

OGEOF Meeting Notes

September 11, 1998

Meeting Summary

The OGEOF meeting was held at the BLM on September 11th, 1998. The meeting focused on three subjects: DOQ status, IRRICC matrix review, the DEM status and baseline status.

Attendance

Bob Harmon, OWRD Mary Harrison, BLM

Emmor Nile, ODF Dale Gunther, REO

Henry Wolter, USGS Steve Barnett, SSCGIS

Chris Hamilton, BLM Nancy Tubbs, USGS

Data Status Reports

DOQs

Nancy Tubbs showed the committee a map of the DOQs which have been funded or have proposed funding. The list contained all but a handful of DOQs in Harney County. The Department of Interior agencies will know whether they got the proposed funding in the near future.

DEMs

Work continues on the DEMs. The first group has been delivered to Clams. OGEOF decided that OTIS would determine whether the SSCGIS should host the DEMs when they are completed.

West Side Fifth Field Watersheds

The updates to the fifth field watershed are almost complete. The subgroup is simply waiting for some changes from the Mt. Hood National Forest. The subcommittee has worked out a naming convention for the watersheds to prevent duplication and name the unnamed watersheds. The committee does not know if they will be able to begin work on the east side at this time.

Baseline

Mary Harrison reported that Geomatronics figured out the data shift problem. She expects the remaining DLGs to be completed within the next two weeks. The road CFF's will be ready for their final QC by next Tuesday. The BLM has decided to only use CFF's where DLGs or GCDB data does not exist.

IRRICC Report

At the request of IAC, an IRRICC subcommittee created two interconnected matrixes to help prioritize data updates. The first matrix involved determining the cost, lead entity and time for each data theme. The second matrix determined how many groups need specific data layers. IRRICC hopes that the process will provide more resources for data creation.

Agenda for the next meeting

1. Hydrography MOU
2. Creation of OGEOF MOU
3. Finalize mission statement goals and objectives
4. DOQ and DEM updates - Nancy
5. Committee Status Reports

Next Meeting

October 21st, 1998

SSCGIS, IRMD Large Conference Room
