Reporting Cycle: Oregon Fiscal Year (July 1 - June 30)
This measure includes numbers for applicants who took the first of five GED tests in a calendar year. Successful applicants are those who complete and pass all five of the GED tests and who are issued a GED certificate within three years of the month of their first test date. Over 2/3 of those tested are at community colleges with other sites at Education Service Districts (ESD), the University of Oregon, WorkSource Centers, school districts and Corrections.

Reporting Cycle: Oregon Fiscal Year (July 1 - June 30)
The measure includes federally reportable students who were enrolled in a particular academic year and had a valid pre and post test, then tracked for that academic year and the following academic year to identify whether the student completed at least one outcome measure. Federally reportable students are those who have: At least one Entry Record, are enrolled in an approved instructional program, have received 12 or more hours of instruction, are between the ages of 16 and above, are not concurrently enrolled in high school/K-12 and have the following demographic information reported: date of birth, gender and race/ethnicity.
Federal outcome measures included in this measure are: Educational skill attainment, obtain GED, transition to postsecondary education or training program, obtain employment and retain employment.

Reporting Cycle: Oregon Fiscal Year (July 1 - June 30)
The measure cohort includes all professional technical concentrators for the program year who were identified as having Licensed Practical Nursing or Registered Nursing majors. The measure result is the percentage of these students who completed one-or two-year Nursing programs within the program year. The definition of "Professional Technical Concentrator" is based on Perkins III accountability measures, and includes students who are credit students in the fall term of the reporting year and who have earned at least 50% of credits applicable toward their professional technical major.
Between 2006-07 and 2007-08 Oregon was required to transition from Perkins III to Perkins IV performance measures. This transition resulted in a more inclusive definition of CTE Concentrators (the denominator in Nursing completions) and a more restrictive definition for Completers (the numerator). The 20% decline in Nursing Completion rates for 2007-08 is an artifact of definitional change rather than a true decline.
Further negotiated changes in these definition for 2008-09 will result in additional unpredictable changes for next year.

Reporting Cycle: Oregon Fiscal Year (July 1 - June 30)
Employers who have received training for their employees from the Business and Industry Training System complete a training satisfaction survey. They rate their satisfaction using a 1 - 5 scale,1 not satisfied and 5 very satisfied. The number of employers with a 4 or 5 satisfaction rating is divided by the total number responding to the survey. The result is the percent of employers rating training as 4 or 5 meaning, "good" or "better".

Reporting Cycle: Oregon Fiscal Year (July 1 - June 30)
Most pass rate data are self-reported by each community college to CCWD. Data on national pass rates is gathered from professional associations and some from community colleges. The data are reported inconsistently year-to-year and are thought to be unreliable. The data will continue to be questionable and probably incomplete until the data collection method is improved.

Reporting Cycle: Oregon Fiscal Year (July 1 - June 30)
The measure cohort includes the unduplicated count of all fall credit students with no previous Associates degree and enough credits to possibly complete an Associate's degree by end of spring term. The percentage is calculated by identifying the number of these students who do complete Associate's degree by end of spring term. Students are identified as having "enough credits to potentially complete an Associate's degree" according to their enrollment status in the fall term of the year under consideration. Full-time students (those enrolled in 12 or more credits in the fall term) could potentially complete an associate's degree by the end of spring term of the reporting year if they have earned at least 54 credits by the time they enroll full-time for the fall quarter. Half-time students (those enrolled in 6-11.99 more credits in the fall term) could potentially complete an associate's degree by the end of spring term of the reporting year if they have earned at least 72 credits by the time they enroll half-time for the fall quarter. Part-time students (those enrolled in 1-5.99 more credits in the fall term) could potentially complete an associate's degree by the end of spring term of the reporting year if they have earned at least 81 credits by the time they enroll part-time for the fall quarter.

Reporting cycle: Oregon Fiscal Year

This measure addresses Oregon's rank for community college tuition and fees among 15 western states (California excluded). Oregon Community College data is generally available for this measure in late spring/early summer. Western state data is generally available in December of the academic year. Annualized figures include the in-district tuition rate per credit plus those fees based on number of hours taken on an annualized basis (from: WICHE, the Western Interstate Commission for Higher Education, www.wiche.edu).

Reporting Cycle: Oregon Fiscal Year (July 1 - June 30)
This measure is a count of unduplicated Dual Credit program participants - high school students - in the reporting year. The count is the number of students enrolled in Dual Credit programs. In these programs juniors and seniors are enrolled in Lower Division Collegiate or Tech Prep credit courses. These courses are taught by high school teachers and held in the high schools. Students who complete the courses earn credits for high school graduation and college credit (i.e., dual credit).
Reporting irregularities prior to the 2005/06 year result in decreased reliability for figures reported in 2002/03, 2003/04 and 2004/05.

Statewide	**1.46**	**1.31**	**3.51**	**1.15**

Source: OCCURS and the 2006-2008 American Community Survey, Census

Estimate Method

1. Estimate Each Community College's Service Area – The Service Areas were determined on the basis of entire counties because the minority population data from the U.S. Census Bureau is published on a county basis.
2. Determine Race Estimates of Service Districts – The American Community Survey (ACS)
3. 2006-2008 was used to determine the minority population for each service district. Data for BMCC, COCC, and SOCC are incomplete because three counties are not included in the ACS.
4. Estimate College Racial Composition – The 2008-09 minority enrollment for each college came from OCCURS.
5. Compare the Estimates – The percentage of minority enrolled for each college was compared to the percentage minority population in the Service Area. A ratio greater than 1.0 indicates that a minority group has larger representation in the collage than in the Service Area as a whole.
