Dear ODAV members,

I am a resident of Charbonneau and former President of it's Board of Directors. I am very opposed to the expansion of the Aurora airport as shown on it's latest master Plan (AMP) proposal. As a former business man and small business owner, I appreciate the desire of the private business owners of the airport to want to expand. But, this should not be done using any tax dollars, IN VIOLATION OF THE LAW (Senate Bill 100), and TO THE DETRIMENT OF AIRPORT NEIGHBORS health and safety! We already suffer from the over flights through noise and pollution from all flights the take off to or land from the North, particularly those who do not follow the airports take off and landing guidelines. Expanding the airport will lead to more flights with larger planes (why else would they want to do it?) and more noise and more pollution. A closer runway will also increase the safety risk to our community. Please do not violate the law and hurt our health by approving the AMP. We do not wish to wind up in yet another legal battle, but will not back away from it either to protect our health and safety.

If there is an actual public need for more airplane landing sites in the south Portland area, please look at expanding the Salem airport instead.

With respect,

Gary Newbore
