

Oregon GIS Program Leaders Meeting
13-Oct-09
Department of Human Services Building, Salem

Present: Arron Heriford (DHS), James (DOR), Milt Hilt (GEO), Emmor Nile (ODF), Laer Haider (DHS), Cy Smith (GEO), Brady Callahan (OPRD)

Scribe: Arron Heriford (DHS)

Topic	Discussion Summary	Result	Action Required	Responsible Party
Introductions		Self Introductions	No	
Minutes	None			
Next Meeting		Nov. 10, 2009 - Archives	No	
Announcements	None			
OSBEELS Report	Brady Callahan (OPRD) provided a synopsis of the information from the OSBEEL's Professional Practices meeting held on Friday, October 9, 2009. The board received 5 examples of GIS projects, which may be interpreted as practicing surveying. All five examples were found to not be practicing surveying. Coastal landuse and Lidar examples did raise some concerns. Determination of structure locations was identified as the concern within the coastal landuse example and precision of Lidar coordinates was the identified concern within the Lidar example. The vendor generating the Lidar data would be party most likely to be found practicing surveying. A newsletter is coming out referencing Lidar for engineering purposes.		No	
DAS/GEO Report	Cy Smith (GEO) - Data Sharing - The City of Portland and Metro are receiving pressure from Mayor Sam Adams to provide data free to the public (i.e. RLIS data) OEM - Roads data sharing not available for most counties, Dave Snader (GEO) has been tasked to coordinate with the local road authorities and PSAPs to develop data sharing agreement allowing Brady Callahan (OPRD) - Requested clarification on the definition of the X,0, and e symbols present within the GEO Project Dashboard scheduling report			

Cy Smith (GEO) -

Report Item #10 - ESRI Master Price Agreement with ESRI has an adjusted completion date

Report Item #11 - Implement GIS Software Standard has been completed

Report Item #12 - Web Imagery Portal - Oregon Lambert Mosaic nearly completed, ESRI technical staff (Reid) upgraded Imagery Portal (hardware update)

Report Item #2 - GEO Customer Service Plan - Geo will start

Report Item #8 - Implement the RAMONA GIS Inventory Tool - Indiana has example of statewide system, Milt Hill (GEO) - would like to demo at future meeting (Nov 09)

Report Item #16 - Web-based Map Viewers - SOS Ballot Drop Box application is on time

Report Item #23 - Test eGov Collaboration Tools - collaborative document example is in the works with others

Report Item #24 - Develop & Implement Communication Plan - this is part of the strategic plan

Press Release - stimulus tracker role out from governor's office

Agency Reports

DHS	Arron Heriford - awaiting hardware to bring web development
ODF	Emmor Nile - Compressed County Mosaics (CCM), Milt put them on ftp site for one week for download as each county arrives in 1/2 meter and IR, Leveraging Liadr had lower quality results for the South Coast. It will used to update stream channels, figuring out new staff
DOR	James - ORMap Fall Funding
