

CWAC Update on Child Welfare Staffing

November 9, 2011

As of October 26, 2011 there were 96 Child Welfare Field positions across the state in the process of being filled. Once all positions are filled, Child Welfare Field will be staffed at 67% of the field workload positions identified need based on the Spring 2011 Forecast. Potential budget reductions associated with decreased revenue will likely require positions across DHS to be held vacant to meet expectation of general fund savings.
