Subject: Stockade block lease comments

Upon hearing of this lease discussion I wanted to lodge my statement against such a misuse of public lands. These days it is difficult enough to get access to almost any private lands due to the rising costs of hunting leases. Now, we may lose access to some of our publicly held lands due to this plan. This is unacceptable as the only benefit will be to the leasor and the public will lose forever access to lands we own.

Public lands are not designated to be profit making machines for the state or any other entity. They are designated for the public to enjoy, use, and hold for future generations. This proposal does none of those things and harms the people who have the rightful expectation of these lands to be protected by the leaders we have elected to protect our interests.

Thank you for your time,  
Bob Schulz
