Nominated by:
Phone number:

E-mail:

Project name:
DSL permit number, if applicable:
Project completion date:
Location/address:

Contact person for project:
Phone number:

E-mail:

Consulting firm for project, if applicable:
Phone number:

E-mail:

Project type:

- Wetland mitigation
- Voluntary wetland restoration, creation or enhancement
- Wetland avoidance as an amenity to planned development

Generally describe the project:

Nominating criteria: Nominations are limited to five pages of text answering the following points, and five pages of other supporting information such as photos and maps.

1. Provide information to verify the project meets or exceeds all permit conditions, or describe how wetland impacts were avoided. Provide information that demonstrates sustainable stewardship of natural resources over the long term.
2. a) Describe how the project has improved or protected wetland functions (such as water quality improvement, habitat improvement, etc.). Also include information about rare species benefits or any offsite function benefits from the project.

b) Provide information to demonstrate how the improved/protected functions have produced natural resource benefits and have increased economic and/or amenity values to the landowner, watershed, economy or community.
3. Describe innovative concepts and/or creative use of materials.
4. Include information about community involvement or partnerships for the project.
5. Indicate how the project avoided or minimized impact to wetland areas.

Attach any maps, photos or other documents that will help illustrate the conditions or qualities mentioned above.

Applications due Feb. 22, 2012. Send to:
