Child Care Quality Indicators

Registered Family Child Care

Group Size, Staff/Child Ratio & Education

The group size and number of caregivers for children in family child care typically vary throughout the day. Within state regulations, Registered Family child care providers set a maximum number of children within the group, and the number of caregivers to work with that group. Those numbers are typically reported to parents as group size and staff/child ratios.

Please answer the question below as what you report to a parent inquiring about group size and staff/child ratios in your Registered Family Child Care Home

- What is the typical number of children, including your own (under 13 years of age), that are in the child care home at any one time? # _____
- Do you care for children under 24 months of age (including your own children)?
(please check YES or NO) YES NO
- Do you regularly have an assistant over 18 years of age who works with you to provide care for over 20 hours a week, not counting substitutes?
(please check YES or NO) YES NO

Please place a checkmark next to all of those that apply to your level of education:

Level of Education	Check if Completed	Major/Minor	Completed in Another Country
Less than High School			
High School/GED			
Some College			
Associates Degree (AA, AS, AAS)			
Bachelors Degree (BA, BS)			
Masters Degree (MA, MS)			
Doctorate (PhD)			
Oregon Registry (state current level of completion)			

Please check the boxes below regarding the following credentials:

- Child Development Associate (CDA) Yes No
- Oregon Registry Infant Toddler Professional Credential Yes No
- Other (list specific credential(s)): _____
