Subject: What the hey

I can't really believe this is true. Then again, it is government. Throw out the people that have been using this land for the highest bidder? Sucker punching us for the almighty California and Texas deep pocket slobs. And some in government say they don't want hunting to become a rich mans sport. These type fly in and don't spend any money in Burns or surrounding towns to support the local economies. Usually corporate types to cuddle up to big spenders, in the big cities.

Obviously a sellout to the almighty dollar. What is next up your sleeve? David Montgomery, PO Box 1976, Jacksonville, Oregon 97530
