will be responsible for the oversight of the CHNA and the resulting Community Health Improvement Plan (CHIP). JCCCO's CHNA and CHIP will meaningfully engage the voice of the community served. The CAC will be comprised of 51% CCO consumers who will lead us in our community health assessment and improvement plan that will be updated each year. Their recommendations will be shared to its board to lead the JCCCO in its priorities and implementation in pursuing the Triple Aim.

Although details of the CHNA and CHIP are still to be determined, JCCCO is committed to assessing, monitoring, and improving health through a community-driven process that aims to 1) eliminate duplication of effort and health disparities, 2) promote joint implementation of health needs assessment and health improvement strategies, and 3) rely on shared responsibility for monitoring progress on the population's health, with a focus on those experiencing inequities.

JCCCO's CHIP will build off the existing assessments required by the Internal Revenue Service and recommended by federal funders and national partners. Our CHIP will be aligned with and integrate the Oregon Health Policy Board's Oregon Health Improvement Plan (HIP) and non-profit hospital community benefit requirements within 990H IRS reporting requirements as well as the Local Public Health Authorities assessment and planning requirements in order to design and implement a process that is inclusive - with a special emphasis on those experiencing barriers to participation and health inequities. JCCCO's CHIP efforts will include non-profit hospital community benefit requirements within 990H IRS reporting requirements, as well as the Local Public Health Authorities assessment and planning requirements.

JCCCO will work with the Oregon Health Authorities' Office of Equity and Inclusion, Addictions and Mental Health, and Public Health to design and implement the assessment and planning process. JCCCO will explore the use of Mobilizing for Action through Planning and Partnerships (MAPP), developed by National Association of County and City Health Officials in cooperation with the Centers for Disease Control and Prevention. MAPP is a strategic approach to community health improvement. This tool promotes strategic thinking among an inclusive set of community partners in order to prioritize community health issues and identify resources to address them. Using MAPP, communities seek to achieve optimal health by identifying and using their resources wisely, taking into account their unique circumstances and needs.

Section 2 – Member Engagement and Activation

A.2.1. Member and Family Partnerships

A.2.1.a. One of the exciting aspects of JCCCO is that it promotes a structure that is local and community-based. We will build on the experience of the local FQHCs, as well as the long-term care providers, SPD, and other community organizations in developing Member-based programs to help develop programs and policy. We want CCO Members (and their families and support networks) to meaningfully engage as partners in the care they receive, as well as in organizational quality improvement activities. Though the exact form of Member engagement will be developed by the local community, JCCCO's affiliate CareOregon has experience developing a Member Advisory Committee (MAC) which has helped engage Members in the following ways:

- The MAC encourages all Members and their families to share their ideas; participate in projects and events that improve service and communications for all; and actively support each other in peer-to-peer efforts.
- MAC Members help review Member materials, create Member education materials, develop health opportunities (e.g., health fairs, advocacy days), and serve on committees devoted to process improvement.
- Through Community Care Team and Care Support (case management) departments, staff work one-on-one with Members (either in person or on the phone), who have chronic health issues or are transitioning out of the hospital. By identifying both specific clinical needs and social determinants affecting an individual's health, the staff teams with Members and their families to eliminate barriers to health improvement.
- Through encouraging network providers to develop policies which support active engagement of individuals and their families in accessing care and treatment planning.
- Through ensuring that agencies partnering with the CCO have QA/QI processes which involve Member and family participation.
- Through supporting the use of peer and family supports throughout the provider network that will support Members and their families in getting access to care and engaging actively with their health care providers.

A.2.1.b. In addition to the work of the CAC and other Member committees (such as a MAC), JCCCO will ensure comprehensive communication to engage and provide all Members, not just those Members accessing services or involved in committees, with appropriate information related to benefits and accessing physical health, behavioral health and oral health services via the following:

- Provide annual Member handbooks written in plain language outlining:
  - Rights and responsibilities
  - Benefits and services
  - How to access customer support
  - How to access providers
  - How to navigate coordinated care
  - How they can participate in improvement efforts or peer-to-peer support
  - Information about preventive care and non-traditional services
  - Privacy rights
- Provide the option of receiving handbooks and preauthorization information in languages other than English
- Provide interpretation services for all languages through Customer Services
- Provide a website (with a translation function) that includes service and benefit information, customer support, health education, provider access, formulary options, and Member engagement information and opportunities
- Provide a quarterly newsletter to all Members
- Provide social media opportunities that support sharing late breaking news and opportunities, as well as feedback and peer-to-peer opportunities
- Solicit feedback and involvement through newsletters, handbook, web site, surveys
- Participate in PSA opportunities through TV and radio to encourage better nutrition and exercise, as well as preventive care, among target audiences (families, individuals, parents)
- Engage the CAC in the development, deployment, and analysis of the annual CAHPS survey and other measures of member experience, such as focus groups, primary care-based surveys, engagement rates in care management programs, and customer service statistics.
- Provide targeted communications to Members regarding preventive care, immunizations, screenings and testing services

Section 3 – Transforming Models of Care

A.3.1. Patient-Centered Primary Care Homes

A.3.1.a. JCCCO plans to support its network in the development of Patient-Centered Primary Care Medical Homes by drawing upon the experience of its affiliate, CareOregon, which has actively participated in the development and implementation of the State's PCPCH program. JCCCO will use the primary care home development resources already available via CareOregon's Patient and Population Centered Primary Care (PC3) Curriculum to provide technical assistance, tools and data systems to promote further development and standardization. We will also continue to develop tools and skills necessary to ensure that our primary care clinics function as advanced primary care homes in order to achieve the goals of the Triple Aim.

CareOregon's Primary Care Renewal (PCR) Medical Home Collaborative, in place since 2007, has an incentive component based on the co-design of measures that achieve a patient-centered medical home. PCR is organized as a combination of regular face-to-face collaborative meetings, peer-to-peer communities of practice, and on-site, telephonic, and email practice coaching.

Based upon the learnings from PCR, CareOregon and the PCR clinics developed the PC3 Curriculum. This curriculum is designed to support clinic and organizational leaders in practice transformation both to meet the requirements of PCPCH and to move towards meeting Triple Aim outcomes. The content is organized around five key areas: leadership, data systems, team based care, clinic systems, and care management. It utilizes very practical tools that were designed based on significant experience working with the PCR clinics. These tools are combined with targeted process improvement and Lean training and tools.

Clinics participating in PC3 will learn strategies for patient engagement as part of the learning modules. Clinics are encouraged to have patient's complete CAHPS experience of care surveys on an ongoing basis and use Member feedback as a tool for quality improvement in addition to learning strategies about real-time collection of patient experience data to inform improvements.

JCCCO will continue to provide technical assistance to providers who have not achieved PCPCH Tier status and strongly encourage application under the OHA to become a medical home for all PCP clinics. JCCCO will provide resources for clinics, such as interpreters, Member materials and provider materials, to ensure that communication is in each Member's language of choice.

A.3.1.b. JCCCO's Governing Board will sponsor the following activities for engaging Members in achieving transformation:

<u>Member Participation</u>

- JCCCO will convene one or more public forums in the months of May and June, 2012
- JCCCO will ask a Public Outreach Committee of 5-10 community leaders to coordinate these events
- Member advisory and advocacy groups will be invited to participate in outreach activities
- The Public Outreach Committee will help create the CAC
- The CAC will serve as Member Advisory Council for the CCO
- JCCCO will encourage its provider network to also develop Member Advisory Councils

<u>Research and Respond to Member Opinions</u>

- JCCCO will use consumer surveys to measure consumer satisfaction
- JCCCO Customer Service will monitor and report common concerns and obstacles
- JCCCO will set goals for achieving high marks on HEDIS and CAHPS

Clinical Connection to Members

- JCCCO will support patient centered primary care home development
- Community Health Workers will support the CCO's work connecting Members to CCO services

Member to Member Support

- The CCO will explore health innovations based on peer support, support groups and Member activities
- JCCCO will coordinate Community Benefit Programs that will involve CCO stakeholders and the Members of the CAC

In the PCPCH model, patients are encouraged to be active partners in directing their health goals, not passive recipients of care. Members will be involved in transforming the delivery system by actively embracing their health goals, engaging in their care and encouraging collaboration between their various medical providers and their primary care home team. We will use a coordinated approach to educate Members how to navigate a coordinated healthcare system. Clinics may use providers, advocates, case managers, nurses or innovative staff, such as health navigators, to carry out the task of patient engagement. In addition, clinics will be encouraged to establish a Member Advisory Council to ensure that patient voices are represented in the evaluation of the medical home process.

All of the participating FQHCs have consumer majority boards, many of which have been very engaged in the establishment of health homes in these clinics.

A.3.1.c. JCCCO's primary model for medical home development will be the State's PCPCH Program. The list of certified PCPCH distributed by the state is still partial, but JCCCO fully expects that all of our contracted safety net clinics (FQHCs) will be certified at Tier 2 or 3, and most other private practices with more than 3 practitioners will achieve Tier 1. Our primary care payment plan, which we will work with local Jackson County providers to develop further, specifies that clinics achieve at least Tier 1 designation in order to participate. We are also fully engaged in the application to CMS for the Comprehensive Primary Care initiative (CPCi) and should that application be approved, will further give momentum to the effort of clinic certification and primary care home development.

Specifically, we project the following:

- More than 75% of CCO enrollees will be enrolled in clinics with Tier 1 or higher designation by the end of 2012.
- Through local and statewide collaborative efforts in shared learning, as well as payment incentives, we expect that more than 75% of participating CCO clinics will achieve Tier 2 or higher by the end of 2013.
- We will accomplish this by building on participation in our primary care home collaborative. Each clinic in the collaborative, including the two FQHCs in Jackson County, has achieved a Tier 3 PCPCH status.

The coordination and communication among other providers and the PCPCH will be an ongoing priority for the CAP, once it is developed. New initiatives for Jackson County include an initiative to improve clinical information integration with local physicians and lab/radiology interfaces.

A.3.1.d. Though the specific program will be developed locally with the Jackson County provider and long-term care community, JCCCO expects the delivery system to build on the existing framework of communication, work done by the Jefferson Regional Health Alliance (JRHA), and pilot programs in joint management of long-term care Members already in place with the health plan partners.

PCPCH Tier 3 providers attest to having a system in place to coordinate services with long-term care providers which may include visiting clients in nursing homes. PCPCHs will be engaged in coordinating medical services ranging from acute care for minor illness and injuries to management of long term care. PCPCHs will be expected to track referrals and coordinate care where appropriate for community settings outside the PCPCH such as long-term care. Expectations related to care coordination between primary care and outside providers will be specified in individual provider contracts with JCCCO.

A.3.1.e. JCCCO's affiliate, CareOregon, has a long history working with the safety net provider community which JCCCO will draw upon. JCCCO recognizes the importance of safety net providers in caring for the Medicaid population and will contract with the local FQHCs and RHCs in the community. Local FQHCs are certified as Tier 3 PCPCHs. JCCCO's partner, JBH, is currently working to identify initiatives that will enhance mental health services at FQHCs.

As local FQHCs, Community Health Center and La Clinica del Valle will have representation on the JCCCO Governing Board and the CAP. In addition, representatives will actively participate in all aspects of CCO development, implementation, and management.

A.3.2. Other Models of Patient-Centered Primary Health Care

A.3.2.a. JCCCO's affiliate, CareOregon, will partner with the PCPCHs in the Jackson County region to develop a regional Hot Spot program similar to CareOregon's Community Care Program that is operating currently in the Portland area. The aim of such a program is to reduce the total cost of care and/or hospital and ER utilization for a subpopulation of Members who have experienced recent high "potentially avoidable" utilization while improving the experience of care and indicators of health. The crux of this program is the addition of community outreach workers to the PCPCH team to provide critical outreach, engagement, coaching and health literacy activities for high acuity patients. JCCCO will engage its mental health partners in the Jackson County community to ensure the inclusion of their already-existing programs in the outreach approach.

A.3.2.b. The objectives of the Community Care Program are as follows:

- Engage targeted Members in an optimal relationship with a primary health home (physical and behavioral if appropriate), one in which the Member actively participates in a culturally appropriate, trusting and respectful partnership with a care team that knows him/her
- Facilitate the connection of targeted Members to beneficial community resources(including peer specialists), and advocate for critical social services
- Educate and coach targeted Members to improve health literacy, condition-specific self- management skills, and activation in wellness
- Coordinate services and communication between various providers of services on behalf of Members

The Community Care Program has identified the following target population criteria. Within 12 months,

- 2+ non-OB hospital admissions
- 1 non-OB hospital admissions with 0-5 ER admissions
- 1+ psychiatric admission with or without ER admissions
- 6 + ER visits with or without hospital admissions

In order to evaluate the effectiveness of this program, numerous metrics will be tracked and monitored:

- Hospital and ER utilization rates (monthly run charts, before/after program enrollment), time between events, hospital length of stay, time to follow up after hospital discharge
- Total cost of care (before/after program enrollment, population over time)

- Primary health home utilization rates (monthly run charts, before/after program enrollment)
- Client satisfaction with program and with primary health home
- Health home provider satisfaction with program
- Functional health status (quarterly)
- Medication adherence and complexity (before/after program enrollment)
- Condition-specific clinical indicators
- Palliative care and hospice enrollment rates (population over time)

A.3.2.c. The PCPCH is the hub of the outreach workers' daily operation, and outreach workers do the majority of their documentation within the health home electronic medical record system so that coordination and communication with the PCPCH team is centralized. Outreach workers develop a comprehensive picture of the various service providers that are involved with each patient, and work to make these relationships coordinated and effective. Outreach workers see clients in their homes and within a variety of community sites in addition to meeting them in the health home, hospital, skilled nursing facility, or ER. They will often accompany a client to a specialist appointment or mental health visit, and will assist in the coordination of those visits with the primary health home team. When outreach workers are involved in their initial engagement process with a new individual they rely on a 'warm hand-off' if possible from someone on the health home team that knows the individual best; this may be a primary care provider, a mental health counselor, a nurse, or a social worker, among others. Clinical pharmacists, mental health prescribers, psychiatrists, chemical dependency counselors and peer wellness specialists are among the many other health team Members that might collaborate with an outreach worker to develop and implement a care plan for a high risk client.

A.3.2.d. Outreach workers will include long-term care providers and services as in their engagement process with Members and will ensure that coordination with the PCPCH team is ongoing through conversations with the Member of the care team and through the use of health home electronic medical record system.

A.3.3. Access

A.3.3.a. CareOregon's Community Care Program provides individualized, high-touch outreach and engagement to high-risk individuals within their own residential settings rather than relying on these individuals to come into an office setting. Outreach workers usually meet with clients in their homes or in other community locations such as parks, coffee shops, and community centers. JCCCO will engage mental health partners and FQHCs in the service area to ensure the inclusion of their already-existing programs in the Community Care Program approach. The key to the success of this program will be that CareOregon, as JCCCO's affiliate, will hire individuals from within the Jackson County service area who have knowledge of the diverse needs of the community, as well as language skills (especially Spanish) and cultural competency skills to meet the needs of CCO members.

A.3.3.b. Through an existing network of community providers in all specialties and via safety net providers, all physical health services will be covered.

Through a direct service agreement with JCCCO partners, JBH and Jackson County Mental Health Department, contracts exist and full range of functions and services exist for monitoring, improving and supporting mental health services. Assurances can be provided to mitigate any gap or loss in services due to existing downstream agreements.

JBH has current contracts with Providers all over the state for Mental Health residential services, Outpatient Clinics, Behavioral Rehabilitation Programs, Day Treatment Programs, Hospitals, Adult Crisis Resolution Centers and County Mental Health Programs. They also provide financial support to peer-run organizations.

The main barriers that Mental Health faces now are the barriers that we will encounter initially in the CCO environment: the lack of communication, coordination and collaborative problem solving between the various systems. Examples include the following.

Physical and Mental Health

- The lack of communication between Primary Care Physicians, Physical Health Clinics, Physical Health Plans and Community Mental Health Providers leads to duplicated services, inefficiencies and poor treatment for our Members.
- A person with a major mental health challenge is not always capable of following through with appointments, may be symptomatic during an appointment and cause concern for the other patients at the clinic or is often times a complex case that a PCP/Clinic cannot address. These situations, often associated with stigma, lead to an individual with major mental health challenges being misunderstood and even terminated from services and being served by the Community Mental Health Provider only.
- Payment and billing issues routinely arise when a Member is hospitalized or goes to the Emergency Department. It is often unclear whether the Physical Health Plan or the Mental Health Plan should pay for episodes involving complicated cases of Members with co-occurring disorders. Non communication between these systems leads to our community hospitals not being reimbursed and our Members not knowing who to coordinate with.
- Psychotropic medications prescribed to Members are not monitored by the Physical Health Plans or the Mental Health Plans.
- There is currently an identified disparity in availability and culturally appropriate outreach and services for Hispanic Members and seniors.

Mental Health and Alcohol and Drug Services

- Lack of collaboration between these systems for dually diagnosed individuals' results in the Member not getting the services that he/she needs from either system.

Mental Health and Senior and Peoples with Disabilities

- Research suggests that individuals with major mental health challenges die 20-25 years sooner than the average population. Individuals that are experiencing major health problems or end of life issues at the age of 45 - 64 need SPDS involvement but are not being accepted for services because they do not meet criteria.
- There are also existing problems with coordinating care for people who have lived with major mental illness and now show signs of Dementia, Alzheimer's or other cognitive impairments that are often impossible to support with just one of the systems providing services. A joint effort is needed here.
- Not enough residential resources that address the aging population with severe mental health issues and severe medical/physical conditions.

Mental Health and Developmental Disability Services

- Lack of collaboration between these systems for dually diagnosed individuals' results in the Member not getting the services that he/she needs from either or both.

Existing contracts help address some of these barriers, but JCCCO will need to develop a multi-disciplinary community advisory team to address these high-needs Members that are not getting necessary services. Emphasis should be placed on prevention of ER abuse and/or Hospitalizations by collaborating with different agencies to meet the Members' specific needs regardless of eligibility, payment and other barriers to support.

Strategies to address these barriers might include mechanisms for existing committees, such as the Acute Care Council and Member Advisory Council, to meet regularly to discuss issues. Improvement in addressing the above barriers would be monitored through the JCCCO Quality Improvement process. JCCCO may build on

existing partner committees to further expand participation in the community. Examples of community treatment team discussions include:

- Acute Care Council
- Adult Mental Health Initiative Workgroup
- Wraparound Project Committees
- System of Care Advisory Committee
- Quality Management Committee
- Member Advisory Council (Coalition for Mental Health Recovery and Resiliency)
- Collaborative Performance Improvement Project committees
- Early Psychosis Intervention Project Committee
- Operational Care Coordination Committees (Children, Adolescent and Adults)
- Community Coordinated Care committees (in each county)
- Participation in various Statewide committees, including:
  - Intensive Service Array
  - Outcome Measurements for Children
  - Children's System Advisory Council
  - Statewide Wraparound Advisory Committee
  - Quality Improvement
  - Adult Mental Health Initiative
  - Long Term Care
  - Peer-Delivered Services Curriculum Review Committee

Monitoring, improving and supporting mental health services already takes place, in the form of JBH's Delegation and Oversight Policy, and the Utilization Management Policies for Adults and Children. These structures could easily be expanded to encompass all of the services which would be covered by coordinated care. The specific Policies and Procedures mentioned can be accessed on the JBH website, under Provider Services, and are attached for convenience.

A.3.3.c. To engage Members of all covered populations to be informed partners of this model;

- The CCO Governing Board will convene one or more public forums in the months of June and July, 2012.
- The CCO Governing Board will develop a Public Outreach Committee to coordinate these events. These community leaders should include representatives from local social service agencies, public health officials, consumer advocacy organizations and safety-net providers. The CCO will provide staffing support and financial resources to support this community work.
- The public forums will be promoted by JCCCO's affiliate organization, through public relations announcements. The affiliate will be asked to contact stakeholder organizations that they frequently partner with. The purpose of these public forums will be to describe what is envisioned by JCCCO. Ideally it will be attended by Medicaid consumers, local stakeholders and other interested community Members.
- There will be a public sign-up list where anyone interested in participating in the Community Advisory Committee can nominate themselves. The Public Outreach Committee will consider each individual who signed-up to help and participate. Each individual who signed-up will receive a written "thank you" letter within a week that also informs them of the process or status of Community Advisory Committee search.

The Public Outreach Committee will set criteria for the CAC that includes:

- Individuals who either are Oregon Health Plan clients or who work with Oregon Health Plan clients
- Cultural diversity approximate to the demographics of Medicaid clients, with a particular emphasis on Spanish-speaking members

- A range of points of view, networks and personal background
- Commitment to the mission of providing support to OHP clients
- Viewpoints that are representative of those receiving OHP services and of those providing OHP services

None of the CAC Members should work for JCCCO or represent a business entity that will contract with JCCCO.

The Public Outreach Committee will select an initial list of individuals to serve as the initial Community Advisory Committee, and will convene the first meeting of the CAC. At this first meeting, an organizational charter will be proposed, amended and adopted, that clarifies the role of the CAC, its decision making process, the expectations of Members and the process of selecting new Members.

From this point on, the work of engaging JCCCO Members will be initiated by the CAC. The CAC will have some responsibility to communicate directly to CCO Members. The CAC will also advise JCCCO on what communications are expected to be made to its Members from JCCCO itself. The costs of supporting the CAC (including costs associated with Member communication) are to be assumed by JCCCO. JCCCO will not attempt to censor or edit the CAC communications when they are intended to solicit Member advice, input or participation in the CAC.

JCCCO's partner, JBH, has a wide network of community partners and Member advocates. We could invite our partners and advocates to participate and give input for the public outreach efforts. JBH has grown from merely meeting State requirements to becoming a leader in Member participation on various committees and workgroups. They have extensive experience in breaking down the barriers that exist in effective communication and participation in committees, including helping Members migrate from a mere token representative to a fully informed and participating committee Member.

JBH has a track record of recruiting and retaining Members to sit upon its many advisory committees. This has been done through careful consideration of the needs of its Members, as well as developing methods to train and support Members in their engagement on committees. They provide stipends and mileage reimbursements to Members participating in JBH functions. This is done through training and carefully building relationships with the Members who sit on those committees. There has also been careful work and consideration given to not making Members out to be token committee Members. Furthermore JBH works with existing advocacy groups, and supports Members being on statewide committees, as well as being part of trainings.

JBH has mechanisms in place to provide information to Members, in the form of handbooks, newsletters and communications, committee minutes, website and presentations, so they can be informed partners in transitioning to CCOs.

A.3.4. Provider Network Development and Contracts

A.3.4.a. On the physical health side, an existing network is available that consists of long standing community partnerships, including safety net clinics like Community Health Center and La Clinica de Valle, PrimeCare, and each local hospital: Rogue Valley, Providence, and Ashland Community.

Regarding behavioral health, the safety net clinics have employed and borrowed behavioral health providers included in their PCPCH models that enable coordination of care. A relationship with JBH and Jackson County Mental Health Department also provides coordination and access to services in existing community delivery models. Additionally, further coordination will be performed through CareOregon Medical Benefit Assurance Unit for arrangement of services outside the CCO area when needed and available through CareOregon's state-wide network.

JCCCO, through its affiliate and partners, will have access to all primary care, specialty care and tertiary care in Jackson County and beyond its borders. Portland-area Hospitals, Centers of Excellence and Transplant Centers

are all available. JCCCO's affiliate, CareOregon, will recommend and may help develop new payment methodologies for all providers.

JCCCO will contract with JBH under an initial capitated and delegated agreement to provide for mental health services. CareOregon will continue to arrange for addiction treatment services, and engage local addiction treatment providers in the best methods of integrating these programs. CareOregon and JBH will work together to develop a specific plan to integrate the administrative services of physical and mental health over the next twelve months.

JBH has a policy in place for coordinating care with out of network providers when services are not available within the provider network. Policy language includes:

"Every contracted agency is responsible for obtaining covered services for OHP Members that cannot be provided by the agency or its contractors. The cost of such services to the Member cannot exceed the cost for in-network services as specified in the MHO contract. The use of out-of network services should be monitored to determine the need for additional service capacity within the county. All out of network services must be pre-authorized by JBH, or the Member may be responsible for payment for non-authorized out of network services."

JBH currently coordinates care with out-of-network providers on a daily basis; this is done through existing contracts for services throughout the State and with relationships to other MHO's and through relationship with AMH (State). Children often are moved from an emergency room in Southern Oregon to a psychiatric hospital in Portland, sub-acute in Portland, Residential Program locally or outside the area, State Hospital, and then back to the home community with careful discharge planning that involves the team. There are utilization activities that include the program, Jackson County care coordinator, child welfare and juvenile, so that when treatment requires change there is planning that can occur in a timely manner. Adults are moved from State Hospital settings to lower levels of care throughout the State. JBH already has experience with this and would be very eager to develop those relationships within the physical health side as well. Through the work of the Child and Family Team and the Wraparound model, this is a part of services currently provided by JBH.

JBH will continue to develop peer-delivered services, including focusing on building wellness oriented services and integrating with the physical health and drug and alcohol services. They will also continue to promote wellness activities including tobacco cessation, Living Well with Chronic Conditions classes, and supporting peer-run organizations.

JBH has a history of being responsive to the needs of our Members, including helping to facilitate their move to another service provider network, which would better meet their needs. Special unique needs are a challenge and are addressed for Members on the borders of certain counties or catchment areas.

JBH has strategies to implement specialized integrated care approaches for these target high-risk populations:

- High utilizers of emergency room services—adults
- High utilizers of emergency room services—children and adolescents
- High outpatient medical utilization for adults with moderate (anxiety/depression) mental health needs
- Drug-seeking adults
- Adults with chemical dependency problems and physical health complications
- Adults in Extended Care Projects (with histories of long-term state hospitalizations)
- Children and adolescents with histories of trauma (PTSD)
- Older adults with depression
- Adults with co-occurring mental health and chemical dependency problems
- Adults with pain management needs

- Transition age youth experiencing a first psychotic episode
- Adults with major mental health challenges who die 20-25 years earlier than others

A.3.4.b. CareOregon's Community Care Program provides community-based health literacy, self-management, and educational interventions to patients who have a recent history of high hospital and ER utilization. A primary goal for these interventions is a reduction in inpatient admissions and readmissions.

Jackson County has well established alternatives to acute inpatient care for behavioral health. JCCCO will support the existing system of services. JCMH community crisis workers assess individuals in crisis and develop community safety plans to divert those individuals from inpatient care. On a daily basis, JCMH staff evaluate individuals admitted on holds to the behavioral health unit and assist hospital staff with discharge to lower levels of care as quickly as possible. Various respite options are available for diversion and step down, including access to the Crisis Resolution center in Grants Pass, respite beds at mental health and sobering facilities, crisis treatment foster care options for children, and daily support and monitoring for individuals in local motels. The community supports program at JCMH offers a range of community based supports and services to assist individuals with serious mental illness to avoid the need for inpatient treatment, including intensive case management, skills training, benefits management, medication training and support, supported housing and supported employment.

Adult Utilization Policy and procedures are described as:

"Clear delineations of responsibility and procedural protocols that govern the utilization review of acute care episodes. These protocols view the utilization review process as a shared responsibility between JBH and Member county mental health programs. These policies and procedures shall be consistent with Utilization Control requirements of 42 CFR Part 456." Per the Adult UM Policy, JBH, in its contract with the state, is required to conduct utilization review activities in accordance with 42 CFR Part 456, which details processes by which acute care admissions, lengths-of-stay and discharges are reviewed and monitored. JBH and CMHP staff conducting these utilization reviews will meet ISSR requirements for QMHP, and have appropriate clinical expertise in treating the enrollee's condition or illness.

Reviews may occur at various points during an episode of care: pre-admission (Prospective Review), during course of stay (Concurrent Review), or after discharge (Retrospective Review). In addition provisions for Post-Stabilization services are monitored with the intention of minimizing potential for, or preventing readmissions.

Within JCMH is Intensive Community Treatment Services. This is designed to keep youth and children in the home community with services that will prevent inpatient hospitalizations. With good Wraparound and care coordination this is possible in most cases. There are also advisory councils that discuss ongoing needs and barriers to services and ways to implement new services that will address those needs. JBH has contracts for Psychiatric Respite (which was developed from advisory council recommendations) that provides alternative treatment for very short term stabilization, and evaluations. This often prevents hospitalization and long term care by providing brief interventions and evaluations for ongoing treatment needs.

JCCCO will use the following strategies to help decrease unnecessary inpatient utilization for children and adults.

- Formulation of a multidisciplinary crisis response team, including mental health, drug and alcohol, developmental disabilities, human services, primary care providers, emergency department personnel, community health centers and Members.
- Diversion: Development of policies, protocol and resources for children, youth, youth in transition and adults.

- Support innovative or non-traditional community programs and supports, such as peer-run organizations, dual diagnosis groups, early psychosis intervention teams and Assertive Community Treatment Teams and enhanced utilization of trauma-informed care.
- As a subcommittee of the CCO's clinical care committee, create a multiagency program development committee to transform the current delivery system into a seamless integrated system of care.

A.3.4.c. There is a behavioral health network in Jackson County that will be available through JCCCO's partners and their existing relationships:

- Jackson County Health & Human Services and Jefferson Behavioral Health will provide a continuum of care at various locations in the county, with opportunities for consolidated and streamlined services and operations.
- Between these organizations, there will be direct OP services and access to inpatient and outpatient services. The system provides a continuum of mental health treatment at different levels from inpatient, residential and foster care, through transitional housing to supported independent living. The AMHI (Adult Mental Health Initiative) Coordinator and Residential services staff monitor level of care using a standard tool and ensure that adults are served and supported at the most independent level. A similar process exists for children where care coordinators assist in assessing the level of care needed and working with individuals and their families to determine the supports and services needed to allow the child to live in the least restrictive setting possible.
- The Clinical Advisory Panel will provide input to the Governance Board on best practices and community needs for any delivery enhancements.

JCCCO's partner, JBH, has been part of the Adult Mental Health Initiative (AMHI) since its inception in 2010. This is a project that works toward providing services to help transition adults with mental illness into living independently. Through this project, we have developed a support network and coordination among providers to help provide the supports necessary to help people transition from high levels of care (Oregon State Hospital/residential treatment facilities) into community placements. They are already coordinating with an extensive network of community providers and services which enable Members to live in the least restrictive environment and most appropriate and independent settings for which they are capable. Their Exceptional Needs Care Coordinator (ENCC) has many years of experience in accessing resources for Members. These services are available through community mental health programs and other state funded and monitored resources and include supported employment, supported housing, foster care homes and facilities, assertive community treatment teams, peer support centers and advocates and skills training resources.

On the children's mental health side, JBH has been serving this function since 2006, when the Children's System Change Initiative was implemented. JBH has worked with county mental health providers and has contracted with children's providers collaboratively to help keep children in their communities and to support their families in ways to make this happen. JBH has been innovative in its approach, and continues to develop services to meet the needs of families and children. This has also been achieved through the Rogue Valley Wraparound Project, which is a service designed to help meet the needs of a population of children who traditionally use large amounts of high cost services. This project has brought together Child Welfare, Mental Health Providers, Family Members, and other child serving agencies. Another innovative feature of this project is the use of Peer Delivered Services through the deployment of Family and Youth Partners, as well as family Members, on decision making bodies throughout the entire project.

Through its mental health partners, JCCCO will enhance and create additional community supports and innovative approaches which will help achieve the Triple Aim and ensure Members' care is provided in the most integrated and least restrictive environment. These supports may include: multidisciplinary care

coordination teams, home and community based services, person-centered primary care homes, and peer delivered services and peer supports.

A.3.5. Coordination, Transition and Care Management

Care Coordination

A.3.5.a. Currently information about individuals seen through the mental health crisis system are reviewed each day and sent to treating clinicians. Notification of the primary care provider will become an automatic part of that communication loop. Records from the behavioral health care unit are accessed by JCMH staff who are involved in discharge planning and arrangement of post discharge services. Again automatic distribution to primary care providers will be established. JCCCO will develop a data interface with the electronic health record established at JCMH to assist in the flow of information among providers.

Partner JBH has extensive experience in working with the Olmstead Act implementation strategy and a thorough knowledge of the multiple levels of long-term care and support system throughout Oregon. JBH is prepared to assist JCCCO in complying with any requirements from the pending US Department of Justice settlement agreement. There are systems in place through the Adult and Children's Services staff that regularly communicate with these providers and services through placement, monitoring and review processes. JBH utilizes regional and statewide placements to tailor the care needs to the individuals and their recovery goals. In conjunction with JCMH, JBH staff manages referrals to the State Hospitals, Sub-Acute Care facilities, secure and non-secure residential treatment facilities, and foster homes. They provide oversight in the form of regularly scheduled site reviews and follow the progress of Members through regular contact and interviews with both the Members and their service providers.

JCCCO will employ the following strategies to support the coordination of care between providers.

- Use Child and Family Teams to provide care coordination for Members in need of services that meet the criteria for Intensive Service Array determination.
- Sponsor trainings around facilitation of child and family teams and have trainers available for ongoing education needs of existing and newly hired staff.
- Employ Exceptional Needs Care Coordinators who are experienced in coordination of care across systems for Members of all ages.
- Provide training in person-centered planning, System of Care training, Tobacco Cessation training, peer delivered services training and provider trainings related to coordination of care with other healthcare providers.
- Provide trainings to Members on accessing services and supports for the last two years.
- Sponsor Members attending the Substance Abuse and Mental Health Services Administration's Annual Alternatives Conference, and attend other statewide conferences.
- Develop and implement an effective Health Information Exchange system that will allow all providers involved in the care of Members to have access to medication records and other relevant aspects of Members' care.
- Initiate a system enhancement to provide access to primary care for each Member residing in the long-term care system, where information is shared between mental health and primary care (including vision and dental care).
- Expand current Memoranda of Understanding with multiple human services and community partners in the children's Wraparound Pilot project and throughout the long-term care system, capitalizing upon the enhanced flexibility with the State's 1915(i) waiver.

A.3.5.b. The provision of crisis services and community based support services will be available through JCCCO partner, Jackson County Mental Health (JCMH). Strong relationships will be established between JCCCO and care coordination staff and designated individuals within these two programs to resolve any access problems and assist in coordination of care. JCCCO will support and have access to the well established chronic disease self management program in the county, including groups specifically for individuals with serious mental illness. In addition JCCCO will work with the county prevention programs in public health and addictions to mutually support prevention efforts.

A.3.5.c. JCCCO will develop a tool for provider use to assist in the culturally and linguistically appropriate education of Members about care coordination, and the responsibilities of both providers and Members in assuring effective communication via the following:

- Provide a comprehensive online provider manual that includes information on operations, care coordination, authorization, service requirements, cultural/linguistic expectations, education on Member-provider relationship building.
- Online provider directory that includes language options.
- Online provider newsletter that includes information that supports education regarding care coordination, provider/Member responsibilities, etc.
- Training courses that support provider education in process improvement, cultural awareness, effective communications, etc.
- Provide social media feed for providers regarding late breaking news, changes, opportunities, education.

A.3.5.d. JCCCO's affiliate, CareOregon, will provide claims-based utilization profiles for Members residing in Jackson County. These profiles will allow primary care and specialty providers to identify high acuity and high cost patients that would benefit from intensive care coordination and outreach efforts such as CareOregon's Community Care Program. CareOregon will also provide claims-based predictive modeling reports to local provider organizations that assist in the identification of diagnostically-defined high-risk subgroups of patients that could benefit from care coordination and chronic disease interventions.

Through its contracts and agreement with Jackson County, JCCCO will establish methods for the dissemination of information and coordination of care for CCO Members with developmental disabilities through the county developmental disabilities division. JCMH staff meets regularly with county DD staff to coordinate care for individuals with developmental disabilities who also have mental illness.

JCCCO's partner, JBH, will continue to address an array of integrated services for Members with multiple physical health diagnoses, drug and alcohol addictions and developmental disabilities in relationship to their primary or secondary mental health conditions. JBH is uniquely positioned as the regional host for Developmental Disability crisis services and coordinates the crisis needs of the majority of developmentally disabled individuals who also have mental health challenges.

JCCCO will build upon an already-existing community meeting structure and other local forums to bring community providers and agencies together to discuss the needs of individuals as well as the needs of the community.

Developmental Disabilities: Region V is a division of Jefferson Behavioral Health. Region V Crisis Diversion office is the product of an intergovernmental partnership of Coos, Curry, Douglas, Jackson, Josephine and Klamath Counties' Developmental Disabilities (DD) Programs. Since 1999, the Region V office has provided coordination of crisis services and placements to DD children at risk of out of home placement and to DD adults whose community supports are in jeopardy and/or are at risk of Civil Commitment under ORS 427.

There are many roles and responsibilities at the Region, including crisis assessments, technical assistance, behavioral consultation, coordination of crisis placements and long term placements, transitional planning for

T-18 placements and new development of services across the Region. Region V also supports many service providers across the six counties by offering various training seminars and sponsoring several Behavioral Consultant Mentorship programs.

Region V manages and authorizes all Short Term Diversion Crisis SE44 funding for DD individuals who meet crisis eligibility and qualify for crisis diversion services within the six counties. Disbursement of SE44 funds is subject to strict protocols which Region V must comply with per DHS/ODDS policy transmittals.

Authorization of long term funding is subject to ODDS and Region V's Utilization Committee. The Utilization Committee (UC) is comprised of representatives from all six counties which attend meetings six times per year. The UC approves long term diversion funding for DD children and adults, along with approval for funding DD individuals who are eligible for Turning 18 or Turning 21 funding.

Region V's partnerships extend across various DHS agencies, however the Region V program is an integral community partner with County DD Program's and Brokerages to stabilize individuals with Developmental Disabilities experiencing crisis.

A.3.5.e. JCCCO will meet this requirement through its partnership with JCMH. The Community Supports Services (CSS) and Intensive Community-based Services and Supports (ICTS) programs at JCMH provide care coordination for adults with serious mental illness and children with severe emotional disorders respectively. Program staff ensures that all participants are receiving physical health care, often accompanying individuals to medical appointments. Staff also coordinate care with other involved agencies such as schools, Child Welfare, adult and Juvenile Corrections, Self Sufficiency and Vocational Rehabilitation. In addition to specific program continuation and development, the use of person-centered recovery planning and trauma-informed care will be prioritized throughout engagement.

A.3.5.f. JCCCO's affiliate, CareOregon, will partner with FQHCs and safety-net providers in Jackson County to facilitate the inclusion of community outreach workers as a critical component of their care team. CareOregon's current experience has proven that outreach workers can function primarily as 'engagement specialists' who specialize in engaging and motivating individuals often labeled as "resistant," "noncompliant," and/or "troubled or disruptive," and bring with them a fundamentally nonjudgmental and compassionate attitude toward such individuals.

Community outreach workers see clients in their homes and within a variety of community sites in addition to meeting them in the health home, hospital, skilled nursing facility, or ER. They will often accompany a client to a specialist appointment or mental health visit, and will assist in the coordination of those visits with the primary health home team. Clinical pharmacists, mental health prescribers, psychiatrists, chemical dependency counselors and peer wellness specialists are among the many other health team Members that might collaborate with an outreach worker to develop and implement a care plan for a high risk client.

Ultimately, community outreach workers are tasked with partnering, guiding, and "walking alongside" our high risk Members with a goal of stabilizing their health in such a way that results in less expensive resource use, more frequent and/or optimal 'touch points' with a primary health home, an improved sense of well-being for the client, and improved clinical health indicators. This process is highly individualized and may require a plethora of non-traditional methods of engagement (e.g. going to a bar to meet with a client), trust building (e.g. helping a client move out of a destructive home environment) of engagement, and health coaching (e.g. buying a swim suit for a client) over a significant amount of time before the proverbial corner is turned.

For Members with intensive care coordination needs and health disparities due to serious mental illness, through JCMH, JCCCO will access evidence-based practices such as Strengths-Based Case Management, Supported Housing, Supported Employment and Peer Support. The use of community based outreach workers in the CSS and ICTS programs at JCMH is well established for those with serious mental illness. Tobacco

cessation efforts, wellness programs and chronic disease self management will be particularly supported for this population. JCMH and CareOregon are partnering with the FQHC's in the county to pilot a project where community health workers will engage individuals showing high utilization through assertive outreach and support.

JBH has shown state and national leadership in peer delivered and peer support services such as the community survival project, dual diagnosis anonymous, and other peer/advocate support systems. Jefferson Behavioral Health has trained 36 adult consumers and 15 Family Members and Youth in the last year through an AMH approved Peer Delivered Services Curriculum. These Members are now eligible to be hired by programs to start providing Medicaid-billable Peer Delivered Services. Evidence continues to show that Peer Support is central to improving mental health outcomes for peers. The JBH Member Services Specialist is a Member of the AMH Peer Delivered Services Curriculum Review Committee, and has been a part of the state-wide effort to build and support Peer Services as a part of the mental health system.

JBH has also continued to support Peer Delivered Services through the support of Consumer Operated Programs throughout the JBH Region. There is continually growing evidence that these programs are effective in helping people achieve positive outcomes with their mental health treatment. Through continuing to support these programs, as well as nurture further efforts, JBH can help JCCCO provide innovative services to their Members.

JCCCO will support the following strategies to ensure coordinated care for Members with intensive needs.

- JBH, through the integrated network, will support the development of peer wellness specialists. Peer wellness specialists will support Members in wellness activities including: nutrition, living well with chronic conditions, wellness recovery action planning, tobacco cessation, physical activities and socialization.
- Through integrated efforts, target the disparity that exists with Members suffering from mental illness, who have a 25-year shorter life expectancy than the general population.
- Help support the creation of health navigators that will meet the specific needs of people with mental illness.
- Work with the CCO to fully assess the integrated health needs of all Members in all settings.
- Continue to conduct ongoing research into new and evolving evidenced based practices and provide ongoing training opportunities for all partners in the health care spectrum.
- JBH will continue to conduct ongoing research into new and evolving evidenced based practices and provide ongoing training opportunities for all partners in the health care spectrum.

<u>Assignment of Responsibility & Accountability</u>

A.3.5.g. JCCCO will initially assign Members its existing affiliate, CareOregon, in order to ensure continuity of care for currently enrolled Members. New enrollees will be assigned initially using the State's current Auto Assignment algorithm. Future Member assignments are expected to be based on performance measures that emphasize the outcome goals under the Triple Aim as well as PIP measures such as "Time to First Appointment."

CareOregon assigns all Members to a Primary Care Provider within 30 days of enrollment and relevant PCP contact information is provided to the Member upon assignment. Members are assigned based on prior history with a primary care provider, Member preference, or provider availability in terms of capacity or geography. The PCP also has access to an assigned roster on a regular basis so that the provider can accommodate patient requests upon initial contact. Member education materials encourage the establishment of care immediately upon attaining benefit eligibility.

A.3.5.h. JCCCO believes that quality medical care is most appropriately rendered in the Member's prevalent language with awareness for and sensitivity to cultural differences and similarities, and the effect of those on the

experience of the Members medical care. CareOregon Customer Service staff has a full complement of Spanish-speaking staff members, and experience arranging interpretation services statewide for more than 50 languages. Access to qualified interpretation services shall be provided in person or by telephone in providers' offices and in other contracted ancillary or facility providers. JCCCO will require that communication preferences are documented in the medical records including documentation on accommodations made. JCCCO will require that interpreters have required training and certification, are proficient in communicating in English and the primary language of the Members and able to interpret medical information effectively. A minor child should not be used as a communicator. Family Members or friends should only be used as adjunctive communicators if the Member prefers.

Comprehensive Transitional Care

A.3.5.i. JCCCO's affiliate, CareOregon, currently works with Members during transitions of care from a hospital setting, inpatient rehab, skilled nursing facilities and emergency departments. CareOregon's Utilization Management and CareSupport programs refer Members who have any of 21 diagnoses to our disease management vendor, Health Integrated (HI), as soon as the Member is identified – either through utilization management activity or case management activity. HI works with CareOregon internal staff and the Member to assure safe transitions across settings of care while the Member is engaged in support. There is a monthly clinical coordination meeting in which specific Members are discussed and the plan of care is updated. The outreach worker for HI attends Concurrent Review (CR) rounds on a routine basis, and will also accompany the CR RN in the hospital if the Member is difficult to contact in the community. The outreach worker also meets routinely with CareSupport staff to discuss and coordinate cases across transitions for Members. CareOregon also have two palliative care programs which would expand into southern Oregon. They have an active Concurrent Review (CR) program in all of the hospitals to which plan Members are admitted. This review may be conducted telephonically or onsite. The CR RN actively engages with hospital staff including hospitalists, discharge planners and social workers, as well as Members and their representatives, to discuss the plan of care for the Member, and to actively assure a safe transition to the next care setting. CR RNs utilize information and reports within the CareOregon system in this collaboration. They also conduct CR in Skilled Nursing Facilities (SNF). CareOregon's RNs are responsible for the timely flow of information for Member stays in participating hospitals, and at times, in non-participating hospitals, and in skilled nursing facilities, palliative care programs, and inpatient rehab facilities. CareOregon staff assists in the management of transitions in levels of care, by working collaboratively across Utilization Management, CareSupport, CareOregon Clinical Programs, and facility staff. They additionally provide faxed notification of both planned and unplanned inpatient admissions to the Member's assigned primary care provider (PCP) the same day CareOregon is notified of the admission so the PCP can share the Member's plan of care with the admitting facility for a safe transition. Notification of discharge is also faxed to the Member's PCP.

Utilization Management staff identifies Members at risk of adverse outcomes and refers them to the CareSupport case management program or other CareOregon Clinical Programs, including our delegated disease management program.

The daily hospital census includes information about Member history of enrollment in CareSupport, and other clinical programs in order to assure that our programs are aware of the Member's admission to the hospital.

Comprehensive care transition strategies related to reducing readmissions will be prioritized for behavioral and physical health. System improvements will include standardization of the admission and discharge transition processes and emphasizing PCP notification throughout the patient's stay. At discharge, a standard discharge document would be sent to the Member's PCP or other primary provider, and if they do not have one, the hospital would identify one and set up a follow-up appointment. Standard risk assessment tools will be used across the provider network to identify those who are especially at risk and will require additional support.

Lastly, medication reconciliation and coordination is a common reason for readmission (locally and nationally). JCCCO will practice the evaluation of systemic solutions in such a single formulary and work with affiliate and partner delivery systems to ensure accurate medication reconciliation occurs at each transition.

Technical improvements will include a HIPAA-compliant Emergency Department Information Exchange (EDIE) or similar platform to facilitate transmission of discharge summaries from any hospital Electronic Health Record (EHR) and transmit them to the primary health home within 24 hours of discharge, with concurrent alerts to the PCP and other involved caregivers. EDIE, or similar systems, can be multi-directional, used not only to communicate hospital discharge needs to community providers but also to communicate primary care-based care plans to a hospital, ED, or other acute care providers. Any of the care managers discussed in previous sections will be able to attach their care plans to identified Members so that they are immediately available to providers at different points of care. As more care management is built into primary health homes, this information technology will allow a much higher level of information sharing and care coordination. The EDIE or similar system can also function to coordinate transitions between other care settings. Just as it can transmit discharge summaries from hospital to primary care and alert key providers, the system can transmit care summaries and send alerts from any level of care setting to the patient's next providers. This can facilitate the standardization of workflows, including follow up contacts and scheduling appointments or intakes, across the multiple settings that may be involved in a patient's care. Once standard workflows to and from primary care have been established, workflows to other settings such as skilled nursing facilities and assisted living, will be added.

A.3.5.j. The Long Term Care Program began as a joint venture with CareOregon, a large medical group in the Portland area, and Seniors and People with Disabilities (SPD). The program utilizes a Nurse Practitioner (NP) to perform home visits on chronically ill CareOregon Members, living in their home or in an adult foster home, who need additional support to access care/treatment, or are having difficulty working within the regular medical system. The NP works directly with the Member's Primary Care Providers (PCP) and SPD case managers. The focus is to improve the quality of health care services, coordinate chronic disease treatment, streamline access, avoid over use of the ER, assure safe transitions, and avoid unnecessary hospitalizations for these Members. Once the Member is stabilized, the NP may release them back to the sole care of the PCP, or in some cases, follow the patient for a longer period of time. CareOregon works with the NP and PCP to discuss currently enrolled Members and barriers they have to receiving care. CareOregon and the NP work together to assure that Member needs are met while coordinating services and appropriate payments within the benefit structure. JCCCO will support the deployment of the CareOregon Long Term Care Program in Jackson County.

A.3.5.k. JCCCO's affiliate, CareOregon, currently has a transitional tracking system in place. Transitions work in concurrent review includes the CR RN working actively with discharge planners and CareSupport staff while the Member is in the inpatient setting. The CR RN works to facilitate a safe and effective discharge plan. Work begins with CareSupport early in the Member's hospital stay in order to proactively assist the Member during the transition process. CareOregon has a CR RN that reviews all SNF stays. In addition to the review work for level of care, she will also visit SNFs to participate in Care Conferences on specific Members. She additionally visits Members and, if available, their families to discuss transitions to other care settings.

Transition work continues after discharge with CareSupport and the Hot Spot program. CareSupport utilizes daily census reports from an electronic system which identifies Members at admission and includes all inpatient, SNF, and Home Health admissions for the past year. They additionally utilize another report from the system which identifies that a Member has been discharged from the inpatient or SNF setting. They follow the Member for 30 days, work with the Member on their plan of care, and document contact with the Member and the Member's family in the electronic system.

In the above cases, JCCCO would be adding on to existing programs and document management systems within its affiliate, CareOregon. We would need to develop programs in the area for palliative care, as

CareOregon has done in the Portland area. JCCCO would also need to expand presence in Adult Foster Care Facilities.

Please refer to CareOregon's Utilization Management Program description and QI description in attached document **2c. CareOregon QI Program - JCCCO** for further information.

The current system of coordination with psychiatric residential treatment providers and state hospitals used by partners JBH and JCMH will continue to be used to coordinate discharge planning and develop transitional care plans for individuals with serious mental illness. At the county, the AMHI coordinator (adults) and the ISA Coordinator (children) participate in hospital discharge planning meetings and develop a community plan for transition back into the community. JCMH provides a range of transitional and community supports for children and adults including intensive case management, skills training, medication oversight, benefits management, supported housing and supported employment. An individual care coordinator will be assigned for each AMHI client and will coordinate primary care, habilitative supports (funded with the 1915i SPA), mental health treatment supports, residential services, state hospital services, community corrections, developmental disabilities programs, Aging and Disability Services and additional recovery needs and commitments.

In addition to specific programs and personnel driven coordination efforts, development of population-based information systems will significantly improve coordination. Utilization management databases and middleware for physical health and behavioral health will be integrated to minimize redundant efforts and maximize return on investment in benefits management.

Individual Care Plans

A.3.5.l. Individualized care plans are currently developed for adults and children needing intensive community based services, including personal care plans for those in foster care. The AMHI coordinator, foster care case manager and ISA coordinator are responsible for ensuring that such plans are in place. There is a process in place to determine level of need for screening individuals for admission into an intensive level of care. Individuals in these high levels of care are re-assessed every ninety (90) days.

A.3.5.m. Upon enrollment, all JCCCO Members will be mailed a health assessment survey as part of their Welcome Packet. Returned surveys will be screened by the Care Coordination team and follow-up will occur as appropriate.

Certain eligibility categories of JCCCO Members will be automatically referred for intensive care coordination. In addition, JCCCO Members may also be identified for intensive care coordination services upon enrollment via Self-Reported Health Risk Assessments, self-referral, from a PCP, agency caseworker, a representative, other health care or social services agencies and through claims-based or diagnosis-driven trigger lists throughout eligibility with JCCCO. Intensive care coordination services will also be available to coordinate covered services for Members who exhibit inappropriate, disruptive or threatening behavior in a practitioner's office.

Information about services available through intensive care coordination is communicated to the eligible Member according to the most appropriate communication method including accommodations for impaired, disabled, alternative language or other cultural differences.

A.3.5.n. JCCCO is currently in discussions with AAA/APD to finalize standard memoranda of understanding with local Medicaid LTC agencies. MOUs will outline requisite roles, responsibilities and scopes of work. This document will be available at the time of the Readiness Review.

A.3.5.o. Individualized care plans developed for adults and children needing intensive community based services will be re-assessed every ninety (90) days or as needed. Upon review, individualized care plans will be modified as necessary. Re-assessments are not limited to changes in clinical status only, but may be triggered by changes in overall health factors, environmental factors (housing), patient activation (motivational interviewing), and identification of barriers to social services and other programs. Community health workers and care management staff are particularly adept at identifying these re-assessment triggers.

A.3.5.p. JCCCO partner, JBH, has been following the OARs and the ISSRs in developing and training the CMHPs in the use of the Individual Services and Supports Plan for outpatient services, and in oversight of the residential care facilities' Care Plans for residents of licensed homes. These service and care plans are based on Comprehensive Assessments which are completed on every individual to determine treatment issues and needs. The comprehensive assessments identify and make referrals for critical risk factors and co-occurring disorders such as suicide potential, medical disorders, tobacco and other substance use or abuse. ISSPs and Care plans are reviewed regularly with treatment teams on an ongoing basis to update goals and desired outcomes.

Plans are currently developed within the children's programs that include a service coordination plan that identifies strengths and needs and then plans and coordinates services around those identified service needs. The ongoing coordination occurs within Child and Family Team meetings. The team consists of family and those providing the services to the individual. There is constant review of the needs and the plans reflect those changes. To begin high level service, there is a Level of Service Intensity Determination process and a Certificate of Need Process. The level of Service Intensity Determination is done by completing an ECSII or a CASII, then reviewing the most recent mental health assessment, and looking at various factors such as, how many agencies the child is involved with, school, socioeconomic conditions, DSM diagnoses, family dynamics, symptomology, developmental disorders, juvenile, etc. to determine level of need. To complete a Certificate of Need, various documents are reviewed, most recent psychiatric evaluation, mental health evaluation, plan of care, degree of symptoms, diagnosis, and progress in current treatment levels.

Ongoing utilization reviews are carried out for residential on a monthly basis, Day Treatment on a quarterly basis, BRS and wraparound on a monthly basis, and psychiatric respite and enhanced PRTS on a weekly basis.

JCCCO will use the following strategies to share and coordinate individualized care plans for Members.

- Develop a universal, integrated screening and assessment tool.
- Continue educating our providers and partners in changes in federal and State rules regarding service provision, billing and documentation.
- Convene a planning team to collaboratively develop a universal screening process ensuring that all partners, including local Type B AAA and APD providers as well as DHS Medicaid funded LTC providers participate equally in the creation of an instrument, provide training on its use and fidelity measures to the model.
- Track through semiannual or more frequent reassessments for high needs Members as part of JCCCO quality assurance activities.

A.3.6. Care Integration

Mental Health and Chemical Dependency Services and Supports

A.3.6.a. JCCCO's affiliate, CareOregon, is already responsible for the planning, funding, development and oversight of services and provider networks to meet the capacity and behavioral health needs of all age groups, Medicaid Members and uninsured residents in the service area. In partnership with the community, JCCCO will make ongoing improvements to the availability, accessibility, and quality of culturally appropriate prevention, treatment and recovery oriented services.

Changes in Medicaid enrollment, employment or unemployment and overall population growth all impact the need to increase or decrease capacity in the provider network. The provider panel will be routinely adjusted to expand or contract service capacity to ensure adequate access to services. JCCCO and its partners will be able to offer culturally appropriate and specific services for all age groups ranging from crisis intervention available to the entire community to evidence based general behavioral outpatient, intensive outpatient including 24-hour intensive service wraparound service programs, early psychosis intervention, peer run and peer delivered services, supported employment and education programs, respite care, residential treatment programs, sub-acute facilities and inpatient treatment services. Many of the same mental health and addiction agencies offer services across the entire region with some providers specific to service provision in one county.

The provider networks and service programs have become increasingly more diverse as the populations served have become more culturally and socially diverse. The workforce is also changing from what has traditionally been a professionally-driven workforce focused on reduction of symptoms, to greater inclusion and employment of peer mentors and peer support specialists working on mental health promotion and overall wellness in recovery. Some specialized treatment services and prevention programs like early childhood mental health, school based mental health, crisis services, child and family Wraparound care coordination, culturally specific addiction prevention programs for youth and adults, early psychosis intervention, pre- and post-commitment services are not contracted out and the services are performed directly by county staff.

A.3.6.b. As the lead outpatient services provider in the community, partner JCMH has several Spanish speaking providers and providers with diverse cultural backgrounds. Subcontracts with other providers such as La Clinica allow for additional diversity. JCCCO will contract directly with OnTrack and Addictions Recovery Center (ARC), the primary chemical dependency providers in Jackson County. Both agencies have a history of close collaboration with JCMH and the FQHCs.

A.3.6.c. Through its partnership with the Local Mental Health Authority, JCCCO will be able to deliver high quality systems of integrated care to meet the range of age, developmental stages, cultural and social needs for individuals with mental health and addiction disorders. In addition, Members will be able to access culturally appropriate phone based and community outreach programs that provide preventive support and information, engagement, screening for mental health and addiction issues, coordination of care and immediate or follow up referrals based on acuity and need.

In the County's FQHCs, Members can access screening and brief intervention for mental health and addiction issues along with their primary care. Likewise, specialty mental health team based programs including early psychosis programs, 24-hour intensive case management programs, culturally specific socialization programs as well as respite and sub-acute services all offer primary care screening and services through nurses or other team medical staff.

A.3.6.d. Integration of Mental Health will come from strategic partnerships with JBH and Jackson County HHS, Mental Health Division (JCMH) as a lead outpatient services provider. Each of these organizations will contribute their network of inpatient and outpatient treatment providers, administrative support and coordination. JBH is also one of the MHOs contracted for Dual Diagnosis Anonymous – self help groups with local meetings. JCMH, OnTrack and ARC have a coordinated system of referral and consultation for individuals with co-occurring mental health and chemical dependency disorders. The Jackson County Addictions Manager oversees the array of chemical dependency prevention and treatment services available in the county and facilitates collaboration among JCMH and chemical dependency providers. The community crisis response system relies on collaboration among these providers, law enforcement, local hospitals and shelters and veteran's services. Involvement with the PSCC mental health subcommittee, the local Alcohol and Drug Planning Committee and the county Prevention Council will assist in further developing the system of services and supports.

JCCCO's partner, JBH, already coordinates with an extensive network of community providers and services which enable Members to live in the least restrictive environment and most appropriate and independent settings for which they are capable. Their exceptional needs care coordinator (ENCC) has many years of experience in accessing resources for Members. They assist in transitions from the State Hospitals and have a system of services and supports already in place. Their clinical practice guidelines refer to evidence based, recovery oriented practices. In general, the guidelines recommended are consistent with the Recovery Model of mental health care. SAMHSA, the Substance Abuse and Mental Health Services Administration within the US Department of Health and Human Services issued a consensus statement in 2004, defining "Mental Health Recovery" as "a journey of healing and transformation enabling a person with a mental health problem to live a meaningful life in a community of his or her choice while striving to achieve his or her full potential."

The Recovery model recognizes that client needs are unique to each individual, and therefore a variety of evidence-based methods may be clinically appropriate or indicated. JBH endorses and encourages the use of AMH approved EBP (evidence based practices) in a variety of community-based services that support empowerment of persons with mental illnesses to recover.

The services JBH coordinates are available through JCMH and other state funded and monitored resources and include supported employment, supported housing, foster care homes and facilities, intensive community treatment teams, peer support centers and advocates, and skills training resources.

Currently in the Children's Program Care Coordination occurs at the higher level of service intensity and now through the fidelity wraparound project. Drug and alcohol could easily be brought into this and screening for drug and alcohol use should definitely be implemented when prescribing psychotropic meds.

JCCCO will also pursue the following strategies to organize a system of services and supports for mental health and chemical dependency.

- Build on community collaborative care committees to bring in new partners. This would be very valuable in prevention and development and could certainly work on development of a community crisis response. There are conversations currently going on now within the mental health and child welfare partnership through the wraparound projects.
- Continue to train staff and providers in collaborative problem solving which is a state recognized intervention that would work well in the system of care as it expands.
- Perform a community needs assessment using non-traditional community health workers
- Continue to research, identify and implement effective training programs in diversity, as well as models of care that are culturally appropriate and effective for the needs in this region. Target groups that have been identified to have health disparities, such as: culture, race, language, age, gender, sexual orientation, and socioeconomic status.

- Actively recruit bilingual/bicultural providers in universities located in urban and metropolitan areas, professional organizations, etc.
- Actively work to retain qualified providers through appropriate incentives.
- Continue to provide language interpretation and alternative written formats.
- Use feedback from Member advocates to inform us about their experiences and challenges related to the cultural appropriateness of the services being offered.
- Ensure that services are provided in a culturally sensitive and in an individualized manner that tends to the unique needs of each Member.

Oral Health

A.3.6.e. JCCCO intends to begin discussions with Dental Care Organizations (DCO) operating in Jackson County in early 2013 to evaluate the feasibility of developing contractual arrangements to serve the oral health needs of JCCCO Members prior to July, 2014, pursuant to HB 3650. Here is a draft timeline:

- July-September 2012: Include DCOs and dental providers (including school-based dental programs) in initial solicitation of projects to fund to achieve the Triple Aim
- October – December 2012: Invite DCOs to attend JCCCO board meeting(s) to discuss integration opportunities and challenges
- January-March 2013: CCO Board develops a plan for integration of dental
- April 2013-July 2014: Selection process and contract amendment to include dental, with the actual implementation date to be determined by the CCO Board.

A.3.6.f. Great disparities exist in oral disease prevalence and the Medicaid population is often disproportionately burdened with oral disease. Access to preventive and routine dental care is a determinant of overall disease status. JCCCO will consider a dental needs assessment in the Jackson County service area and, if indicated, explore enhanced access opportunities through alternative care delivery models, including community-based prevention strategies, and school-based prophylactic dental clinics. We plan to include dental providers in the CAP prior to integration to better identify potential areas of opportunities, such as hospital-based treatment of dental disease.

Hospital and Specialty Services

A.3.6.g. JCCCO is committed to adequate, timely and appropriate access to hospital and specialty services for its Members. Initially, JCCCO will build upon existing processes in place at its affiliate, CareOregon, which has policies and procedures in place which require the following:

- That CareOregon's Medical Benefits Assurance Unit notifies a member's primary care provider of an authorized request for services at the time of authorization, and again upon admission to an in-patient setting.
- That CareOregon's CareSupport department notifies a Member's PCP of hospital discharge by fax; this occurs for every CareOregon Advantage Member (dually-eligible) and for select high-risk CareOregon Medicaid members. All CareOregon members who are enrolled in the CareSupport program receive care coordination which involves coordination between primary and specialty care providers.
- That CareOregon's Medical Benefits Assurance Unit accepts requests for service authorizations for inpatient procedures which require authorization. No authorization is required for urgent or emergent admissions. CareOregon Concurrent Review RNs work with hospital staff during the Member's stay in the hospital.

- That CareOregon's CareSupport Case Managers encourage and receive referrals from primary care providers for coordination of care for their complex patients. CareOregon's website offers a referral template that can be used by primary care providers to request assistance for care coordination; referrals also occur by telephone either via our Member Services Department or directly to our CareSupport telephone queue.
- That CareOregon's Medical Benefits Assurance Unit's notification to providers of an inpatient admission includes a request to share the Member's plan of care with the facility.
- That CareOregon Concurrent Review RNs work with hospital discharge planners and CareOregon CareSupport staff for safe and effective discharge planning and transitions to other care settings.
- That CareOregon CareSupport Case Managers work telephonically with CareOregon members upon discharge from the hospital or skilled nursing facility to ensure their self-management success and timely follow-up with their primary care provider.

JCCCO's affiliate and its partners have invested heavily in improving coordination between providers, between care settings, and across service entities.

A.3.7. DHS Medicaid-Funded Long Term Care Services

A.3.7.a. As described in A.3.5.j-k, , JCCCO's affiliate, CareOregon, has a Long Term Care project which began as a joint venture with CareOregon, a large contracted medical group in the Portland area, and Seniors and People with Disabilities (SPD). The project utilizes a Nurse Practitioner (NP) who performs home visits on chronically ill CareOregon Members, living in their home or in an adult foster home, who need additional support to access care/treatment, or are having difficulty working within the regular medical system. The NP works directly with the Member's Primary Care Providers (PCP) and SPD case managers. The focus is to improve the quality of health care services, coordinate chronic disease treatment, streamline access, avoid over use of the ER, assure safe transitions, and avoid unnecessary hospitalizations for these CareOregon Members. Once the Member is stabilized, the NP may release them back to the sole care of the PCP, or in some cases, follow the patient for a longer period of time. CareOregon staff works with the NP and PCP to discuss currently enrolled Members and barriers they have to receiving care. CareOregon and the NP work together to assure that Member needs are met while coordinating services and appropriate payments within the benefit structure.

JCCCO would expand this program model in Southern Oregon, and utilize existing document management systems currently in place. We are targeting January 2013 as the implementation date of the initial pilot, and sooner if feasible.

A.3.8. Utilization Management

A.3.8.a.JCCCO's affiliate, CareOregon, makes utilization management decisions for physical health needs by considering each Member's unique needs and diversity. As described above, they have established a program that creates collaboration between SPD, Member PCP, and CareOregon for Member enrolled in LTC services. JCCCO would expand that model into southern Oregon, along with a model reflective of collaboration across other continuums of care, for Members with special health care needs (including the ENCC populations), Members with intellectual disability and developmental disability, serious mental illness, and serious emotional disturbance.

CareOregon maintains a no-authorization required list for ambulatory services so access is not a barrier to their Members. This list can be found on their web site at www.careoregon.org . They do require notification of acute admission, in order to work with Members, Member's family and providers in order to ensure a safe transition, and avoid readmission.

CareOregon monitors and analyzes utilization data on an ongoing basis in order to identify potential or actual incidents of over /under utilization. Thresholds are determined for each of the selected areas. If trends/patterns are recognized necessary steps are taken to investigate and address these variances. Behavioral Health is included in the monitoring process which is performed at least annually. Data is selected from HEDIS measures relevant to the population (Medicare/Medicaid).

- Frequency of selected procedures (HEDIS) Medicare and Medicaid
- Behavioral Health Measure (HEDIS): Initiation and Engagement of AOD

Thresholds are established using external, nationally-recognized sources whenever possible. Reporting and analysis is incorporated into the annual evaluation for reporting purposes. Over- and under-utilization is incorporated into the quality and utilization program descriptions.

JCCCO will expand this program model in Southern Oregon, and utilize existing document management systems currently in place.

Initially, on the behavioral health side, utilization practices currently employed by JBH and JCMH would be adopted and during the course of the first year analyzed to determine how best to integrate these practices into the overall UM process for JCCCO. These current practices involve defined authorization processes, level of need assessment, concurrent review and re-authorization practices.

Section 4 – Health Equity and Eliminating Health Disparities

A.4.1. With a growing population of more than 200,000, Jackson County faces many of the challenges facing other counties in Oregon during this recession: high unemployment rates (more than 12%, compared to 10% for the state), a slow and declining housing market and budgetary constraints at the city and county level. In addition, Jackson County is seeing an increasingly diverse population. Persons of Hispanic or Latino origin now represent more than 10% of the population, and a much higher percentage of the low-income population. JCCCO plans to build on the many programs and activities in Jackson County promoting health and outreach to underserved communities that experience health inequity and disparities.

JCCCO's affiliate, CareOregon, brings experience working with communities throughout Oregon in a comprehensive manner to develop programs to address health equity. These programs are built on pillars from IHI which include the following:

- Safe
- Effective
- Efficient
- Patient Centered (culturally appropriate and linguistically sensitive)
- Timely
- Equitable

It is imperative that Members with complex medical or social issues as well as those individuals who need additional support in understanding health care issues as a result of language or literacy barriers have their needs addressed. Conducting a population analysis annually provides us with the building blocks for understanding our Members. The Quality Improvement Plan is included as a reference document. Through CareOregon, JCCCO will have the ability to analyze data for health care disparities which can include a review by eligibility category, gender, age group, as well as race/ethnicity and languages. Outcome data (HEDIS) is reviewed for variations of practice on a provider level. Information is shared currently on an annual basis with the plan to increase the report sharing to quarterly.

CareOregon has developed a "Diversity Team" which was created to ensure that culturally appropriate communication is embedded in all aspects of the delivery systems to providers and Members. JCCCO will work with the Governing Board, CAP, CAC, other Member committees, and OHA's Office of Equity and Inclusion, sharing knowledge and resources from our diversity work throughout the state.

A.4.2. JCCCO will build on current resources and tools to not only improve outcomes but also as a mechanism to identify opportunities for improvement. Currently CareOregon utilizes a software program called CareAnalyzer which provides the ability to track and report on quality measures. These reports also include demographic information about each Member, allowing for a holistic approach to health improvement. For example, CareAnalyzer can identify prescription drug usage for diabetics and then staff and committees can use this information to track and trend diabetic care for different ethnic groups, addressing the question of whether Latino individuals have different outcomes than Caucasians. CareAnalyzer is updated monthly which gives the ability to generate reports for a variety of HEDIS measures, including ones that involve mental health and substance abuse. Currently HEDIS measures being tracked and monitored for mental health and substance abuse are:

- Follow up After Hospitalization for Mental Illness(Medicare)
- Initiation and Engagement of Alcohol and other Drug Dependence Treatment
- Follow up Care for Children Prescribed ADHD Medication

CareOregon has conducted surveys of both physical and behavioral health providers as a way to understand the needs of both; focusing on communication and information sharing.

In order to ensure continuity and coordination of care of Members between medical and behavioral health, CareOregon (QIC) approved and implemented evidence based guidelines for substance abuse screening. These are available for providers through the CareOregon website. Claims data has been used as a way to assess the frequency of this screening in the primary care clinics. Provider training in the use of the screening tools has been made available to the Primary Care Clinics as a way to support the process.

Section 5 – Payment Methodologies that Support the Triple Aim

A.5.1. The development of alternative payment arrangements is such a critical component to CCO design and operation. JCCCO will fully engage the Governing Board, CAP, and CAC before implementing major changes. These changes will include targets for all aspects of the Triple Aim, not simply cost and utilization targets.

Though JCCCO will not implement major payment changes prior to local engagement and approval, we will build on existing programs and payment methods already in place, such as the following:
CareOregon currently complies with the state requirement to use DRG and APC payment methodology with hospitals. In addition, the payment also includes incentives for Member experience (hospital CAHPS scores) and Member outcomes (Oregon Patient Safety Commission reporting), as well as project-based funding through its CSSI program to encourage provider connectivity and sharing of electronic health record data in Jackson County.

CareOregon's primary care payment model is one that has several components: (1) fee for service, (2) CSSI project-based funding to improve health outcomes and engage in PCPCH development, (3) an incentive plan that has several elements related to Member experience and health outcomes. The primary care incentive payment will be based on the PCPCH criteria to ensure that clinics are not duplicating efforts and focus on patient care and not plan reporting.

Section 6 – Health Information Technology

A.6.1.a. JCCCO's affiliate, CareOregon, currently houses application systems that efficiently maintain and process:

- Member enrollment
- Provider configuration
- Customer service call tracking
- Contracts
- Plan benefits
- Case management
- Claims adjudication
- Utilization management, including web-based tools that support provider practices and have the capacity to be expanded to include personal health records, EHR and medical home functionality

The current web functionality includes capability to send and receive secure communications between the plan and providers.

CareOregon also maintains data systems and a data warehouse populated with claims, Member enrollment, providers, pharmacy claims, lab results, ALERT data, and other data which is used for a variety of analytical purposes including financial, contractual, program evaluation, clinic analysis, and whole system analysis.

A.6.1.b. JCCCO's affiliate, CareOregon, is actively involved with the provider community through their Primary Care Renewal program, which them to actively support and encourage use of certified EHRs. They have a regular provider survey and verification process that can be enhanced to include gathering information on EHR status, and enable appropriate follow-up. As mentioned above, the current web functionality can be enhanced to include a certified EHR that can be made available to providers.

A.6.1.c. CareOregon has a regular provider survey and information verification process that can be enhanced to include gathering information on meaningful use and HIE status, and enable appropriate follow-up to assist providers with accessing these network tools.

Jackson County Coordinated Care Organization, LLC
Appendix B – Provider Participation & Operations Questionnaire

Section 1 – Service Area and Capacity

The service area for JCCCO will be the entire county of Jackson. The maximum number of members is unlimited.

Jackson County	All zip codes in Jackson County: 97501, 97502, 97503, 97504, 97520, 97522, 97524, 97525, 97527, 97530, 97535, 97536, 97537, 97540, 97541, 97410 and 97572.	Unlimited

Section 2 – Standards Related to Provider Participation

Standard #1 - Provision of Coordinated Care Services

JCCCO, through its affiliate CareOregon and partners, including JBH, has a comprehensive and integrated network of physical health, mental health, addictions delivery system that serves the Medicaid and dually eligible members in the categories of service and types of providers below. The current panel of providers builds on the existing participating provider lists provided by CareOregon (physical health and additions) and JBH (mental health) as part of its annual MCO and MHO contracts. Please see the attached lists of Participating Providers (Table B-1) for more detail. We have a comprehensive list of providers that meets all current DMAP access standards and are currently open to new enrollees. For care management in our network, we will build on the existing models and adapt locally. For example, the current CareOregon CareSupport program works with primary care, addictions treatment, and specialty providers throughout the state. Our medical management nurses speak with hospitals in Jackson County about our transitions program and discharge planning. Upon this platform we will extend these transitional services to include a long-term care pilot beginning January 2013, and introducing community health workers, who will likely be based at primary care clinics.

Standard #2 – Providers for Members with Special Health Care Needs

For members with multiple chronic conditions, JCCCO will use current CareOregon care management staff to engage members in ongoing care coordination. CareSupport uses a behavioral interviewing model that is patient-centered and identifies potential for improvement and engagement by the member. Our experience with OHP adults as well as members with Medicare and Medicaid has driven our contracting decisions to include community mental health centers, geriatric providers, and enhance our current care management program by using Health Integrated, a contracted vendor, for members with diabetes or depression.

As a current mental health organization, JBH has Adult Exceptional Needs Care Coordinators (ENCC) who work with and on behalf of JBH members with serious mental illness, which by virtue of the severity, chronicity, and acuity or co morbidity of their conditions; require special services including long term out-of-home placements. In accord with AMH's Adult Mental Health Initiative (AMHI) the ENCC, in collaboration with providers and JCMH staff , assists in member tracking, placement determination, needs and resource identification, Individual Services and Supports planning, and the facilitation of safe transitions to lower levels of care.

JBH also delegates these services to specialists within and subcontracted by the CMHPs, including JCMH. Through the Delegation and Oversight Policy is the stipulation that all employees' credentials are reviewed for clinical appropriateness and compliance with OARs and ISSRs on an annual basis.

Evidence-based specialty services within the Jackson County include:

- Parent-Child Interactive Therapy
- Trauma Informed services
- Collaborative Problem Solving
- Dialectical Behavioral Therapy
- Cognitive Behavioral Therapy
- Child and Youth Day Treatment Programs
- Child and Youth Psychiatric Residential Program (in Josephine County)
- Behavioral Rehabilitative Services
- Assertive Community Treatment
- Supported Employment
- Transitional Youth
- Supported Education
- Supported Housing
- Wraparound Fidelity
- Strengths Based Case Management
- Early Psychosis Intervention (to be implemented in Jackson County)
- Peer Delivered Services
- Dual Diagnosis Anonymous
- Facilitation Training (child and family teams)
- CASII, ECSII and LOCUS assessment tools
- Nurturing Parenting Program

Also, as a Community Mental Health Center, JCMH providers include a continuum of specialists for those with mental illness including psychiatrists, nurses, licensed social workers, Qualified Mental Health Professionals and Qualified Mental Health Associates (case managers and skills trainers) and Peer Support Specialists. All have training and experiences in treating adults and children with serious mental illness and coordinating care for their other medical needs. Some have specific training in treating those with co-occurring mental health and chemical dependency disorders.

Our next step during CCO implementation is to accomplish two main structural changes during the first year of the CCO:

1. Better incorporate local organizations, such as the local SPD and AAA offices, and schools, and child welfare, into physical health care management activities at a local level, like JBH and JCMH have done.
2. Integrate care management activities of JBH and CareOregon so that it is seamless to the member and provider community, ensuring that data and information is transitioned efficiently and effectively while ensuring CCO member confidentiality and rights under HIPAA and Oregon state law.

Standard #3 – Publicly Funded Public Health and Community Mental Health Services

Please see attached document **1h(3b). Publicly Funded Programs – JCCCO** for a list of Publicly Funded Health Care and Service Programs in Jackson County.

3.a. CareOregon has actively engaged a collaborative group of Jackson County stakeholders, including JBH, JCMH, the FQHC's and substance abuse providers by providing start-up funding and technical assistance for a project focusing on high utilization members in Jackson County. CareOregon has provided presentations to and received written support from Jefferson Regional Health Alliance, Jackson County Commissioners, Rogue Valley Council of Governments and other community stakeholders, which includes representation from publicly funded health care and services programs including public health, mental health, chemical dependency and long-term care. Additionally, each of these entities have been engaged and participated in the development of the application.

3.b. CareOregon, as JCCCO's affiliate, has extensive and positive experience in contracting with county Public Health Departments and does not anticipate any barriers with contract development and execution. Contracts will be based on local capacities, considering public health, other publicly funded services and non-publicly funded health related resources. In general, CareOregon's contracts with local health departments cover public health programs and services. We will ensure that these contracts, on behalf of JCCCO, cover the following:

1. **Community Health Assessment and Health Action Plan.** Local health department involvement in these efforts is critical and described in A.1.6 of this application.
2. **Point of contact services.** Per ORS 414.153, local health departments will be reimbursed for immunizations, sexually transmitted disease, and other communicable disease clinical services.
3. **School-based health centers.** School-based health centers. Once the state determines the JCCCO service area, contracts with local health departments will include provisions for school-based health centers in those counties where a school-based health center(s) exists. Payment mechanisms for these centers will be consistent with how JCCCO treats other publicly funded health care centers (such as federally qualified health centers).
4. **Wraparound and other preventive services.** JCCCO will facilitate discussions with local health departments, clinical providers, and appropriate community organizations to determine the best locus for provision of services such as maternity case management, high-risk infant tracking and monitoring, prenatal care, child care, and health-related services provided in schools and early childhood development programs. When appropriate, some or all of these services may be included in the contract with local health departments.
5. **Community-based prevention services.** Following decisions made through the Community Health Assessment and Action Plan (A.1.6), JCCCO will facilitate discussions with local health departments, clinical providers, and appropriate community organizations to determine the best locus for providing community-based preventive interventions. When appropriate, some or all of these services may be included in the contract with local health departments.

In regards to Mental Health: JCCCO will have a capitated, delegated agreement with JBH in place by the readiness review in which JBH will perform most of the current mental health functions required by CCOs. As mentioned elsewhere in this document, CareOregon and JBH will jointly develop a plan of action for integrating administrative services over the first year of the CCO.

Agreements are in development with JBH and JCMH, for coordination of services in public health and mental health that are outside the global budget.

As part of its agreement with JCCCO (through JBH), JCMH will provide comprehensive outpatient mental health treatment services including psychiatric care, crisis intervention and support, and community based services and supports for adults and children with intensive treatment needs. This also includes the provision of transition services for adults and children moving in and out of state hospital and residential treatment.

3.c. JCCCO is currently working through provisions of mental health services, including an agreement with JBH, and fully expect to have signed agreements by the readiness review.

Standard #4 – Services for the American Indian/Alaska Native Population (AI/AN)

4.a. Individuals from the AI/AN population are offered an option of receiving services from the tribal clinics. CareOregon has worked with NARA in the Portland area for many years, but has not had specific Indian Health Center primary care locations within its services. In Jackson County, like many other counties, there are no Indian Health Center locations. Many AI/AN who have coverage through OHP receive services at Community Health Center and La Clinica, which have expertise in culturally relevant care delivery.

Standard #5 – Indian Health Services (IHS) and Tribal 638 facilities

5.a. Currently, individuals from American Indian or Alaskan Native populations are given the opportunity to self-identify at treatment intake and are offered referral to Indian Health services upon request. Identified individuals in the community and regional tribal offices are contacted as necessary to coordinate care and offer consultation and assistance. JCCCO partner, JBH, receives a monthly file containing a membership roster of those members self-identified as American Indian and Alaskan Native. This roster is provided to each of the community mental health, including JCMH, to ensure appropriate coordination of services. No prior authorization is required for members in this category and enhanced reimbursement is available to IHS or Tribal 638 facilities. JCCCO, or its affiliate or partners, will not discriminate in contract payments to these agencies. Members are free to seek services from one of these designated agencies, or any other network provider that meets Medicaid standards, based upon their choice. Therefore, Alaska Natives and American Indians have access and regularly use physical and mental health services within the system.

Standard #6 – Integrated Service Array (ISA) for children and adolescents

6.a. JCCCO will build on the ISA for children developed through partners JBH and JCMH. Our goal is to better integrate those services with physical health providers (especially primary care and addiction treatment providers) within the first year of CCO operation. JBH has a range of contracts with ISA providers including residential and day treatment providers. JCMH has a history of providing care coordination and Intensive Community-based Services and Supports (ICTS) for children with serious emotional disorders since 2005. The identification of children and youth who would benefit from the ISA will be informed by the level of service intensity indicated by the ECSII or CASII composite score and additional risk factors. Children and youth with the most serious mental health needs will be prioritized for the ISA in order to maximize the benefit of available resources. ECSII & CASII composite scores result in a recommended level of service intensity. Each level describes a combination of service variables that could potentially meet the level of service intensity need. The need for active case management increases at the higher levels and service options are dependent upon the service array available in the local system of care. JBH Treatment Guidelines and Level of Service Intensity Determinations are attached as document **2e. JBH Treatment Guidelines.**

6.b. JBH and JCMH have long established collaborative relationships with Child Welfare, juvenile justice and special education staff at multiple levels. The ICTS team regularly engages Child Welfare, school staff and juvenile justice staff involved with the children they serve. Staff participates in Child and Family Team meetings and contributes to a wraparound plan of care for the child and family. JCMH is represented on interagency planning and staffing teams including the Juvenile Justice Advisory Committee. Staff provides consultation to Child Welfare supervisors as well as participating in Family Decision Meetings at Child Welfare. JCMH funds mental

health services in school based health centers. For individual children with serious emotional disorders, educational needs with the goal of regular school attendance are addressed as a priority in individualized care plans. This may involve skills training staff being present in the classroom.

6.c. The children's services program at JCMH has a commitment to family driven services and employs Family and Youth Partners to work with individual families to promote family/youth voice and participation. Cultural needs are identified as part of the intake and application process and culturally specific needs are considered as part of individualized care plans. Children with serious emotional disorders are offered community based service delivery as the primary mode of engagement and treatment.

Standard #7A – Mental Illness Services

7A.a. This will be provided through partnering with JBH and JCMH. JBH has a complete and comprehensive delivery system throughout its region which they will coordinate and integrate with JCCCO. Through an array of 50 contracts, a utilization management system, a quality assurance system, and a community committee structure, JBH successfully meets and exceeds all requirements of the current state plan and the new service enhancements outlined in the State's 1915(i) waiver.

Members currently receive ACT (Assertive Community Treatment) through State AMHI and community mental health programs. ACT is an evidence based treatment team designed to access the members in their home community, and to keep them there by providing support services where and when they are needed. It is a flexible and individualized, non-traditional approach. In addition, JBH is involved in the development of an Early Psychosis Intervention Project, to bring early intervention services to Southern Oregon. These would include screenings at first evidence of mental health disorder symptoms, often in a physician or emergency room setting, and protocols for immediate family and community based interventions designed to minimize the disability associated with mental illness. Screenings for substance abuse already occur within the Comprehensive Mental Health Assessment that takes place when an individual is assessed for mental health services.

JCMH provides community-based services and support for its adults through the Community Support program. Services include intensive case management and care coordination, skills training, medication monitoring, housing support, vocational support and benefits management. For children, community services and supports are provided through the ICTS program which provides care coordination and wraparound services through Child and Family Team meetings, case management, skills training and wraparound supports for children with serious mental illness.

7.A.b. Validated screening tools for depression and anxiety will be made available and their use promoted in all primary care homes. JCMH provides walk-in screening and assessment for individuals showing evidence of mental illness as well as providing screening and assessment in the community for individuals with acute symptoms. JCMH is participating in a project which will evaluate the mental health and chemical dependency needs of those individuals showing high utilization of medical services.

JCCCO, its affiliate and its partners will promote community awareness and provide support and training opportunities for providers of services on the signs and symptoms of mental illness for the purpose of interventions, referrals and reduction of stigma.

JBH will actively participate with JCCCO in the ongoing monitoring and analysis of over and underutilization and take proactive steps to reduce costs and enhance care opportunities to improve patient outcomes.

Standard # 7B – Chemical Dependency Services

7.B.a. The CareOregon Quality Improvement Committee (QIC) has approved guidelines that speak to the importance of screening for substance abuse in the adult population. These are available to providers (and members) via the CareOregon website. Member educational materials such as the Drug Abuse Screening Test (DAST-10) and the CRAFFT Screening Questions are both available on the CareOregon website. Additional links are offered for members that are seeking additional support in relation to substance abuse issues. Addictions Recovery Center (ARC) and On Track have both involved in CCO development and we expect they will be involved in CCO governance. These organizations, both local, currently provide these services and coordinate with community-based services. Our goal is to provide structure and funding and support so that JCCCO can increase the identification of substance abuse and enhance retention in programs. We will look at care coordination staff that span chemical dependency, mental health , and physical health (including pharmacy), building on CareOregon's team-based CareSupport model. We will also improve coordination with local AAA and SPD services.

7.B.b. Provider contracts would include expectations that populations would be screened in a timely manner for substance abuse with the appropriate referrals made for treatment.

JCCCO partners On-Track and ARC provide community based services for individuals with chemical dependency. Jackson County Mental Health provides access to community recovery supports for those with chemical dependency. We will measure both incidence and retention rates.

Standard #8 – Pharmacy Services and Medication Management

8.a. JCCCO's affiliate, CareOregon, has extensive experience providing prescription drug benefits following the OHP Condition/Treatment pair guidelines, and is committed to continuing to provide this benefit.

8.b. CareOregon has a restrictive Medicaid formulary that has FDA-approved drug products in each therapeutic class in addition to including over-the-counter medications. The formulary includes at least one FDA-approved drug for each therapeutic class. Access to products not on the formulary is managed through a formulary exception process.

8.c. Utilization tools such as prior-authorization, step-therapy, quantity limits, age and drug interaction edits and other quality interventions are used and updated regularly, based on reviews by physician and non-physicians specialists of the latest research. Providers can access information on how to submit a prior authorization (PA) request, including the PA form, online or by calling a Pharmacy technician. JCCCO will utilize this CareOregon expertise.

8.d. JCCCO will use CareOregon's pharmacy benefit manager, Express Scripts, to process pharmacy claims, providing real-time inquiry and updated access. This system captures the relevant clinical and historical data required for claims payment and includes appropriate coordination of benefits application. Pharmacy provider reimbursement is tracked and coordinated from the claims processor regularly.

8.e. JCCCO will use CareOregon's prior authorization services, which are done in-house and accepted via fax 24/7. CareOregon is open 8 a.m. to 5 p.m., Monday through Friday and ExpressScripts covers after-hours for urgent requests and phone calls from pharmacies or providers. In addition, ExpressScripts and CareOregon staff will provide emergency supplies of medication to assist when necessary to provide immediate coverage for urgent medications.

8.f. JCCCO's affiliate, CareOregon, has negotiated rates that are confidential and do not exceed -15% of the Average Wholesale Price (AWP) for either retail brand or generic drugs. Mail order rates do not exceed -20% AWP. All rebates are handled according to State and Federal regulations, or as agreed upon and stipulated by the

contract. Dispensing fees do not exceed $2.00 for either brand name or generic drugs. Generally, mail order prescriptions do not have a dispensing fee.

8.g. JCCCO's affiliate, CareOregon, currently has contracts with nearly all 340B pharmacies associated with 340B-qualified entities serving the JCCCO population. CareOregon will work with pharmacists representing 340B pharmacies within the JCCCO to optimize 340B utilization, increase membership use of pharmacies eligible to process 340B, and expand best practice in clinical pharmacy services with 340B revenue.

8.h. Medication Therapy Management (MTM) is an integral part of CareOregon's PCPCH services and will be used by JCCCO. CareOregon has many years of experience with MTM through both OHP and Medicare, and has incorporated pharmacists into its team-based CareSupport teams. Current projects include evaluation and policies/procedures for effective Hepatitis C medication treatment.

8.i. CareOregon provides E-prescribing for providers to utilize with their EMR systems. Providers can access eligibility, formulary information and patient history. Again, JCCCO will benefit from this affiliate's resources.

Standard #9 – Hospital Services

9.a. JCCCO's affiliate, CareOregon, performs a network assessment twice annually to ensure there are adequate numbers and geographic distribution of primary care, behavioral health, and specialty practitioners that meet member's needs. CareOregon monitors practitioner availability annually against its standards, and initiates actions as needed to improve network access.

Practitioner availability monitoring is completed for the following provider types within CareOregon's network:

- Family Practice
- Internal Medicine
- Pediatricians
- General Practice
- Women's Health
- OB/GYN
- Specialty care practitioners, (based on high-volume claims)
- Alcohol and Drug Treatment Facilities
- Detox facilities
- Mental Health
- Psychiatry
- Hospitals
- Skilled Nursing Facilities
- Home Health agencies
- Durable Medical Equipment suppliers
- Ambulatory Surgery Centers
- Ambulatory Clinics

All inpatient facility stays are reviewed concurrently to assure timely access to services and appropriateness of services.

CareOregon will arrange for non-network specialty care when providers are unavailable or inadequate to meet a member's medical need. If necessary, single case agreements will be arranged to assure member access to necessary services.

9.b. Currently CareOregon's CareSupport Department receives a daily emergency department census from some hospitals. CareSupport staff then follows up with members on the ED visits and provides education to members on ED use. This program will be adopted by JCCCO, expanding into southern Oregon. JCCCO will develop reporting capabilities and relationships in the community, which would allow timely access to ambulance, ED or urgent care use. From that, we can utilize existing motivational interviewing for member education.

9.c. CareOregon Claims Department has a process in place to monitor and adjudicate claims for HACs. Their claims payment system, QNXT, has the ability to automatically adjudicate claims based on applicable indicators. They currently have a program in place which stops claims with a Present on Admission indicator, and the claim is sent to an examiner for review.

9.d. Readmissions are identified on the daily census report, and are sent to the Quality Improvement Unit for review. CareOregon concurrently reviews the reason for the readmission, and works with discharge planners to affect an appropriate discharge plan.

9.e. JCCCO will build on current CareOregon programs to reduce unnecessary inpatient hospital and emergency room use. For example, the Jefferson County Health Collaborative is already reviewing CareOregon data to evaluate potential projects aimed at frequent emergency room users and readmissions. We also have a transitions program that we will work with the CAP to evaluate implementing, which involves intensive care management for all inpatient discharged members with certain diagnoses at risk for readmission, such as congestive heart failure. The current CareOregon readmission rate is less than 10%. Although there are opportunities, it will take time and effort to achieve discernible savings.

Section 3 – Assurances of Compliance with Medicaid Regulations and Requirements

For purposes of implementing this CCO and the readiness review, JCCCO will rely primarily on CareOregon policies and procedures for the Medicaid assurances in Attachment 6. CareOregon has met the requirements for the following programs:

- NCQA
- CMS
- DMAP

Each of these entities reviews policies and procedures related to member access, quality improvement, care management, HIPAA, record keeping, billing and payment, and member education. In addition, CareOregon has been an existing trading partner with DMAP since program inception, meeting system requirements for capitation receipt, quality reporting, financial reporting, HIPAA electronic transactions, and encounter reporting.

Jackson County Coordinated Care Organization, LLC
Appendix C – Accountability Questionnaire

Section 1 – Accountability Standards

C.1.1. Background Information

C.1.1.a. During the first year of operation, JCCCO will rely on current quality measurement and reporting systems available through its affiliate, CareOregon. CareOregon's ability to collect and report on the quality measures surrounding accountability is robust and has the internal structure for integrating data from a variety of sources. CareOregon has produced a full spectrum of HEDIS measures for several years, many of which crosswalk to the quality measures found in RFA Table C-1. Understanding the member experience has been a focus for CareOregon (Triple Aim) and is deeply embedded in its QI Program. An annual CAHPS survey is conducted for both Medicaid and Medicare as one way to gain insight into the member experience. Historically, CareOregon has also conducted Clinic-Based CAHPS surveys in order to produce results that are more actionable for both providers and CareOregon. In addition, CareOregon, through its affiliated Medicare plan, currently reports more than 50 outcome and member experience measures to CMS as part of the Star rating program, and has the policies and procedures in place to gather this information, validate it, and submit to CMS, having achieved a 3.5 Star plan rating and 100% compliance with CMS data validation standards.

C.1.1.b. At a minimum, JCCCO will monitor the following HEDIS measures as a way to monitor both compliance and performance. These measures are directly linked to CareOregon's NCQA Accreditation as a health plan.

- Annual Monitoring for Patients on Persistent Medications (Total Rate)
- Antidepressant Medication Management (Both Rates)
- Appropriate Testing for Children With Pharyngitis
- Appropriate Treatment for Children With Upper Respiratory Infection
- Avoidance of Antibiotic Treatment in Adults With Acute Bronchitis
- Breast Cancer Screening
- Cervical Cancer Screening
- Childhood Immunization Status (Combination 2)
- Chlamydia Screening in Women (Total rate)
- Cholesterol Management for Patients With Cardiovascular Conditions (LDL-C Screening Only)
- Colorectal Cancer Screening
- Comprehensive Diabetes Care (Eye Exam, LDL-C Screening, HbA1c Testing, Medical Attention for Nephropathy)
- Comprehensive Diabetes Care—HbA1c Poor Control (>9.0%)
- Controlling High Blood Pressure
- Flu Shots for Adults (Ages 50–64)
- Flu Shots for Older Adults
- Follow-Up After Hospitalization for Mental Illness (7-Day Rate Only)
- Follow-Up for Children Prescribed ADHD Medication (Both Rates)
- Glaucoma Screening in Older Adults
- Medical Assistance With Smoking and Tobacco Use Cessation (Advising Smokers and Tobacco Users to Quit Only)
- Osteoporosis Management in Women Who Had a Fracture
- Persistence of Beta-Blocker Treatment After a Heart Attack
- Pneumonia Vaccination Status for Older Adults

- Prenatal and Postpartum Care (Both Rates)
- Use of Appropriate Medications for People With Asthma (Total Rate)
- Use of High-Risk Medications in the Elderly (Both Rates)
- Use of Imaging Studies for Low Back Pain
- Use of Spirometry Testing in the Assessment and Diagnosis of COPD

C.1.1.c. JCCCO's performance expectation for HEDIS measures will be to attain the 75th percentile nationally. This is based on the NCQA Quality Compass benchmarks which are produced annually.

Ongoing dialogue with providers concerning HEDIS results will be accomplished through a team approach of JCCCO staff members sharing results, identifying best practices and supporting clinics in their improvements efforts. Having the ability to analyze data in a variety of venues will give JCCCO additional insight to provide quality improvement activities incorporating cultural and linguistic components.

C.1.1.d. Performance data will be communicated to providers as reporting is completed, through the Community Advisory Council (CAC), and annually in an annual quality summary document. Additionally, JCCCO will share outcomes in the form of periodic provider newsletters.

C.1.1.e. It is important that JCCCO members understand that quality of the health plan is a priority. Members will be informed of the plan's performance on quality metrics via member communications, such a mailings or the JCCCO website. Members will also receive information about the goals of the health plan in response to the community needs assessment. All mailings and information will be reviewed and approved by OHA in order to meet standards for readability and cultural sensitivity. Documents will be translated for prominent sub-populations, if requested.

C.1.1.f. An alternative payment model based on improvement in key quality, access, and utilization metrics will be developed for practices that are certified at any Tier in the Patient-Centered Primary Care Home (PCPCH) Program. Practices will develop an improvement plan at the beginning of a 12 month cycle to indicate measures that they are targeting for improvement that are aligned with clinic strategic goals and with State measurement priorities. To participate, practices will be required to participate in the fielding of the CAHPS Medical Home survey and to report chosen measures monthly. They will receive additional dollars based on the number of measures they achieve improvement on. This model will evolve over time as practices are prepared to take on more risk, develop strong reporting systems, and participate in CCO governance.

C.1.1.g. JCCCO, through the support of its affiliate, CareOregon, has experience with data collection and analysis. CareOregon has six full time Healthcare Analysts on staff who are skilled at collecting and analyzing healthcare data. In addition, CareOregon's QI Program is staffed by three QI Coordinators, a Health Education Coordinator, an Accreditation Coordinator and a QI Nurse Manager who have experience working with member and healthcare data. CareOregon has had experience with producing member survey data such as CAHPS by working with external vendors. Their experience with the HEDIS process including the Hybrid portion has given them the skill set to produce this type of data collection for future endeavors. JCCCO will meet data and reporting requirements as required in the CCO contract.

Section 2 – Quality Improvement Program

C.2.1. Quality Assurance and Performance Improvement (QAPI)

C.2.1.a. JCCCO is affiliated with CareOregon, whose Quality Improvement Program has been reviewed and approved by the National Committee for Quality Assurance (NCQA). JCCCO will build upon the existing structure of its affiliate's and its partners' Quality Improvement Programs in developing its own QI Program. Please see attached documents **2c. CareOregon QI Program - JCCCO** and **2d. JBH QI Work Plan - JCCCO** for descriptions of CareOregon's Quality Improvement Program.

C.2.1.b. JCCCO's Chief Medical Officer will be responsible for implementation and ongoing efforts of the QI Program. The QI Program will strive to continuously improve the quality of care and service provided to JCCCO members. It will be implemented through a series of committees that address various aspects of quality of care and service.

JCCCO will build a Quality Committee structure that is based on the existing work of its affiliate, CareOregon. The following Quality Committees are currently in place at CareOregon.

<u>Quality Improvement Management Committee</u>

- Develops and provides oversight and direction for the implementation of Quality related initiatives in the CareOregon strategic plan. Reviews and recommends approval of the annual Quality Improvement and Utilization Management evaluations and program descriptions
- Establishes and monitors plan-wide quality metrics
- Provides oversight and direction to the various QI committees by assessing committee specific information
- Makes final de-delegation decisions for specific delegated entities
- Meets and exceeds regulatory and accreditation agency standards

<u>Credentialing Committee</u>

- Evaluates healthcare professionals' initial credentialing applications based on established criteria
- Evaluates organization/facility initial credentialing applications based on established criteria
- Evaluates healthcare professionals' recredentialing applications based on established criteria
- Evaluates organization/facility recredentialing applications based on established criteria
- Approves credentialing and recredentialing applications with and without exceptions
- Approves organization/facility credentialing and recredentialing applications with and without exceptions
- Makes recommendations to the Network & Quality Committee of the Board of Directors regarding healthcare professionals' and facilities' participation on the CareOregon panel in the event of an adverse action for applicants
- Reviews and approves policies and procedures that directly relate to the credentialing decision-making process
- Reviews results of internal audits on a regular basis

<u>Delegations Oversight Committee</u>

- Reviews pre-delegation assessments for contracted entities and has the authority to make the following determinations:
  - Approve assessment
  - Request corrective plan from delegate
  - Make recommendation to QIMC regarding denial of delegation
- Reviews and approves documents related to delegation oversight
- Makes on-going delegation decisions for delegates based on review of annual reports and audits and has the authority to make the following determinations:
  - Approve assessment

  - Request corrective action plan from delegate
  - Make recommendation to QIMC regarding denial of delegation

- Establishes de-delegation and performance thresholds for delegated entities
- Identifies opportunities for improvement
- Defines and implements corrective action plans when warranted
- Ensures adequate resources are available to provide delegation oversight
- Makes policy recommendations regarding delegation oversight

Pharmacy & Therapeutics Committee

- Develops, regularly reviews and revises the CareOregon drug formulary to be consistent with evidence-based clinical practice and requirements of the Oregon Health Plan
- Develops, regularly reviews and revises the Health Plan of CareOregon drug formulary to be consistent with evidence-based clinical practice and requirements of CMS
- Assists with development and appraisal of drug utilization review (DUR) programs
- Assists with development and appraisal of the Medication Therapy Management Program
- Develops, regularly reviews and revises prior authorization, step-edit, quantity limit and other clinical edits to ensure that they are clinically appropriate
- Reviews pharmacy utilization; identifies trends and recommends and monitors improvement projects as appropriate

Peer Review Committee

- Reviews aggregate provider-specific complaints and takes action as appropriate
- Reviews provider-specific performance information (such as sentinel events and adverse outcomes)
- Reviews results of office site assessments done as a result of member complaints and makes recommendations
- Defines and implements provider-specific corrective action plans
- Monitors progress against provider-specific corrective action plans
- Recommends de-credentialing of specific providers to the Credentialing Committee

Quality Improvement Committee

- Reviews population analysis and establishes priorities for projects involving clinical aspects of care to ensure that they address high risk/high volume areas
- Decision-making authority for CareOregon medical policies relating to benefit management
- Decision-making authority to review new technology assessments and new uses of established technologies and make recommendations regarding coverage of the technology
- Reviews utilization data including but not limited to referrals, authorizations, inpatient utilization, appeals and identifying trends
- Establishes performance standards
- Reviews and analyzes data as it pertains to quality improvement initiatives including:
  - Preventive health initiatives
  - Health education programs
  - Programs for members with chronic conditions
  - Initiatives that focus on patient safety, health disparities, cultural competency, and health literacy
- Makes recommendations for change or interventions based on results of data
- Monitors for the effectiveness of changes
- Reviews and approves practice guidelines

Service Quality Committee

- Reviews and analyzes data from multiple sources including but not limited to:
  - Consumer Assessment Health Plan Survey (CAHPS)
  - Aggregate member complaint reports
  - Focus groups
  - Aggregate appeals reports
  - Provider satisfaction surveys
  - Aggregate provider complaint reports
  - Member Focus Groups
  - Member Surveys
- Identifies areas for improvement and testing
- Monitors results against established targets
- Implements and monitors a systematic and ongoing process to obtain member input
- Recommends improvements to the QIMC

Each JCCCO Quality Committee roster will include members of the Jackson County provider community and will reflect the diversity of membership in the service area. The Quality Committees will interact with and inform the work of the JCCCO Community Advisory Council and Clinical Advisory Panel, respectively.

C.2.1.c. Annually, each committee will conduct an evaluation of its work and recommend changes to existing programs and new projects to the Quality Improvement Management Committee (QIMC) for review. The QIMC will evaluate the committee recommendations and assist in the creation of the overall JCCCO Quality Strategy.

C.2.1.d. Under JCCCO, a diverse group of providers and consumers will be represented on the CAC, and all will have the opportunity to plan and design the QI program as the community's needs are identified and addressed. Consumers will have a vote on the CAC.

C.2.1.e. The QI Program will evaluate outcomes through data and metrics that are reported in a way that allows analysis of health and outcome inequities, such as those for clients of racial and ethnic disparities. The CAC will address these specifically in the Quality Strategy.

C.2.1.f. Providers will be monitored for compliance with contractual responsibilities regularly through the use of performance measures and the grievance system. If concerning trends are revealed through analysis of grievance reports or other utilization data, providers will be counseled and put on corrective action plans. Please refer to Provision C.2.1.b for more details about the Peer Review Committee and its role in developing corrective action plans.

C.2.1.g. JCCCO's affiliate, CareOregon, has a well defined process for managing member grievances (complaints) which are seen as one way to respond to customer satisfaction. Three of the established quality committees exist to respond to these issues. These committees are Peer Review, Quality Improvement and Service Quality. They deal with individual clinics/providers (Peer Review) as well as addressing trends and patterns (Quality Improvement/Service Quality). Issues of fraud and abuse can be identified through the grievance process and are managed according to the CareOregon fraud and abuse program.

C.2.2. Clinical Advisory Panel

C.2.2.a. JCCCO intends to establish a Clinical Advisory Panel (CAP). A CAP representative will be included on JCCCO's Governing Board.

C.2.2.b. This question does not apply to JCCCO.

C.2.3. Continuity of Care/Outcomes/Quality Measures/Costs

C.2.3.a. JCCO intends to devise a strategy for improving member outcomes that is specific to the needs of the Jackson County community. JCCCO's affiliate, CareOregon, has experience with and is willing to support the following programs in order to help improve member outcomes.

Ongoing Case Management: Multidisciplinary teams (RNs, Behavioral Health Specialists, Clinical Pharmacists, and Health Care Coordinators) are aligned to provide case management services for at-risk members. This program helps members whose treatment is endangered by complex medical, behavioral or social conditions.

Transitions: This program supports members transitioning from in-patient facilities, whether hospitals or skilled nursing facilities, to home.

Community Care Program: Primary Care Clinic teams involve Community Outreach Workers who are "embedded" within a specific primary care clinic or an ED for the purpose of supporting patients who have been unable to follow their health management protocols, resulting in hospital admissions, or ED visits.

Opiate Therapy: The opiate program identifies members who have received multiple prescriptions from multiple prescribers and pharmacies or members who are suspected or have committed Fraud, Waste or Abuse. These members are either restricted to a pharmacy and/or prescriber by their PCP or by CareOregon or are being monitored to ensure safe and appropriate use of controlled substances.

Hepatitis C: A collaborative effort between CareOregon's CareSupport and Pharmacy Units is made to provide member support and assistance to achieve successful outcomes on Hepatitis C treatment. The program performs light touch case management involving a couple of monthly check-in phone calls, evaluation for barriers or factors suggesting unlikely successful outcomes, refill monitoring and PA expiration avoidance.

Palliative Care: Palliative care is provided as a "bridge" before hospice care. It is provided for members with life-limiting, advanced illness. Treatment is focused on symptom management and end-of-life planning.

Long Term Care (LTC): This program utilizes a Nurse Practitioner to perform home visits on chronically ill adults with CareOregon insurance who need additional support to access care/treatment or have difficulty working within the regular medical system.

Health Integrated (HI): HI's Synergy program offers free telephonic Disease Management Care Coaching services to members who are 18 years of age and older, speak any language, and are identified with any of the following behavioral or medical conditions:

- Asthma
- Migraines
- Rheumatoid Arthritis
- Seizures
- Low Back Pain
- Ulcerative Colitis
- Crohn's Disease
- Parkinson's Disease
- Depression
- Diabetes
- BH Conditions
- Congestive Heart Failure
- Coronary Artery Disease
- Cognitive Impairment
- Multiple Sclerosis
- Chronic Kidney Failure
- Obesity
- Osteoarthritis
- Overall Pain
- Hypertension
- HIV
- CBA/Strokes
- Chronic Obstructive Pulmonary Disease

Patient Centered Primary Care Home (PCPCH): In March 2007 CareOregon and five of its partner primary care organizations began a collaborative initiative to test and spread a "patient centered medical home" model that had been demonstrated to be effective by the South Central Foundation in Anchorage, Alaska. The goal of the project, called "Primary Care Renewal," has been to improve reliability of the delivery of evidence-based medical services to practice patients and to enhance the supports to patients with chronic and complex conditions so they can have the best possible health outcomes. That project has evolved into an ongoing effort to support Patient Centered Primary Care Medical Home work throughout CareOregon's service area. By supporting and developing a robust PCPCH model, providers in the delivery network have better access to their populations'data, understand what gaps exist in care, develop a team to support the work of closing those gaps, and are able to monitor their outcomes. Engaged leadership, quality improvement tools, and team based care allow the PCPCH to more easily implement new standards of care and to identify processes for improvement within their organization.

Care Support and System Innovation (CSSI): CSSI was developed in 2005 as a way to foster a culture of evidence based practice and continuous improvement in CareOregon provider organizations. The CSSI program provides three million dollars annually for training, coaching, and technical assistance to hospitals and provider clinics for selected improvement projects. A conference is held at the end of each funding season at which each participant presents their project and outcome. One of the overarching goals is to develop strategic partnerships with providers who share CareOregon's mission of serving the underserved. Projects are funded annually to support providers in developing or enhancing renewal/medical home practice and projects that support our organizational strategic goals. Historically, CSSI's emphasis has been on supporting provider organizations that identified teams to lead projects and initiatives that improved health care delivery and outcomes.

Releasing Time to Care (RT2C): In 2010, CareOregon launched *Releasing Time to Care* together with four Oregon hospitals, the Oregon Nurses' Association, the Oregon Association of Hospitals and Healthcare Systems and others. *Releasing Time to Care* is an improvement methodology that was designed by and for nurses based on LEAN principles. Its purpose is to free up time for front line hospital nursing staff so that nurses can devote more time to direct patient care, thereby improving patients' experience of care and patient outcomes. Through observation and tracking, teams identify waste that can be removed from daily processes, and they develop quality measures for their units that are displayed so that patients, visitors, and hospital staff can see their progress. *Releasing Time to Care* is rolled out unit by unit within a hospital, preserving the culture of a particular unit while standardizing many processes throughout the hospital.

C.2.3.b. JCCCO will evaluate outcomes in care through evaluation of core and transformational measures, additional measures such as HEDIS and evaluation of the Quality Strategy. This will include outcomes for disparities and those achieved individually by PCPCHs within the provider panel, and will build on the NCQA national benchmark standards already being measured. The CAC will work towards health equities among members to alleviate disparities. Additional measures may be added at the

C.2.3.c. JCCCO's affiliate, CareOregon, has implemented a robust member education component to their website which has a strong focus on wellness. Tobacco cessation materials, flu promotion and prenatal information including "Text4Baby" are other examples of CareOregon's ability to reach out to members.

The text below represents an excerpt from the website where members have access to Healthwise® resources.

Resources for Staying Healthy:

- Healthwise® Knowledgebase health conditions, shared decision-making, diseases, and medical tests and procedures.
- Healthwise – Health Topics
- Healthwise – Medical Tests
- Healthwise – Medications
- Healthwise – Symptom Checker
- Healthwise – Interactive Tools
- Interactive Tool: What Health Screenings Do I Need?
- Interactive Tool: Are You Ready to Quit Smoking?
- Health Topic: Healthy Eating
- Health Topic: Asthma

Also available through Healthwise®:

- Healthwise Online Spanish Health Guide

More Resources for Healthy Living

- CareOregon Health Topics: Diabetes

CareOregon also places a strong emphasis on health and wellness for staff. Some examples of this include:

Facilities	Policies	Wellness Activities
• Bike racks • Ping pong table • Pool table • Wii fit games • Ergonomic evaluations • Healthy vending machine options	• Tobacco free workplace • Lactation rooms • Quiet room • Work from home • Flex schedules	• Sponsor walking teams (i.e. Race for the Cure, Brain Tumor Walk) • Pedometers • Walking/fitness competitions • Walking routes books • Blood drive • Weight watchers onsite – ongoing • Yoga onsite – ongoing • Free fitness classes • Health fairs

C.2.3.d. JCCCO, through its founding partners, has the experience, systems and capability to record, monitor and report required data. The programs, methods, and processes have been addressed in prior sections of this C.2.3. JCCCO, through CareOregon, already has in place payment incentives with primary care providers and hospitals that align with improved health outcomes and member experience.

C.2.3.e. JCCCO will move towards a community wide HIT network that will help providers access information that will reduce duplication of services. Patient-Centered Primary Care Medical Home development will focus on strategies that may be used by providers to monitor and create improved outcomes in primary care. JCCCO will monitor prior authorization policies and use case managers to review requests for services and ensure that they are medically necessary and not duplicative.

C.2.3.f. JCCCO will draw upon the experience of its affiliate, CareOregon, in managing the coordination of care and the arrangement, tracking and documentation of all referrals and prior authorizations. CareOregon has policies and procedures in place that are designed to ensure continuity of care for members who are accessing different facets of the healthcare system. CareOregon also has a robust electronic system for tracking, documenting and responding to prior authorization requests.

Jackson County Coordinated Care Organization, LLC
Appendix D – Medicare/Medicaid Alignment Questionnaire

Section 2 – Ability to Serve Dually Eligible Individuals

D.2.2.a. CareOregon has operated a Medicare Advantage program since 2006. Our dual-eligible Special Needs Plan (SNP), CareOregon Advantage Plus, has more than 7,000 members, and includes Jackson County in its service area.

More than 90% of CareOregon Advantage members receive both Medicare and Medicaid services through CareOregon. Members have a single local phone number, with specialized staff, to answer any questions they have regarding the complex set of Medicare parts A and B, Medicare Part D, and Medicaid benefits. Our care management staff has extensive experience working with individuals who have both Medicare and Medicaid coverage. More than 50% of our SNP members are younger than age 65, and many have multiple chronic conditions, that include both physical and mental health.

D.2.2.b. CareOregon already has a contract in place with CMS for individuals who have Medicare and Medicaid.

D.2.2.c. CareOregon has participated in the statewide CCO dialogue regarding integration of Medicare and Medicaid services through the CCO Medicare/Medicaid Work group and the ongoing DMAP Medicare/Medicaid Work Group. CareOregon is committed to working with the state to participate in the CMS Medicare/Medicaid alignment Demonstration. We are enthusiastic about the opportunities the Demonstration brings in terms of better alignment of both programs to benefit the member. If the state does not pursue that option, CareOregon Advantage would continue its current contract with CMS as a Medicare Advantage plan.
