

Endophyte or Sod Quality Tag Request Form

The Oregon Department of Agriculture issues quality tags for seed lots that meet quality standards. Endophyte tags are issued for lots that meet tolerance standards for endophyte fungi as described in OAR 603-056-0170. Seed lots meeting sod quality standards established in OAR 603-065-0145 may be labeled as “Oregon Sod Quality Seed” using tags issued by the department.

For more information, visit <https://oda.direct/EndophyteTags> or <https://oda.direct/SodQualityTags>.

Fill out the following information completely. For each tag request, provide copies of endophyte or sod quality testing as appropriate for the lot. Additional information is on page 2 of this form. This form and additional documentation should be emailed to seedservices@oda.oregon.gov.

Additional Information about Endophyte or Sod Quality Tags

- For Sod Quality testing, contact the Oregon State University Seed Laboratory at 541.737.4464 or email seedlab@oregonstate.edu. Only OSU Sod Quality testing can qualify seed for Oregon Sod Quality Seed tags.
- Sod Quality standards for different seed kinds are established by OAR 603-056-0145 and are available at <https://oda.direct/SodQualityTags>.
- To be eligible for Endophyte tags, seed must be officially sampled and tested by the department and found to contain less than 5% endophyte fungi or their metabolites.
- For seed sampling requests, contact SeedServices@oda.oregon.gov.
- For Endophyte testing information, contact PlantHealth@oda.oregon.gov.
