

SDC Introduces New Deputy Administrator

Kurtis Danka returned to DAS in August to serve as deputy administrator of the State Data Center. His most recent position was deputy chief information officer for the Seniors and People with Disabilities Division of the Department of Human Services. Prior to that, Kurtis worked for both DHS and DAS as an IT manager and technical architect. His private sector experience includes application and development management for Deloitte Consulting.

State Data Center Administrator Julie Bozzi describes Kurtis as resourceful, creative and responsive, with an unparalleled intuition. "He has the drive, aptitude and communications skills that have earned the respect and trust of his customers, co-workers and staff," said Bozzi.
