Introduction

Oregon's property tax system is one of the most important sources of revenue for the public sector in Oregon. This source raised \$3.61 billion for local governments in fiscal year 2003–04. Only state personal income tax collections exceed property tax revenues as a source of state and local tax revenue. Over the past decade, property tax revenues have been reduced and limited as a result of two changes to how taxes are calculated. Since the last limitation went into effect in 1997–98, and despite the economic downturn of the last couple of years, property tax revenues continue to gradually increase each year.

This publication describes Oregon's property tax system through the presentation of statistical information. Specifically, it presents assessed values, market values, and taxes imposed by county and type of taxing district. In addition, the publication contains a brief description of how Oregon's property tax system has changed over the last 12 years and how it currently works.

This document contains four sections:

- The *Overview and Highlights* makes observations about distinguishing features of fiscal year 2003–04 and recent trends in Oregon's property tax system.
- The *Guide to Using the Data* explains how certain data elements are handled in the tables. This guide is provided both to clarify some subtle features of the property tax system that may appear inconsistent and to point out some data limitations.
- The *Detailed Tables* section provides tables of property values and taxes imposed, both by county and type of district. Taxes collected and uncollected are also included by county.
- Finally, the three appendices contain a detailed list of district tax rates (Appendix A), a description of changes to the property tax system over the last decade (Appendix B), and a glossary of terms used in the publication (Appendix C).

The information in this book is presented primarily at the county or district-type level. Additional information about property taxes is available in two other Department of Revenue publications. Information about individual taxing districts can be found in the 2003–04 edition of the *Oregon Property Tax Statistics Supplement*. Information about property tax exemptions can be found in the *State of Oregon 2003–05 Tax Expenditure Report*.

In recent years, some of the property tax data the department has received from counties has been incomplete. This has prevented some statewide totals from being calculated. In an effort to provide as much useful information as possible, we have included tables with missing data. Where data were missing, every effort was made to clearly identify the gaps. Totals are included only where we have complete data for all 36 counties. In some cases, certain data discrepancies could not be resolved. The *Guide to Using the Data* section provides further discussion of the major data problems.

Overview and Highlights

Statewide Taxes Imposed and Property Values

Property taxes imposed in Oregon totaled \$3.61 billion in fiscal year 2003–04, an increase of 5.8 percent from the year before. This follows an increase of 5 percent for fiscal year 2002-03, and 7.9 percent for fiscal year 2001-02.

The increase in 2003–04 can be attributed primarily to growth in property values and new local option and bond taxes. An additional factor that influenced the growth of taxes imposed for some districts was a change in urban renewal calculations. See Appendix B for a description of the urban renewal changes.

Statewide, the real market value of property slightly exceeded \$305 billion, an increase of 6.3 percent since last year. Not only does this growth rate continue the trend of increasing property values, it reflects a marked change from the recent pattern of declining growth rates that has existed since 1999-00. Although real market value grew at a faster pace, such is not the case for total assessed value, the value of property subject to tax. It increased from \$219.9 billion in fiscal year 2002–03 to \$227.9, an increase of 3.6 percent. Assessed values generally are limited to 3 percent growth per year, so this increase indicates that additional value from property improvements and other exceptions more than offset the effect of properties with assessed values that declined. See the “Historical Context” description on page 6 for more on assessed value.

Statewide, the ratio of assessed value to market value continued to decline (by 1.9 percent) to 74.6 percent for 2003–04. For a discussion of the differences between assessed and market value, see *Appendix B: A Recent History of Oregon Property Taxation*.

Exhibit 1

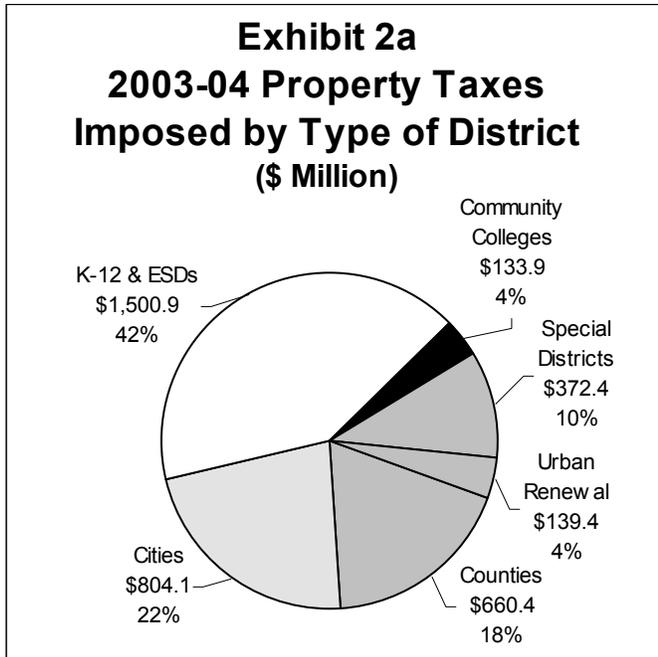

SUMMARY OF OREGON PROPERTY VALUES AND TAXES IMPOSED (\$ million)

	2002-03	2003-04	Percent Change
Real Market Value*	\$287,260.0	\$305,351.4	6.3%
Total Assessed Value*	\$219,877.9	\$227,879.4	3.6%
Net Assessed Value*	\$213,998.4	\$221,584.0	3.5%
Operating Taxes	\$2,775.2	\$2,947.9	6.2%
Bond Taxes	\$504.9	\$523.8	3.7%
Total District Taxes	\$3,280.1	\$3,471.7	5.8%
Urban Renewal Taxes	\$134.5	\$139.4	3.6%
Total, all Taxes	\$3,414.6	\$3,611.2	5.8%

* An additional \$19.7 million assessed value of unallocated utility property is taxed by the state and the tax is then distributed back to counties. See glossary for a description of net and total assessed value.

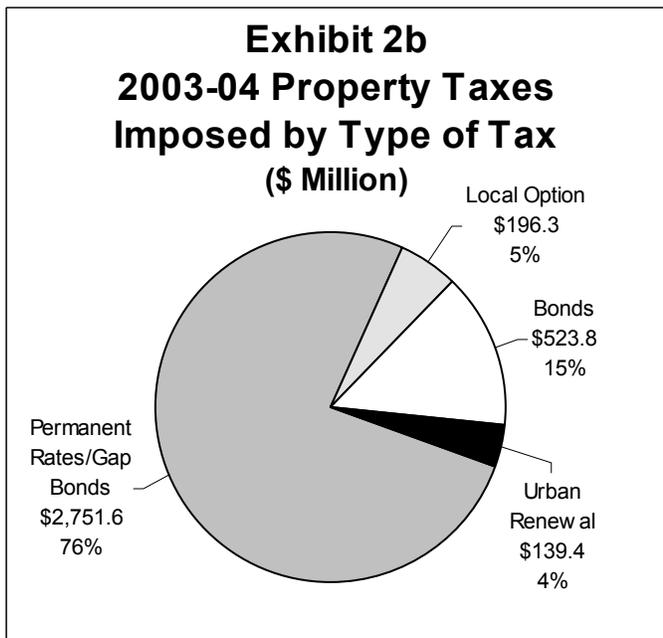

Taxes by Type of District and by Type of Tax

The accompanying charts illustrate the composition of taxes imposed for 2003–04 by type of district and by type of property tax. Please refer to the Glossary for definitions of terms.

Type of District

Approximately 1,500 districts impose property taxes in Oregon. The accompanying chart illustrates the relative share of property taxes that each type of government imposes, with schools receiving the largest share of property tax revenue (42 percent of the total). Cities (22 percent) and counties (18 percent) are the next largest district categories. Special districts, such as fire, road, water, hospital, park, and port districts represent the largest number of districts, but they only imposed 10 percent of the taxes.

Type of Tax

Property taxes are composed of four primary parts: 1) permanent rate and gap bond levies, 2) local option levies, 3) bond levies, and 4) urban renewal revenues. Taxes from permanent rate and gap bond levies comprise the most significant portion of property taxes, representing 76 percent of all property taxes imposed. The share of taxes by type of levy did not change much from last year. Local option levies grew from four percent to five percent of total property taxes imposed, while the share of taxes from permanent rate and gap bond levies decreased from 77 percent to 76 percent. The shares corresponding to bonds and urban renewal revenues remained unchanged from the

previous year.

Exhibit 3
Type of Property Taxes Imposed, 2002-03 and 2003-04
By Type of District (Millions of Dollars)

K-12 & ESDs	1,058.1	1,094.9	3.5%	36.9	58.5	58.3%	329.7	347.4	5.4%	1,424.7	1,500.9	5.3%
Community Colleges	96.3	100.0	3.8%	NA	NA	NA	31.9	34.0	6.5%	128.2	133.9	4.4%
Special Districts	288.5	302.0	4.7%	16.3	20.2	23.8%	50.2	50.2	0.1%	355.0	372.4	4.9%
Total District Taxes	2,641.9	2,751.6	4.2%	133.2	196.3	47.3%	504.9	523.8	3.7%	3,280.1	3,471.7	5.8%
Urban Renewal Agencies										134.5	139.4	3.6%
TOTAL										3,414.6	3,611.2	5.8%

Exhibit 3 summarizes some of the changes in property taxes in fiscal year 2003-04. These include:

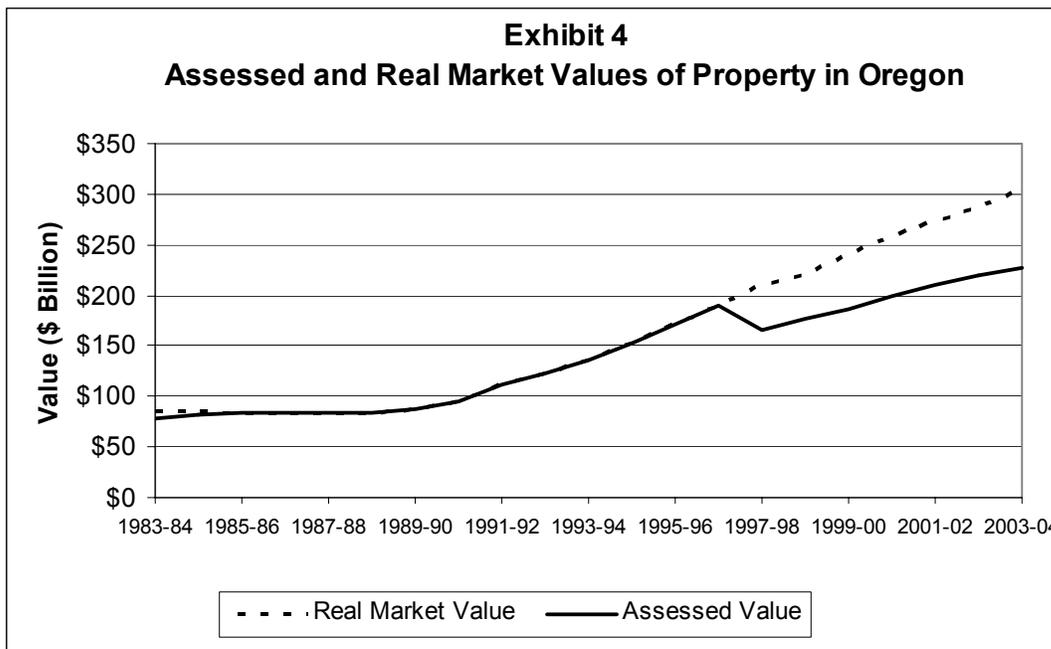

- Total property taxes grew by 5.8 percent in fiscal year 2003-04, a faster rate than last year's 5 percent growth.
- Combined taxes from permanent rates and gap bond levies grew by 4.2 percent in fiscal year 2003-04.
- Local option taxes grew by 47 percent over last year, with city local option taxes increasing fastest. Much of this growth resulted from new levies. In fact, 11 cities that had not done so in 2002-03 used local option levies. Six school districts also imposed new local option levies.
- Bonds, the primary taxing vehicle for funding long-term capital projects, increased by 3.7 percent. This is significantly lower than the prior year's increase of 5.1 percent. While city bond revenue fell by 3.9 percent, both schools and community college districts experienced large increases in bond revenue.
- Taxes for urban renewal increased 3.6 percent this year after increasing by 6.4 percent in 2003-04. Most urban renewal agencies increased the amount of revenue they received through property taxes. However, 13 agencies raised less revenue than in 2002-03. Five new plan areas were added in 2003-04. The new plan areas are located in Clatsop, Curry, Jackson, Jefferson, and Lane counties. See tables F.1 and F.2 for information about specific plan areas.

One important point to consider is that statewide figures result from a wide range of individual district characteristics. For example, 169 of the 1,452 districts in fiscal year 2003-04 did not impose taxes. These were mostly road, water, sanitary, or service districts. Of

the districts that did impose taxes in fiscal year 2003–04, approximately 70 percent increased taxes at a rate no faster than the growth rate of their assessed value. When large districts have substantial changes in their taxes, they can noticeably impact the statewide numbers. The largest 25 districts account for roughly half of all district property taxes imposed in fiscal year 2003–04. Information about specific districts is available in the the 2003–04 edition of the *Oregon Property Tax Statistics Supplement*.

Historical Context

Prior to 1997–98, the assessed, or taxable, value of a property in Oregon was equal to its real market value, except for a brief period in the early 1980s.¹ For 1997–98, Ballot Measure 50 redefined each property’s assessed value as 90 percent of the property’s 1995–96 assessed value, thus separating the assessed and real market value for every property. In addition, the assessed value of a property now is limited to a maximum of 3 percent growth per year. Exhibit 4 shows total assessed value growth from 1982–83 to 2003–04. After relatively modest growth through most of the 1980s, property values grew rapidly from 1989–90 through 1996–97. In fact, values during this period grew by an average annual rate of 11.6 percent.

The passage of Measure 50 in 1997 redefined assessed value. Consequently, 1997–98 total assessed value fell 12.5 percent below the prior year and 21 percent below the 1997–98 real market value. Since 1997–98, statewide assessed value has been increasing gradually each year, but not as fast as real market value. From 2002–03 to 2003–04, assessed value has fallen from 76.5 to 74.6 percent of statewide real market value.

To fully understand the growth in total assessed value, it is important to know the two possible sources of that growth: existing property and new property. The growth in assessed value for existing property is the value subject to the limit; for every property that existed in 1997–98 and remained unchanged through 2003–04, the assessed value could increase by no more than 3 percent per year. On the other hand, some properties can experience a decline in assessed value, such as business personal property that depreciates.

¹ For the years 1980 through 1984, assessed values differed from market values because the Legislature set the assessment ratio at a level below 100 percent. The ratio returned to 100 percent in 1985.

New property, such as a newly constructed home, represents a new source of assessed value. Some other sources of new value include improvements, where an addition to a house significantly increases the home's value, or rezoned property, where a change in zoning laws could increase the value of a property more than 3 percent in the year that the change took place.

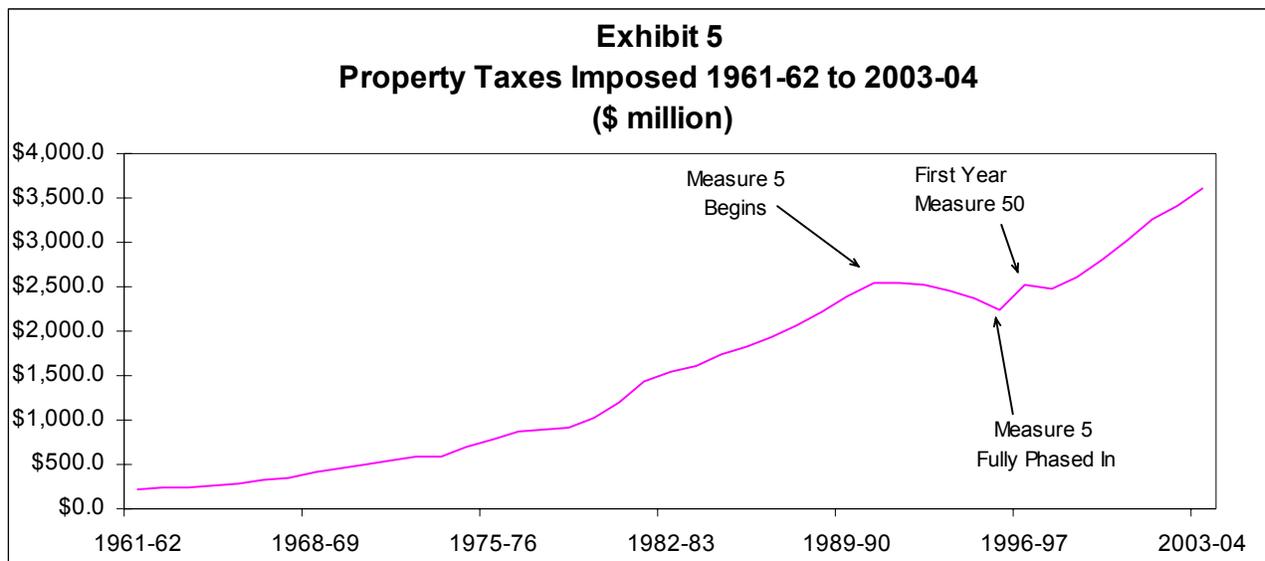

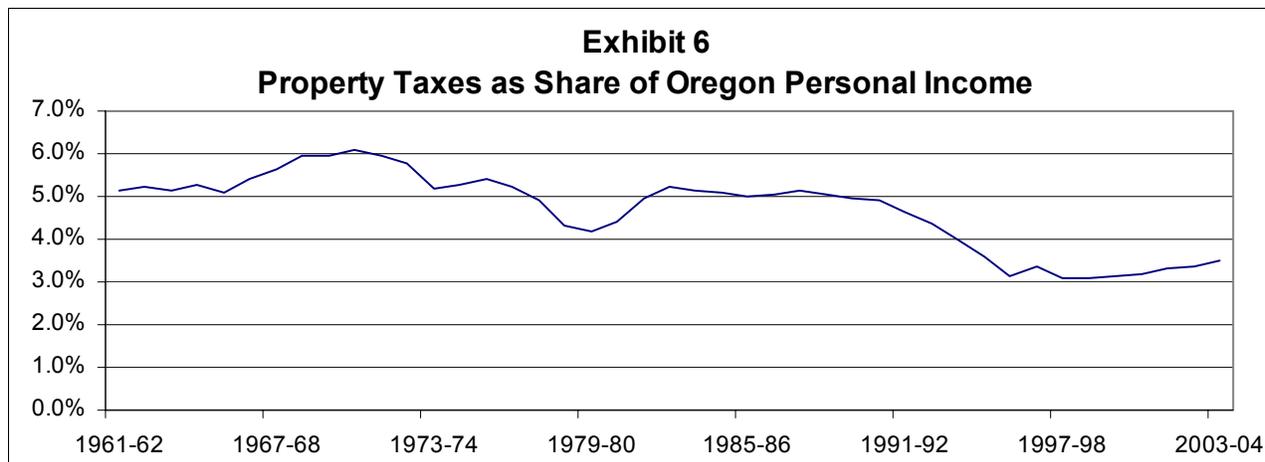

Exhibit 5 displays the growth of Oregon property taxes during the past 44 years. The chart illustrates several distinct periods. After modestly increasing up to the mid-1970s, property taxes grew more rapidly through the early 1990s. In 1990, voters passed Measure 5, which enacted constitutional tax rate limitations. These limitations resulted in annual declines in taxes imposed through 1995-96. Taxes in 1996-97 increased with assessed values but continued to be restricted by the Measure 5 limitations. Measure 50's limits caused imposed taxes to fall again in fiscal year 1997-98. Since 1997-98, taxes imposed have been increasing, but are at lower levels than they would have been without the limitations.

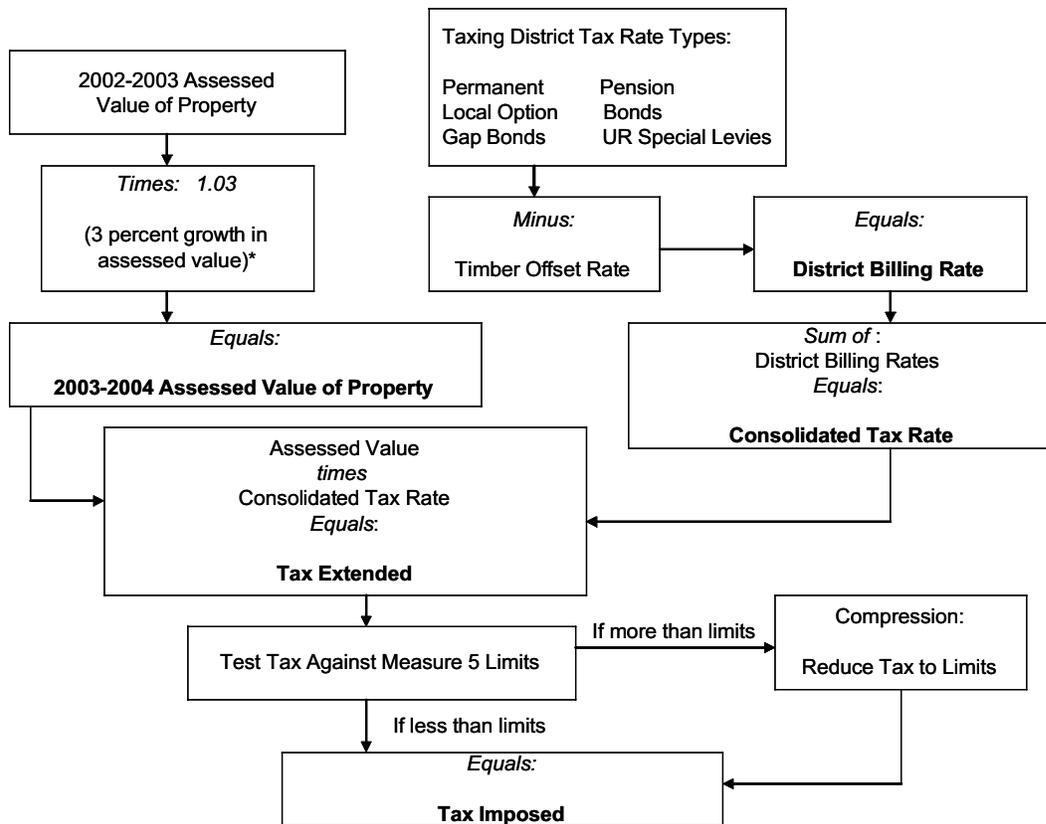

To appreciate the burden of property taxes on taxpayers, it is helpful to look at taxes in relation to personal income, which is a broad-based measure of statewide economic activity. Exhibit 6 shows the share of Oregon personal income that property taxes represent. The combination of increasing personal income during the 1990s and restrictions on property taxes brought about by the two ballot measures resulted in a decline in the share of income represented by property taxes. This percentage decreased from over 5

percent in the 1980s to approximately 3 percent in the late 1990s. The gradual increase since 1999–00 is due to much slower income growth and continuing increases in property taxes.

How Property Taxes are Determined for an Individual Property

Exhibit 7 shows the process used to determine the property tax bill for an individual property. Note that the steps for calculating the billing rate are done for each taxing district in which a property is located. For example, a home may be located within six taxing districts: a county, a city, a K–12 school district, an education service district, a community college district, and a cemetery district. Each of these districts will have a billing rate, and their sum will equal the consolidated tax rate for the home. The assessed value of the home multiplied by the consolidated tax rate results in the tax extended. The nonbond taxes paid to the K–12, education service, and community college districts are subject to the Measure 5 school limit, while the nonbond taxes paid to the county, city, and cemetery are subject to the Measure 5 general government limit. If either the school or general government tax-extended amount is greater than the respective Measure 5 limit allows, then the tax is reduced to the limit. In reducing the nonbond tax, the tax for each district is reduced first by reducing local option taxes to zero and then reducing nonbond taxes proportionately. The final tax (nonbond tax plus bond tax) is referred to as the tax imposed, and this is the amount the property owner must pay.

Exhibit 7: Property Tax Calculation for an Individual Property

*If improvements were made to the property during 2003, then the assessed value could grow more than 3 percent. Assessed value calculation above is for property with real market value greater than assessed value.

Guide to Using the Data

This publication presents information about assessed and real market values and taxes imposed under Oregon's local property tax system. Because this tax system is complex, we provide this guide to help readers understand the meaning of the data. In some cases, similar concepts may be reported differently from one table to another to reflect certain characteristics of the property tax system. In other cases, the use of different sources results in slight data variations across tables.

Data Sources and Discrepancies

The county assessors' offices provide all data except for the permanent rates and values for centrally assessed property. As in past years, there are occasional discrepancies in the tables as a result of inconsistencies in the data reported by counties. Rather than letting these data problems prevent the publication of available information, we attempt to provide available information as clearly as possible. Because this publication is designed to be a description of the property tax system using true and correct figures, generally we have not included estimates when actual data were unavailable.

The data issues can be grouped into two categories: missing data and inconsistent data. Missing data are the result of counties being unable to provide the requested information. The most notable of these cases pertain to exempt or specially assessed property and property values by property class (residential, commercial, etc.). NA in tables B and C indicates missing data. Totals are not reported where we do not have all of the information.

Assessed Value

Both total and net assessed value are reported within this document. The difference between these two values lies in the treatment of state fish and wildlife property, nonprofit housing property, and urban renewal excess values. Table A.3 shows both the total and net assessed values, and how they relate to one another. Net assessed value is used in calculating tax rates, and for calculating taxes imposed for taxing districts. It is calculated by adding nonprofit housing values and state fish and wildlife values to total assessed value, then subtracting urban renewal excess value. Both state fish and wildlife property and nonprofit housing property values are added to total assessed value because the state makes payments instead of property taxes on these properties. Net assessed value does not include urban renewal excess value because property tax revenues from excess value go to urban renewal agencies instead of tax districts for the purpose of eliminating neglected areas. See Appendix B for more on how urban renewal financing works.

The assessed value of unallocated utilities is reported only in certain tables, depending on the level of detail. These small railcar utility properties, which represent a small piece of total value, cannot be attributed to specific counties. Therefore, tables presenting county breakdowns do not include the unallocated value, unless it is listed at the bottom of the table. Also, assessors do not use this value when computing tax rates. Owners of these utilities pay taxes to the state, which then distributes the money to counties.

Taxes Extended and Imposed

Urban renewal revenues generally are not included in the tax extended or tax imposed figures in the detail tables. However, they are included in the *Introduction* and *Overview and Highlights* sections, and in tables F.1, F.2, G.1, and G.2.

Table Changes and Clarifications:

- A.1–A.2 Districts are counted once, even if they cross county borders. In years before fiscal year 2000–01, districts that crossed county lines (known as joint districts) were counted once for each portion of the district that was in a different county.
- B.2 Changes in the numbers from one year to the next may be partially caused by reclassification of properties by the counties for reporting purposes. In addition, Western Oregon Small Tract Option is no longer reported. Accounts that previously fell under this program are now included in other forestland classes.
- B.3 The values reported include the adjustments to utility values from supervisory orders. These adjustments are intended to be made before tax rolls are certified. In the past, the adjustments from supervisory orders were not included.
- D.1-D.2 ‘Tax to Extend’ means the amount of district tax calculated for extension to accounts. It does not include the effects of individual account rounding or tax reductions to meet constitutional limitations.
- D.3-D.4 These tables report tax actually extended to accounts along with tax imposed and the loss due to tax limitations.
- Appendix A Permanent rate authority includes rate reductions mandated by SB 123 in the 1999 legislative session.

NOTES: The category "Other" includes taxing districts such as library, transit, and public utility districts.
Tax rates are applied to net assessed value, which includes nonprofit housing value and state fish and wildlife value but excludes urban renewal excess value.
Property taxes imposed excludes special assessments and taxes allocated to urban renewal agencies.
Districts that cross county borders are counted only once rather than counting each county portion of a district separately.
Statewide value totals exceed the values taxable by county districts because some property is not part of any county tax district.

* Due to inconsistencies in information reported by counties, manufactured structure values reported here are slightly different from those reported on Table B.1

NOTES: Assessed values of public utilities do not include \$19.7 million in value taxed by the state.
Parts may not add up to totals due to reporting methods of counties.

NOTES: Significant variation across years may be due to classification changes by counties.

NA indicates that the county did not provide data or the class was not reported in that year.

Due to program changes, accounts should no longer be reported as belonging to the Western Oregon Small Tract Option class. Accounts that previously fell under this program should instead be included in other forestland classes.

NOTES: Significant variation across years may be due to classification changes by counties.

NA indicates that the county did not provide data or the class was not reported in that year.

Due to program changes, accounts should no longer be reported as belonging to the Western Oregon Small Tract Option class. Accounts that previously fell under this program should instead be included in other forestland classes.

NOTES: Significant variation across years may be due to classification changes by counties.

NA indicates that the county did not provide data or the class was not reported in that year.

Due to program changes, accounts should no longer be reported as belonging to the Western Oregon Small Tract Option class. Accounts that previously fell under this program should instead be included in other forestland classes.

NOTES: Significant variation across years may be due to classification changes by counties.

NA indicates that the county did not provide data or the class was not reported in that year.

Due to program changes, accounts should no longer be reported as belonging to the Western Oregon Small Tract Option class. Accounts that previously fell under this program should instead be included in other forestland classes.

NOTES: The category "Other" includes taxing districts such as library, transit, and public utility districts.
Taxes in the "Outside Limit" category are not subject to the Measure 5 rate limits.
Any difference between "Outside Limit" tax extended and tax imposed is due to rounding.
Urban renewal revenues are not included in this table.

 or if the district voluntarily uses a lower rate.

Appendix B

A Recent History of Oregon Property Taxation

To understand the current structure of Oregon's property tax system, it is helpful to view the system in a historical context. Although governments in Oregon began taxing property before statehood, the structure of the tax changed very little until the 1990s, when two statewide ballot measures dramatically altered the system.

Voters passed Measure 5, which introduced tax rate limits, in 1990. It took effect in the 1991–92 tax year. When fully implemented in 1995–96, Measure 5 cut tax rates an average of 51 percent from their 1990–91 levels. Measure 50, passed in 1997, cut taxes, introduced assessed value growth limits, and replaced most tax levies with permanent tax rates. It transformed the system from one primarily based on levies to one primarily based on rates. When implemented in 1997–98, Measure 50 cut effective tax rates an average of 11 percent from their 1996–97 levels.

This appendix consists of four sections designed to provide a history of Oregon's property tax system within the context of the changes of the 1990s. The first section, *Overview*, consists of a broad look at how the two ballot measures have affected the property tax system. The second section, *Property Tax Administration*, reviews how property assessment, tax calculation, and tax collection have been transformed. The third section, *Urban Renewal Agency Revenue*, describes the changes urban renewal agencies have undergone. The fourth and last section, *Tax Relief*, discusses programs to reduce tax burdens that have existed during the past twenty years.

Overview

One useful way to understand the recent history of the property tax system is to divide the discussion into three distinct periods: Pre-Measure 5, Measure 5, and Measure 50.

Pre-Measure 5

Oregon had a pure levy-based property tax system until 1991–92. Each taxing district calculated its own tax levy based on its budget needs. County assessors estimated the real market values of all property in the state. Generally speaking, the full market value of property was taxable; there was no separate definition of assessed value. The levy for each taxing district was then divided by the total real market value in the district to arrive at a district tax rate. The taxes imposed by each district equaled its tax rate multiplied by its real market value. As a result, there was no difference between taxes imposed and tax levies under this system. Most levies were constitutionally limited to an annual growth rate of 6 percent, and levies that would increase by more than 6 percent required voter approval.

Under this system, the tax rate for an individual property depended on the combination of taxing districts from which it received services. Taxes for each property were calculated by adding the tax rates for the relevant taxing districts to arrive at a consolidated tax rate. That tax rate was multiplied by the assessed value of the property to determine the tax imposed on that property. The annual growth in taxes on an individual property depended on a number of factors, including new or larger levies and the amount of new construction within the district. For example, if new construction did not occur, and property values did not change, then any growth in levies meant taxes increased for individual properties. On the other hand, new construction within the district meant that the levies were distributed across greater value. The tax rate

would fall when the value of the district increased. This growth could result in lower taxes for some individual properties.

Measure 5

Measure 5 introduced limits, starting in 1991–92, on the taxes paid by individual properties. The limits of \$5 per \$1,000 real market value for school taxes and \$10 per \$1,000 real market value for general government taxes apply only to operating taxes, not bonds.² If either the school or general government taxes exceeded its limit, then each corresponding taxing district had its tax rate reduced proportionately until the tax limit was reached. This reduction in taxes to the limits is called “compression.”

Measure 5 resulted in a system that was a hybrid of levy-based and rate-based systems. For properties where the school and general government taxes were below the limits, the process resembled a levy-based system; taxes imposed depended on levies. For properties where the calculated taxes exceeded the limits, and hence the tax rates were fixed at the limits, the process more closely resembled a rate-based system; taxes imposed depended on assessed values.

Measure 50

The 1997 Legislature drafted Measure 50 in response to the passage of citizens’ initiative Measure 47 in November 1996. Measure 47 would have rolled back property taxes (not assessed values) to 90 percent of the 1995–96 level for each property in the state. Measure 47 was repealed by Measure 50. This legislatively referred measure was drafted to correct a number of technical problems with Measure 47 while replicating its tax cuts.

The objective of Measure 50 was to reduce property taxes in 1997–98 and to control their future growth. It achieved these goals by cutting the 1997–98 district tax levies and by making three changes: switching to permanent rates, reducing assessed values, and limiting annual growth of assessed value.

While Measure 5 simply limited the tax rates used to calculate taxes imposed, Measure 50 changed the concepts of both assessed values and tax rates. Assessed value is no longer equal to real market value. For 1997–98, the assessed value of every property was reduced to 90 percent of its 1995–96 assessed value.³ Because growth in value has not been uniform throughout the state, this change had varying impacts. Properties that had experienced the greatest value growth between 1995–96 and 1997–98 received the greatest cuts in assessed value, and consequently in taxes. For new property that did not exist in 1995–96, such as business personal property or improvements, the assessed value was calculated as a percentage of its market value.

For existing property, Measure 50 limited the annual growth in assessed value to 3 percent. This limitation made predicting future assessed values much simpler. For new property (e.g., newly constructed homes), assessed value is calculated by multiplying the new property’s real market value by the ratio of assessed value to real market value of similar property. This approach to assigning values to a new property assures that it is taxed consistently with similar existing properties. Measure 50 also states that assessed value may not exceed real market value. As a result, if the real market value of a property falls below its assessed value, the taxable value will be set at the real market value.

² The limit for school taxes was \$15 per \$1,000 assessed value in 1991–92. It was reduced by \$2.50 each year until it reached a rate of \$5 per \$1,000 assessed value in 1995–96.

³ In 1995–96, assessed and real market value were equal.

Before Measure 50, levies were set by local governments and voters, and tax rates were the result of dividing levies by assessed value. Under Measure 50, most levies were replaced by permanent tax rates, making the permanent rates central to the property tax system.

There are three types of property taxes that taxing districts may impose: taxes from the permanent rates, local option levies, and bond levies.⁴ Only the permanent rates are fixed; they do not change from year to year. Bond levies typically are approved in terms of dollars, and the rates are calculated as the total levy divided by the assessed value in the district. Local option levies may be approved either in rate or dollar terms. If the local option levy is in dollar terms, then rates are calculated in the same way as bond levy rates.

Taxes from the permanent rates, typically referred to as operating taxes, are used to fund the general operating budgets of the taxing districts. They account for the single largest component of property taxes. Strictly speaking, the permanent rates are rate limits, so districts may use any rate up to their permanent rate.

Local option taxes represent the only way taxing districts can raise operating revenue beyond the permanent rate amount. Even so, these taxes are the first to be reduced if the Measure 5 limitations are exceeded. Because voters at the local level must approve these levies, they represent one aspect of local control over the level of property taxes. All districts, except educational service districts (ESDs), are authorized to levy local option taxes. However, community colleges cannot seek local option levies that are greater than the amount of reduction caused by Measure 50 in fiscal year 1997–98. Fiscal year 2000–01 was the first year that school districts were able to use local option levies. Measure 50 requires that local option levies, in elections other than general elections, be approved by a majority of voters with at least 50 percent of all registered voters actually voting.

Bond levies have remained largely unchanged. They are used to pay principal and interest for bonded debt. Under the provisions of Measure 50, new bond levies, like new local option levies, are subject to a 50 percent voter participation requirement if the election is not a general election.

Some taxing districts receive timber tax revenue. This revenue, known as an offset, actually reduces the amount of revenue that districts may raise from their permanent rates. Only county government districts reduce their permanent tax rates when they receive offset payments. When schools receive timber tax payments, it is in addition to what they raise through property taxes.

School District Replacement Revenue

Under Measures 5 and 50, the state was required to compensate schools for losses in tax revenue due to changes in each ballot measure. In both cases, the effects of the requirements were negligible because the Legislature appropriated more than the required amount each biennium. Under Measure 5, losses from tax compression were required to be replaced through 1996, but the state was not required to continue the level of Basic School Support that it had provided to school districts prior to Measure 5. The replacement revenue requirement ended up being partially offset by reductions in other Basic School Support funds that were no longer mandated. Measure 50 also contained a constitutional requirement that the Legislature replace school district revenue lost due to the Measure 5 rate limits. This requirement has had a minimal effect on actual state school funding because the school revenue compression losses under Measure 50's lower tax environment have been smaller than the amount of Basic School Support provided by the Legislature.

⁴ Currently, there also are gap bonds and a pension levy. Gap bonds represent debt obligations that have been funded with the operating taxes of districts. The pension levy represents an ongoing obligation the City of Portland has to its fire and police forces. Both of these eventually will become part of the permanent rate for their respective districts.

Property Tax Administration

The changes to the property tax system brought about by Measures 5 and 50 required significant changes in the way county governments and the state administer the tax.

Property Assessment

The process of identifying and assigning a value to taxable property is called assessment. Most property assessment is administered by the county assessor. The Oregon Department of Revenue assesses some property, including public utilities and large industrial properties. Utility property is placed on a separate assessment roll, which is transferred to the county assessment roll prior to preparation of tax bills. The Department of Revenue appraises large industrial plants, but those properties appear only on the county assessment roll.

Property subject to taxation includes all privately owned real property (land, buildings, and improvements) and business personal property (machinery, office furniture, and equipment). There is no property tax on household furnishings (exempted in 1913), personal belongings, or automobiles (exempted in 1920). These, as well as other property tax exemptions, are detailed in the State of Oregon *Tax Expenditure Report*, a companion document to the Governor's Budget.

Prior to the passage of Measure 5 in 1990, each county assessor prepared an annual assessment roll listing all taxable property as of January 1. For example, the assessed value of a property for the 1989–90 fiscal year was determined as of January 1, 1989. Through 1980, assessed value was set to market value for all classes of property. From 1980 to 1983, taxable property was divided into two categories: homestead and all other. Homestead property consisted of owner-occupied single-family residences. Property was appraised at market value but assessments were limited to 5 percent growth statewide per year for each category. Beginning in 1984–85, the distinctions of homestead and all other property were eliminated and in 1985 the Legislature repealed the 5 percent limit on assessed value increases. Beginning with the 1985–86 tax year, all property again was assessed at 100 percent of full market value.

The legislation to implement Measure 5 made two primary changes in the assessment process. First, it changed the assessment date from January 1 to July 1, effective beginning with the 1991–92 fiscal year. Second, the new legislation set assessed value equal to “real market value,” where real market value was defined as the minimum value the property would sell for during the year.

With Measure 50, property assessment changed dramatically. For 1997–98, the assessed value of a property was set at 90 percent of the property's 1995–96 assessed value. From 1998–99 onward, assessed value growth is limited to 3 percent per year. For new properties, assessed value is calculated by multiplying the ratio of assessed value to real market value for similar property in the county by that property's real market value. For example, if the ratio of assessed value to real market value for residential property in a given county is 0.8, then the assessed value for a new house would be 80 percent of its real market value. Measure 50 also redefined real market value as the value the property would sell for in the market on the assessment date (January 1). This eliminated the concept, adopted under Measure 5, of real market value being the minimum value the property would sell for during the year.

Equalization

The process of maintaining uniformity of values among property owners and among various classes of property is called equalization. Prior to Measure 5, county boards of equalization heard taxpayer appeals and could adjust assessed values up or down to maintain uniformity. Boards of equalization also could adjust values for entire classes of property at the request of the county assessor, again to maintain uniformity in assessments. Measure 5 greatly reduced

the authority of the county boards of equalization, and when Measure 50 took effect, the equalization process became unnecessary.

Measure 5 removed the power of the county boards of equalization to equalize values. Their sole responsibility was changed to hearing petitions for reduction of value from individual taxpayers. At the county level, it was up to assessors to maintain uniformity in values by assessing each property at its real market value. At the state level, the director of the Department of Revenue used information on sale prices and assessed values to adjust county assessment rolls, if needed, to maintain uniformity among property owners and property classes.

Under Measure 50, the mandated calculation of assessed value from a base-year value with the 3 percent annual growth limit meant that equalization became unnecessary.

Assessment Appeals

Appeals to reduce real market value and assessed value and to request a waiver of late filing penalties are heard by the county Boards of Property Tax Appeals (BoPTA) after tax statements are issued.

Prior to Measure 5, property was assessed as of January 1 of each year. Property owners received their assessment notices in the spring, and appeals were settled prior to computing tax rates and mailing tax bills in October.

Two features of Measure 5 required changing the appeal process. First, the assessment date was changed from January 1 to July 1. This meant that as a practical matter there was not enough time to complete the appeal process prior to mailing tax bills. The Legislature fixed this problem by combining the assessment notice and the tax bill and by allowing appeals after tax bills were mailed. Property owners could file appeals between October 25 and December 31 with the County Board of Equalization (BOE). Taxpayers received tax refunds if their appeals were successful.

The second effect Measure 5 had on the appeal process was the definition of assessed value. The assessed value was set to "real market value," defined as the minimum value the property would sell for during the year. This meant that for some properties, the assessed value was not the value on the assessment date (July 1), but on some later date. To allow for adjustments to the assessed value of properties whose value declined after the assessment date, the Legislature provided for a second appeals period. Between July 15 and July 31 following the end of the tax year, property owners who thought the market value of their property declined during the tax year could appeal to the County Board of Ratio Review (BORR). If successful, taxpayers received refunds.

Measure 50 eliminated the BOE and BORR and replaced them with county Boards of Property Tax Appeals (BoPTA). The limitation placed on increases in assessed value has resulted in a large decline in the number of appeals filed at this level. With the assessment date reset to January 1, the second appeals period no longer exists and appeals must be filed between the date the tax statements are issued and December 31.

Tax Calculation

Just as the assessment process changed under Measure 5 and Measure 50, so did the calculation of taxes. Measure 5 imposed tax rate limits, and Measure 50 established permanent tax rates to replace most tax levies that existed under the pre-Measure 5 and Measure 5 systems. This section describes the calculation of taxes and tax rates under the three systems.

Tax Levies

Prior to the passage of Measure 50 in 1997, tax levies played a key role in determining the amount of property taxes raised by local governments. Measure 50 required that most of the tax

levies that existed previously be assigned permanent tax rates. Below we discuss the old levy system and describe how it changed under Measure 50.

Under both the pre-Measure 5 and the Measure 5 systems, tax levies played a key role in determining the amount of property tax revenue local governments received and the amount of tax imposed on each property. The process of calculating and declaring the amount of taxes to be raised from taxpayers was termed “making the levy.” Authority to levy property taxes was held by the governing body of each local government. Each governing body determined the levy for its taxing district before July 15 each year as part of the budget process. Annual budgets for taxing districts are based on a fiscal year that begins July 1 and ends the following June 30.

Constitutional and statutory limits on the amount that a taxing district may levy were:

1. Levy inside the 6 percent limitation (tax-base levy). A local government tax base, approved by a majority of its voters at a state general or primary election, represented a permanent authority to levy a specific dollar amount each year. That dollar amount could not be more than 6 percent larger than the highest amount levied in the three prior years. Tax-base levies could be increased in proportionate amounts for annexed territory. A taxing district was permitted to have only one tax-base levy. Proceeds from the tax-base levy could be expended for any purpose allowed by law for the district except general obligation bonds. Tax-base levies were subject to the Measure 5 tax-rate limits.
2. Levy outside the 6 percent limitation (one-year, serial, safety net, or continuing levies). One-year and serial levies, approved by a majority of voters at a special election, were temporary taxing authorities permitting the levy of a specific dollar amount for one year or for two or more years (serial levies). Safety net levies were available only to school districts and qualifying ESDs and did not require voter approval. The safety net levy was the amount needed to bring the current year’s total tax base and other levies for operating purposes up to the amount of the prior year’s total levy for operating purposes.⁵ Continuing levies were those approved by voters prior to 1953. They were permanent and were limited in amount by the product of the voted tax rate and the assessed value of the taxing district (as opposed to a limit on the levy amount). Starting in 1978, serial levies also could be established using a specified voter-approved tax rate, but the term could not exceed three years. These were sometimes referred to as “rate levies.” The 1989 Legislature (Oregon Laws Chapter 658) increased the limit on fixed-dollar serial levies from three to five years for operating purposes and 10 years for any other purposes. All one-year, serial, safety net, and continuing levies were subject to the Measure 5 tax rate limits.
3. Levy for bonded indebtedness (bond and interest levy). Taxing districts could levy an amount sufficient to pay principal and interest for bonded debt each year. Bond measures to be paid from future tax levies first had to be approved by a majority of those voting, unless otherwise provided by law. Proceeds from a bond levy could not be diverted to another purpose. Bond levies used for capital construction were not subject to the Measure 5 tax rate limits.

Measure 50 converted most of the levies imposed under the pre-Measure 5 and Measure 5 systems to a permanent tax rate. Tax base levies, one-year levies, serial levies, safety net levies, and continuing levies all became part of the permanent rate created by Measure 50. In addition, Measure 50 created a new type of levy known as a local option levy. Local option levies are operating levies that can be passed by local governments to raise revenue beyond the permanent rate amounts. The original Measure 50 language did not allow school districts or ESDs to use local option levies. However, legislation passed in 1999 enabled school districts to use local option levies starting in 2000–01. Levies for bonded indebtedness remain in essentially the same form as prior to Measure 50. Taxes from permanent rates and from local option levies are subject to the Measure 5 rate limits, but taxes from bond levies remain exempt from limits.

⁵ Levies for operating purposes did not include levies for payment of bonded debt, capital construction, or serial levies approved for more than three years (ORS 328.715).

Tax Rates

Measure 50 replaced most tax levies with permanent tax rates. Therefore, the exercise of setting tax rates remains only for local option levies, bond levies, and urban renewal special levies. Under Measure 50, the county assessor computes tax rates for local option levies, bond levies, and urban renewal special levies, then adds those rates to the permanent rates to compute the total rate to be extended to a property. The tax extended to a property is the total tax rate times the assessed value of the property.

Under the pre-Measure 5 and Measure 5 systems, the county assessor extended authorized levies and computed district tax rates for each taxing district. District tax rates were expressed as a dollar amount per \$1,000 of assessed value and were computed by dividing total taxes levied by the total assessed value inside the taxing district boundaries. The total tax extended to a property was the sum of the district tax rates times the assessed value of the property. Under Measure 5, if the tax extended to the property exceeded the Measure 5 limits, the tax going to each local government was reduced proportionally until the limit was reached.

When Measure 50 first took effect in the 1997–98 tax year, permanent tax rates were calculated based on a complicated formula that took into account several factors. These included: a) the amount of taxes that would have been raised in 1997–98 under Measure 47, b) the levies that existed under the Measure 5 system, c) the tax cut required by Measure 50, and d) a variety of special provisions that exempted certain types of levies from the Measure 50 cuts and reduced the amount of the tax cuts for districts with rapid assessed value growth due to new construction.

Property Tax Compression

Compression is the process used to reduce property taxes to the Measure 5 limits. Prior to Measure 5, compression did not exist. Reductions in taxes due to compression are the difference between what taxing districts wish to raise through property taxes (tax extended) and the amount they actually raise (tax imposed).

Measure 5 introduced limits, phased in between 1991–92 and 1995–96, on the taxes paid by individual properties. The limits are \$5 per \$1,000 real market value for school taxes and \$10 per \$1,000 real market value for general government taxes. These limits are applied only to operating taxes, not bonds. For each property, the assessor compares education taxes with the education limit and other governmental taxes with the general government limit. If property taxes exceed the Measure 5 limits, then taxes are compressed in a specific order. First, local option taxes are reduced, possibly to zero. If there are no local option taxes or they have been reduced to zero, the tax rates from the permanent tax rates for each taxing district are reduced proportionately.⁶

It is important to note that while property tax rates under Measure 50 are applied to a property's assessed value, the Measure 5 rate limits apply to real market value. Prior to Measure 50, this distinction was unnecessary because assessed value equaled real market value. While the Measure 5 limits still apply under Measure 50, the effect of the Measure 5 limits is minimal for most properties because Measure 50 greatly reduced property taxes.

Tax Collection

Once the tax rates and Measure 5 tax rate limits are applied to each property, the assessor certifies the assessment roll and turns it over to the tax collector. The tax collector bills and collects all taxes and makes periodic remittances of collections to taxing districts. Tax statements mailed to property owners list the assessed value of property and the taxes extended by each taxing district. They also indicate how much is inside and how much is outside the Measure 5 property tax limits and the amount of taxes actually due after the limits have been applied.

⁶ Gap bonds and pension levies are reduced also, if present.

Taxes are levied and become a lien on property on July 1. Tax payments are due November 15 of the same calendar year. Under the partial payment schedule, the first one-third of taxes are due November 15, the second one-third on February 15, and the remaining one-third on May 15. A discount of 3 percent is allowed if full payment is made by November 15; a 2 percent discount is allowed for a two-thirds payment made by November 15. For late payments, interest accrues at a rate of 1.33 percent per month. If taxes remain unpaid after three years from the tax-due date, counties begin property foreclosure proceedings.

Urban Renewal Agency Revenue

In Oregon, urban renewal agencies receive the bulk of their revenues through a tax increment financing mechanism. When an urban renewal plan is created, the value of the property within its boundaries is locked in time, or frozen, at the amount calculated from the last certified tax roll prior to the plan's approval. The agency then raises revenue in following years from any value growth above the frozen amount. This value growth is referred to as the increment. The tax rate used to calculate taxes imposed for the urban renewal plan is the consolidated tax rate for the taxing districts within the geographic boundaries of the plan. These urban renewal taxes, referred to as "tax off the increment," are calculated as the consolidated tax rate times the value of the increment.

Pre-Measure 5

Prior to Measure 5, urban renewal agencies received taxes that would have been imposed by each taxing district on the excess value of property within each urban renewal plan area (an agency can have more than one plan area). Technically, only the properties within the urban renewal plan area paid taxes to the urban renewal agency. However, in effect all taxpayers in taxing districts overlapping the plan area paid urban renewal taxes because the removal of urban renewal excess value from the tax rate calculation caused tax rates to be slightly higher for everyone in the taxing district.

Measure 5

Measure 5 made a number of changes to tax increment financing in urban renewal areas to create equality among taxpayers. If the Measure 5 tax limits had been imposed under the old urban renewal system where only properties inside the plan areas paid urban renewal taxes, those properties could have paid taxes that were very different from surrounding properties' taxes. If an agency used its revenue to finance bonds outside the limits, the properties in the plan area could pay far higher taxes than similar properties outside the plan area. Likewise, if the agency used the revenue for non-bond purposes, then properties inside the plan area would have relatively more of their taxes subject to the Measure 5 rate limits and could pay far lower taxes than similar properties outside the plan area.

The Legislature attempted to fix this problem by spreading urban renewal taxes over all properties inside the urban renewal agency's boundary for taxing districts overlapping urban renewal plan areas. Urban renewal taxes appeared separately on tax statements, just like those of each taxing district.

In 1992, tax increment financing in urban renewal areas was changed again. The Oregon Supreme Court ruled that all revenue collected by an urban renewal agency to pay for bonds is inside Measure 5 rate limits and therefore subject to the general government limit. This has had a major effect on urban renewal agencies, because a large percentage of their revenues are used to pay for bonds.

Measure 50: 1997–98 to 2001–02

As a rule, urban renewal agencies do not have permanent rates and raise revenue primarily through tax increment financing. Measure 50 returned the structure of urban renewal financing to much the same form it had prior to Measure 5, with one exception; under certain circumstances, urban renewal agencies were allowed to raise additional revenue, beyond what they raised through tax increment financing, via special levies. Starting in 1997–98, if an existing urban renewal plan received less revenue off its increment under Measure 50 than what it would have received under the pre-Measure 50 tax system, the agency could impose a special levy to make up the difference. The special levy is imposed on all properties within the boundaries of the urban renewal agency (either a city or a county), not just on properties in the plan area. New plan areas (established after 1996) receive tax increment financing revenue only; the agency may not impose a special levy for new plan areas.

Measure 50: After 2001-02

Two major changes took effect in 2002–03. One was a result of new legislation in the 2001 session (HB 3215). This established that certain plan areas could not divide taxes from local option or bond levies that were passed by voters after October 6, 2001. These plan areas are either option 1 or option 2 plans (see Glossary), or are new plans that were adopted after October 6, 2001. All other plan areas adopted before October 6, 2001, divide taxes from local option and bond levies as in the past, without regard to when the levies are approved by voters.

The second change that began in 2002–03 is that a court case (Shilo Inn vs. Multnomah County) clarified that all urban renewal revenues must be considered in the general government category for the purpose of meeting the constitutional tax limitations, regardless of what type of district originated the division of tax revenue. Previously, the tax reduction to meet the constitutional limitations was calculated based on the type of district the division of tax came from. If a school district had faced division of tax, the amount of tax divided for urban renewal was reduced with the other education category taxes at the \$5 per thousand limit. The court case changed this so that now the division of tax from the school district would be grouped with all other general government revenue for testing against the \$10 per thousand general government limit.

In order to accommodate both the legislative change and the court decision, the division of tax calculation reverted to some extent back to the method used under Measure 5 before 1997–98, where division of tax was spread across the urban renewal agency. The excess value within each plan area in the district and the district billing rate determine the amount of urban renewal revenue from division of tax. This amount is divided by the value of property that is both within the agency and within the district (shared value) to determine the division of tax rate. The district billing rate is reduced by the division of tax rate for taxpayers in the area of shared value. All revenues from the division of tax rate are considered general government revenues for the purpose of meeting the constitutional tax limitations.

The overall effect of these changes will vary by taxpayer, but education districts in urban renewal agency areas will tend to have less revenue lost to the constitutional limitations than before. General government districts in those areas will tend to see more revenue lost to the constitutional limitations than before.

Tax Relief

During the past 20 years, the Legislature has created six property tax relief programs. Currently, only two of these programs exist: the Elderly Rental Assistance (ERA) and Homestead Deferral programs. The Homestead Deferral program include three components: property tax deferral programs for seniors (62 years and older) and disabled homeowners, and a special assessment deferral program for seniors.

In 1973, the Legislature enacted the Homeowner and Renter Refund Program (HARRP) to provide tax relief to low- and middle-income Oregonians. The program was modified in 1989 and phased out in 1991. While it existed, the program provided property tax refunds to households based on income levels and property taxes paid (for renters, 17 percent of rent was considered to be property tax), up to specified maximum refund amounts. The refunds were initially available to households with incomes less than \$17,500.

Starting in 1989, the Legislature restricted HARRP refunds to households with non-housing assets less than \$25,000. The maximum refund amounts increased as income declined. For homeowners, the maximum refund for the lowest income category was \$750, declining to \$0 as income exceeded \$17,500. The maximum refund amounts for renters were one-half of those for homeowners. The 1991 Legislature phased out HARRP, making the 1990 tax year the last year for refunds. For 1990, the household income limit was reduced to \$10,000; the maximum refund was reduced to \$500 for homeowners, \$250 for renters.

The Elderly Rental Assistance program (ERA) was a companion to HARRP that continued after HARRP was eliminated. It provides tax relief to elderly renters whose rent, fuel, and utility expenses are large in relation to their income. Starting in 1975, ERA refunds were available to persons at least 58 years of age with incomes less than \$5,000. If rent, fuel, and utility expenses were more than 40 percent of household income, renters would receive an ERA refund instead of a HARRP refund if the ERA amount was higher. In 1990, with the phase-out of HARRP, the income limit for ERA was raised to \$10,000, and the rent, fuel, and utility expense limit was reduced to 20 percent of income.

Homeowners 62 years of age or older who meet certain income requirements are able to defer all property taxes. Under the Senior Citizen's Deferral program, the state pays the property taxes of participants and charges the homeowner 6 percent interest on the deferred amount. Homeowners are not required to pay the taxes or interest to the state until they die or sell their homes. Income eligibility requirements have changed many times over the course of the program. For the 2003–04 tax year, the program was open to seniors with household incomes of less than \$33,000 (an increase from \$32,000 in 2002–03). Once approved, senior citizens are eligible for the deferral in years when their federal adjusted gross income for the prior year does not exceed an amount that is adjusted for inflation each year.

A similar program, the Senior Citizen's Special Assessment Deferral program, allows qualifying seniors to defer their special assessment charges for public improvements (e.g. sewer or sidewalk improvement charges). The the qualifying income limit increased from \$32,000 for 2002–03 to \$33,000 for 2003–04, and the limit will adjust for inflation in future years.

The third Homestead Deferral program, the Disabled Citizen's Property Tax Deferral program, began in 2001 for fiscal year 2001–02. It is similar to the Senior Citizen's Deferral program in that the same income limits apply and property taxes are deferred at 6 percent interest. However, this program is for disabled homeowners who are eligible for or receive Social Security disability benefits and are younger than 62.

Appendix C: Glossary

Additional taxes. Revenues for taxing districts, including penalty upon reclassification, as a result of various statutory provisions:

- **Farmland.** Additional tax and penalty paid when farmland changes use and becomes ineligible for farm-use assessment.
- **Forestland.** Additional tax and penalty paid when forestland becomes ineligible for forestland assessment.
- **Small tract.** Additional tax and penalty paid when land becomes ineligible for Western Oregon Small Tract preferential tax treatment.
- **Open space.** Additional tax and penalty paid when open space land becomes ineligible for preferential tax treatment.
- **Historic property.** Additional tax and penalty paid when property is no longer used as an historic site.
- **Late filing fee.** Penalty amount paid for failure to file a personal property return on time under ORS 308.302.
- **Clerical error.** Additional tax paid as a result of the correction of a clerical error under ORS 311.206.
- **Other.** Other additional taxes and penalties, such as those resulting from a reclassification of an enterprise zone (ORS 285.617) or riparian land (ORS 308.798).

Arm's-length transaction. Transaction between an informed buyer and informed seller who are not related or not on close terms, and who are presumed to have roughly equal bargaining power; not involving a confidential relationship.

Assessed value. Value of property subject to taxation. Under the provisions of Measure 50, assessed value for the 1997–98 tax year was set at 90 percent of the 1995–96 assessed value for each property in the state. The assessed value for each property is then allowed to grow a maxi-

imum of 3 percent per year, but cannot exceed the real market value of the property.

Assessment. The process of identifying and assigning a value to taxable property.

Average tax rate. Average rate computed for an area by dividing the taxes imposed in that area by the net assessed value of taxable property.

Billing rate. Tax rate expressed in dollars per \$1,000 of property value. For county districts, the billing rate equals the permanent authority district tax rate minus the timber offsets rate. For all other districts, the billing rate and district tax rate should be equal.

Board of Property Tax Appeals (BoPTA). County board that hears taxpayer appeals of property assessment. Property owners can file appeals between October 25 and December 31, after they receive their property tax bill. Refunds are granted when appeals are successful. Taxpayers may appeal the BoPTA decision to the Magistrate Division of the Oregon Tax Court.

Bond levy. Amount of levies needed to pay principal and interest on district bonded debt.

Business, housing, and miscellaneous exemptions. Exempt value of certain business, housing, and miscellaneous other properties that are partially or totally exempt from property taxation. The qualifying exemptions include:

- **Veterans' exemptions.** Exemption applies to the assessed value of homesite and personal property of disabled veterans or their surviving spouses. For 2002–03, the exemption was \$9,570 if income limits were not exceeded. Veterans with service-connected disabilities were eligible for a larger exemption of \$12,750 in 2002–03, regardless of income. Both exemption amounts increase 3 percent per year.
- **Historic property.** Improved property that has been granted a partial exemption due to its historic designation.

- Enterprise zones. Certain business properties within designated enterprise zones that qualify for exemption for a limited number of years, under ORS 285.570 to 285.620. To be eligible, a business must meet several conditions relating to type of business activity and requirements for hiring and investment.
- Commercial facilities under construction. Certain commercial buildings in the process of construction that qualify for exemption from property taxation for not more than two consecutive years, under ORS 307.330 and 307.340.
- All other business, housing, and miscellaneous exemptions. These include alternative energy systems, farm labor camps, fallout shelters, housing for low income rental, multiple-unit housing in core areas, nonprofit homes for the elderly, pollution-control facilities, port and airport property leased, etc.

Centrally assessed property. Taxable property assessed by the Department of Revenue, including electric and communication utilities, rail transportation, air transportation, water transportation, gas pipelines, private railcars, and others.

Changed property ratio (CPR). The ratio of average maximum assessed value to average real market value. This ratio is used in calculating the assessed value of new property improvements and other additions to the tax roll. See Oregon Administrative Rule 150-308.156 for establishing a CPR.

Code area. Geographic unit, established by county assessors and identified by a code number, representing the combination of taxing districts in which a piece of property is located. All properties in a code area pay taxes to the same taxing districts.

Compression. Reduction in taxes required by the Measure 5 property tax rate limits approved in 1990. County assessors calculate compression as a dollar amount, but it also can be expressed as a tax rate. Compression is done on a property-by-property basis.

Consolidated tax rate. Sum of the billing rates of all taxing districts that impose taxes in a given code area. Billing rates are calculated prior to any compression that may result from Measure 5 property tax rate limits.

District. A local government entity that imposes property taxes (e.g. county, city, K-12 school district). A district can include multiple taxing districts and may cross county lines. For example, the City of Portland District includes taxing districts representing the portions of the city that are located in Clackamas, Multnomah, and Washington counties.

District tax rate. Tax rate expressed in dollars and cents per \$1,000 of property value. It is computed by adding together the permanent rate, the local option rate, the gap bond rate, and the bond rate for the district.

Division of tax. The process of, and revenue from, apportioning tax to urban renewal agencies based on the relationship between the frozen base value and the growth of value ("excess value" or "increment") of properties in a particular geographic area.

Effective tax rate. District tax rate expressed in dollars and cents per \$1,000 of property value. It is computed by multiplying 1,000 by a ratio, where the numerator is the total taxes imposed and the denominator is the assessed value of taxable property within the district (i.e., 1,000 times tax imposed divided by assessed value). It is the tax rate after compression.

Equalization. The process of maintaining uniformity of values among property owners and among various classes of property. Measure 50 made equalization unnecessary because it mandated the calculation of assessed value from a base year value with a 3 percent annual growth limit.

Excess value. See urban renewal excess value.

Exempt property. Properties that are not taxed under the property tax system. See public exemptions, social welfare exemptions, and business, housing, and miscellaneous exemptions.

Existing urban renewal plan. Urban renewal plan area that 1) existed in December 1996, 2)

chose an option, and 3) established a maximum amount of indebtedness by July 1998.

Farm use special assessment. Special assessment at less than full assessed value for land primarily used to make a profit in farming. Exclusive farm use (EFU) land is zoned exclusively for farming. Non-EFU land is not zoned EFU, but is and has been farmed for the preceding two years (ORS 308A.068).

Fish and Wildlife. Total assessed value of state Fish and Wildlife Commission property. While not subject to property tax, the commission makes equivalent payments to counties under ORS 496.340.

Forestland special assessment. Special assessment at less than full assessed value of land used for growing timber.

Frozen base value. The assessed value of property within an urban renewal plan area at the time that the plan was created.

Full local option authority. Estimate of the amount of tax that could be levied if a district were to use the full amount of local option levies passed by voters.

Full permanent authority. Estimate of the amount of tax that could be levied if a district were to use its entire permanent rate.

Gap bonds. Principal and interest obligations of districts that are paid for with operating revenues rather than with the proceeds of a bond levy.

Interest. Cumulative interest and penalties collected in 2001–02 for successive years up to June 30, 2002.

Joint district. A taxing district that crosses county lines.

Levy based property tax system. Tax system in which levies are determined by budget needs (which in many cases must be approved by voters), and tax rates are calculated as levies divided by assessed value. The alternative is usually a rate-based system in which tax rates are set by law or by voters, and levies are calculated as rates times assessed value. Under Measure 50, Oregon's tax system is predominately a rate-based system.

Local option levies. Property tax levies for operating purposes beyond the revenues generated by permanent tax rates. Local option levies must be approved by voters in a general election or an election that has at least 50 percent voter participation.

Locally assessed property. Taxable property assessed by county assessors, including real property, personal property, and manufactured structures carried on a separate roll.

Manufactured structures. Total assessed value of all manufactured structures, less the amount of veterans' exemptions applied to manufactured structures. Manufactured structure has the meaning given in ORS 801.333.

Market value. See real market value.

Measure 5. Constitutional tax rate limitations passed by voters in November 1990, which can be found at Article XI, Section 11b of the Oregon Constitution. Measure 5 limited school taxes to \$15 per \$1,000 of assessed value and nonschool taxes to \$10 per \$1,000 of assessed value starting in 1991–92. The school limit fell by \$2.50 per \$1,000 each year until it reached \$5 per \$1,000 in 1995–96. The nonschool limit remains at \$10 per \$1,000. Levies to pay bond principal and interest for capital construction projects are outside the limitation. The Measure 5 rate limits still apply under the provisions of Measure 50, passed in 1997, but now apply to real market value.

Measure 50. Measure 50 is a legislatively-referred measure drafted to correct technical problems with Measure 47, a tax cutting citizens' initiative passed in 1996. For 1997–98, Measure 50 reduced the assessed value of every property to 90 percent of its 1995–96 assessed value. Measure 50 then limited the annual growth in assessed value of existing property to 3 percent. In addition, Measure 50 led to the replacement of most levies with permanent tax rates.

Metropolitan Statistical Area (MSA). Areas that have been designated by the U.S. Office of Management and Budget as metropolitan. A MSA has at least one urban area of 50,000 people or more, plus adjacent territory that has a high degree of economic and social integration with the nucleus. Oregon has the following MSAs:

- Bend MSA: Deschutes County.

- Corvallis MSA: Benton County.
- Eugene-Springfield MSA: Lane County.
- Medford MSA: Jackson County.
- Portland-Vancouver-Beaverton MSA: Clackamas, Columbia, Multnomah, Washington, and Yamhill counties. Clark County and Skamania counties in Washington are also part of this MSA, but they are not included in information reported in this book.
- Salem MSA: Marion and Polk counties.

Mobile homes. See manufactured structures.

Net assessed value. Value used to calculate district tax rates for dollar levies. It is total assessed value plus nonprofit housing value and state fish and wildlife value, less urban renewal excess value used.

Net for collection. Total tax for collection minus total credits.

Nonprofit housing. Total assessed value of property removed from the roll for nonprofit housing purposes. This property consists of land and improvements owned by nonprofit corporations to provide permanent housing, recreational and social facilities, and care to elderly persons. Under ORS 307.244, qualifying property receives a funded exemption from the property tax, but the county receives an equivalent payment from the state.

Operating taxes. Taxes from the permanent rates that are used to fund the general operating budgets of the taxing districts.

Percent cumulative uncollected taxes. Total cumulative uncollected taxes as a percent of the total for collection.

Percent uncollected, FY 2001–02. Total uncollected taxes FY 2001–02 as a percent of the total for collection FY 2001–02.

Permanent tax rates. Permanent taxing authority for each taxing district, expressed as a rate per thousand dollars of assessed value. This rate is the maximum rate a district may use without approval by voters; districts may use any rate below this maximum.

Personal property. Total assessed value of personal property, including machinery, equipment,

and office furniture. Unless otherwise specified, the value is net of veterans' exemptions applied to personal property. Beginning in 1997–98, most personal property accounts of less than \$10,000 in value, excluding personal property manufactured structures, were not required to pay property tax and were not included in assessed value. Beginning with the 2002–03 fiscal year, the limit goes up to \$12,500 and is indexed from that point forward.

Plan area. See urban renewal plan area.

Public exemptions. Property owned by federal, state, or local governments (including counties, cities and towns, and school districts) is generally exempt from property taxation. This includes all public or corporate property used or intended for use for corporate purposes of local governments and all public or municipal corporations in the state. When such property is leased to a private party, the leased portion generally becomes taxable.

Public utility. Property described under *centrally assessed property* (ORS 308.515).

Real market value. Minimum value a property will sell for during the tax year in an arm's-length transaction.

Real property. Total assessed value of real property, including land, buildings, structures, and improvements. Unless otherwise specified, this value is net of veterans' exemptions applied to real property. The following property classes are included within real property:

- Commercial land. Unimproved property that has commercial use as its highest and best use.
- Commercial property. Improved property that has commercial use as its highest and best use.
- Farm and range property. Land or land and buildings with a highest and best use of the production of agricultural crops, feeding and management of livestock, dairying, any other agricultural or horticultural use, or any combination thereof.

- Farm and range zoned property. Land or land and buildings located within an exclusive farm-use zone assessed as farm-use land.
- Farm and range unzoned property. Land or land and buildings assessed as unzoned farmland.
- Forestland and forest property. Consists of land with a highest and best use of growing and harvesting trees of a marketable species, and land that has been designated as forestland.
- Industrial land. Unimproved property that has industrial use as its highest and best use.
- Industrial property. Improved property that is a single plant or a complex of properties engaged in manufacturing or processing a product. The appraisal of this property can be either Department of Revenue or county responsibility.
- Multiple housing land. Unimproved property that has multiple housing use (five living units or more) as its highest and best use.
- Multiple housing property. Improved property that has multiple housing use (five living units or more) as its highest and best use.
- Recreation land. Unimproved property that has recreational use as its highest and best use.
- Recreational property. Improved property that provides recreational opportunities as its highest and best use.
- Residential land. Unimproved property that has residential use as its highest and best use.
- Residential property. Improved property that has residential use as its highest and best use.
- Tract land. Unimproved acreage with a highest and best use other than farm, range, or timber production.
- Tract property. Improved acreage with a highest and best use other than farm, range, or timber production.

Social welfare exemptions. Assessed value of properties owned by private organizations and

used for educational, religious, or developmental purposes. These properties are exempt from property tax. The qualifying property classes include:

- Fraternal organizations. All real or personal property that is occupied or used in fraternal works or for entertainment and recreational purposes by nonprofit corporations or social clubs (ORS 307.136).
- Literary and charitable. All property owned by unincorporated literary, benevolent, charitable, or scientific institutions (ORS 307.130).
- Religious organizations. All houses of public worship and other buildings and property used solely for administration, education, or entertainment by churches or religious organizations (ORS 307.140).
- Burial grounds. All burial grounds, tombs, lands, and buildings, not exceeding statutory acreage limits, owned and occupied by any crematory or cemetery associations (ORS 307.150).
- All other social welfare. Includes private schools and day care facilities, public libraries privately owned, senior centers privately owned, etc.

Special levy. See urban renewal special levy.

Specially assessed property. Property that is assessed at less than its full value. See, for example, farm use special assessment and forestland special assessment.

Supervisory orders. Orders to the counties from the Department of Revenue to correct the values of centrally assessed utility accounts on the tax rolls. These orders are related to corrections in valuations, not appeals.

Taxable value. See assessed value.

Taxes added to rolls. Additional taxes generated when a final order is entered in an appeal, other omitted property is included, or error corrections are made.

Tax collection FY 2001–02. Sum of advance collections and tax collectors' collections certified for FY (fiscal year) 2001–02.

Tax extended. Amount of tax to be paid by taxpayers before the Measure 5 rate limits are applied. If, for an individual property, taxes exceed the limits, then the taxes for that property are reduced to the limits.

Tax imposed. Taxes due to be paid by taxpayers after the Measure 5 rate limits have been applied. For individual properties, the tax imposed always will be less than or equal to the tax extended.

Tax increment financing. A financial tool designed to tax the increases in property value that occur over time in a specific geographic area. Given the frozen base value of the property at the time such a plan is established, any growth in value ("excess value") is taxed to raise revenue.

Tax increment revenue. Revenue raised from taxing the growth in value ("excess value" or "increment") of properties in a given geographic area.

Taxing district. The portion of a district that exists within a single county.

Tax limit category. Under the 1990 Measure 5 constitutional property tax limitation, taxes are divided into three categories: 1) inside the general government limit, 2) inside the education limit, and 3) outside the limit. All taxes, other than bond levies for capital construction, that are used for nonschool purposes fall inside the general government limit of \$10 per \$1,000 of assessed value. All taxes, other than bond levies, that are used for education purposes fall inside the education limit of \$5 per \$1,000 of assessed value. All bond levies used for capital construction fall outside the limit. Of the current types of levies, permanent rate, local option, gap bond, and pension levy taxes are subject to the limitations. Bond levies are outside the limit.

Timber offset. Amount of revenue county districts received from the timber privilege tax. This revenue reduced, by an equal amount, the money these districts received from the property tax. School districts also received revenue from the timber privilege tax, but it did not offset their property taxes.

Timber offset rate. Timber offset amount expressed in dollars per \$1,000 of property value.

Total amount certified. Amount of taxes charged by the tax collector as certified by the assessor and authorized by the county clerk. The total includes taxes on real property, personal property, manufactured structures, and public utilities. The amount reported by counties generally includes taxes relating to special assessments and in-lieu payments for fish and wildlife property and nonprofit housing property.

Total assessed value. Sum of assessed values of all taxable properties on the roll.

Total credits. Includes discount allowed for prompt payments, personal property taxes canceled by order of county clerk, real property foreclosures, and other corrections or cancellations.

Total cumulative uncollected taxes. Difference between the net for collection and the total tax collections for all years up to June 30, 2003.

Total for collection. Sum of the total amount of certified, uncollected taxes, and taxes added to rolls.

Total levy. Total levy submitted by the district, including the local option levy and the levy for bonded indebtedness.

Total taxes collected. Taxes collected by the tax collector during the fiscal year ending June 30, 2003. Tax collections are reported separately from interest and penalty collections.

Total uncollected taxes, FY 2001-02. Difference between the net for collection and the tax collection for FY 2001-02.

Unallocated utilities. Small, private railcar companies that pay property taxes to the state. These taxes are distributed by the state to county governments.

Uncollected balance. Cumulative amount of unpaid taxes as of July 1, 2003.

Urban renewal. A state-sanctioned program designed to help communities improve and redevelop areas that are physically deteriorated, unsafe, or poorly planned.

Urban renewal agency. Entity responsible for administering urban renewal programs. Urban renewal agencies can be organized by city governments or county governments. They oversee activities in urban renewal plan areas. An urban renewal agency can administer multiple plan areas.

Urban renewal excess value. Total assessed value of property in urban renewal plan areas in excess of the base assessed values when the plan areas were established. This is also called the “increment”.

Urban renewal option. Funding option that the urban renewal plan uses. Only “existing” plan areas could choose option 1, 2, or 3 (see *existing urban renewal plan* above). Plan areas that are not “existing” raise revenue as described under “Other” below.

- Option 1 plan areas receive full division of tax revenue from all levies except local option and bond levies passed after October 6, 2001. A special levy on all taxable property in the municipality may be used to reach the plan area’s maximum revenue authority.
- Option 2 plan areas cannot receive division of tax revenue but a special levy may be used to raise revenue up to the plan area’s maximum revenue authority from properties in the municipality.
- Option 3 plan areas had their revenue from division of tax limited when the option was selected. These plan areas receive division of

tax revenue up to their limit and may impose a special levy on all taxable property in the municipality up to their maximum revenue authority.

- Other plan areas that did not select an option but were adopted before October 6, 2001, raise division of tax revenue from all levies but cannot use a special levy. Other plans that were adopted after October 6, 2001, must exclude local option and bond levies passed after October 6, 2001, when calculating division of tax revenue; they also cannot use a special levy.

Urban renewal plan area. Geographic area in which urban renewal activity takes place. It is the “excess” value in urban renewal plan areas that determines the amount of tax to raise for urban renewal agencies.

Urban renewal shared value. The assessed value of property that is both (A) within the district that covers part of a plan area, and (B) within the boundaries of the urban renewal agency. It also includes portions of a district that are within a plan area but outside the area of the urban renewal agency. Property owners within the shared value area may have part of their taxes allocated for urban renewal rather than for their tax districts.

Urban renewal special levy. Levy imposed by an urban renewal agency if the amount of revenue raised from excess value is below its revenue raising authority.
