SECTION 2. PROGRAM AND POSITION INFORMATION

a. Describe the program in which this position exists. Include program purpose, who's affected, size, and scope. Include relationship to agency mission.

The program in which this position exists is the Health Services section of the Oregon Department of Corrections. The purpose of this program is to provide health care to inmates at each state institution operated by the Department of Corrections. State and federal laws have established that inmates are entitled to health care during incarceration. Health care services available to inmates must be consistent with health care provided in the community in order to meet the legal obligation the state has when persons are incarcerated. This means that all types and levels of health care must be provided in a clinically appropriate manner by properly credentialed professionals in settings equipped and designed for the delivery of health care. Health care includes medical, dental and psychiatric/mental health services.

The Health Services section is comprised of an administrative unit which sets policy and long term direction and a series of operational units representing the health care program at each facility or a division wide clinical service. The health care program at each of the correctional institutions operated by the Department is responsible for delivering health care to inmates consistent with policy established by the Section. The average daily population for whom the entire range of services must be available is 13,500 inmates. The Health Services section employs more than 500 health care personnel and manages a number of agreements with health care organizations in communities throughout Oregon

and the surrounding states in order to deliver constitutionally adequate health care. The biennial budget for the Health Services section exceeds \$150 million dollars.

The Oregon Accountability Model (OAM) depends upon a team approach to custody with the security-series personnel and non-security personnel communicating effectively to maintain safe, secure, and sanitary correctional environments while preparing inmates for successful reentry into the community. The vast majority of DOC inmates will return to Oregon communities. Enhanced public safety, lower crime rates, and reduced recidivism can all be tied directly to attitudes and actions of correctional staff who must effectively apply ODOC rules and transition initiatives in their daily interaction with inmates. All staff are expected to model pro-social behaviors; reinforce positive behaviors; redirect negative behaviors; and effectively communicate observed behaviors to responsible program staff, administrators, and supervisors in support of OAM.

The Department of Corrections recognizes and respects the dignity, diversity and human rights of all persons. In support of those values DOC employees are expected to promote a respectful work environment that recognizes cultural diversity. Moreover, DOC upholds a zero-tolerance policy towards all sexual abuse.

Managers and supervisors are expected to provide leadership that contributes to the establishment of a working environment that is positive, productive and free from harassment and discrimination. As part of this effort, managers and supervisors are expected to participate in and encourage others to participate in the agency's activities that support affirmative action. This includes recruiting, selecting, retaining and promoting individuals with a diverse background who are committed to the mission and values of the Department.

b. Describe the primary purpose of this position, and how it functions within this program. Complete this statement. The primary purpose of this position is to:
