

New Fueling Requirements

Eugene now has a station that pumps renewable bio-fuels, we ask that our customers refuel DAS leased or rented vehicles at **SeQuential Biofuels located at 86714 McVay Highway, Eugene, OR.**

All fuel available from this station is cleaner, and produced domestically from renewable sources. The biofuel station can fuel all gasoline and diesel vehicles.

Our flex fuel vehicles should be filled with E85 and our traditional unleaded fuel vehicles can be filled with the E10 blend.

Biodiesel is also available for use in our vehicles with diesel engines.

You can access the station south of Eugene by taking the I-5 to the Lane Community College exit 189.

Station hours are from **6 am to 9 pm - 7 days a week.** For fueling after these hours, please fuel at the most cost effective location.
