

837 ENC Professional**Priority 2A**

837P ENC - Professional Claim

DHS Ownership	Dept: HTCPO	Individual:
----------------------	--------------------	--------------------

PHP: Test File Requirements:

Other PHP Concerns about the process:

PHP Comments:

Plan Tracking Number not in production.

Can multiple ST-SE's be handled within a file? OCHIN is sending multiples within a file.

DHS Response: The DHS Translator can accept multiple ST-SEs, but generates a single 997 per functional group (GS-GE).

DHS Comments re: Coordination with 837 Transaction. On 7/14/04, OMAP made a proposal to the HIPAA Contractor Task Force: Add accepted service lines to claims using HARC 24. HIPAA Task Force comments were sent to Pat Van Dyke on 7/21/04. PHPs do not accept proposal to add accepted service lines to the 837 CAS segment. Comments were forwarded to Rick Howard who made a Business Decision. Based on responses from PHPs and further consideration, OMAP will not implement this proposal. 8/23/04: The official Business Decision was posted to the Web.

DHS Comments: DME will continue to be sent in the same manner as pre-HIPAA.

Relationship with Other Transactions:

PHP Comments:

Needs to coordinate with the 835.

Crosswalk Completed:

JAD Sessions were held w/PHPs in July and August 2003 to crosswalk HIPAA Adjustment Reason Codes (HARC) to Disposition and Delete Reason Codes. PHPs shall review quarterly HARC updates as they occur to add or deactivate codes listed on the DHS HARC/Disposition Code Crosswalk via Encounter Data Work Group meetings. While PHPs have input into the disposition of HARCs, OMAP has final authority and discretion.

In process:

Last revision: June 2004

Quarterly Code List updates may be viewed on the Washington Publishing Company site at:<http://www.wpc-edi.com/codes/>

- Provider Taxonomy Codes
- Claim Adjustment Reason Codes
- Claim Status Codes
- Claim Status Category Codes
- Health Care Services Decision Reason Codes
- Insurance Business Process Application Error Codes
- Remittance Remark Codes

Due Date:

Final: Ongoing Updates
 Due Date: _____

Companion Guide:

DHS 837 Profession Companion Guide - FFS 4010A1 (v1.35 - 9/13/04)
 DHS 837 Professional Companion Guide - Encounter 4010A1 (v1.36 - 09/23/04)

Testing / Production

11/5/04- Successful pilot testing of adjustments and deletes is necessary prior to moving to production.

Pilot

Who: LIPA
 Start: 5/17/04 1st Test received

In process: 5/25/04 Results available - CAS Segment: HARC codes missing - test not acceptable.
6/11/04 Conversation with LIPA re: technical questions
6/22/04 2nd Test received - Business Decision: Run Pilot after Plan Tracking Number is implemented
9/3/04: A pilot file from LIPA containing Plan Tracking Number was tested successfully and results emailed to LIPA. There was one claim that had a hospital provider number and was excluded from processing in determining the success of the pilot. HPO has an outstanding question to OMAP to see if this claim is OK.
LIPA discovered one issue with the 835. The 835 had procedure modifier 'EK' attached to all service lines submitted with no modifier. This was quickly resolved, the 835s were reproduced and results made available to LIPA on 09/17/04.

Completed: 9/3/2004

Open on (date): 9/3/04- HPO considers this transaction ready for B2B testing.
 12/6/04 Adjust/Delete Pilot Test file expected this week from Family Care, per Maria Ahrendt.

Miscellaneous Information:

Transaction Development Status:

*09/03/04: A pilot file from LIPA containing Plan Tracking Numbers was tested successfully and results emailed to LIPA. There was one claim that had a hospital provider number and was excluded from processing in determining the success of the pilot. HPO has an outstanding question to OMAP to see if this claim is OK. HPO considers this transaction ready for B2B testing. We are ahead of the scheduled November production implementation time frame.

*10/11/04: This pilot with LIPA was successful and DHS programming has been implemented into production ahead of the scheduled November time frame. LIPA discovered one issue with the 835. The 835 had procedure modifier 'EK' attached to all service lines submitted with no modifier. This was quickly resolved, the 835s were reproduced and results made available to LIPA on 09/17/04.

*11/05/04: It was determined at the October Task Force meeting that a successful pilot test of adjustments and deletes is needed before DHS can consider this transaction fully operational in production. DHS is seeking a trading partner to pilot this functionality.

*12/01/04: It was determined at the October Task Force meeting that a successful pilot test of adjustments and deletes is needed before DHS can consider this transaction fully operational in production. Family Care has agreed to be the pilot tester and we are awaiting a file.
