What you are planning to do with this block of land is wrong. Leasing out hunting rights to private hunting groups and blocking access to public land is not right. The hunters of this State are losing more and more land every year to development. That combined with large timber companies locking their land up leaves a hunter with few choices. You start crowding people into what little public land that will eventually be left and that is a recipe for a disaster. If you lease this land and the access to public land is denied I can just about promise you there will be confrontations because people will try to cross this leased land to get to the public land.
