Dear OGIC – FIT Review Team;

We have enclosed our 2009 OGIC –FIT Proposal. The following are highlights of our project:

- The goal of this project is to develop a comprehensive for Oregon public schools. This dataset will provide OFRA with greater ability to study spatial relationships among DHS caseloads, enhance the delivery of services to DHS clients, and promote collaboration between Oregon public agencies and local stakeholders.
- This project conforms to FIT administrative boundary standards.
- OFRA will act a steward for this dataset, and collaborate with stakeholders to manage future stewardship responsibilities.
- The data collection phase of this project is currently underway. To date, DHS has contributed 480 staff hours to data collection and accuracy review.
- The total project cost is \$29,790.40.

We appreciate your consideration of this proposal, and invite you to contact Patrick McIntire at (503) 945-6237 or Patrick.mcintire@state.or.us with questions.

Sincerely,

Patrick McIntire
OFRA Administrator
