

Right and Left Navigation Bars

The Right Navigation Bar

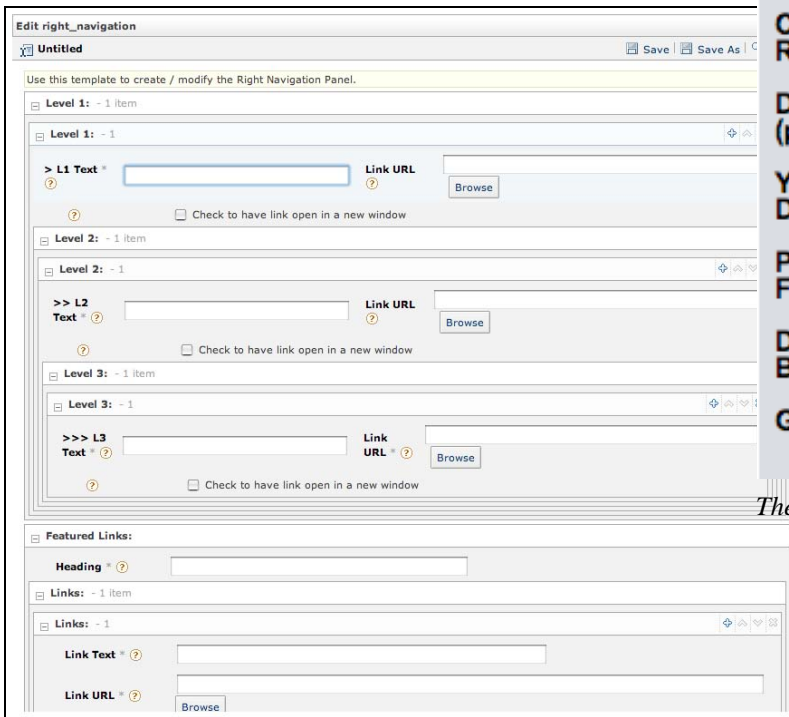

The template, “agency_right_nav_menu” gives each mini-site the option of maintaining their own navigation bar, linking to that of its parent (DAS) or that of the State level bar (on the home page of Oregon.gov), by selecting the appropriate file from the mini-site index page.

The Right Navigation Bar template allows you to add a drop-down menu at its top that includes the option of up to 12 links. Each of these links contains optional nested links, two tiers down, with a maximum of 5 links in each tier. (figure 1)

The Right Navigation Bar also includes a section (below the dropdown menu) with an editable blue bar headline (Current Topics) with the option of adding up to 8 links with a maximum character count of 45 each. (figure 2).

The DAS Level Right Navigation Bar

The DAS Level Right Navigation Bar Template

The Left Navigation Bar

The left navigation bar has changed in appearance, slightly, but the template has only changed in one way. The only change to this template is to allow for longer, more characters, in the link fields.
