## Testing Datamart Connections...Is Your Agency Ready?

Time is drawing closer to test connections to the new Datamart server. Is your agency ready? SARS, Enterprise Application Services, and the State Data Center plan to start testing the new connections by mid August.

Is your agency ready to test connections to the new server?

Make sure your agency has the following information turned in to Linda Tullis by August 10th:

- Hyperion Version other than 8.3.2, Service Pack 3
- Special ways to connect to Hyperion (like through a Citrix server)
- Microsoft Access Version other than 2003 (only if you use Access to directly pull data from the Datamart)
- Special Agency OCE's (Open Catalog Extensions) other than the OSPA and Datamart regular OCE's
- Other Report Writers linked directly to the Datamart (like Crystal Reports, Cognos, etc.)
- Brio Version 6 On-Demand Server to schedule reports
- Combining Agency Spe-

cific Databases with the Datamart (like an Accounts Receivable Subsidiary System with the Datamart)

If your agency is unsure of connections please feel free to contact Linda Tullis for help. If we don't hear from your agency we will assume you are not utilizing any special connections listed and do not need to test.

We plan to start testing connections in late August through mid September. If testing goes according to plan, we could be switched over to the new server by October. We will only switch after we feel all known connections are working. For more information contact Linda Tullis at (503) 373-7277, ext. 281.

## Datamart New User Access

How does a new user get access to the Datamart? First, here are the requirements for a new employee:

- A current RACF ID
- Hyperion software installed on computer
- ODBC driver software installed on computer
- OCE's set up on computer

Secondly, to gain access to the Datamart new users need a password specifically for the Datamart. Here are in-

structions on how to get that password:

- Obtain a RACF ID
- Have your supervisor request **Datamart** access through your Agency Security Officer. Give your Agency Security Officer the employee's RACF ID, Name, Phone Number, and E-mail.
- The Agency Security Officer will add your agency name, agency

number, and agency and/or department billing number to the request and e-mail SCD Systems Security.

- SCD Systems Security will confirm the RACF ID is valid and forward the request on to Enterprise Security Office (ESO).
- ESO will set up the new employee and e-mail a temporary Datamart password to the new employee.
