If you want to make money off the hunters then charge us a fee such as or similar to a state park or forest permit, don't lease it to a private hunting ranch or corporation.

The Stockade Block is an asset of the Common School Fund....the primary purpose of the land is to produce income for the Common School Trust Fund to help finance Oregon K-12 schools. As such it is not like all other state public lands, e.g. state parks or forests. The draft Plan explores a full range of revenue opportunities...some viable; some not so.

I am against public land hunting rights being leased out.  
I think our government agencies forget who the public land belongs too, it belongs to us the tax payers.  
I think it is time to start cutting some positions in the government.
