About This Report

In 2007, House Bill 3290 established Oregon's community benefit reporting law to document the benefits hospitals provide their communities. Oregon Revised Statutes 442.200 and 442.205 require hospitals to report their yearly community benefit costs to the Oregon Health Authority within 240 days of the close of their fiscal year.

Oregon's 60 acute care hospitals are subject to reporting requirements for community benefit. For-profit hospitals have no obligation to provide community benefit because they are subject to property and income tax, however must still report any community benefit activities they do engage in. McKenzie-Willamette Medical Center and Willamette Valley Medical Center are Oregon's two for-profit hospitals. In total, 58 of Oregon's 60 acute care hospitals are tax-exempt, not-for-profit hospitals.

Data are reported as costs to provide the service. These costs may be reported directly from accounting systems, or estimated using a cost-to-charge ratio. More information about cost-to-charge ratios can be found in the appendix. Any revenue received must be deducted so that only the expenses a hospital incurs are reported. Detailed information about what may or may not be included in each community benefit category can be found at the link provided at the bottom of the page.

The data are self-reported by hospitals directly to the Oregon Health Authority. Hospitals report data on a fiscal year basis. Fiscal years vary from hospital to hospital. The date range for each hospital's fiscal year is included in the community benefit data table provided on the Office of Health Analytics website.

In 2016, PeaceHealth Sacred Heart Riverbend and Sacred Heart University District began reporting separately. Previously they provided a combined community benefit report. Starting in the first quarter of 2018, Willamette Valley Medical Center became a Type B hospital.

The Oregon Health Authority provides supplemental data files and additional information at: http://www.oregon.gov/oha/HPA/ANALYTICS/Pages/Hospital-Reporting.aspx.

Hospital Types

Hospital data are presented in four categories: All hospitals, DRG hospitals, Type A hospitals, and Type B hospitals. Definitions, details, and a map of their respective locations are displayed below.

All hospitals: There are 60 acute care inpatient hospitals in Oregon, excluding federal hospitals and long-term care and rehabilitation facilities. Hospitals are grouped into three categories: DRG, Type A, and Type B.

There are 27 **DRG** hospitals in Oregon. These are typically large, urban hospitals that receive payments based on the prospective Diagnostic Related Group (DRG) system.

There are 12 **Type A** hospitals in Oregon. These are small (fewer than 50 beds) and are located more than 30 miles from another hospital.

There are 21 **Type B** hospitals in Oregon. These are small (fewer than 50 beds) and are located within 30 miles of another hospital.

Executive Summary

Community Benefit Report 2018

Oregon's hospitals provided more than \$2.5 billion in community benefit spending in 2018, a 8.9% increase from the \$2.3 billion reported for 2017. As a share of total community benefit, unreimbursed costs of health services continue to grow, representing \$2.1 billion, or 84.2% of all community benefit spending. Charity care spending grew by \$36.0 million in 2018, the second straight year of growth after several years of reductions following the passage of the Affordable Care Act. Unreimbursed costs for Medicare and Medicaid both increased, growing 9.6% and 8.0%, respectively, from 2017.

The spending categories most closely associated with social determinants of health, community health improvement costs and community building costs, showed mix results. Community health improvement costs increased 19.7% year-over-year, while community building decreased 11.9%. Hospitals increased health professional education spending by \$12.6 million, a 5.8% increase since 2017.

Total Community Benefit Spending

Oregon's hospitals provided \$2.5 billion in total community benefit spending in 2018, an 8.9% increase since 2017. DRG, Type A, and Type B hospitals grew 7.0%, 17.7%, and 25.1% compared with 2017. Total community benefit spending has increased 34.3% since 2014.

Oregon hospitals provided \$2.5 billion in community benefit spending.

Statewide total community benefit spending in millions:

Total community benefit costs in millions by hospital type:

Total Community Benefit Costs are the sum of all community benefit categories listed in this report. Community benefits are reported as costs, however it is important to note that all community benefit items are directly reportable expenses. For example, charity care or unreimbursed Medicare costs cannot be accounted for as an expense for accounting purposes.

2018

\$1,000

\$0

Unreimbursed Health Service Costs

Unreimbursed Medicare Services Costs

Oregon's hospitals incurred \$968.8 million in unreimbursed costs for Medicare services in 2018. This is an increase of \$84.5 million, or 9.6%, compared with 2017. Unreimbursed costs as percent of gross patient revenue grew 0.1 percentage point statewide. DRG hospitals were flat compared to 2017. Type A hospitals grew by 0.1 percentage point and Type B hospitals grew by 0.7 percentage points. Growth in unreimbursed Medicare costs as a percent of revenue indicates some of the increase in total spending can be attributed to increases in Medicare volume as well as service cost increases.

Statewide unreimbursed costs of Medicare as a percent of gross revenue increased 0.1 percentage points.

Statewide unreimbursed costs as a percent of gross patient

Unreimbursed cost as a percent of gross patient revenue by hospital type:

Total unreimbursed Medicare costs grew 9.6%. Total costs in millions, by hospital type:

5%

Unreimbursed Medicare Costs are an estimation of the costs that are not reimbursed to the hospital for providing Medicare services. A hospital may have unreimbursed costs when the amount received for providing a service is less than the expenses the hospital incurred, or because Medicare, denied payment to the hospital. In most cases, these costs are an estimate calculated with a cost-to-charge ratio. More detail on cost-to-charge ratios can be found in appendix A.

1.5%

2018

3.8%

2018

Unreimbursed Medicaid Services Costs

Statewide, hospitals incurred \$824.9 million in unreimbursed costs for Medicaid services in 2018, an increase of \$61.0 million, or 8.0%, from 2017. As a percent of gross patient revenue, unreimbursed Medicaid costs were flat statewide at 2.8% compared to 2017. DRG type hospitals fell 0.1 percentage point. Type A and Type B hospitals grew 0.1 and 0.5 percentage points respectively. Overall unreimbursed Medicaid costs as a percent of gross revenue being flat indicates growth in total costs can likely be attributed primarily to increases in service costs, not increases in patient volume.

Statewide unreimbursed costs for Medicaid as a percent of gross revenue was flat in 2018.

Statewide unreimbursed costs as a percent of gross patient revenue:

Unreimbursed costs as a percent of gross patient revenue by hospital type:

Total unreimbursed Medicaid costs grew 8.0%. Total costs in millions, by hospital type:

Unreimbursed Medicaid Costs are an estimation of the costs that are not reimbursed to the hospital for providing Medicaid services. A hospital may have unreimbursed costs when the amount received for providing a service is less than expenses the hospital incurred, or because Medicaid denied payment to the hospital. In most case these costs are an estimate calculated with a cost-to-charge ratio. More detail on cost-to-charge ratios can be found in appendix A.

Charity Care

The statewide median charity care rose \$500,000 in 2018 compared with 2017. The median DRG and Type A hospitals had increases of \$100,000 each. The median Type B hospital grew \$800,000. Statewide total charity care rose \$36.0 million from since 2017. Increases in charity care costs can be attributed to hospitals expanding financial assistance policies beginning in 2017. The median is calculated using only hospitals that reported charity care hospitals. All sixty hospitals (100%) provided charity care in 2018.

Median statewide Charity care costs increased \$500,000 since 2017.

Statewide median charity care costs in thousands:

Median charity care costs in thousands by hospital type:

Total charity care costs grew 18.2%.

Charity Care Costs are the costs of services provided to people that are unable to pay all or part of their bill and qualify for charity care based on the hospital's published policies. Similar to the unreimbursed costs from public payers, charity care costs are most commonly estimated using a cost-to-charge ratio.

Subsidized Health Services Costs

Statewide median subsidized health service costs in

The statewide median subsidized health service costs fell 5.9% in 2018 compared with 2017. The median DRG hospital grew 87.8%. The median Type A and Type B hospitals fell 33.6% and 72.3% respectively. Statewide total subsidized health service costs rose \$4.5 million from 2017 to 2018. The median is calculated using only hospitals that reported subsidized health services expenses. Forty hospitals (66.7%) reported subsidized health services in 2018.

Median statewide subsidized health services decreased 5.9% in 2018.

Total subsidized health services increased 6.1%. Total costs in millions, by hospital type:

Median subsidized health services costs in thousands by hospital type:

Subsidized Health Services Costs are expenses for hospital clinical services that are provided at a financial loss because they meet an identified community need and it is reasonable to conclude that if the service was no longer offered it would not be available from another source in the community or the service would then become the responsibility of the government or other tax-exempt organization. Examples are 24-hour emergency departments at rural hospitals, inpatient and outpatient services, behavioral and mental health services, hospice, and home health services.

Other Public Programs Costs

The statewide median other public program costs rose 7.3% in 2018 compared with 2017. The median DRG and Type B hospitals fell 4.7% and 8.7% respectively. Type A hospitals did not have any other public program costs. Statewide total other public program costs fell \$8.7 million from 2017 to 2018. Statewide totals fell while statewide medians increased because nine fewer hospitals reported costs in 2018 than in 2017 (26 vs 18). The median is calculated using only hospitals that reported other public program costs. Eighteen hospitals (30.0%) reported other public programs in 2018.

Median statewide other public program costs increased 7.3% in 2018.

Statewide median costs for other public programs in thousands:

Total other public program costs fell 27.4% Total costs in millions, by hospital type:

Other Public Program Costs are costs incurred supporting other public programs such as Champus, Tricare, Veterans Health Administration, Indian Health Service, and other federal, state, or local programs. These programs exclude Medicare and Medicaid. Any offsetting revenue must be deducted from cost calculations.

Unreimbursed Service Costs - as proportion of total community benefit

Since 2014, the proportion of total community benefit spending attributed to unreimbursed costs for services has continued to increase. Unreimbursed costs of Medicare, Medicaid, charity care, subsidized health services and other public programs make up 84.2% of total community benefit in 2018, totaling \$2.1 billion in costs.

Unreimbursed service costs as a share of total community benefit increased 0.2 percentage points.

Unreimbursed Public Payer Service Costs as a proportion of total community benefit shows the proportion of total community benefit costs that are due to the combined unreimbursed costs of Medicare and Medicaid services.

Direct Community Benefit Spending

Health Professional Education Costs

The statewide median health professional education costs rose 38.7% in 2018 compared with 2017. The median DRG and Type A hospitals had increases of 32.7% and 14.6% respectively. The median Type B hospital fell 17.1%. Statewide total health professional education costs grew \$12.6 million in 2018 compared with 2017. The median is calculated using all non-zero hospitals. Fifty-one hospitals (85.0%) reported health professional education spending in 2018.

Median statewide health professional education costs increased 38.7% in 2018.

Statewide median professional education costs in thousands:

\$500 \$450 \$4450 \$350 \$350 \$300 \$328.4 \$324.7 \$328.4 \$250 \$2014 \$2015 \$2016 \$2017 \$2018

Median professional education costs in thousands by hospital

Total health professions costs increased 5.8%. Total costs in millions, by hospital type:

Health Professional Education costs are those incurred providing educational programs that result in a degree, certificate, or other training necessary to be licensed to practice as a health professional. It does not include education or training programs available exclusively to the organization's employees. Costs, including stipends, benefits or scholarships for medical residents or interns can be included even if such people can be considered employees for W-2 tax reporting purposes.

Research Costs

Only 16 hospitals in Oregon reported any research costs in 2018. As a result, the median can rise and fall sharply based on how research costs are allocated by a hospital, especially hospitals affiliated with a health system. In 2018, the median statewide research costs fell 68.4%. This is due to four additional hospitals reported research costs, pulling the statewide margin back down from a sharp increase in 2017. Statewide total research costs rose \$1.9 million in 2018 compared to 2017. The median is calculated using only the sixteen (26.7%) hospitals that reported research spending in 2018.

Median statewide research costs fell 68.4% in 2018 as four additional hospitals reported costs.

Statewide median research costs in thousands:

Median research costs in thousands by hospital type:

Research Costs are expenses incurred conducting any study or investigation in which the goal is to increase generalize-able knowledge made available to the public. Hospitals may include costs incurred conducting research that is funded by tax-exempt or government entities. It may not include research conducted on behalf of an individual or organization that is not tax-exempt. These costs may include salary and benefits for research staff as well as costs for equipment, facilities, computers, biosafety, accreditation, and any number of other expenses.

Community Health Improvement Costs

The statewide median community health improvement costs fell 12.3% in 2018 compared with 2017. The median DRG and Type A hospitals had increases of 31.0% and 67.0% respectively. The median Type B hospital fell 32.0%. The statewide median fell due to overall decreases in Type B community health improvement spending. Statewide total community health improvement costs grew 19.7% in 2018. The median is calculated using only hospitals that reported community health improvement costs. Fifty-six hospitals (93.3%) reported community health improvement spending in 2018.

Median statewide community health improvement costs fell 12.3% in 2018.

Statewide median community health improvement costs in thousands:

Median community health improvement costs in thousands by hospital type:

Total community health improvement costs grew 19.7%. Total costs in millions, by hospital type:

Community Health Improvement Costs are expenses from activities or programs subsidized by the hospital that are carried out for the express purpose of improving community health. Such activities cannot be counted if they are primarily for marketing purposes or for the purpose of increasing referrals to affiliated organizations. Such activities must all fill an established or documented need in the community.

Cash and In-Kind Contributions

The statewide median cash and in-kind contributions rose 11.1% in 2018 compared with 2017. The median DRG hospital fell 2.6%. The median Type A and Type B hospitals grew 157.6% and 45.1% respectively. Statewide total cash and in-kind contributions grew \$3.5 million in 2018 compared with 2017. The median is calculated using only hospitals that reported cash and in-kind costs. Fifty-six hospitals (93.3%) reported cash and in-kind contributions in 2018.

Median statewide cash and in-kind contributions increased 11.1% in 2018.

Statewide median cash and in-kind contributions in thousands:

Median cash and in-kind contributions in thousands by hospital type:

Total cash and in-kind spending grew 11.5%. Total costs in millions, by hospital type:

Cash and In-Kind Contributions are direct donations of funds, or donation of supplies, space, and employee time to other individual or community organizations where the hospital is not the primary sponsor or organizer. As a general rule, such donations should be consistent with the hospital's goals and mission. Donations of money, supplies, or time must be representative of the hospital and individual activities performed by employees on their own time may not be counted.

Community Building Costs

The median statewide community building costs fell 23.6% in 2018 compared with 2017. The median Type A and Type B hospitals fell 14.0% and 8.4%. The median DRG hospital grew 24.8%. Statewide total community building costs fell \$1.4 million in 2018. The median is calculated using only hospitals that reported community building costs. Forty-seven hospitals (78.3%) reported community building spending in 2018.

Median statewide community building costs fell 23.6% in 2018.

Statewide median community building costs in thousands:

Median community building costs in thousands by hospital type:

Total community building costs fell 11.6%: Total costs in millions, by hospital type:

Community Building Costs are expenses related to activities in the community that are not directly related to providing health services but address root causes of health problems in the community. Such activities could address issues of poverty, homelessness or environmental issues. Examples of such activities are supporting economic development, physical environmental improvements, coalition building, and workforce development.

Community Benefit Operational Costs

The median statewide community benefit operation cost rose 149.4% in 2018 compared with 2017. The median DRG, Type A, and Type B hospital rose 36.4%, 71.1%, and 102.1% respectively. Statewide total community benefit operational costs rose \$1.6 million in 2018. The median is calculated using all non-zero hospitals. Forty hospitals (66.7%) provided community benefit operational spending in 2018.

Median statewide community benefit operational costs increased 149.4% in 2018.

Statewide median community benefit operational costs in thousands:

Median community benefit operational costs in thousands by hospital type:

Community Benefit Operations are those costs associated with staffing and coordinating the hospital's community benefit initiatives. These costs include staffing and supply costs to manage or oversee community benefit program activities as well as the costs to perform community needs assessments and strategic implementation plans.

Type B

DRG Type A

Appendix

APPENDIX A- Cost Estimations

The Cost-to-charge Ratio, or CCR, is a critical element in estimating the costs associated with Medicaid, Medicare and charity care services. The CCR describes, on average, how much expense the hospital incurs for every dollar it charges. It is the ratio of operating expenses to total charges. If a hospital's total operating expenses were \$45,000,000 and its total charges were \$100,000,000 then the CCR would calculate to 0.45.

\$45,000,000/\$100,000,000 = 0.45

The CCR used for community benefit reporting has certain adjustments made to a hospital's expenses and charges. Every hospital that uses a CCR to estimate costs must calculate it the same way. The state of Oregon uses the same CCR calculation method the IRS requires on the federal 990 form for tax-exempt organizations. Detailed explanations of the CCR calculation can be viewed at: http://www.oregon.gov/oha/analytics/HospitalReporting/CBR-Directions.pdf

Hospitals are required to subtract offsetting revenue from their cost estimation. Offsetting revenue is any source of income for the provided service from the patient or the insurance provider. Final community benefit cost is reported as the estimated expense for the service minus offsetting revenue. For example:

Hospital A had a CCR calculated at 0.45. They had \$5,000,000 in Medicaid charges in 2015. They received \$2,000,000 in payments from Medicaid for those services.

 $5,000,000 \times 0.45 = 2,250,000 \text{ in estimated costs.}$

\$2,250,000 - \$2,000,000 = \$250,000 in unreimbursed Medicaid costs. Hospital A will report this amount on their community benefit reporting form.

The rate in which gross charges increase in comparison to net revenue and operating expenses will influence both the cost-to-charge ratio and the amount of unreimbursed costs reported. This relationship is shown in the graph below. Note that net patient revenue and operating expense essentially overlap one another.

APPENDIX A - Cost Estimations

Overall, gross charges have grown faster than operating expenses and net revenue. In the period of 2014 to 2018, gross charges for all hospitals increased 39.0%. In the same time period, operating expenses and net patient revenue increased 30.7% and 26.7% respectively. Operating expenses and net patient revenue always track closely together for non-profit hospitals.

The table below illustrates the impact of gross charges growing faster than expenses and revenue using the previous example numbers as a base for 2014 and calculating 2018 numbers using actual growth reported by hospitals.

	2014	Change	2018
Operating Expense	\$45,000,000	30.7%	\$58,815,000
Gross Charges	\$100,000,000	39.0%	\$139,000,000
Cost to Charge Ratio	0.45	-6.0%	0.42
Medicaid Charges	\$5,000,000	55.7%	\$7,785,000
Medicaid Revenue	\$2,000,000	51.0%	\$3,020,000
Estimated Costs	\$2,250,000	46.4%	\$3,294,063
Unreimbursed Cost	\$250,000	9.6%	\$274,063

Growth in gross charges above growth in operating expense (39.0% vs. 30.7%) results in only a small decrease in the cost-to-charge ratio (0.45 vs 0.42), but a large increase in the estimated costs (\$2,2500,000 vs \$3,294,063). Revenue growth at a lower rate, tracking with operating expenses, results in an increase in unreimbursed costs.

Patient volume increases can intensify this effect because natural increases in gross charges that accompany growth in patient volume are amplified with associated increases in the base amounts hospitals charge for services. Hospitals have seen more patients and have increased gross charges.

Hospital Specific Community Benefit

As previously described, hospitals in Oregon are divided into three categories based on size and distance to other hospitals. In addition to these categories, designation as either a health district hospital or a critical access hospital can also impact community benefit costs.

A health district hospital is one that is under the control of a formal health district. In most cases the controlling entity is the local county government. Being part of a health district allows the hospitals access to additional funds from tax sources to contribute to operations. This access to tax funding allows many hospitals to continue to operate in rural areas when they otherwise could not afford to run the facility. Health districts may also provide funding to other types of clinics and providers.

A critical access hospital is designated by the Centers for Medicare & Medicaid Services (CMS). This designation impacts the reimbursement the hospital receives from Medicare. There are a number of specific criteria a hospital must meet to be considered a critical access hospital, but in general a hospital must be located in a rural area and serve a population with limited access to other hospitals. In exchange for providing additional services that the hospital might not otherwise provide due to the cost, Medicare will reimburse the hospital at a higher rate than other hospitals receive for the same services. These services mostly relate to expanded emergency services such as a 24-hour emergency room and ambulance transportation.

In the following pages health district hospitals are indicated with an asterisk (*), critical access hospitals are indicated with the Greek letter Phi, and for-profit hospitals are indicated with a superscript 'p'.
