

Client Maintenance Unit (CMU) Requests

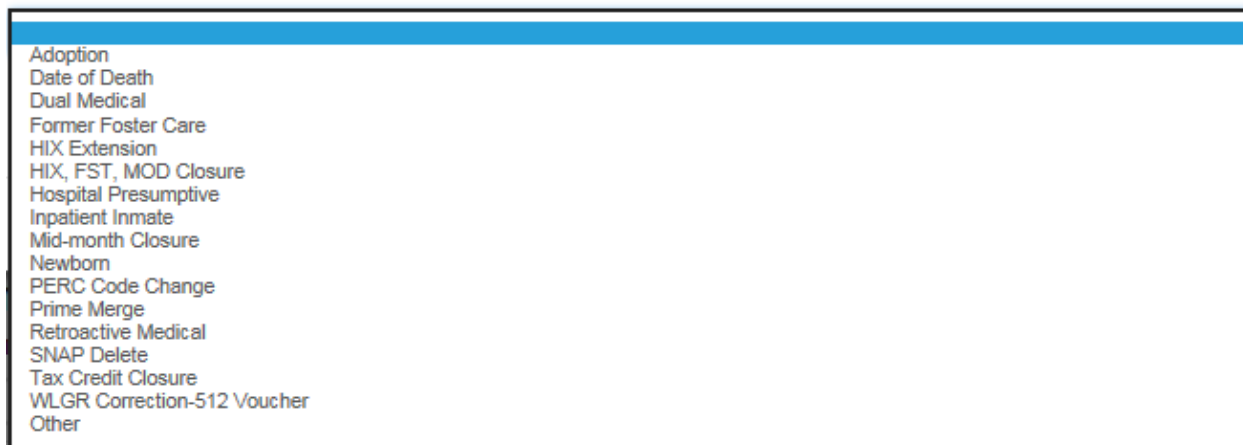

Quick Reference Guide for Field Staff

Before submitting a request to CMU for corrections, use this guide to determine the correct Request Type and if urgent processing is appropriate.

Request Types

The screenshot below lists all available Request Types.

Select Request Type:

A screenshot of a dropdown menu with a blue header bar. The menu lists the following request types: Adoption, Date of Death, Dual Medical, Former Foster Care, HIX Extension, HIX, FST, MOD Closure, Hospital Presumptive, Inpatient Inmate, Mid-month Closure, Newborn, PERC Code Change, Prime Merge, Retroactive Medical, SNAP Delete, Tax Credit Closure, WLGR Correction-512 Voucher, and Other.

Select the Request Type that best matches your need with one of the following:

Adoption

- Individual has been adopted and bio screen needs to be locked.
- Notes on F21 screen or other notification that adopted/bio primes have been merged and need to be split.

Date of Death

- System corrections or updates for a date of death that workers are not able to complete.

Dual Medical

- Two cases with open medical on a **single** prime or the **same** case open on two primes.

Former Foster Care

- Not being used currently.

Client Maintenance Unit (CMU) Requests

Quick Reference Guide for Field Staff

HIX Extension

- Extend eligibility on a closed HIX case for Due Process, RFI, Hearings, etc. Extensions are typically for one or two months. CMU does not extend HIX cases with an infinity end date (12/31/2299).

HIX, FST, MOD Closure

- Changes from the infinity date (12/31/2299) to a specific end date. If the closure date is not the last day of the month, use the Mid-month Closure Request Type.

Hospital Presumptive Eligibility (HPE)

- Changes needed in MMIS that involve HPE cases.

Inpatient Inmate

- Add a segment of eligibility for a client who is currently incarcerated.

Mid-month Closure

- Closures with an end date other than the last day of the month. Examples include, but not limited to: date of death, incarcerations, Child Welfare Programs, OCCS medical transitioning to OSIPM.

Newborn

- Add a segment of eligibility to MMIS due to death of infant or adding a segment of eligibility prior to Child Welfare medical.

Perc Code Change

- Corrections to change the PERC code ONLY.

Prime Merge

- Anytime the same client has two or more designated primes.
Note: If there's an open AFS case and it's not the preferred prime, the case must be closed by the caseworker before CMU can process the prime merge. CMU will close a HIX, FST or MOD case if there is active medical on both primes and when it's not the preferred prime.

Retroactive Medical

- Changes to eligibility such as, but not limited to, backdating, extending for due process or RFI, limited retro and changing eligibility.

Quick Reference Guide for Field Staff

SNAP Delete

- Delete SNAP cases (FS cases in DHR) that are closed, denied or expired so a client can be opened on another FS case.

Tax Credit Closure

- Remove or history medical segment in MMIS due to client having tax credits. Client has requested that their benefits be removed because they should not have had medical or should have ended and now are in danger of penalties or fines.

WLGR Correction-512 Voucher

- Corrections needed in WLGR due to inverted lines or incorrect coding that may prevent payments to providers.

Other

- Add MPR coding to MMIS
- Add segments of time for Child Welfare
- Overrides
- Overlaps
- Cancellation or Payment related issues for (TANF, SIP, ICP, FSCO)
- Direct Deposit Programs
- Anything else that does not fit with the above descriptions

Best Practices

Urgent requests

Check the 'Urgent Processing' box only if urgent processing is needed because the **client has been denied medications or emergency treatment or has no current coverage and needs immediate access to benefits or services.**

If urgent processing is needed but does not meet the urgent criteria above, check the "Urgent Processing" box, select 'Other' and provide a brief description in Step 3. 'Additional Information' section.

Due to the volume of requests CMU receives, it's important that 'Urgent Processing' only be requested when the client has an urgent need.

Trouble shooting

If you have technical problems with the form check to see if a coworker is having the same issue. If they aren't you probably just need to clear the cache on your computer or restart your computer. If you are still having a problem, contact CMU.

You can leave the CMU web form open during your work day (it does not time out), but it's best to log out at the end of your work day. Doing so ensures that any updates to the form are available to you the next time you use it.

Using correct email addresses

Be sure to enter your email address correctly on the web form in the 'Worker Contact Information' section. This will help ensure you receive the confirmation email when your request has been completed. The contact information you entered can be viewed in Step 1 at the top of the web form. If corrections are needed, click on the EDIT button to make the corrections.

The screenshot shows the 'Client Maintenance Unit Request' web form. It is divided into two main steps:

Step 1. Enter Worker Contact Information (with an EDIT button)

First Name	Last Name	Branch or Office	Email Address	Worker Load Code	Phone Number
State	Worker	5503	state.worker@state.or.us	SW	503-555-5555

Step 2. Enter Household Information

Click the "ADD CLIENT" button to add each person that needs a correction. You can add as many people as needed as long as they are in the same household.

ADD CLIENT

Client Name

Action Needed - No clients or requests currently added

Quick Reference Guide for Field Staff

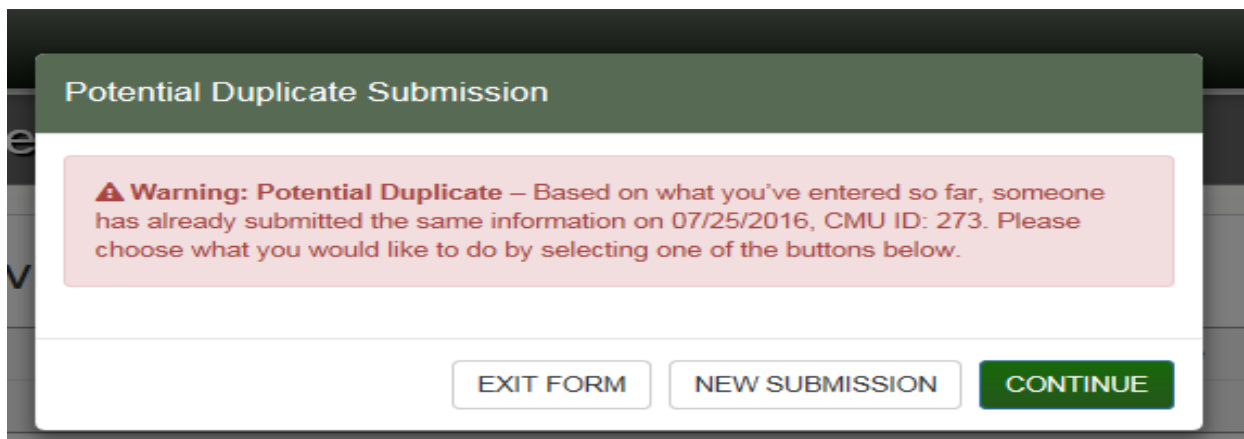

Duplicate submissions

The web form checks every new submission to see if the same request was submitted within a recent date range. If exact values match, a Potential Duplicate Submission warning message appears. The warning message includes the CMU ID # and the date the potential duplicate request was submitted.

If you get the warning message, check your narration system(s) to see if the same request has already been submitted and check MMIS to see if coverage has already been updated.

After checking narration and MMIS, if you are unable to confirm that your submission is a duplicate, call CMU to see if you should still submit the form. If you decide you want to continue, click the CONTINUE button. If you do not want to continue, select EXIT or NEW SUBMISSION.

If the request was submitted but has not yet been processed and there is an **urgent need, do not submit a second request. Instead, call CMU for urgent processing.**

Contacts

If you have questions about a specific request, contact CMU at 503-378-4369. For operational needs with the web form, contact Barbara Key at Barbara.key@state.or.us.
