Steps to healthy Aging

Benefits of Walking

- Builds & maintains healthy bones, muscles & joints
- Improves balance and muscle strength
- Prevents falls
- Lowers risk factors for certain diseases
- Makes heart stronger & helps control blood pressure
- Promotes well-being & self-esteem
- Reduces feelings of depression & anxiety

How to Begin

- **Check with your physician before beginning.**
- **Start slowly and add distance as you build endurance.**
- **Walk with a partner, walk in the mall, walk outside…just walk.**
