A registered Apprenticeship Program with the Oregon Bureau of Labor and Industries Apprenticeship and Training Division.

Sheet Metal Institute

Portland Sheet Metal Workers JATC MA#1028

Description of the trade: Sheet metal workers fabricate and install fittings and duct work used in construction or industry for heating, ventilation and air-conditioning systems in residential, commercial and industrial applications. They set up and operate shears, press brakes, hand brakes, bending rolls, welding machines and other equipment to cut, form and attach metal together for applications such as metal roofing and stainless steel work for restaurants, kitchens and hospitals. They prepare shop and field drawings manually and with computer programs. Computer skills are becoming increasingly important for controlling industrial equipment.

Working Conditions: The work is performed both indoors and out, using scaffolding, ladders and high lifts, and in awkward positions and cramped spaces. Sheet metal workers may work in shops performing fabrication work or on construction sites, doing installation.

Selection Method: Ranked based on scored interview combined with points based on documentation of classroom training and previous work experience.

Selection Interview Scoring:		
a. Attitude	minimum to maximum	1-20 points
b. Interest	minimum to maximum	1-20 points
c. Potential	minimum to maximum	1-20 points
