METHODOLOGY

Introduction

This banner book report summarizes the results of the 2017 CAHPS© Medicaid survey of Health Share of Oregon members. Health Share of Oregon is one of 16 health plans that participated in the survey. The survey was administered over a twelve-week period using a mixed-mode (mail and telephone) six-wave protocol. This protocol consisted of a pre-notification letter, an initial survey mailing and reminder postcard to all respondents, followed by a second survey mailing and reminder postcard to non-respondents. Phone follow-up was conducted for members who had not responded to the mailings. Respondents were surveyed in English and Spanish. DataStat administered the survey under contract with the Oregon Health Authority.

Sampling

The sampling plan for the adult and child surveys called for a random sample of 900 eligible members per CCO in each age group. The state elected to sample 1800 members from each age group of the Open Card population. Adults were defined as members aged 18 years or older and children as 17 years old or younger, both as of November 30, 2016. To be eligible, members had to have been enrolled in Oregon Health Plan for at least six months as of November 30, 2016. The final selected sample consisted of 16,200 adult OHP enrollees and 16,200 child OHP enrollees.

Questionnaires

The instruments selected for the survey were adaptations of the CAHPS© 5.0 adult and child core questionnaires for use in assessing the performance of CCOs. CAHPS© supplemental questions as well as OHP-specific items were added to the instruments.

Selection of Cases for Analysis

Surveys were considered complete if respondents did not say 'No' to Q1 and if they provided a valid response to at least one non OHP-specific question.

Composites, Overall Ratings, and Measures for Reporting

In addition to responses by individual question, the CAHPS® 5.0 questionnaire yields several types of results for reporting. *Composite scores* summarize responses in key areas of member experience. Five composites are calculated for the adult and child instruments: *Getting Needed Care*, *Getting Care Quickly*, *How Well Doctors Communicate*, and *Health Plan Customer Service*, and *Shared Decision Making*. Global or *overall ratings* measure respondents' assessments, using a scale of 0 to 10, of their health plan, health care, personal doctor, and specialist. In the child questionnaire, an additional set of three *Reporting Measures* are possible. These measures cover topics called *Access to Specialized Services*, *Family Centered Care*, and *Coordination of Care*.

The questions for each composite, overall rating, and reporting measure are listed below, with their locations in the adult and child questionnaires, respectively, as well as the topics addressed by the item.

Composite: Getting Needed Care

- Q14/15. Got care, tests or treatment you thought you needed
- Q25/46. Getting appointments with specialists

Composite: Getting Care Quickly

- Q4/4. Got care for illness/injury/condition as soon as you thought you/child needed
- Q6/6. Got an appt. for routine care as soon as you thought you/child needed

Composite: How Well Doctors Communicate

- Q17/32. Personal doctor explained things in a way that was easy to understand
- Q18/33. Personal doctor listened carefully to you
- Q19/34. Personal doctor showed respect for what you had to say
- Q20/37. Personal doctor spent enough time with you/your child

Composite: Customer Service

- Q31/50. Health plan's customer service gave needed information or help
- Q32/51. Treated with courtesy and respect by health plan's customer service staff

Composite: Shared Decision Making

- Q10/11. Doctor talked about reasons you might want to take a medicine
- Q11/12. Doctor talked about reasons you might not want to take a medicine
- Q12/13. Doctor talked about what you thought was best for you when discussing a medication

Rating Questions

- Q13/14. Rating of all health care
- Q23/41. Rating of personal doctor
- Q27/47. Rating of specialist doctor
- Q35/54. Rating of health plan

Composite: Access to Specialized Services (Child only)

- Q--/20. Getting special medical equipment or devices for your child
- Q--/23. Getting special therapy (physical, occupational, speech) for your child
- Q--/26. Getting treatment or counseling for your child

Composite: Family Centered Care: Personal Doctor Who Knows Child (Child only)

- Q--/38. Child's personal doctor talked with you about how child is feeling, growing, behaving
- Q--/43. Child's personal doctor understands how child's health conditions affect child's day-to-day life
- Q--/44. Child's personal doctor understands how child's health conditions affect family's day-to-day life

Composite: Coordination of Care for Children with Chronic Conditions (Child only)

- Q--/18. Got help contacting school and daycare from someone at health plan or doctor's office
- Q--/29. Got help coordinating care among providers from someone at health plan or doctor's office

Comparisons, Statistical Testing, Scoring, and Weighting

In the tables, results are presented for all questionnaire items, reporting measures, and composites, by OHP overall, age category, race/ethnicity, health status, and gender. If any demographic subgroup has fewer than 11 respondents then the data in that demographic subgroup are suppressed, no cases will be presented in the column. Suppressed banner points are marked with a '##' on the banner point label. Some banner points have zero respondents, these banner points are marked with a '#' on the banner point label.

Significance testing was conducted between the CCO results and the overall OHP results, and the plan demographic subgroup results. Statistically significant differences were determined with binomial and t-tests, using a significance level of .05 or less. Tests were considered valid when the number of cases used to compute the score was 50 or greater and there was non-zero variation in the tested groups. The symbol '~' is used to indicate the test was not valid. For comparisons with statistically significant differences, a star (*) is found to the right of the relevant percentage in the table.

For rating, composite, and reporting measure questions, responses grouped together as scores offer a means of comparing performance across plans and other subgroups. Scores are usually designed to capture respondents' positive experiences. Thus, in rating questions, for example, responses of 8, 9, or 10 represent a positive experience, as do responses of 'Usually' or 'Always' to questions that make up the composites and most of the reporting measures. To make these scores easily available to users, positive responses have been set apart in the banner tables and labelled as 'Nets'. A net score preceded by '#' signifies the most inclusive grouping (i.e. 8, 9, and 10), whereas a net score preceded by the label 'Score 2' represents the least inclusive grouping (i.e. 9 and 10).

Data presented in the banner books were weighted to reflect each plan's actual distribution in the total eligible population. A weight unique to each health plan and age category (adults and children) was constructed by applying the percentage of members by plan in the population to the corresponding percentages in the completed cases.

Response/Non-Response Comparison

Presented below is a comparison, by age and gender within each age category, of respondents and non-respondents, all of whom were part of the random sample for the Oregon CAHPS© 2017 survey.

Non-Respondents are members or member proxys who decided not to participate in the study by mail or phone. This group includes two types of non-respondents:

- 1) Members who passively refused by not returning the questionnaire mailed to their household and/or not answering questions over the phone.
- 2) Members who actively refused, either by contacting DataStat or by declining to participate when DataStat attempted to reach them by phone.

The category labeled **Respondents** includes members or member proxys who completed the questionnaire either by mail or phone.

DS. INTERVIEWER: YOU MAY DO THE INTERVIEW WITH ONLY THE [NAMED RESPONDENT. NO PROXIES WILL BE ACCEPTED/PARENT/GUARDIAN/OR ADULT WHO KNOWS MOST ABOUT [MEMBER NAME] 'S HEALTH CARE] .

PHONE NUMBER ---> [1 CELL PHONE - HAND DIAL (###) ### - ### /*** *---****]

Hello, I'm calling about a health care survey on behalf of [HEALTH PLAN NAME]. This call will be recorded and may be monitored for quality and training purposes. May I please speak with [[MEMBER FIRST NAME] [MEMBER LAST NAME]]/the person who knows the most about [NAME OF CHILD]'s health care]?

We are conducting an important study to find out how satisfied [people/families] are with [HEALTH PLAN NAME]. The results of the study will help [HEALTH PLAN NAME] improve the care they provide and will also help consumers when they choose health care plans.

The interview is completely confidential and voluntary, and will not affect [your/your child's] health care or benefits in any way.
