The freedom to roam public lands is something that few people in the entire world get to enjoy. Here in the western part of the US we have unprecedented opportunity to share the values and this freedom with anyone who chooses to visit.

Although some \$ can be raised by leasing hunting rights on public lands, two things happen

1) We set a precedent for the loss of public lands use for those who cannot afford them. Providing this opportunity for money hungry governments may create a "FEEDING FRENZY" which would in turn deny access for most of us!

2) There is a very real possibility that administering the lease(s) would add a layer of inefficient bureaucracy which would gobble up most, if not all, of the proceeds.

I strongly urge you to abandon any thought of leasing hunting rights on "OUR LAND"!!!
