

Section 13—Index

Topic	Section/page	
Activities (ratio) timeline	2-1	Ratio trend analysis
Additional analysis, examples	9-1	Regression analysis (see chapter 11 also).....
Adjusting individual sales	6-2	Regression, linear
Appendix—additional reference materials	14-1	Reliability measures
Appraisal ratio studies	9-1	Sale (property) identification
Average absolute deviation (AAD)	7-5	Sale listing format
Basic property classes	3-1	Sales adjustment table (individual)
Basics steps to a complete ratio study	1-2	Sales analysis, double/comparable
Central tendencies, ratio indications	7-4	Sales collection year
Central tendencies, summary	7-12	Sales confirmation, methods
Coefficient of dispersion (COD).....	7-6	Sales data collection and data format
COD standards	7-6	Sales data collection flow chart
Coefficient of variation (COV)	7-9	Sales data year
Condition codes, sale data	5-4	Sales database
Confidence interval, table, example	7-14	Sales listing data.....
Consideration from instrument	5-4	Sales questionnaire letter
Database fields.....	4-2	Sales questionnaire, examples
Deductions from sales price	5-1	Sales transaction analysis
Frequency distribution	7-1	Sales, usable or unusable
Frequency distribution, skewed, example.....	7-3	Selected ratio, adjusting
Geometric mean	7-11	Standard data format
Glossary.....	12-1	Standard deviation, bell curve example
Introduction	1-1	Standard deviation.....
Manufactured structure sales.....	8-1	Statistical analysis, computing the ratio
Manufactured structure statutory references	8-1	Statistical analysis, sampling
Market area boundaries	3-4	Statistical data
Market area codes and maintenance	3-4	Statutes and administrative rules
Market areas.....	3-4	Straddle study
Market data sources.....	4-1	Time adjustment, methods
Mean, array analysis hints	7-7	Time adjustment, purpose
Measuring RMV level.....	7-3	Time trend scatter graph, example
Median.....	7-4	Time trends, types
Median, array analysis hints	7-5	Toolbox (process aids)
Mid-point ratio, table examples	6-9	Trend line analysis (chart example)
Mode	7-11	Trend line graphs, examples
Multi-account sales	3-1	Uniformity measure (AAD).....
Percent of similarity	7-12	Uniformity measure (COD).....
Preparing/assembling the ratio study	10-1	Uniformity measure (COV)
Preparing ratio study, elements, example	10-1	Uniformity measure (PRD).....
Price related differential (PRD)	7-10	Users of the ratio study
Progressivity/regressivity (PRD) examples	7-10	Validity determination (cent. tendencies)
Property classification	3-1	Vertical equity (PRD)
Purposes of the ratio study	iii	Weighted mean
Ratio study year	2-1	Weighting
