

SECTION: State Program Operations

200

SUBJECT: OVERVIEW

DATE: September 7, 1994 (*Reviewed 06/96*)

This manual is designed to serve as a policy and procedures guide for local WIC programs, with state program operations detailed only as necessary to clarify local operations. Consequently, many of the functions of the state program, such as liaison with the USDA regional office and Oregon Health Division, are not described here.

This section contains information on general state operations, such as selection of local programs and local program review. State functions relating to vendor, data system, and fiscal areas are covered in their respective sections of this manual. ★
