Dear Board Member Board of Forestry,

I understand that you're in the process of making a Habitat Conservation Plan for our state forests that could have an impact on western Oregon communities for decades to come. This is an immensely important decision, and I'm writing today to ask you to make sure that this plan protects biodiversity, water quality, and recreational resources.

Do not be pressured into shortsighted political decisions that ignore long term sustainability.

I appreciate your help,
Andrew Davis
