Subject: RE: Task Force Meeting

I'll forward you some of the letters about our house. Norman Building and Design, Jim, Gary, and Ron Norman. House has a wood foundation, toxic mold, EIFS that leaked inside the home. The entire 1st floor and half of the garage was torn down to framing and rebuilt. The entire exterior was torn down to plywood, and retyvek and cedared. Also all the decks, off master and main floor were completely torn off, dry rot, and replaced with steel. Took 10 months. The house was new 11/2000, and started to leak inside the house 2/01.

I sent letters to all legislatures/governor/Bev Clarno/Spoke personally with Ben Westlund on three occasions.

No one cared or did anything. Arbitration quite frankly is horrible for the consumer, and very expensive.....

Linda, just a bit of info.

Governors Roberts and Kitzhaber both wanted to and tried to close the OSU School of Veterinary Medicine. Dr. Schmotzer and I worked like maniacs to get a huge hearing going, through mailings, phone calls, etc., and won both times. Never say never.

What happened with you and your contractor? Who was your contractor?

Joyce Faltus

I can not go to the meeting. I have tried for 5 years to have an impact, and feel that it has all been a waste of time. I do appreciate people like you making an effort. It is a very tiring, and thankless effort. Hang in there.

Linda
