

## 317 FUNDED VACCINE - Effective July 1, 2007

Vaccines	Ages Covered	All or High Risk?
DTaP Series	6 weeks through 6 years	All
Hepatitis A <sup>1,3</sup>	1 year through 18 years, certain adults	See footnotes
Hepatitis B <sup>2,3,10</sup>	Birth through age 18 years, certain adults	See footnotes
Hib series <sup>4</sup>	6 weeks through 59 months, certain adults	See footnote
HPV series <sup>5</sup>	9 years through 18 years, certain adults	See footnote
IG	All as necessary for post-exposure prophylaxis	
Influenza (2007-08 Season) <sup>6,10</sup>	6 months through 18 years, certain adults	See footnote
IPV	6 weeks through 18 years	All
MMR <sup>7,10</sup>	1 year through 18 years, certain adults	See footnotes
MMR/V	1 year through 12 years (including 2 <sup>nd</sup> doses when indicated)	All Who Need Both MMR and Varicella
Pneumococcal Conjugate (PCV7) <sup>8</sup>	6 weeks through 59 months	All
Pneumococcal Polysaccharide (PPV23) <sup>8</sup>	2 years and older	See footnote
Td <sup>10</sup>	7 years and older	All, plus footnotes
Tdap <sup>10</sup>	11 years and older	All, plus footnotes
Varicella <sup>9,10</sup>	Two doses for all 1 year through 18 years; Certain adults	See footnotes
Vaccines <b><u>Not Covered at all under</u></b> 317 Eligibility include: Meningococcal (MCV4 & MPSV4), Rotavirus		

- **Note: Vaccines for Travel:** Leisure travelers must pay for their vaccines, which should be coded as "B" for billable. Non-leisure travelers (e.g. families migrating to and from Mexico) are eligible for no-cost vaccines as detailed below.
- **Note: Vaccines Required for School Attendance:** 317-funded vaccines are available for primary through high school students of any age if the vaccine is required for school entry. Vaccines required for attendance in specific schools or programs (i.e. hep. B for nursing programs) are not covered.
- **Note: Vaccines for Hematopoietic Stem Cell Transplant Recipients:** 317-funded vaccines are available for all ages, post transplant, as indicated in the Pink Book.

## 1) Adults eligible for hepatitis A vaccine include:

- ❖ Persons with chronic liver disease
- ❖ Persons with Hepatitis B and/or C virus infections
- ❖ Persons seeking care in a STD clinic
- ❖ Persons with clotting factor disorders
- ❖ Non-leisure travelers to countries with high or intermediate rates of infection
- ❖ Men who have sex with men
- ❖ Injection drug users
- ❖ Persons working with non-human primates infected with HAV or with HAV in a laboratory.
- ❖ Persons needing post-exposure prophylaxis
- ❖ Incarcerated persons.

## 2) Hepatitis B vaccine may be given to all children from birth through 18 years. Additionally, Hepatitis B vaccine may be used in adults with the following exposure-risk factors:

- ❖ Persons seeking care in any of the following facilities: STD clinics, HIV centers, drug abuse treatment and prevention programs, hemodialysis and end-stage renal disease centers, institutions and non-residential day care facilities for developmentally disabled persons.
- ❖ Persons with hepatitis C infections
- ❖ Incarcerated persons
- ❖ Injection Drug Users

- ❖ Immigrants, refugees or adoptees from countries where HBV infection is endemic, and their household members
  - ❖ International non-leisure travelers spending six months or more in an area with high rates of HBV infection and who will have close contact with the local population
  - ❖ Alaskan Natives and Pacific Islanders
  - ❖ Individuals engaged in commercial sex work
  - ❖ Hepatitis B vaccine may also be used for appropriate post-exposure prophylaxis.
- 3) Hepatitis A & B vaccines may also be used to complete the series in adults who started their series before they turned 19
- 4) One dose of Haemophilus *influenzae* type b vaccine is available for unimmunized high-risk persons over 59 months of age, with either functional or anatomical asplenia (SSD, post-splenectomy), immunodeficiency, HIV infection, or immunosuppression due to HIV infection or cancer chemotherapy.
- 5) HPV vaccine may be used to complete the series in a 19 year old if you started the series while they were 18 or younger.
- 6) TIV and LAIV may be used according to each influenza season coverage guidelines, for ages 6 months through 18 years only. Guidelines are published annually in August. Please request a copy of these guidelines if you do not have them available.
- 7) Measles-containing vaccine (MMR) is covered for:
- ❖ age-appropriate children;
  - ❖ adults born on or after 1/1/57 who:
    - i. are certain college students as required by Oregon law
    - ii. post-partum women with negative rubella titers
- 8) Pneumococcal Polysaccharide (23-valent) is available for: All adults 65 years of age and older; persons 2 years of age and older with a normal immune system who have a chronic illness, including cardiovascular disease, pulmonary disease, diabetes, alcoholism, cirrhosis, or cerebrospinal fluid leak, or cochlear implants; immunocompromised persons 2 years of age and older who are at increased risk of pneumococcal disease or its complications including those with splenic dysfunction or absence, Hodgkin's disease, lymphoma, multiple myeloma, chronic renal failure, nephrotic syndrome; persons immunosuppressed from chemotherapy or high dose corticosteroid therapy (14 days or longer); persons 2 years of age and older with asymptomatic or symptomatic HIV infection. Consider vaccinating the following: persons living in special environments or social settings with an identified increased risk of pneumococcal disease or its complications, such as certain Native American (i.e. Alaskan Natives, Navajo and Apache) populations.
- 9) Varicella vaccine is covered for:
- ❖ age appropriate children;
  - ❖ adults who are non-immune to varicella, have no past history of disease, and have had acute exposure to varicella disease within five days;
  - ❖ All ages in response to verified outbreaks.
- 10) In addition to clients, public clinic employees are eligible for certain vaccines as follows, if they are without health insurance that covers vaccine costs:
- ❖ Those who provide healthcare to clients routinely/daily are eligible for the following vaccines:
    - i. Hepatitis B
    - ii. MMR
    - iii. Varicella
  - ❖ Those who work at a public clinic without regard to patient contact are eligible for the following vaccines:
    - i. TdaP/Td
    - ii. Influenza
