

**Oregon Department of Energy - Business Energy Tax Credit
Renewable Tier One Phase 3 Applications April 11, 2011 Funding Period**

updated 4/22/11

On April 11, 2011, ODOE posted on its website the Tier One Phase 3 applications. On April 12, 2011, ODOE received 165 applications at its P.O. Box. ODOE assigned each application envelope a number and used a random number generator to determine the order for opening applications. Applications were opened until reaching the limit of \$5 million in tax credits requested.

During the process, 12 applications were found to be incomplete, withdrawn or disqualified. Seventy six applications (listed below) moved into technical review. The remaining applications that ODOE was unable to accept were returned to the applicants.

After April 12, 2011, ODOE received 17 more applications in its P.O. Box – all of which were returned to the applicants – bringing the total number of returned applications to 94.

- Technical Review (see list below) = 76 applications
- Incomplete, Withdrawn or Disqualified = 12 applications
- Returned because the \$5 million limit in tax credit requests was exceeded = 94 applications

The list below is displayed in alphabetical order by project owner name for the BETC Tier One Phase 3 applications that were selected for technical review. Information was provided by the applicant and may change once a complete technical review of the application has been performed.

Technical Review Applications: Business Name	Application Type	Site City
Aldrich Point Dairy	Wind	Astoria
Banks Trail Cafe	Photovoltaic	Banks
Barbara Buchholtz Farm	Wind	Woodburn
Beaverton Toyota	Photovoltaic	Beaverton
Bend Area Habitat for Humanity	Homebuilder	Bend
Bend Area Habitat for Humanity	Homebuilder	Bend
