TRILLIUM BEHAVIORAL HEALTH (TBH)

S TAFF CAN ASSIST TRILLIUM MEMBERS IN FINDING MENTAL health and addiction counseling or treatment services and help coordinate care to ensure the best possible outcome. Trillium promotes an effective system of care that maintains and enhances the mental and emotional well-being for individuals and families in Lane County and our surrounding communities.

TRILLIUM INTEGRATION INCUBATOR PROGRAM (TIIP)

T RILLIUM COMMUNITY HEALTH PLAN is developing and implementing a delivery of care model that integrates mental health and physical health care, including addiction and dental health. The Trillium Integration Incubator Project (TIIP) is in its first year supporting the development and implementation of integrated medical homes covering up to 20% of our members. Four sites are integrating behavioral health services into primary care and an additional four sites are integrating primary care into behavioral health services. The project is rich with a monthly learning collaborative, weekly newsletter, national experts and research/analytics reporting. Efforts are underway to disseminate the early learning and potentially expand these models to an increasing number of our members.

YOUTH SYSTEM OF CARE DEVELOPMENT

T RILLIUM IS WORKING IN PARTNERSHIP WITH A SPECTRUM OF community-based service providers for youth and their families, focusing on aligning the values and principles that guide practice at each child serving system. This includes behavioral health, school system, DHS Child Welfare, juvenile justice, Developmental Disability services, Public Health, and peer service providers. TBH has developed a committee governance structure that includes a practice-level workgroup, an implementation and oversight committee for Wraparound facilitation of multidisciplinary teams, and an executive team of leaders from each child serving system.
