*Get a high-  
performance,  
high-value  
new school  
for low bid*

## Building a new school

is a daunting project these days. You have a limited budget and expect a functional, flexible, healthy building with low operating costs. You want to get the most value for the money spent. In short — you want a high performance school for low bid.

The Oregon Office of Energy can help. The Oregon High Performance Schools Program has special funding available now. The program offers up to \$50,000 per project for the up-front costs to design a school building that will achieve the highest level of energy and resource efficiency while providing improved

comfort and a healthy environment for students and staff.

If you expect to be involved in a new school construction project in the next few years, you need to call **now**. The Oregon High Performance Schools Program will last while funds are available — first come, first served.

Please call Energy Analyst Greg Churchill with our Schools Program at 1-800-221-8035 or (503) 373-7563 in Salem. You may e-mail Greg at **[Gregory.Churchill@state.or.us](mailto:Gregory.Churchill@state.or.us)**.
