January 29, 2020

* Each Oregon West Coast Electric Highway (WCEH) original EV station site currently consists of only a 50 kW CHAdeMO DC Fast Charger and a 7.2 kW Level 2 Charger. No Combo Charging System (CCS) DC Fast Chargers are currently available at these original sites.

- These original sites were initiated in 2012 and only equipped with CHAdeMO DC Fast Chargers, prior to the adoption of the CCS DC Fast Charging standard.
- To better serve all makes and models of plug-in electric vehicles, Oregon is pursuing upgrades to original WCEH locations through competitive funding opportunities to replace CHAdeMO-only stations with dual protocol DC Fast Chargers.

To learn more about Oregon's WCEH funding opportunity, visit www.oregon.gov/ODOT/Programs/Pages/Electric-Vehicles.aspx. On the website, you can also sign up to receive automatic email updates.
