Footnotes:

- 2017 Data collected under Centers for Disease Control and Prevention (CDC) protocol.
- Results are for surveys mailed to mothers of babies born January 1 through December 31, 2017.
- 1,473 women responded to the 2017 Oregon PRAMS survey.
- "n" = unweighted number of respondents for a question.
- "Valid Percent" is a weighted percentage. It represents the use of denominators that exclude blanks and unknowns. Valid Percent may not add up to 100.0 due to rounding.
- Significantly lower number of respondents to certain questions usually indicate a skip pattern in the questionnaire.

Breastfeeding

How old was your new baby the first time he or she had liquids other than breast milk (such as formula, water, juice, or cow's milk)? (Q45)

	Valid Percent
My baby was less than 1 week old	20.5
1.0 to 2.9 weeks	6.5
3.0 to 4.9 weeks	8.0
5.0 to 6.9 weeks	2.9
7.0 to 8.9 weeks	6.6
9.0 to 10.9 weeks	0.5
11.0 or more weeks	9.2
My baby has not had any liquids other than breast milk	45.8

(n = 1,328)

PRAMS respondent mothers can respond to the survey starting when their baby is 2 months old and ending when their baby is 9 months old. Therefore, the overall percent response for “My baby has not had any liquids other than breast milk” does not necessarily reflect how old babies are when they begin receiving liquids other than breast milk. Therefore, we also present data from these mothers by the age of their baby at the time they answered the PRAMS survey.

Percent of “Yes” responses to **My baby has not had any liquids other than breast milk, by age of baby at time of survey response**

Baby's age at time of survey	Weighted percent “Yes” responses
Up to 12 weeks old	69.7%
More than 12 weeks up to 16 weeks	53.3%
More than 16 weeks up to 20 weeks	39.9%
More than 20 weeks up to 24 weeks	26.0%
More than 24 weeks up to 28 weeks	14.6%
More than 28 weeks	9.0%

- Results are for surveys mailed to mothers of babies born January 1 through December 31, 2017.
- 1,473 women responded to the 2017 Oregon PRAMS survey.
- “n” = unweighted number of respondents for a question.
- “Valid Percent” is a weighted percentage. It represents the use of denominators that exclude blanks and unknowns. Valid Percent may not add up to 100.0 due to rounding.
- Significantly lower number of respondents to certain questions usually indicate a skip pattern in the questionnaire.
