

ORDINANCE NO. 05-1

AN ORDINANCE DEFINING CERTAIN TERMS; ESTABLISHING SEWER USER CHARGES; IDENTIFYING THOSE RESPONSIBLE FOR PAYMENT; PROVIDING FOR COLLECTION OF USER CHARGES; REPEALING ORDINANCE NO. 04-1; AND DECLARING AN EMERGENCY.

THE LAPINE SPECIAL SEWER DISTRICT ORDAINS AS FOLLOWS:

SECTION 1. SHORT TITLE:

This ordinance shall be known as the La Pine Special Sewer District Sewer Rate Ordinance.

SECTION 2. TABLE OF CONTENTS:

Section 3. Purpose

Section 4. Definitions

Section 5. Sewer User Charges

Section 6. Responsibility, Payment Delinquencies and Penalties

Section 7. Handling of Funds

Section 8. Appeals

Section 9. Conformity with the Law

Section 10. Severability

Section 11. Repeal Clause

Section 12. Emergency Clause

SECTION 3. PURPOSE: This ordinance is adopted for the following purposes:

- I. In order to protect the groundwaters within and adjacent to the core area of the community of LaPine from pollution and to promote the health, safety, and welfare of the residents, a sewage system has been proposed to be constructed and operated by the LaPine Special Sewer District for collection, treatment, and disposal of wastewater;
- II. In order to carry out the District's authorized function of sewage collection, treatment and disposal, it is necessary and in the public interest that the District establish rates for sewage service in amounts sufficient to pay the expenses of operating and maintaining such facilities, to provide for replacement, and to provide a margin for reserve; and

- III. The District has entered into a grant agreement with the Environmental Protection Agency for construction of sewage treatment facilities, in which the District has agreed that the costs of operating and maintaining the sewage treatment works shall be distributed among all users of such treatment works in general proportion to each user's contribution to the total wastewater flow and loading of the sewage system.

SECTION 4. DEFINITIONS:

Refer to the LaPine Special Sewer District System Use Ordinance (Ord.No 01-1) for additional definitions.

4.1 "Collection and treatment works" shall mean all facilities for collection, pumping, treating and disposing of sewage to be operated by the District. "Treatment works", "treatment system", and "sewage system" shall be equivalent terms for "collection and treatment works".

4.2 "Commercial user" shall mean any premises used for commercial or business purposes which are not an industry as defined in this ordinance.

4.3 "District" shall mean the LaPine Special Sewer District, Deschutes County, Oregon.

4.4 "District Engineer" shall mean the consulting engineer retained by the District.

4.5 "Domestic Waste" shall mean any wastewater from dwellings.

4.6 "Operation and maintenance" shall mean activities required to ensure the dependable and economical function of treatment works.

(a) Maintenance: Preservation of functional integrity and efficiency of equipment and structures. This includes preventive maintenance, corrective maintenance and replacement of equipment.

(b) Operation: Control of the unit processes and equipment that make up the treatment works. This includes keeping financial and personnel management records, laboratory control, process control, safety and emergency operation planning, employment of attorneys and consultants, payment of court costs; and payment of any costs or fees reasonably associated with any of the above.

4.7 "Person" shall mean any individual, firm, company, association, society, corporation or group.

4.8 "Public treatment works" shall mean a treatment works owned and operated by a public authority.

4.9 "Replacement" shall mean obtaining and installing equipment accessories or appurtenances that are necessary during the design or useful life, whichever is longer, of the treatment works to maintain the capacity and performance for which such works were designed and constructed.

4.10 "Service area" shall mean all the area served by the collection and treatment works and for which there is one uniform user charge system.

4.11 "User" shall mean every person directly or indirectly using any part of the public treatment works of the LaPine Special Sewer District. User includes each separate, non-residential establishment, whether or not sewer facilities are located in the user's portion of the building.

(a) "Residential user" shall mean domestic sewer usage.

(b) "Non-residential user" shall mean any other user.

4.12 "User charge" shall mean a charge levied on users of a treatment works, paid by a user for the user's proportionate share of the cost of improvement, operation and maintenance (including replacement) of such works under Section 204(b)(1)(A) of the Federal Clean Water Act.

SECTION 5. SEWER USER CHARGES:

5.1 User charges shall be levied on all users of the public treatment works. These charges shall cover the costs of improvement, operation and maintenance, replacement, taxes, and other administrative costs of such collection and treatment works. The user charge shall distribute these costs in proportion to each user's benefit derived and/or contribution to the wastewater loading of the treatment works.

5.2 There shall be established classes of users such that all members of a class shall pay a flat charge for a minimum volume of wastewater discharged from each residence, facility or other appropriate unit.

5.3 Should any user believe that the user's proportional cost is incorrect, user may apply for review of the user charge as provided in Section 9 of this ordinance.

5.4 Should the District Engineer determine that a user's wastewater contribution is incorrectly assigned, he or she shall reassign a more appropriate value to that user and shall notify the user of such reassignment.

5.5 Records of all assigned wastewater contributions forming the basis of the charges shall be kept on file with the District and shall be open for public inspection.

5.6 Each non-residential user's wastewater treatment cost contribution will be determined on the basis of the current equivalent dwelling unit schedule. This will determine that user's annual wastewater service charge, to be assessed in accordance with the rate schedule established by resolution of the District Board. Residential users may be considered to be one class of user and an equitable service charge may be determined for each such user based on an estimate of the total wastewater contribution of this class of user. The District may classify industrial, commercial and other non-residential establishments as a residential user, provided that the wastes from these establishments are equivalent to the wastes from the average residential user.

5.7 Non-residential establishments are charged on a store-front basis, one charge per each separate business in a structure. Each separate business is charged even though there may not be facilities in the user's portion of the building since each user's use and occupancy adds to the load and sewage

treated by the overall system. The District may charge the owner or user where the common facilities are located for each tenancy in lieu of charging each tenant individually.

5.8 Any user that cannot be classified in any of the above user classes shall be considered a special user. Such user shall be placed in an Open Class and charged according to the user's wastewater contribution, as determined by the District Engineer, and the rates established by resolution, all in accordance with this section.

5.9 The sewer charge for new development shall commence three months after the system development charge is paid or due, whichever is earlier. Once commenced, no sewer charge credit shall be given for vacancy thereafter.

SECTION 6. RESPONSIBILITY, PAYMENT DELINQUENCIES AND

PENALTIES:

6.1 The property owner of record is the responsible party for purposes of this Ordinance, and shall apply for sewer services and be responsible for all charges, administrative and late fees therefore, as prescribed by this ordinance. Where a responsible party has a delinquent bill for one premises, the delinquency may be charged against that responsible party for sewer services obtained at any other premises within the District.

6.2 The responsible party shall be billed every month (12 times per year) for services at a rate to be established by resolution.

6.3 Sewer user charges shall be due and payable to the District no later than 20 days after the bill is sent.

6.4 If the District has not received payment within twenty (20) days, a notice shall be mailed to the responsible party, notifying the responsible party that sewer service may be suspended if the delinquent bill has not been paid in full within thirty (30) days, and that the sewer charges may be collected in accordance with this section and in accordance with the provisions of subsection 6.5, fifteen (15) days from the date of notice unless payment is received in full.

6.5 Any sewer charge which is due and unpaid at the expiration of the time limitations set forth in subsection 6.4 or any expenses related to discontinuance, removal, closing or restoration of service after a delinquency, may be recovered in an action at law by the District in accordance with the provisions of this Section; and any delinquencies may be certified to the tax assessor of Deschutes County Oregon, for collection in the manner provided by ORS 454.225.

6.6 Interest shall accrue on all accounts from the date of delinquency. In addition, a penalty shall be assessed from the date of delinquency, which shall be added to the account and shall accrue interest in the same manner as all other delinquent charges beginning the following month. The interest rate and penalty charge shall be established by resolution.

6.7 In the event sewer charges remain unpaid fifty (50) days after the date of the end of the one-month period for which the bill is made, the District shall have the right to remove or close sewer connections and to enter upon the property for accomplishing such purposes. If the District chooses to pursue this

option, it will provide a ten (10) day prior written notice to any affected user(s). The expense of such discontinuance, removal, or closing, as well as the expense of restoring service shall be a debt due to the District and may be collected from the responsible party in accordance with the provisions of this ordinance.

6.8 In the District's sole discretion, sewer service may not be restored until all charges, including interest accrued and the expense of removal, closing, and restoration have been paid.

6.9 Change of ownership or occupancy of premises found delinquent shall not be cause for reducing or eliminating these penalties. In the District's discretion, it may refuse to provide new service to any person owing unpaid fees and/or penalties, plus interest to the District, until such amounts have been paid in full.

SECTION 7. HANDLING OF FUNDS:

7.1 Bills for sewer user charges shall be mailed to the address specified in the application for permit to make the connection unless or until a different owner or user of the property is reported to the District.

7.2 All collections of sewer user charges shall be made by the Manager of the District. Sewer user charges shall be computed as provided in Section 5 of this ordinance and shall be payable as provided in Section 6 of this ordinance.

7.3 The Manager of the District is hereby directed to deposit in the Sewer Fund all of the gross revenues received from charges, rates and penalties collected for the use of the sewage system as herein provided.

7.4 The revenues thus deposited in the Sewer Fund shall be used exclusively for the operation, maintenance and repair of the sewage system; reasonable administration costs; expenses of collection of charges imposed by this ordinance and connection fees provided for in the LaPine Special Sewer District sewer system use and regulation ordinance together with any attorney fees, investigation fees and/or court costs incurred therein; and payments of the principal and interest on any debts of the sewage system of the District.

SECTION 8. APPEALS:

8.1 Any responsible party who feels the applicable sewer user charge is unjust and inequitable as applied to the user's premises within the intent of the foregoing provisions may make written application to the District's Board of Directors requesting a review of the user charge. Said written request shall, where necessary, show the actual or estimated average flow of the user's wastewater in comparison with the values upon which the charge is based, including how the measurements or estimates were made.

8.2 Review of the request shall be made by the District's Board of Directors and the District Engineer. The District Engineer shall determine if the request is substantiated or not, including recommending further study of the matter by the District engineer or other registered professional engineer.

8.3 If the request is determined to be substantiated, the user charges for the user shall be recomputed, based on the approved revised flow and/or strength data and the new charges thus recomputed shall be applicable retroactively up to six months, as appropriate.

8.4 Any appeal undertaken herein shall not excuse the responsible party from paying all sewer user charges presently assessed. Failure to pay such charges shall subject the responsible party to the penalties provided in Section 6. A subsequent ruling on appeal favorable to the responsible party shall not act to extinguish any penalties or interest assessed against the responsible party for non-payment of any user fees; provided, however, that such penalties and interest shall be recomputed consistent with any reduction in user fees allowed on appeal.

SECTION 9. CONFORMITY WITH THE LAW:

This ordinance shall not substitute for or eliminate the necessity for conformity with any and all laws, ordinances, rules or regulations of the State of Oregon or its agencies, Deschutes County, the District or other public entity.

SECTION 10. SEVERABILITY:

If any section, subsection, sentence, clause, phrase or portion of this ordinance is for any reason held invalid or unconstitutional by a court of competent jurisdiction, such portion shall be deemed as a separate, distinct, and independent provision and such holding shall not affect the validity of the remaining portions of this ordinance.

SECTION 11. REPEAL CLAUSE:

Ordinance 04-1 is hereby repealed.

SECTION 12. EMERGENCY CLAUSE:

It is hereby adjudged and declared that existing conditions are such that this Ordinance is necessary for the immediate preservation of the public peace, health, and safety of the LaPine Special Sewer District, and an emergency is hereby declared to exist and this Ordinance, and all provisions modifying the ordinances referred to herein, shall take effect in full force and effect when signed by the Board President.

PASSED AND ADOPTED by a ___ vote for and a ___ vote against by the LaPine Special Sewer District Board of Directors, this ___ day of _____ 2005.

Board President

ORDINANCE NO. 01-4

AN ORDINANCE AUTHORIZING THE ESTABLISHMENT AND PROVISIONS GOVERNING THE DEVELOPMENT AND USE FOR SYSTEM DEVELOPMENT CHARGES FOR SEWER; AND REPEALING ORDINANCE NO. 88-8 AND ALL AMENDMENTS AND REVISIONS THERETO

The LaPine Special Sewer District does ordain as follows:

Section 1. Purpose. The purpose of the system development charge is to impose a portion of the cost of capital improvements for sewer upon those developments that create the need for or increase the demands on capital improvements.

Section 2. Scope. The system development charge imposed by this Ordinance is separate from and in addition to, any applicable tax, assessment, charge, or fee otherwise provided by law or imposed as a condition of development.

Section 3. Definitions. For purposes of this Ordinance, the following mean:

- (1) Capital Improvements. Facilities or assets used for:
 - a. Water supply, treatment and distribution;
 - b. Waste water collection, transmission, treatment and disposal;
 - c. Drainage and flood control;
 - d. Transportation; or
 - e. Parks and recreation.
 - f. "Capital improvement" does not include costs of the operation or routine maintenance of capital improvement.
- (2) Development. The change in character, occupancy or use of land or buildings; or demolishing of a building for the conversion of such property to a deferring use.
- (3) Improvement Fee. A fee for costs associated with capital improvements to be constructed after the date the fee is adopted pursuant to Section 4 of this Ordinance.
- (4) Land Area. The area of a parcel of land as measured by projection of the parcel boundaries upon a horizontal plane, with the exception of a portion of the parcel within a recorded right-of-way or easement subject to a servitude for a public street or scenic or preservation purpose.

(5) Owner. The owner or owners of record, title, or the purchaser or purchasers under a recorded sales agreement, and other persons having an interest of record in the described real property.

(6) Parcel of Land. A lot, parcel, block, or other tract of land that is occupied or may be occupied by a structure or structures or other use, and that includes the yards and other open spaces required under the zoning, subdivision, or other development ordinances.

(7) Qualified Public Improvements. A capital improvement that is required as a condition of development approval, identified in the plan adopted pursuant to Section 8 of this Ordinance; and either

a. Not located on or contiguous to property that is the subject of the development approval; or

b. Located in whole or in part on or contiguous to property that is the subject of development approval and required to be built larger or with greater capacity than is necessary for the particular development project to which the improvement fee is related.

(8) Reimbursement Fee. A fee for costs associated with capital improvements constructed or under construction on the date the fee is adopted pursuant to Section 4 of this Ordinance.

(9) System Development Charge. A reimbursement fee, an improvement fee or a combination thereof assessed or collected at the time of increased usage of a capital improvement, at the time of issuance of a development permit or building permit, or at the time of connection to the capital improvement. "System development charge" includes that portion of a sewer system connection charge that is greater than the amount necessary to reimburse the District for its average cost of inspecting and installing connections with sewer facilities. "System development charge" does not include fees assessed or collected as part of a local improvement District assessment, or the cost of complying with requirements or conditions imposed by a land use decision.

Section 4. System Development Charge Established.

(1) A system development charge shall be established and may be revised by resolution of the Board.

(2) Unless otherwise exempted by the provisions of this Ordinance or other local or state law, a system development charge is hereby imposed upon all parcels of land within the District, and upon all lands outside the boundary of the District that connect to or otherwise use the sewer facilities of the District.

Section 5. Methodology.

(1) The methodology used to establish or modify the reimbursement fee shall consider the cost of the then-existing facilities, prior contributions by then-existing users, gifts or grants from federal or state government or private persons, the value of unused capacity available to future system users, rate-making principals employed to finance publicly owned capital improvements, and other relevant factors identified by the Board. The methodology for establishing or modifying a reimbursement fee shall promote the objective that future system users shall contribute no more than an equitable share of the cost of then-existing facilities.

(2) The methodology used to establish or modify the improvement fee shall consider the cost of projected capital improvements needed to increase the capacity of the system.

(3) The methodology used to establish or modify the improvement fee or the reimbursement fee, or both, shall be contained in a resolution adopted by the Board.

(4) The methodology used to establish or modify the improvement fee or the reimbursement fee shall not:

- a. Include or incorporate a method or system under which the payment of the fee or the amount of the fee is determined by the number of employees of an employer without regard to new construction, new development or new use of an existing structure by the employer;
- b. Include or incorporate any method or system under which the payment of the fee or the amount of the fee is based on the number of individuals hired by the employer after a specified date; or
- c. Assume that costs are necessarily incurred where capital improvements when an employer hires an additional employee.

(5) All methodology for establishing or modifying reimbursement or improvement fees shall be available for public inspection.

(6) A change in the amount of a reimbursement fee or an improvement fee is not a modification of the system development charge if the change in amount is based on the periodic application of an adopted specific cost index or on a modification to any of the factors related to rate that are incorporated in the established methodology.

Section 6. Authorized Expenditures.

(1) Reimbursement fees shall be applied only to capital improvements associated with the systems for which the fees are assessed, including expenditures relating to repayment of indebtedness.

(2) Improvement fees shall be spent only on capacity-increasing capital improvements, including expenditures relating to repayment of future debt for the improvements. An increase in system capacity occurs if a capital improvement increases the level of performance or service provided by existing facilities or provides new facilities. The portion of the capital improvements funded by improvement fees must be related to demands created by development.

(3) A capital improvement being funded wholly or in part from revenues derived from the improvement fee shall be included in the plan adopted by the District pursuant to Section 8 of this Ordinance.

(4) Notwithstanding subsections (1) and (2) of this section, system development charge revenues may be expended on the direct costs of complying with the provisions of this Ordinance, including the costs of developing system development charge methodologies and providing an annual accounting of system development charge expenditures.

Section 7. Expenditure Restrictions.

(1) System development charges shall not be expended for costs associated with the construction of administrative office facilities that are more than an incidental part of other capital improvements.

(2) System development charges shall not be expended for costs of the operation or routine maintenance of capital improvements.

Section 8. Improvement Plan. Prior to the establishment of a system development charge by ordinance or resolution, the Board shall adopt a plan that:

(1) Lists the capital improvements that may be funded with improvement fee revenues;

(2) Lists the estimated cost and time of construction of each improvement;
and

(3) Describes the process for modifying the plan.

Section 9. Collection of Charge.

(1) The system development charge is payable upon annexation; issuance of a building permit; a development permit; a development permit for development not requiring the issuance of a building permit; or a permit to connect to the sewer system.

(2) If no building, development, or connection permit is required, the system development charge is payable at the time the usage of the capital improvement is increased.

(3) The applicant for a connection permit shall be required to state in writing the intended use of the building in sufficient detail to enable the District to determine the appropriate category of use. If the use of a building changes or if the stated use is incorrect, the occupant shall report the change of use to the District within 30 days and promptly pay any additional system development charge. If the applicant fails to report a correct statement of use or a change of use within 30 days or fails to pay the additional system development charge within 10 days after invoice, the occupant shall pay a penalty of 10% of the balance due plus interest on the unpaid balance at the rate of 1.5% per month.

(4)(a) The District shall not issue such permit or allow such connection until the charge has been paid in full, unless an exemption is granted pursuant to Section 11 of this Ordinance, or unless, in the case of hardship, owner agrees in writing to allow the District to assess the uncollected charge against the real property to which the charge is attributable, pursuant to Section 10(3) of this Ordinance.

(b) A hardship shall be determined in the District Board's sole discretion, upon consideration of:

- (1) The financial resources of the owner, and the burden the charge will impose on the owner, with due regard to the owner's other obligations; and
- (2) The extent to which such burden can be alleviated by waiving immediate payment and assessing the total amount against the benefitted property.

Section 10. Delinquent Charges; Hearing.

(1) When, for any reason, the system development charge has not been paid, the District manager shall report to the Board the amount of the uncollected charge, the description of the real property to which the charge is attributable, the date upon which the charge was due, and the name of the owner.

(2) The Board shall schedule a public hearing on the matter and direct that notice of the hearing be given to each owner with a copy of the District manager's report concerning the unpaid charge. Notice of the hearing shall be given either personally or by certified mail, return receipt requested, or by both personal and mailed notice, and by posting notice on the parcel at least 10 days before the date set for the hearing.

(3) At the hearing, the Board may accept, reject, or modify the determination of the District manager as set forth in the report. If the Board finds that a system development charge is unpaid and uncollected, it shall docket the unpaid and uncollected system development charge in the lien docket. Upon completion of the docketing, the District shall have a lien against the described land for the full amount of the unpaid charge, together with interest at the legal rate of 10 percent and with the District's actual cost of serving notice of the hearing on the owners. The lien shall be enforceable in the manner provided in ORS chapter 223.

Section 11. Exemptions.

(1) Structures and uses established and existing on or before the effective date of this Ordinance that are connected to the sewer system are exempt from a system development charge to the extent of the structure or use then existing and to the extent of the parcel of land as it is constituted on that date. Structures and uses affected by this subsection shall pay the sewer charges pursuant to the terms of this Ordinance upon the receipt of a permit to connect to the sewer system.

(2) An alteration, addition, replacement or change in use that does not increase the parcel's or structure's use of the sewer system as calculated are exempt from all portions of the system development charge.

Section 12. Credits.

(1) A system development charge shall be imposed when a change of use of a parcel or structure occurs, but credit shall be given for the computed system development charge to the extent that prior structures existed and services were established on or before the effective date of the Ordinance. The credit so computed shall not exceed the calculated system development charge. No refund shall be made on account of such credit.

(2) A credit shall also be given for construction of a qualified public improvement. The credit shall be only for the improvement fee charged for the type of improvement being constructed, and may be granted only for the cost of that portion of such improvement that exceeds the District's minimum standard facility size or capacity needed to serve that particular development project or property. The applicant shall have the burden of demonstrating that a particular improvement qualifies for credit under this section.

(3) When the construction of a qualified public improvement gives rise to a credit amount greater than the improvement fee that would otherwise be levied against the project receiving development approval, the excess credit may be applied against improvement fees that accrue in subsequent phases of the original development project. However, this subsection shall not prohibit the District from providing a greater credit, or from establishing a system providing for the transferability of credits, or from providing a credit for a capital improvement not identified in the plan adopted pursuant to Section 8, or from providing a share of the cost of such improvement by other means, if the District so chooses.

(4) Credit shall be used within the time specified in the Ordinance, but not later than ten (10) years from the date the credit is given.

Section 13. Segregation and Use of Revenue; and Annual Accounting. All funds derived from the system development charge are to be segregated by accounting practices from all other funds of the District. The system development charge calculated and collected shall be used for no purpose other than those set forth in section 6 of this Ordinance. The District shall provide an annual accounting to be completed by January 1st of each year for system development charges showing the total amount of system development charge revenues collected for each system and the projects that were funded in the previous fiscal year. The District shall

include in the annual accounting, a list of the amounts spent on each project funded, in whole or in part, with system development charge revenues.

Section 14. Review Procedures.

(1) Expenditure Review.

particularity the
the person
two (2) years of

a. Any citizen or other interested person may challenge an expenditure of systems development charge revenues by filing a written complaint with the District describing with decision of the District and the expenditure which challenges. Such challenges must be filed within the expenditure of the systems development charge revenues.

the

Statutes,
the Board
expenditure of systems
Board shall direct that a sum
deposited within one year to the
from which it was spent.

b. A hearing shall be held by the Board within sixty (60) days of the filing of the complaint. After providing notice to the challenger, Board shall determine whether the expenditure was in accordance with this Ordinance and the applicable Oregon Revised Statutes, and may affirm, modify or overrule the decision. If the Board determines that there has been an improper expenditure of systems development charge revenues, the Board shall direct that a sum equal to the misspent amount be deposited within one year to the credit of the account or fund from which it was spent.

c. The decision of the Board shall be judicially reviewed only as provided in ORS 34.010 to 34.100.

(2) Methodology Review.

notice
days prior
development
development
prior to the first
list to receive a notice
the action of the District.

a. The District shall maintain a list of persons who have made written requests for notification prior to adoption or amendment of a methodology for any systems development charge. Written notice shall be mailed to persons on the list at least ninety (90) days prior to the first hearing to establish or modify a systems development charge, and the methodology supporting the system development charge shall be available at least sixty (60) days prior to the first hearing to. The failure of a person on the list to receive a notice that was mailed does not invalidate the action of the District.

b. The District may periodically delete names from the list, but, at least thirty (30) days prior to removing a name from the list, must notify the person whose name is to be deleted that a new

written request for notification is required if the person wishes to remain on the notification list.

c. Legal action intended to contest the methodology used for calculating a systems development charge may not be filed after systems District. methodology used for charge only as provided in ORS 34.010 to 34.100. Persons shall request judicial review of the calculating a systems development charge Ordinance or resolution by the District. Persons shall request judicial review of the calculating a systems development charge only as provided in ORS 34.010 to 34.100.

(3) Other Review. Challenges of any other decisions required or permitted to be made by the District under this Ordinance or associated resolutions including, but not limited to, objections to the calculation of a system development charge must be filed in writing with the District office within twenty (20) days of the date of the decision. The complaint must describe with particularity the decision of the District challenged. A hearing shall be held by the Board within sixty (60) days of the filing of the complaint. After providing notice to the complainant, the Board shall determine whether the decision challenged is in accordance with this Ordinance and the applicable Oregon Revised Statutes, and may affirm, modify, or overrule the decision. The Board must advise the complainant of the right to petition for review pursuant to ORS 34.010 to ORS 34.100.

Section 15. Severability. The sections and subsections of this Ordinance are severable. The invalidity of any one section or subsection shall not affect the validity of the remaining sections or subsections.

Section 16. Repeal. Ordinance No. 88-8 and all amendments and revisions thereto are hereby repealed in their entirety.

ADOPTED this 11th day of April, 2002 by action of the Board of Directors.

LAPINE SPECIAL SEWER DISTRICT
DIRECTORS

ATTESTED:

Secretary

RESOLUTION NO. 06-3

A RESOLUTION PROVIDING FOR THE ESTABLISHMENT OF A
WASTEWATER SYSTEM DEVELOPMENT CHARGE;
AND REPEAL OF RESOLUTION NO. 03-7

WHEREAS, the La Pine Special Sewer District has recently completed Phase 1 of its expansion of the wastewater collection, treatment and effluent reuse system based on short term community growth needs;

WHEREAS, the District Board of Directors, therefore, directed staff and engineering consultants, HGE, Inc., Architects, Engineers and Surveyors and Planners, to develop and complete a Wastewater System Capital Facilities Plan (January 2006), a Wastewater System Methodology for both wastewater reimbursement and improvement fees, and an associated Wastewater System SDC combining these two fees, all attached as Exhibit 1 and incorporated herein by this reference, including any documents referenced in or relied upon by Exhibit 1; and

WHEREAS, additional expansion and an increase in the level of performance of the District's wastewater collection, treatment, bio-solids management and effluent reuse facilities is essential to accommodate new growth within the La Pine UUC, Wickiup Junction RSC, and the Newberry Neighborhood development; and

WHEREAS, District wishes to impose the cost of the wastewater system improvements required to serve new development on new growth through imposition of reimbursement and improvement fees; and

WHEREAS, the total remaining capital cost for the Phase 1 system treatment plant improvements construction attributable to new growth is \$1,023,788, expressed in year 2006 dollars; and

WHEREAS, system expansion to provide wastewater capacity for anticipated resident needs through the 20-year planning period to 2025 are estimated at \$8,294,152, expressed in 2006 dollars; and

WHEREAS, the engineering analysis estimates that 3,590 people, or a projected 1,632 additional Equivalent Dwelling Units (EDUs) will be served through the 20-year planning period to 2025; and

WHEREAS, the District desires that the SDC improvement fee be increased on an annual basis by the cost of inflation, based upon the Engineering News Record index (ENR); and

WHEREAS, the District has adopted Ordinance No. 01-4, an Ordinance Authorizing the Establishment of System Development Charges for Wastewater; and

WHEREAS, the wastewater system SDC methodology has been available for public review since April 7, 2006, in excess of the statutory 60-day minimum review period.

NOW, THEREFORE, BE IT RESOLVED by the District Board for the La Pine Special Sewer District, as follows:

Section 1. Methodology Adopted. The reimbursement and improvement fee methodologies set forth in Section 13 of the Wastewater System Capital Facilities Plan (Exhibit 1) are hereby adopted as the methodologies for the reimbursement and improvement wastewater system development charge fees established herein.

Section 2. Establishment of Wastewater System SDCs.

A. **Reimbursement Fee.** To compensate District for the costs of undertaking construction of the Phase 1 interim needs of the wastewater system, which were specifically constructed to accommodate growth, the following formula for a System Development Charge reimbursement fee per EDU, based upon 2025 projections, will be used:

The pricing of the remaining capacity in the La Pine Special Sewer District wastewater facilities is a function of the "book value" of the facilities, which retain capacity available for growth, divided by the projected growth in service demand as measured in EDUs (Book value cost basis ÷ benefited EDUs).

Calculation:

$$\begin{aligned} &= \$1,023,788 \div 1632 \\ &= \text{Cost Per Benefited EDU} = \$627.32 \\ &\text{Reimbursement fee} = \$672.32 \text{ per EDU} \end{aligned}$$

B. **Improvement Fee.** To compensate the District for system expansions and to increase the level of performance of collection, treatment, and reuse facilities, the following formula for a System Development Charge improvement fee per new development EDU will be used:

Total Cost of Planned Capacity Increasing & System Improvement Projects
+ Estimated increase in EDUs to 2025
= \$8,294,152 ÷ 1632
= \$5,082.20 per EDU

C. SDC Fee Per EDU.

Reimbursement Fee + Improvement Fee + Service related costs
= Wastewater SDC
\$627.32 + \$5,082.20 = \$5,709.52

To assure equitable costs, the existing Sewer District SDC of \$5,700.00 is affirmed.

Section 3. Charge Increase. The Wastewater SDC improvement fee imposed herein shall increase annually by the cost of inflation on the 1st day of January, each year, based on the ENR, without the need for modification of this Resolution or the underlying methodology. An ENR value of 7630 was utilized for construction estimates in the Wastewater System Capital Facilities Plan.

Section 4. The Wastewater System SDC fee imposed herein is payable upon issuance of a building permit, a development permit for development not requiring the issuance of a building permit, a permit or approval to connect to the water system, at the time the usage of the Water System is increased, or as otherwise required by Ordinance No. 01-4.

Section 5.

A. Qualified Public Improvement Credit. Where a “qualified public improvement”, as defined in Ordinance No. 01-4, is constructed by a wastewater connection applicant (Applicant), the District shall grant a credit against any and all applicable improvement charges which would otherwise be owed by the Applicant. The amount of the credit shall be determined by the District Engineer. The credit shall be only for the improvement fee charged for the type of improvement that exceeds the District’s minimum standard facility size or capacity needed to serve the particular development project or property. The Applicant shall have the burden of demonstrating that a particular improvement qualifies for credit under this section of this Resolution, pursuant to ORS 223.304 and Ordinance No. 01-4.

B. When the construction of a qualified public improvement gives rise to a credit amount greater than the wastewater SDC improvement fee that would otherwise be levied against the project receiving development approval, the excess credit may be applied against wastewater SDC improvement fees that accrue in subsequent phases of

the original development project. This subsection shall not prohibit the District from providing a greater credit, or from establishing a system providing for the transferability of credit, or from providing a credit for a capital improvement not identified in the wastewater CIP, or from providing a share of the costs of such improvement by other means, if the District so designates by resolution.

C. Any credit granted under this Section shall be used within ten (10) years from the date the credit is granted.

Section 6. All previously adopted resolutions establishing wastewater system development charges are hereby repealed.

DATED this _____ day of _____, 2006.

APPROVED BY:

President,
Board of Directors

ATTEST:

Secretary,
Board of Directors

ORDINANCE NO. 01-1

AN ORDINANCE FOR THE LAPINE SPECIAL SEWER DISTRICT SEWERAGE SYSTEM REGULATING THE USE AND EXPANSION OF THE PUBLIC SEWER, THE DRAINS, THE INSTALLATION, AND CONNECTION OF BUILDING SEWERS, THE DISCHARGE OF WATER AND WASTES INTO THE PUBLIC SEWER SYSTEM; PROVIDING PENALTIES FOR VIOLATION THEREOF; REPEALING ORDINANCES NOS. 1, 88-1, 87-3, 88-4, 88-7, AND 89-2; AND DECLARING AN EMERGENCY

THE LAPINE SPECIAL SEWER DISTRICT DOES ORDAIN AS FOLLOWS:

SECTION 1: SHORT TITLE:

This ordinance shall be known as LaPine Special Sewer District (District) System Use and regulation ordinance.

SECTION 2: TABLE OF CONTENTS:

- Section 3: Definitions
- Section 4: Use of Public Sewers Required
- Section 5: Private Wastewater Disposal
- Section 6: Sewer Connections
- Section 7: Building Sewer Plumbing
- Section 8: Use of Public Sewers
- Section 9: Prohibitions
- Section 10: Power and Authority of Inspectors
- Section 11: Appeals Procedure
- Section 12: Penalties
- Section 13: Repeal Clause
- Section 14: Emergency

SECTION 3. DEFINITIONS:

Unless the context specifically indicates otherwise, the meaning of terms used in this ordinance shall be as follows:

- 3.1. Board: The Board of Directors of the LaPine Special Sewer District, a sanitary District within Deschutes County, formed pursuant to ORS.450.045 to 450.060, and ORS.198.825.
- 3.2. "BOD" (denoting Biochemical Oxygen Demand): The quantity of oxygen utilized in the biochemical oxidation of organic matter under a standard laboratory procedure in 5 days at 20 degrees Celsius expressed in milligrams per liter (mg/L).
- 3.3. Building Drain: The building drain is that part of the lowest piping of a drainage system which receives the discharge from soil, waste and other drainage pipes inside the walls of the building and conveys it to the building sewer beginning two (2) feet (.6M) outside the building wall.
- 3.4. Building Sewer: The building sewer is that part of the horizontal piping of a drainage system which extends from the end of the building drain and which receives the discharge of the building drain and conveys it to a public sewer, private sewer, individual sewage disposal system or other point of disposal.
- 3.5. Building Official: The Deschutes County Building Official Chair or his/her appointed representative.
- 3.6. County: Deschutes County, Oregon.
- 3.7. District: The LaPine Special Sewer District, a sanitary District within Deschutes County, Oregon, formed pursuant to ORS198.705 to ORS198.955.
- 3.8. Chair: The presiding officer of the Board of Directors of the District.
- 3.9. Easement: an acquired legal right for the specific use of land owned by others.
- 3.10. Floatable Oil: Oil, fat, or grease in a physical state such that it will separate by gravity from wastewater by treatment in an approved pretreatment facility. A wastewater shall be considered free of floatable fat if it is properly pretreated and the wastewater does not interfere with the collection system.
- 3.11. Garbage: Shall mean solid wastes from the preparation, cooking, and dispensing of food, and from the handling, storage, and sale of produce.
- 3.12. Industrial Wastes: The wastewater from industrial processes, trade, or businesses, as distinct from domestic or sanitary wastes.
- 3.13. May: Is permissive.

- 3.14. Natural outlet: Any outlet, including combined sewer overflows, into a watercourse, pond, ditch, lake, or other body of surface or groundwater.
- 3.15. Owner: (1) A person with a legal right of possession to real property; (2) one who is recognized and held responsible by law as the owner of real property; (3) including a purchaser under a land sales contract.
- 3.16. Person: Any individual, firm, company, association, society, corporation, or group.
- 3.17. pH: The logarithm of the reciprocal of the hydrogen-ion concentration. The concentration is the weight of hydrogen-ions, in grams, per liter of solution. Neutral water, for example, has a pH value of 7 and a hydrogen-ion concentration of 10^{-7} .
- 3.18. Practical Route: That route determined by the Board Chair to be economically feasible.
- 3.19. Properly Shredded Garbage: The wastes from the preparation, cooking, and dispensing of food that have been shredded to such a degree that all particles will be carried freely under the flow conditions normally prevailing in the building drain, with no particle greater than $\frac{1}{2}$ inch in any dimension.
- 3.20. Public Sewer: The LaPine Special Sewer District Sewerage System, also referred to as System, or Sewerage System, including septic tanks, pumping facilities, service lines, system piping and control panels, and street sewer. The term 'public sewer' includes STEP, STE systems, and electrical systems.
- 3.21. STEP System: A septic tank effluent pumping system. A service connection using a pump within a septic tank to convey effluent to the street sewer.
- 3.22. STE System: A septic tank effluent system. A service connection using a septic tank and gravity effluent sewer to convey effluent to the street sewer.
- 3.23. Sanitary Sewer: A sewer that carries liquid and water carried wastes from the residences, commercial buildings, industrial plants, and institutions together with minor quantities of ground, storm, and surface waters that are not admitted intentionally.
- 3.24. Service Connection: A septic tank and service line installed on property to connect the septic tank serving the structures thereon to the system piping. Unlike a lateral of a main or a main, service lines are not designed or intended to receive effluent flow from structures other than those structures with wastewater plumbing existing on the property when the lines were installed.
- 3.25. Sewage: Water-carried human wastes, including kitchen, bath, and laundry waste from residences, buildings, industrial establishments, or other places, together

with such groundwater infiltration, surface waters, or industrial waste as may be present.

- 3.26. Sewer: A pipe or conduit that carries wastewater or drainage water.
- 3.27. Shall: Is mandatory.
- 3.28. Slug: Any discharge of water or wastewater which in concentration of any given constituent or in quantity of flow shall adversely affect the collection system or performance of the wastewater treatment works.
- 3.29. Storm Sewer (or "Storm Drain"): A drain or sewer for conveying storm water, groundwater, subsurface water, or unpolluted water from any source.
- 3.30. Street Sewer: A sewer not located upon private property.
- 3.31. Suspended Solids: Total suspended matter that either floats on the surface of, or is in suspension in, water, wastewater, or other liquids, and that is removable by laboratory filtering as prescribed in "Standard Methods for the Examination of Water and Wastewater".
- 3.32. System Piping: The main transmission lines and its laterals which collect wastewater from service lines.
- 3.33. Unpolluted Water: Water of quality equal to or better than the effluent criteria in effect, or water that would not cause violation of receiving water quality standards and would not be benefitted by discharge to the sanitary sewers and wastewater treatment facilities provided.
- 3.34. Vacant Property: Property, at the time of the sewer system construction, on which there exists no structures; or on which there exists no habitable structures, and for which there is no apparent active owner.
- 3.35. WPCF: Water Pollution Control Federation.
- 3.36. Wastewater: Same meaning as sewage.
- 3.37. Wastewater Facilities: The structures, equipment, and processes required to collect, carry away, and treat domestic and industrial wastes and dispose of the effluent. Wastewater facilities include the septic tanks, pumping facilities, service lines, system piping, and control panels.
- 3.38. Wastewater Treatment Works: An arrangement of devices and structures for treating wastewater, industrial wastes, and sludge. Sometimes used as synonymous with "wastewater treatment plant" or "water pollution control plant".

3.39. Water Course: A natural or artificial channel for the passage of water either continuously or intermittently.

SECTION 4. USE OF PUBLIC SEWERS REQUIRED

4.1. It shall be unlawful to discharge to any natural outlet, or to place, deposit, or permit to be deposited in an unsanitary manner upon public or private property within the LaPine Special Sewer District, or in any jurisdiction of said District, any sewage, industrial wastes, or other polluted waters, any human excrement, garbage, or other objectionable waste, except where suitable treatment has been provided in accordance with subsequent provisions of this ordinance.

4.2. Except as hereinafter provided, it shall be unlawful to construct or use any privy, privy vault, septic tank, cesspool, or other facility intended or used for the disposal of wastewater.

4.3. The owners of all property within the boundaries of the LaPine Special Sewer District are hereby required, in accordance with the provisions of this ordinance and within sixty (60) days after date of official notice to do so, to connect the wastewater plumbing of any house, building or structure now existing or subsequently developed, to the System when any system piping, initially constructed or extensions thereafter, is located within six hundred (600) feet along the practical route to such house, building or structure.

4.4. a. Proceedings to extend system piping to an owner or owners of property within the boundaries of the LaPine Special Sewer District who did not connect the wastewater plumbing of any house, building or other structure to the system because the system piping was not within 600 feet as provided in Sec. 4.3 may be initiated by resolution of the Board. Provided however, that such owner or owners may request the Chair for connection to the system by a service line or lines. If such request is granted, the requesting owner shall pay the prevailing connection fee plus the actual costs of installing any piping beyond 300 feet from the system piping. If the Chair determines, however, that extension by service lines is unfeasible or otherwise unwarranted because an extension of system piping is called for, he/she shall not grant the request and shall advise the requesting owner(s) to petition the Board for an extension of system piping.

b. The Board may extend system piping beyond District boundaries if, after a hearing, it finds such extension conforms to any applicable comprehensive land use plan.

SECTION 5. PRIVATE WASTEWATER DISPOSAL

5.1. Where a public sanitary sewer is not available under the provisions of Sec. 4.3, the building sewer shall be connected to a private wastewater disposal system complying with State, County and local law, including the subsurface sewage disposal regulations of the State of Oregon Department of Environmental Quality.

5.2. At such time as a public sewer becomes available to a property served by a private wastewater disposal system, a direct connection shall be made to the public sewer within one year after the date official notice from the District to connect and comply with this ordinance, except where and when time extensions are granted by the District Board. The septic tanks, cesspools, and similar private wastewater disposal facilities previously utilized shall be abandoned, cleaned of sludge and filled with suitable material in accordance with State, County and local laws, ordinances, rules and regulations. or removed or crushed.

Time extensions may be granted on a case-by-case basis, in the Board's sole discretion, after consideration of the following criteria:

- a. The size, location and elevation of the property,
- b. The condition of the private disposal system,
- c. The length of the extension under consideration, and
- d. Such other criteria as the District Board may deem appropriate, upon consultation with the District engineer.

SECTION 6. SEWER, CONNECTIONS, AND DESIGN

6.1. No unauthorized person(s) shall uncover, make any connections with or opening into, use, alter, or disturb any public sewer or appurtenance thereof without first obtaining a written permit from the District.

6.2. Written permits for installation of a service connection issued by the District shall reference District Standards for materials and workmanship. Such standards shall be available for public review. The permittee shall install the service connection in accordance with these standards for materials and workmanship. The permittee must obtain District certification that the installation conforms to District standards, prior to placing the system in use.

6.3. There shall be three classes of written permits:

- a. Single family residential;
- b. Commercial, multi-family (including mobile home parks or any other service which will use a septic tank utilized by more than one building, structure,

or mobile home, or which will have a flow exceeding the equivalent flow of a single family residence); and

c. Establishments producing industrial wastes.

The owner(s) or its agent shall make application on a special form furnished by the District. The permit application shall be supplemented by any plans, specifications, or other information considered pertinent in the judgment of the Chair, and shall be accompanied by a properly executed easement approved by the Chair which permits access by the District to owner's property for the purpose of installing, constructing, maintaining, and inspecting service lines, and septic tanks serving owner's property.

6.4. No permit shall be issued under this ordinance for vacant property. Vacant property means property with no improvements located upon it, or property which has improvements upon it but no need for plumbing.

6.5. a. All costs and expenses incidental to the installation and connection of a building sewer shall be borne by the owner(s). The owner(s) shall indemnify the District from any loss or damage that may directly or indirectly be occasioned by the installation of the building sewer.

b. Installation and connection costs and expenses may be paid in installments and assessed against owner's(') property, pursuant to ORS 454.805, where:

(1) The District makes financing for the installation costs available to owner(s); and

(2) The District determines that owner(s) may apply to pay the assessments in installments, as provided in ORS 223.205 to 223.314, subject to a reasonable penalty for prepayment of assessment installments.

c. Where, in the case of hardship, owner(s) agree in writing that the District may assess the total installation and connection costs, plus interest, to the benefitted property, to be paid upon either foreclosure or sale of the property, immediate payment of such costs may be waived and the entire determination of a hardship will be based upon the District Board's consideration of:

(1) The financial resources of owner(s) and the burden that payment of installation costs will impose, with due regard to owner's(') other obligations; and

- (2) The extent to which such burden can be alleviated by waiving immediate payment and assessing the total amount against the benefitted property.

6.6. No person(s) shall make connection of roof downspouts, foundations drains, areaway drains, or other sources of surface runoff or groundwater to a building sewer or building drain which in turn is connected directly or indirectly to a public sanitary sewer, unless such connection is approved by the Chair in writing for purposes of disposal of polluted surface drainage. Otherwise, no intentional infiltration or inflow shall be permitted.

6.7. To the extent reasonably possible, all excavations for sewer installation shall be adequately guarded with barricades and lights so as to protect from hazard. Streets, sidewalks, parkways, and other public property disturbed in the course of the work shall be restored in a manner satisfactory to the District.

6.8. Upon the sale of a subdivided or partitioned parcel with a house, building, or structure utilizing a septic tank common to another house, building, or structure which was not included in the sale or located on the parcel after division, another septic tank and proper piping shall be installed so that each parcel has independent sewerage facilities.

6.9. With each application for a permit or for an application to provide sewers to a subdivision, the applicant shall submit to the Chair one set of plot plans showing the general layout of the proposed development at a scale no smaller than 1" = 100', and showing the following:

- a. Name of owner;
- b. Name of person who prepared plans;
- c. Property line and both existing and proposed layout;
- d. Building sewers or sewer connections and their distance from system piping;
- e. Existing and proposed water lines and other underground utility lines;
- f. Buildings;
- g. Streets, if any;
- h. Existing private sewage disposal systems; and
- i. Scale used.

SECTION 7. BUILDING SEWER PLUMBING

- 7.1. Existing building sewers may be used in connection with the new buildings only when they meet all requirements of the applicable plumbing code.
- 7.2. The size, slope, alignment, materials of construction of a building sewer, and the methods to be used in excavating, placing of the pipe, jointing, testing, and backfilling the trench, shall all conform to the requirements of the building and plumbing code or other applicable rules and regulations of the State of Oregon.
- 7.3. Whenever possible, the building sewer shall be brought to the building at an elevation below the basement floor. In all buildings in which any building drain is too low to permit gravity flow to the septic tank, sanitary sewage carried by such building drain shall be lifted by an approved means and discharged to the building sewer.
- 7.4. The connection of the building sewer into the septic tank shall conform to the requirements of the applicable plumbing code. All such connections shall be made gas-tight and water-tight and verified by proper testing. Any deviation from the prescribed procedures and materials must be approved by the Chair and/or building official before installation.
- 7.5. The permit applicant shall notify the building official when the building sewer is ready for inspection and connection to the septic tank. The connection and testing shall be made under the supervision of the Deschutes County building official or his/her representative.
- 7.6. Plumbing within newly constructed houses, buildings, or structures shall be so oriented, unless otherwise approved by the Chair and building official, as to allow the building sewer to stem from the side closest to the system piping.

SECTION 8. USE OF PUBLIC SEWERS

- 8.1. The first part of the public sewer system is a septic tank. All discharge to the public sewer system shall first pass through such device.
- 8.2. No person(s) shall discharge or cause to be discharged any unpolluted waters such as stormwater, groundwater, roof runoff, subsurface drainage, or cooling water to any sewer.
- 8.3. No person(s) shall discharge or cause to be discharged any of the following described waters or wastes to any public sewer:
 - a. Any gasoline, benzene, naphtha, fuel, oil, or other flammable or explosive liquid, solid, or gas;

- b. Any waters containing toxic or poisonous solids, liquids, or gases in sufficient concentration, either singly or by interaction with other wastes, to injure or interfere with any waste treatment process, constitute a hazard to humans or animals, or create a public nuisance, or create any hazard in the receiving waters of the wastewater facilities;
- c. Any waters or wastes having a pH lower than 5.5 or greater than 9.5 or having any other corrosive property capable of causing damage or hazard to structures, equipment, and personnel of the wastewater facilities;
- d. Solid or viscous substances in quantities or of such size capable of causing obstruction to the flow in sewers, or other interference with the proper operation of the wastewater facilities such as but not limited to, ashes, bones, cinders, sand, mud, straw, shavings, metal, glass, rags, feathers, tar, plastics, wood, underground garbage, whole blood, paunch manure, hair and fleshings, entrails, paper dishes, cups, or milk containers, etc., either whole or ground by garbage grinders;
- e. Ceramic dusts or particles or other abrasive substances; and
- f. Any water received through infiltration or inflow.

8.4. The following described substances, materials, waters, or waste shall be limited in discharges to the System to concentrations or quantities which will not harm either the sewers, wastewater treatment process or equipment, will not have an adverse effect on the receiving stream, or will not otherwise endanger lives, limb, public property, or constitute a nuisance. The Chair may set more restrictive limitations than those established below if, in the Chair's opinion, such limitations are necessary to meet the above objectives. In forming his/her opinion, the Chair will give consideration to such factors as the quantity of subject waste in relation to flows and velocities in the sewers, construction materials of the sewers, the wastewater treatment process employed, capacity of the wastewater treatment plant, degree of treatability of the waste in the wastewater treatment plant, and other pertinent factors. The following limitations or restrictions on materials or characteristics of waste or wastewater discharged to the sanitary sewer shall not be violated without approval of the Chair:

- a. Wastewater having a temperature higher than 150 degrees Fahrenheit (65 degrees Celsius);
- b. Wastewater containing more than 25 milligrams per liter of petroleum oil, non-biodegradable cutting oils, or product of mineral oil origin;
- c. Wastewater from industrial plants containing floatable oils, fat, or grease;

- d. Any garbage that has not been properly shredded. Garbage grinders are discouraged;
- e. Any waters or wastes containing iron, chromium, copper, zinc, and similar objectionable or toxic substances to such degree that any such material received in the composite wastewater at the wastewater treatment works exceeds the limits established by the Chair for such materials;
- f. Any waters or wastes containing odor-producing substances exceeding limits which may be established by the Chair;
- g. Any radioactive wastes or isotopes of such half-life or concentration exceeding applicable state or federal regulation limits;
- h. Quantities of flow, concentrations, or both which constitute a "slug" as defined herein;
- i. Waters or wastes containing substances which are not amenable to treatment or reduction by the wastewater treatment processes employed or are amenable to treatment only to such degree that the wastewater treatment plant effluent cannot meet the requirements of other agencies having jurisdiction over discharge to the receiving waters; and
- j. Any water or wastes which, by interaction with other water or wastes in the public sewer system, release obnoxious gases, form suspended solids which interfere with the collection system, or create a condition deleterious to structures and treatment processes.

8.5. If any waters or wastes are discharged or are proposed to be discharged to the public sewers which waters contain the substances or possess the characteristics enumerated in Sec. 8.4, the Chair may:

- a. Reject the wastes;
- b. Require pretreatment to an acceptable condition for discharge to the public sewers;
- c. Require control over the quantities and rates of discharge; and/or
- d. Require payment to cover the added costs of handling and treating the wastes not covered by sewer charges.

When considering the above alternatives, the Chair shall give consideration to the economic impact of each alternative on the discharger. If the Chair permits

pretreatment or equalization of waste flows, the design and installation of the plants and equipment shall be subject to the review and approval of the Chair.

- 8.6. Grease, oil; and sand interceptors shall be provided when, in the opinion of the Chair, they are necessary for the proper handling of liquid wastes containing floatable grease in excessive amounts or any flammable wastes, sand, or other harmful ingredients; except that such interceptors shall not be required for private living quarters or dwelling units. All interceptors shall be of a type and capacity approved by the Chair, and shall be located as to be readily and easily accessible for cleaning and inspection. In the maintaining of these interceptors the owner(s) shall be responsible for the proper removal and disposal by appropriate means of the captured material and shall maintain records of the dates, and means of disposal which are subject to review by the Chair. Any removal and hauling of the collected materials not performed by owner(s)' personnel must be performed by currently licensed waste disposal firms.
- 8.7. Where pretreatment or flow-equalizing facilities are provided or required for any waters or wastes, they shall be maintained continuously in satisfactory and effective operation by the owner(s) at his/her expense.
- 8.8. When required by the Chair, the owner(s) of any property serviced by a building sewer carrying industrial wastes shall install a suitable structure together with such necessary meters and other appurtenances in the building sewer to facilitate observation, sampling, and measurement of the wastes. Such structure, when required, shall be accessible and safely located and shall be constructed in accordance with plans approved by the Chair. The structure shall be installed by the owner at his/her expense and shall be maintained by him/her so as to be safe and accessible at all times.
- 8.9. The Chair may require an applicant or holder of a class 6.3.b or 6.3.c permit to provide information needed to determine compliance with this ordinance. These requirements may include:
 - a. Wastewaters discharge average, peak rate, and volume over a specified time period;
 - b. Chemical and biological analysis of wastewaters sampled at specified times, locations, durations, and frequencies;
 - c. Information on raw materials, processes, and products affecting wastewater volume and quality;
 - d. Quantity and disposition on specific liquid, sludge, oil, solvent, or other materials important to sewer use control;

- e. A plot plan of sewers on the user's property showing sewer and pretreatment facility location;
- f. Details of wastewater pretreatment facilities; and/or
- g. Details of system to prevent and control the losses of materials through spills to the public sewer.

8.10. All measurements, tests, and analysis of the characteristics of water and wastes to which reference is made above shall be determined in accordance with the latest edition of "Standard Methods for the Examination of Water and Sewage". Sampling methods, location, times, and durations and frequencies are to be determined on an individual basis, subject to approval by the Chair.

8.11. No statement contained in Section 8 of this ordinance shall be construed as preventing any special agreement or arrangement between the District and any industrial concern whereby an industrial waste of unusual strength or character may be accepted by the District for treatment, subject to payment therefore by the industrial concern.

SECTION 9. PROHIBITIONS

9.1. No person shall maliciously, willfully, or negligently break, damage, destroy, uncover, deface, or tamper with any structure, appurtenance or equipment which is part of the wastewater facilities or drive a motor vehicle over any septic tank not rated for traffic loading.

9.2. No person shall excavate within any area subject to a recorded easement granting the District access and installation rights for wastewater facilities without first obtaining a permit to do so from the Chair.

9.3. No person shall place any structure whatsoever over any facilities without first obtaining a permit to do so from the Chair.

SECTION 10. POWERS & AUTHORITY OF INSPECTORS

10.1. The Chair or other duly authorized employees or agents of the District, bearing proper credentials and identification, shall be permitted to enter all private properties through which the District holds a duly negotiated easement for the purposes of inspection, observation, measurement, sampling, repair, and maintenance of any portion of the wastewater facilities lying within said easement. All entry and subsequent work, if any, on said easement, shall be done in full accordance with the terms of the duly negotiated easement pertaining to the private property involved.

SECTION 11. APPEALS PROCEDURE

- 11.1 Any person aggrieved by a ruling under or interpretation of the provisions of this ordinance may submit a written appeal to the Chair. The appeal shall set forth the events and circumstances leading to the appeal, the nature of the ruling or interpretation from which relief is sought, the nature of the impact of the ruling on appellant's property or business, together with any reasons for the appeal.
- 11.2. The Chair shall submit such appeal together with his/her recommendations to the Board which shall forthwith appoint a committee of three (3) Board members to study the matter, hear testimony if necessary, and prepare a written decision based upon its finding which shall be sent to the appellant and to the full Board within thirty (30) days.
- 11.3. In the event that the appellant considers that his/her grievance has not been handled to his/her satisfaction by the Committee, he/she may apply to the Board for an independent review of his/her case by the Board within thirty (30) days from the date of the written decision of the Committee. The Committee shall forward to the Board its entire file on the case for review of the case. The Board shall, in no more than thirty (30) days from receipt of the application, prepare a written decision on the matter which shall be sent to the applicant and to the Committee.
- 11.4. Decisions of the Board shall be reviewable by the Circuit Court, the State of Oregon for Deschutes County solely and exclusively under the provisions of ORS 34.010 to 34.100.

SECTION 12. PENALTIES

- 12.1. If any person shall construct a public sewer in violation of this ordinance, the Chair may issue an order to such person to stop work in progress which is not then in compliance with this ordinance, or the Chair may issue an order to correct work which has been performed. Such person shall forthwith take such action as may be necessary to comply with such order and with this ordinance, all at the expense of such person.
- 12.2. The Chair may order the owner(s) of any property from which prohibited discharges are entering any sewer to correct such condition. The Chair shall first give written notice of such prohibited discharge to the person. If such person fails to correct such condition within ten (10) days after receipt of such notice, the Chair may enter upon such property and remove or close sewer connections as hereinafter provided.

Any person discharging any material deemed to be dangerous, injurious to treatment processes, hazardous to any person, structure or treatment unit may be subject to immediate discontinuance of sewer service without prior notice at the discretion of the Chair. The Chair shall have the right to enter upon the person's property to remove or close sewer connections as hereinafter provided.

12.3. Any person found to be violating any provision of this ordinance shall be served by the District with written notice stating the nature of the violation and providing a reasonable time limit for the satisfactory correction thereof. The offender shall, within the period of time stated in such notice, permanently cease all violations.

Any person who shall continue any violation beyond the time limit provided for in Sec. 12.2, or the time limit provided in written notice required by this Section, shall be guilty of an infraction, and on conviction thereof, shall be fined in an amount not exceeding one hundred dollars (\$100.00) for each violation. Each day in which any violation shall continue shall be deemed a separate offense.

Any person violating any of these provisions of this ordinance shall be liable to the District for any expense, loss or damage occasioned by the District by reason of such violation.

The District reserves the right to injunctive relief against violation of any of the provisions of this ordinance.

12.4. Conformance with this ordinance shall in no way be a substitute for or eliminate the necessity of conforming with any and all state and county laws, ordinances and rules and regulations which are now or may in the future be in effect relating to the public health.

SECTION 13. REPEAL CLAUSE

13.1. Ordinance Nos. 1, 87-3, 88-1, 88-4, 88-7, 89-2, and other ordinances or parts thereof duplicating and/or inconsistent with this ordinance are hereby repealed.

SECTION 14. EMERGENCY

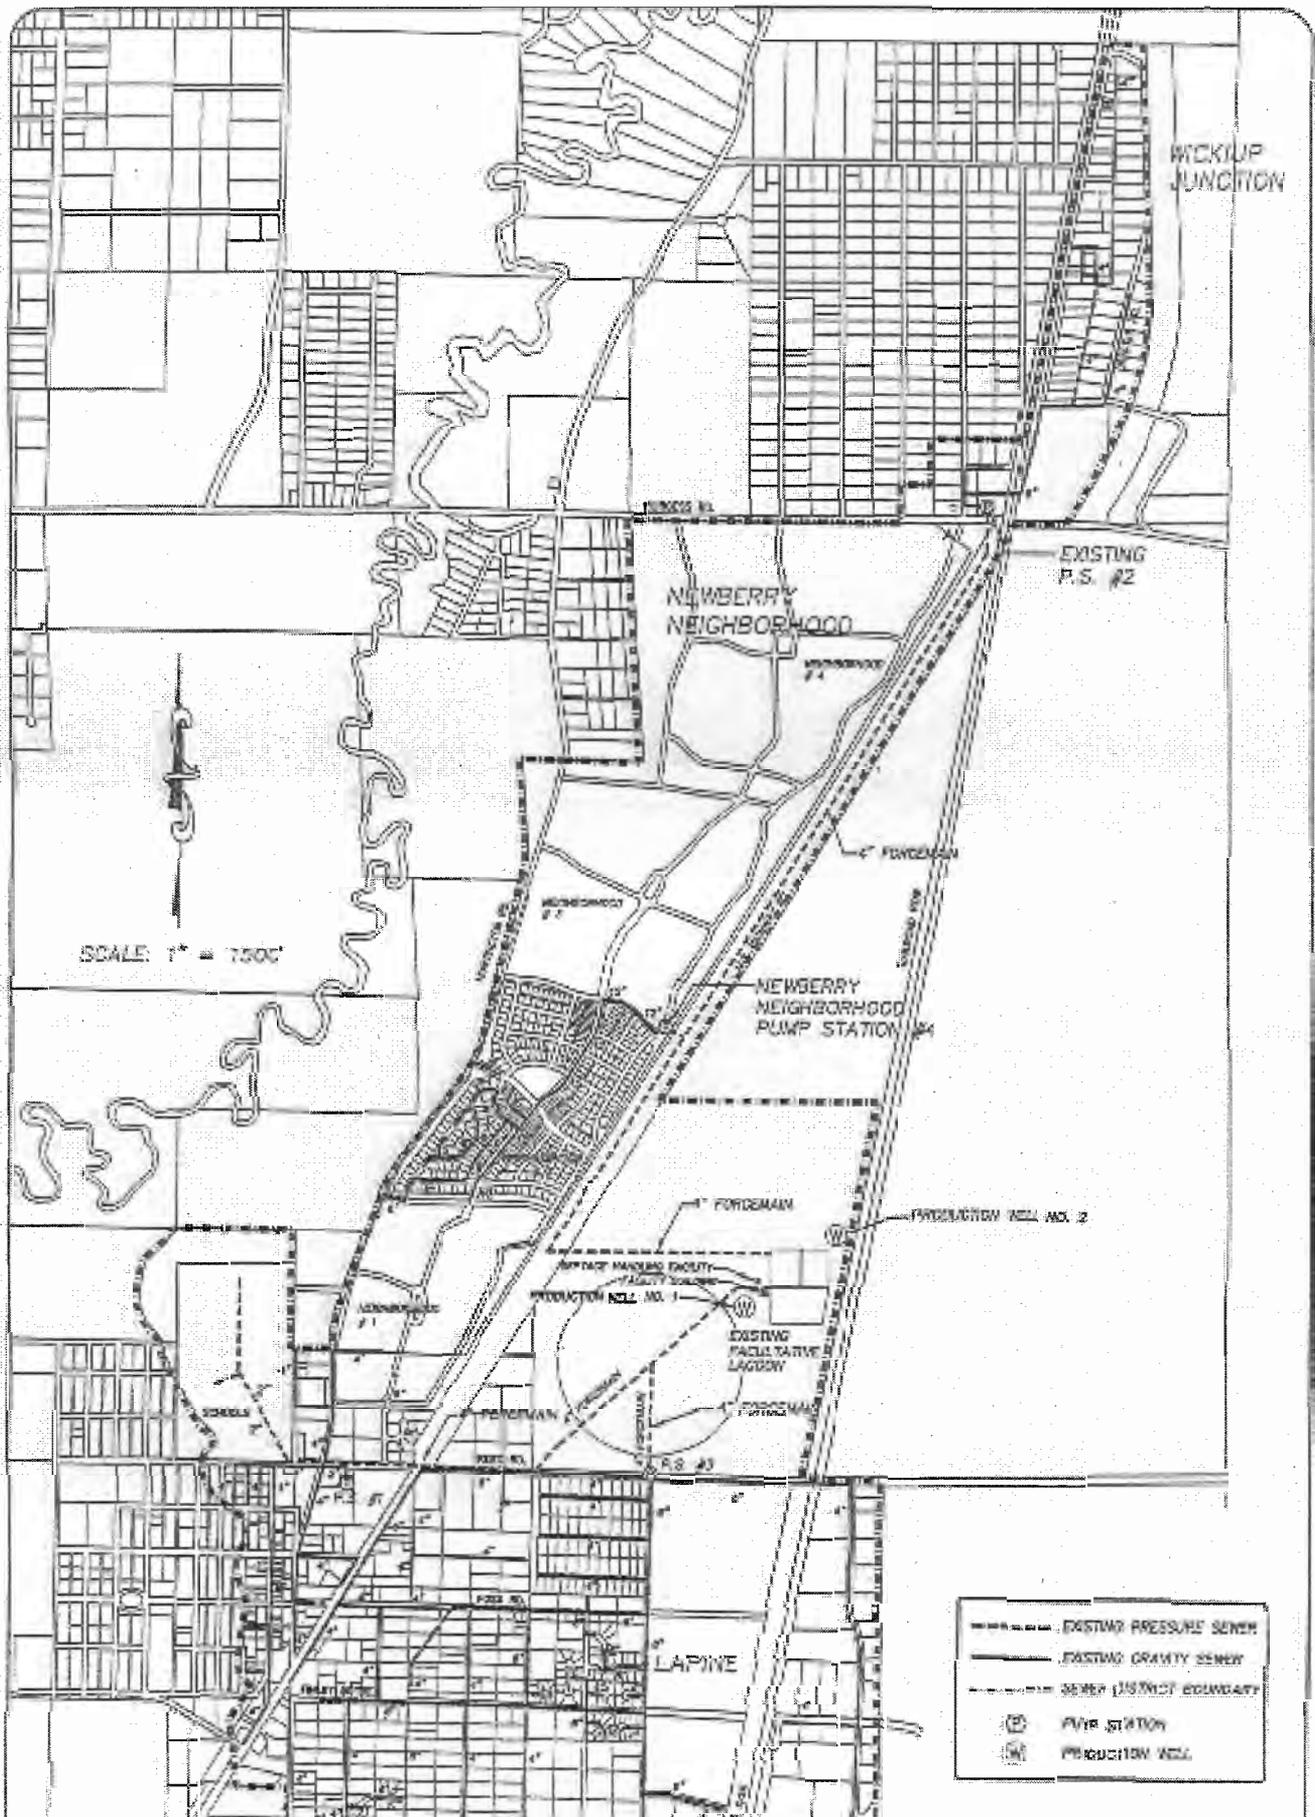

14.1. This Ordinance being deemed necessary by the Board of the LaPine Special Sewer District for the immediate preservation and protection of the public peace, health, safety, and general welfare of the LaPine Special Sewer District, Deschutes County, an emergency is hereby declared to exist and this Ordinance shall be in full force and effect upon its passage.

PASSED AND ADOPTED by a 2 vote for and a 0 vote against by the LaPine Special Sewer District Board of Directors, this 13th day of December 2001.

A SYSTEMS DEVELOPMENT CHARGE TO IMPROVE AND
EXPAND THE LAPINE DOMESTIC WATER SYSTEM.**

WHEREAS, the LaPine Water District has completed a preliminary feasibility study for planning and design of a community water system, entitled "LaPine Domestic Water System Master Plan"; and

WHEREAS, the District's existing Water System does not have available capacity to address growth and increased water needs within the District; and

WHEREAS, District Engineers HGE, Inc., Architects, Engineers, Surveyors & Planners (HGE, Inc.) has developed a Water System Master Plan and a Water System Methodology Summary, attached respectively as Exhibits 1 and 2 and incorporated herein; and

WHEREAS, the District has adopted Ordinance No. 2001-2, an ordinance authorizing the establishment and provisions governing the development and use for system development charges for water; and

WHEREAS, the District must adopt a methodology in order to impose an improvement fee pursuant to its ordinance.

NOW, THEREFORE, be it resolved by the District Board of the LaPine Water District, as follows:

Section 1. Systems Development Charge (SDC). The Water System Master Plan identifies \$663,185 of improvements which must be made to the District's Water System in order to meet anticipated growth demands.

Gross projections within the Water System Master Plan, based upon a 3% growth rate, estimate a residential population of 3,431 needing to be served by the District by the year 2021. For purposes of estimating growth for an expanding service area and various classes of customers, the District has calculated this growth projection in terms of equivalent dwelling units (EDUs). An EDU is defined as the quantity of water utilized by an average residential dwelling unit. HGE, Inc. has calculated that the anticipated growth will create a need for 628 additional EDUs within the District by the year 2021.

Section 2. Establishment of the Water System Improvement Fee.

Formula for Systems Development Charge per EDU:

**Planned Capacity Increasing Project Costs
÷ Projected Growth Expressed in EDUs
= Charge + Service-Related Costs = SDC per EDU**

$\$663,185 \div 628 \text{ EDUs} = \$1,055 + \$350 = \$1,405 \text{ per EDU}$

Section 3. Collection of Charge. The Water Systems Development Charge as calculated above is payable upon issuance of a permit to connect to the water system or at the time the usage of the improvement is increased; or as otherwise allowed under Ordinance ____.

ADOPTED this __ day of _____, 2000, by action of the Board of Commissioners.

2007 Water Quality Report

Is my water safe?

Last year, as in years past, your tap water met all U.S. Environmental Protection Agency (EPA) and state drinking water health standards. La Pine Water vigilantly safeguards its water supplies and once again we are proud to report that our system has not violated a maximum contaminant level or any other water quality standard.

Do I need to take special precautions?

Some people may be more vulnerable to contaminants in drinking water than the general population. Immuno-compromised persons such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune system disorders, some elderly, and infants can be particularly at risk from infections. These people should seek advice about drinking water from their health care providers. EPA/Centers for Disease Control (CDC) guidelines on appropriate means to lessen the risk of infection by *Cryptosporidium* and other microbial contaminants are available from the Safe Water Drinking Hotline (800-426-4791).

Where does my water come from?

Your water comes from 2 source wells on Finley Butte. We do not treat the water in any way.

Source water assessment and its availability

We will be working this summer on completing the source water assessment.

Why are there contaminants in my drinking water?

Drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that water poses a health risk. More information about contaminants and potential health effects can be obtained by calling the Environmental Protection Agency's (EPA) Safe Drinking Water Hotline (800-426-4791). The sources of drinking water (both tap water and bottled water) include rivers, lakes, streams, ponds, reservoirs, springs, and wells. As water travels over the surface of the land or through the ground, it dissolves naturally occurring minerals and, in some cases, radioactive material, and can pick up substances resulting from the presence of animals or from human activity: microbial contaminants, such as viruses and bacteria, that may come from sewage treatment plants, septic systems, agricultural livestock operations, and wildlife; inorganic contaminants, such as salts and metals, which can be naturally occurring or result from urban stormwater runoff, industrial, or domestic wastewater discharges, oil and gas production, mining, or farming; pesticides and herbicides, which may come from a variety of sources such as agriculture, urban stormwater runoff, and residential uses; organic Chemical Contaminants, including synthetic and volatile organic chemicals, which are by-products of industrial processes and petroleum production, and can also come from gas stations, urban stormwater runoff, and septic systems; and radioactive contaminants, which can be naturally occurring or be the result of oil and gas production and mining activities. In order to ensure that tap water is safe to drink, EPA prescribes regulations that limit the amount of certain contaminants in water provided by public water systems. Food and Drug Administration (FDA) regulations establish limits for contaminants in bottled water which must provide the same protection for public health.

How can I get involved?

We invite our customers to attend our monthly meetings to provide input and ideas. Our regular monthly meetings are held on the second Tuesday of each month at our office at 51490 Hinkle Way at 1:00 pm. Please contact us by the Friday before a meeting if you wish to be on the agenda.

Conservation Tips

Did you know that the average U.S. household uses approximately 350 gallons of water per day? Luckily, there are many low-cost or no-cost ways to conserve water. Water your lawn at the least sunny times of the day. Fix toilet and faucet leaks. Take short showers - a 5 minute shower uses 4 to 5 gallons of water compared to up to 50 gallons for a bath. Turn the faucet off while brushing your teeth and shaving; 3-5 gallons go down the drain per minute. Teach your kids about water conservation to ensure a future generation that uses water wisely. Make it a family effort to reduce next month's water bill!

Water Quality Data Table

The table below lists all of the drinking water contaminants that we detected during the calendar year of this report. The presence of contaminants in the water does not necessarily indicate that the water poses a health risk. Unless otherwise noted, the data presented in this table is from testing done in the calendar year of the report. The EPA or the State requires us to monitor for certain contaminants less than once per year because the concentrations of these contaminants do not change frequently.

<u>Contaminants</u>	<u>MCLG or MRDL</u>	<u>MCL, TT, or MRDL</u>	<u>Your Water</u>	<u>Range Low High</u>	<u>Sample Date</u>	<u>Violation</u>	<u>Typical Source</u>
Inorganic Contaminants							
Nitrate [measured as Nitrogen] (ppm)	10	10	0	NA	2007	No	Runoff from fertilizer use; Leaching from septic tanks, sewage; Erosion of natural deposits

Unit Descriptions	
<u>Term</u>	<u>Definition</u>
ppm	ppm: parts per million, or milligrams per liter (mg/L)
NA	NA: not applicable
ND	ND: Not detected
NR	NR: Monitoring not required, but recommended.

Important Drinking Water Definitions	
<u>Term</u>	<u>Definition</u>
MCLG	MCLG: Maximum Contaminant Level Goal: The level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs allow for a margin of safety.
MCL	MCL: Maximum Contaminant Level: The highest level of a contaminant that is allowed in drinking water. MCLs are set as close to the MCLGs as feasible using the best available treatment technology.
TT	TT: Treatment Technique: A required process intended to reduce the level of a contaminant in drinking water.
AL	AL: Action Level: The concentration of a contaminant which, if exceeded, triggers treatment or other requirements which a water system must follow.
Variances and Exemptions	Variances and Exemptions: State or EPA permission not to meet an MCL or a treatment technique under certain conditions.
MRDLG	MRDLG: Maximum residual disinfection level goal. The level of a drinking water disinfectant below which there is no known or expected risk to health. MRDLGs do not reflect the benefits of the use of disinfectants to control microbial contaminants.
MRDL	MRDL: Maximum residual disinfectant level. The highest level of a disinfectant allowed in drinking water. There is convincing evidence that addition of a disinfectant is necessary for control of microbial contaminants.
MNR	MNR: Monitored Not Regulated
MPL	MPL: State Assigned Maximum Permissible Level

ORDINANCE NO. 2003-1
LA PINE WATER DISTRICT
RULES & REGULATIONS

PREFACE

The La Pine Water District is a municipal corporation duly incorporated for the purpose of supplying the inhabitants with water for domestic purposes, and such other purposes as by law authorized. It is located within Deschutes County, State of Oregon.

The District is governed by a Board of five Commissioners. The power and authority given to the District is vested and shall be exercised by the Board. The Board is to manage, control and direct the operation of the District. The Board holds regular monthly meetings, which are open to the residents of the District. The Board may employ a Manager/Operator and such other employees as are required to carry on the operation of the utility. Work carried on by the District's personnel includes installing, repairing and maintaining mains, services and meters; supervision over the operation and maintenance of storage facilities, pumping stations, and other facilities and appurtenance; reading meters, preparing and mailing bills, making collections; and approving plans and construction for water facilities planned for construction by developers, that ultimately will become part of the District water system.

The water system is owned by the District, a municipal corporation. Major improvements in system facilities such as supply lines, reservoirs and feeder mains are normally undertaken by the issuance of bonds and may need to be authorized by the voters. The system is not operated for a profit; its function is that of rendering service at cost. Generally, improvements that benefit new development will be financed by the development, and not by water users of the District.

Under State Laws, the District may issue general obligation bonds financed by tax levy up to ten percent (10%) of the real market value of property within the District. Revenue bonds retired by monies collected from the sale of water may be issued without legal limit; the practical limitation being the ability to sell the securities.

1. DEFINITIONS

“District” shall mean the La Pine Water District, Deschutes County Oregon.

“Board” shall mean the Board of Commissioners of the La Pine Water District.

“Person” shall mean and include any natural person, firm, co-partnership, association or corporation.

“Applicant or Customer” shall mean any “person” granted water service after due application to the District, under the terms of these regulations.

“Manager/Operator” shall mean the manager of the La Pine Water District employed by the Board.

“System” shall mean all or any part of the water system owned and operated by the District, and shall include all service lines to and including all meters.

“EDU” shall mean equivalent dwelling unit.

“SDC” shall mean system development charges.

“Service Line” or “Service Connection” shall mean the pipe, valves, stops, and fittings from a main to and including the meter and meter box.

“Customer Line” shall mean the pipe, valves, and fittings leading from the water meter into the premises served.

“Main” or “Water Main” shall mean the pipe in the street, alley or right of way owned and maintained by the District for the purpose of distributing water to customers and servicing fire hydrants.

2. OWNERSHIP OF SYSTEM

The water system is owned by the District. This District is a municipal corporation organized and operated under Oregon Revised Statutes Chapter 264, and possesses the powers as set forth therein.

3. JURISDICTION AND OPERATION

The entire system, including all mains, service lines, meters, reservoirs, pumping stations, wells and all facilities and appurtenances shall be operated only by regularly employed or authorized personnel of the District.

No person shall connect to any main or service of the system or interfere with the operation of any of the facilities whatsoever, or turn on any meter or service, or operate any valves or fire hydrant; provided however, that members of regularly constituted fire departments shall be permitted to connect to and use fire hydrants for the express purpose of fighting fires, testing and use consistent therewith.

4. RESPONSIBILITY AND LIABILITY OF THE DISTRICT

The District shall maintain and repair its mains, service pipes, meters, structures, facilities and all appurtenances so as to keep them in repair and operative conditions at all times so far as practical and reasonable. The District will exercise reasonable diligence and care to deliver a continuous and sufficient supply of water to customers at pressures in compliance with Oregon Health Division regulations, and to avoid so far as reasonably possible any shortage or interruption in delivery.

5. USE OF WATER

The District shall furnish water for ordinary domestic, business and community use and for such sprinkling, irrigation, industrial, commercial and fire fighting purposes as the system may reasonably supply and as may be approved by the Board.

6. QUALITY OF WATER

The District will exercise reasonable diligence to supply safe and potable water at all times.

7. FURNISHING WATER

The District shall not be obligated to furnish and install at its expense system facilities for all property within the District. The District shall so far as reasonable and practical and within its financial means, however, provide adequate source of supply, necessary primary feeder mains, storage facilities and other improvements necessary to make water service generally available for all areas within the District. Extensions to furnish water to areas at present, not now obtaining water from the system shall, at the expense of those persons requesting service, be made by the District or by those expressly authorized to do so. See Section 29 WATER MAIN EXTENSIONS.

Structures and uses established and existing on or before the effective date of this ordinance that are to be connected to the water system under the initial plan, loan and grant, are exempt from SDCs to the extent that the structure or use then existing continues and to the extent of the parcel of land as it is constituted on that date. Structures and uses affected by this section shall pay SDCs, pursuant to the terms of this ordinance when there is an alteration in the number of parcels to be served, there is an addition to a structure or a change in use of a structure that requires an increase in the use of the water system.

8. MANDATORY CONNECTION

When public water becomes available for connection to property utilizing a private water system, such property shall be connected to the public water system within sixty (60) days after the date of official notice from the District to connect, except where and when time extensions are granted by the Board. Time extensions may be granted on a case-by-case basis at the Board's discretion, after considering the following criteria:

- a. size, location and elevation of the property
- b. condition of the private water system
- c. length of the extension under consideration, and
- d. such other criteria as the Board may deem appropriate upon consultation with the District's engineer or manager/operator water master.

A customer may continue to use their private well for outside domestic watering purposes including irrigation, watering of lawns and gardens and providing water to livestock (except in instances where livestock are used for commercial and/or industrial purposes).

Customer's shall not drill any wells within District boundaries without written permission of the Board or it's agent.

9. SERVICE INSTALLATION CHARGES/SDCs

Customers desiring to connect to the water system after the effective date of this ordinance shall be required to pay service installation charges for complete installation of service pipe and meter from the main to the property line and SDCs. These charges shall be as set forth in a Resolution adopted by the Board.

Payment for service connections for new service where no service previously existed, or for a change in meter size or location, shall be submitted with the application.

10. WATER SERVICE AND METERS

Application for new water service installation shall be made in writing by the owner of the premises to be served, or the owner's agent duly authorized in writing, on regular application forms furnished by the District. No service will be rendered until such application has been completed and the required payments made. All applications shall include signature of applicant, location of premises for which service is requested, address to which all bills shall be sent, and such additional data as the District from time to time may require.

Application for new water service shall be considered merely as a request for service, and shall not bind the District or Board to provide service.

Arrangements to pay all charges made for the installation of water services shall be made in advance of installation by the District.

Water service shall be provided only from pipes or mains located within streets, alleys or rights of way controlled by the district, and to property or premises abutting such mains. So called "Spider Connections" which would provide service from one street or road to property or premises abutting another street or road shall not be permitted, and request for such service shall be disapproved.

The owner of property served shall be responsible for the payment of all bills and charges made for water service installations and service, whether for his/her use or the use of other persons or customers whether they be occupants, renters, or holders of leases of the property to be served, or otherwise. Costs should include costs for review of plans submitted by the owner or property desiring service, and should include the cost of review by District personnel and the District's engineer.

Each dwelling or building shall be provided with its own water service connection and meter. Other options may be available to mobile home parks and malls, per District approval. No person shall furnish water to either buildings or premises without the written approval of the District, and then only under the specific terms of any such authorization which might be granted.

Meters shall be set at property lines, and the service pipe from the main to the meter, as well as the meter and meter box shall be the property of the District and not the person owning the premises or paying for the installation.

Meters shall be installed in such a manner as to allow District personnel access. Meters shall not be installed behind fences or any other enclosure as to render them inaccessible by District personnel, without written permission of the District or its agent.

Unless otherwise requested or required, approved and paid for service connections shall be _ inch and meters shall be first quality 5/8 inch x _ inch meters, to be installed by the District at the cost of the customer as set forth in a Resolution adopted by the Board, together with such corporation stop, fittings, connections, yoke or setter, meter box, shut-off cocks, etc., as the District shall require.

Services larger than _ inch may be installed provided the system is able to adequately service such larger connections without interfering with the water service of others. The charges made for the installation of larger services shall be sufficient to cover all costs thereof, and the basic or facility charge may be higher than for standard 5/8 x _ inch meters.

The size of customer piping for services which are more than 100' from the meter shall be no less than 1".

Minimum meter size shall be determined by the District and be based on expected flows, distance and user needs.

Persons requesting large service connections for fire protection (sprinkler systems) may be required by the Board to pay for an equitable portion of the cost of feeder mains needed to supply the required flow. Each such case shall be considered separately on its merits and the circumstances applying to the case. The Board may also develop fire rates for service of this type in which fire line rates or charges are established that are sufficient to cover the cost of the service rendered and shall be as set forth in a Resolution adopted by the Board.

Service to persons residing outside the limits of the District shall be made only if the District has sufficient surplus water, over and above its requirements within the District, and in compliance with the Oregon Department of Land Conservation and Development (DLCD) regulations. Such service, if provided, may be discontinued at any time if the interest and the needs of the District so require. The rate schedule for outside service shall in no instance be less than 1.5 times the rates charged for residents within the District, and charges may be in such additional amount as the Board may from time to time determine.

11. CLASSES OF SERVICE

The classes of service shall be Residential, Commercial, Industrial, Standby Fire, Contract Services and Special Contracts, as defined as follows: Any class of service may be Within District Boundaries, or Outside District Boundaries.

- a. Residential Services. Residential services shall consist of all services for Domestic purposes, single-family dwellings and homes.
- b. Commercial Service. Commercial services shall consist of those services where water is used for commercial services, such as businesses, multi-family dwellings, trailer parks, nonprofit, community, medical, municipal and religious organizations. Alternatively, at the District's discretion, organizations may be charged on a store-front basis, one charge for each separate entity in a building. Each separate organization could be charged even though there may not be facilities in the user's portion of the building, as each user's use and occupancy adds to the load and demand on the overall system. The District may charge the owner or user where the

common facilities are located for each tenancy in lieu of charging each tenant individually.

- c. Industrial Service. Industrial Service shall consist of those services, including, but not limited to, industrial and manufacturing purposes.
- d. Standby Fire. Standby fire services shall consist of those services where water is available or used for fire protection only. This type of service will only be installed where adequate provisions are made to prevent the use of water from such services for purposes other than fire fighting. Sealed fire sprinkler systems with water-operated alarms shall be considered as having such provisions.
- e. Contract Services. Contract services shall consist of providing water to fire districts or other water districts or associations under contracts authorized by the Board.
- f. Construction Water. Water for construction purposes shall be provided only after application for such service. Water shall be metered using a hydrant meter checked out and/or authorized by District personnel. Penalties for unauthorized use may be levied in the event such person or contractor uses District water without permission. Penalties for unauthorized use shall be as set forth in a Resolution as adopted by the Board.
- g. Special Contracts. When the applicant's requirements for water are unusual or large, such as for an independent water system or that may necessitate special or reserve equipment or capacity, the District, by authorization of the Board, reserves the right to make special contracts, the provisions of which are different from and have exceptions to the regularly published water rates, rules and regulations. Terms of any special contract shall be approved by the Board. See Section 21. CONTRACTS.

12. TURNING ON WATER SERVICES AND METERS

No person other than an employee of the District shall turn on or off any of the District's meters or services without District approval. Customers desiring either a continuance of service, a new service or restoration of service shall make arrangements therefore with the District.

13. DEPOSITS

The District may require the applicant to make a cash deposit in order to establish credit as set forth in a Resolution adopted by the Board.

At the time the deposit is given to the District, the applicant will be given a receipt for the same. The deposit is not to be considered as a payment on account. In the event the service is discontinued, the deposit will be applied to the closing bill, and any amount in excess of the closing bill will be refunded. The District will not pay interest on any deposit.

If an account becomes delinquent and it is necessary to turn off the service, the deposit shall be applied to the unpaid balance due. Water service will not be restored to that premises or that customer at different premises until all outstanding bills due the District have been

paid and the cash deposit replaced, together with service charges as provided by a Resolution adopted by the Board.

14. METER READING AND BILLING

Meters shall be read monthly or bi-monthly and bills rendered based upon consumption to the nearest 100 U.S. gallons used, as well as any other charges affixed to the service.

For the purpose of making charges, all meters serving a customer's premises shall be billed separately, and in accordance with the requirements of the District. Separate meters shall be provided for each dwelling or structure, unless otherwise specifically approved by the Board.

In the event that it shall be impossible or impractical to read a meter on the regular reading date, the water consumption shall be pro-rated on the basis of thirty (30) days per month and the total consumption for billing purposes for the period shall be estimated.

Upon determination of actual water consumption for the period estimated, the customer shall be billed for any additional amounts owed the District. In the event the estimated bill was too high, the excess will either be credited to that customer's next bill or refunded directly to the customer, at the District's discretion.

15. PAYMENTS FOR SERVICE

All charges for water service shall be due and payable monthly on the date of billing and become delinquent on the tenth day thereafter. If payment is not received by the next date of billing, a late fee shall be assessed, as adopted by Resolution adopted by the Board, in addition to the regular charges due. If the property is a rental property, a courtesy notification will be sent to the property owner. If not paid within 45 days of the billing date, a shut off notice will be sent to the customer and/or property owner. If payment is not received within 15 days of mailing of the shut off notice the water service shall be disconnected and an additional late fee shall be assessed.

Water service disconnected for lack of payment of bills will be restored when all past due bills are paid plus such other charge(s) therefore as the Board shall determine proper from time to time and as set forth by Resolution then in effect. This requirement shall not be avoided by change in title or user.

All payments shall be made to the District either by mail or at the office of the District, or such other place as the Board may from time to time designate.

16. WATER RATES AND CHARGES

Monthly or bi-monthly water bills shall consist of a basic charge for each meter category and consumptive water rates which shall be as set forth by Resolution adopted by the Board. The price for consumptive units of water shall be the same for all users within the same classification.

Other charges or fees shall be as set forth in the Resolutions as adopted by the Board.

Water cost contributions, which will be based on the current Water Rate Study, will determine a user's water service EDU. EDUs will be re-assessed as the Board determines necessary.

17. ADJUSTMENTS OF WATER BILLS

Unusually high water bills resulting from loss occurring in the customer's plumbing system may be adjusted for a period not to exceed the previous two months upon notification and request by the user, and if the situation is corrected within thirty (30) days after its discovery. The basis of adjustment will be reduction of water bills by applying production of water costs to excess usage over user's normal bill. Any reduction in any bill is solely at the discretion of the Board.

18. TEMPORARY SERVICE

For temporary water service a customer shall pay the established charge for installation for the service connections requested, plus any additional charge which may be required by the District for removal or resetting of the service following the termination of temporary use. The customer shall also pay in advance one month's anticipated or estimated water service charge, and shall continue to do so each month thereafter so long as the temporary service is maintained.

19. DISCONTINUANCE OF SERVICE OR CHANGE OF OCCUPANCY

At any time specified by a customer that he/she expects to vacate premises where water service is provided and that he/she wishes service discontinued, the District shall read the meter and render a bill promptly, and the bill shall be paid at once.

Basic charges for a portion of a month shall be pro-rated upon the actual days of use. Final bills will be comprised of the pro-rated basic charge plus the consumption charges for the actual amount of water used.

If, at the customer's request, a service is shut off, such charge shall be made therefore as the Board shall determine proper from time to time and as set forth in a Resolution adopted by the Board.

20. SERVICE INTERRUPTIONS

The District from time to time must interrupt service for repairing mains, making extensions, repairing valves, pumps and control devices, etc., and for cleaning, maintaining and reconditioning reservoirs and storage tanks. The District shall not be responsible for any damages caused by such interruptions of service or fluctuations in pressure, but shall, whenever feasible to do so, give customers advance notice whenever it is known that service is to be interrupted for any appreciable length of time. Failure to give such notice shall in no manner cause the District to become liable for loss or damage caused by service interruption.

21. CONTRACTS

Whenever the applicant's requirements for water service are unusually large, or subject to great fluctuation or variation in draft, the District may require a special contract for an extended period of time, and the District may require reasonable security satisfactory to the District and sufficient to protect the District against loss and to guarantee performance under the terms of the contract

Resale of water will be permitted only under conditions of a special contract, and will not be applicable to normal water service within the District boundaries.

All rules, regulations, rates and charges are subject to change or modification by the Board except however, special contracts which specify the length of time in which the contract rates shall apply. All such special contracts shall be in writing, signed by the applicant and duly authorized by either the manager or Board. See Section 11. CLASSES OF SERVICE, subsection g.

22. LEAKAGE WITHIN PREMISES

All leakage occurring beyond the meter shall be at the expense of the customer, and the customer shall be responsible for the proper maintenance and repair of customer's lines, stop and waste valves, gate valves, pressure regulators, plumbing fixtures, etc., within customer's premises.

23. WATER DAMAGES OR INJURIES WITHIN PROPERTY

The District shall not be liable for any damage or injury whatsoever for leakage or for the running of water on the premises from pipe lines, plumbing fixtures, open faucets, valves, fixtures and hoses beyond meters set at property lines.

24. MAINTENANCE AND REPAIR OF CUSTOMER'S LINES

Customers shall install, maintain and repair all piping between meters and premises served, and shall install same at a minimum of 30" depth to protect from freezing and traffic. Leakage occurring in customer's lines shall be the responsibility of the customer. See Section 22. LEAKAGE WITHIN PREMISES.

25. CROSS CONNECTION OR PHYSICAL CONNECTIONS WITH OTHER WATER SUPPLIES OR SYSTEMS

In accordance with District rules and regulations, neither cross connections nor physical connections of any kind shall be made to any other water supply, whether private or public. Included in this category are all pipe lines, appurtenances, and facilities of the District system and all pipes, appurtenances, pumps, tanks, storage reservoirs, facilities, equipment, appliances, etc., of other systems whether located within or on public or private property, or the premises of the water user. Backflow prevention devices and other requisites shall be required as determined by the District.

The District's Manager/Operator or other authorized representative shall have the right without being deemed guilty of trespass or unlawful act to check the premises of users for physical connections with other water supplies or other cross connections. Any such connection shall be removed by the customer after notice. If not removed within the time specified, the District may remove or discontinue any connection which it may have for servicing the property.

All plumbing within buildings served by the District shall be so installed and all plumbing fixtures so constructed as to prevent pollution of water supply by back siphonage or cross

connections. Water service to any premises known or found to have such defects and hazards shall be disconnected and not restored until such defects and hazards have been eliminated.

The District program will follow rules as described in:

1. Oregon Administrative Rules, Chapter 333-61-070;
2. AWWA accepted procedure and practice in cross connection control manual, 9th edition;
3. EPA cross connection control manual revised 1989. The District will inform the customer as to the proper approved Oregon State Health Division backflow device required. Approved double check device on the customer's side of the meter is the minimum requirement that each customer will have installed. Approved devices shall also be installed at all locations where a known or potential hazard exists. For those meters with a double check backflow device at the meter, another approved device may be required to high points of hazard when water is used by the public. The public needs are to be protected. All required backflow devices are the complete responsibility of the customer and will be tested annually per OAR 333-61-070 (10). The test report for the devices will be sent to the District per OAR.

Failure to comply with this section shall result in the immediate termination of water service.

26. MAINTENANCE, REPAIR AND TESTING OF METERS

Normal maintenance and repair of meters shall be carried on by the District at its expense. Should a customer wish to have his/her meter tested, the District will make such test, but should the meter so tested be found to be ninety-six to one hundred and two percent (96-102%) accurate, the customer requesting such testing may be required to pay the cost thereof, provided however that should such meter be found to over-register in excess of two percent (2%) testing shall be at the cost of the District.

Charges made for meter testing may be required to be paid in advance, and deposit required for checking same shall be as shown in a Resolution adopted by the Board. The deposit shall be refunded if such meter testing shall be found to register in excess of two percent (2%) of actual usage.

Whenever a meter has been found to over-register more than two percent (2%), an adjustment in a reasonable amount shall be made to the customer for past billings, but in no case shall adjustment exceed a period of six (6) months.

27. PRESSURE REGULATION

In so far as it is reasonably possible, feasible and economical for the District to do so, it will furnish water at desirable service pressures. Locations in which service pressures are higher than desired or needed by users, customers shall install and maintain within their premises any pressure regulators required.

The District shall not be responsible for damages or difficulties experienced by reason of variations to pressure within the system.

28. MAINTENANCE AND REPAIR OF SERVICE LINES

The District shall maintain and repair service piping between mains and meters at its expense. Water users shall be responsible for the maintenance and repair of service piping between meters and premises. Owners and users shall take all reasonable precautions to protect service lines and meter installations from damage of any kind whatsoever.

29. WATER MAIN EXTENSIONS

Water lines shall meet with District and Oregon Health Division approval for all plans, specifications, standards, materials and construction practices.

The District as a whole shall pay for the cost of supply, pumping stations, storage facilities and primary mains for the general distribution of water within the District, but it shall not pay the cost of main extensions to service additional customers, properties, tracts or subdivisions. Such extensions, when requested, shall be paid for and/or be caused to be installed by the person requesting such extensions; and shall be extended to interconnect with existing facilities within the District.

All such extensions shall be constructed by a properly insured and bonded owner or by a licensed, insured and bonded contractor engaged by the owner or District according to a set of plans drawn by a State of Oregon registered engineer and duly approved by the District according to State of Oregon Health Division Rules and Regulations. All materials used shall be approved by the District and be of first quality and become a part of the permanent system of the District.

The District shall determine the size of mains required. Materials will be comparable to existing materials of installed facilities within the District. All costs related to the extension such as, fittings, service pipe, meters, meter boxes, valves, valve boxes, fire hydrants, taps, disinfection, testing and engineering services required shall be included in the cost to the person requesting such extensions. Extensions shall be made in the street to a point to and through the property to be served, or to the far side of any street bordering new developments.

Main lines, will be designed, inspected and certified by a qualified Registered Professional Engineer and constructed to District standards, subject to District's inspection and approval and at the developer's expense, are required:

- a. for structures which are more than 250' to the front of the structure or more than 300' to the rear of the structure, or
- b. when water service to more than 3 structures on a single piece of property is expected, or
- c. when expected or predicted future development necessitates the installation of a water main.

If the District is performing the work or engaging a contractor to perform the main extension, advance payments for extensions may be required of the owner or owners of the property for which service is desired. After receipt of a written request for a main extension, the Manager/Operator or Engineer for the District shall prepare an estimate of cost and furnish the applicant with a copy thereof. The District shall not proceed with the work until

payments or arrangements to pay have been made for the full amount of the proposed work. After completion of the work and tabulation of costs of the installation, any excess monies deposited prior to the work shall be refunded and any deficiency shall forthwith be paid to the District by the owner. Regular inspections by a qualified Engineer's representative will be required for acceptance of facilities by the District, and said Engineer will certify that construction was completed in compliance with plans and specifications for the project. Prior to final acceptance of the project by the District, Engineer shall provide accurate as-builts for District records, and will furnish as-built records in original reproducible form, with two paper copies of each. A digital record shall also be supplied for the District's record purposes.

The facilities after installation shall be the sole property of the District and shall be maintained and operated by the District's personnel exclusively, and all connections for services thereto shall be made in the manner elsewhere set forth in these regulations, and the charges made for service connections and meters shall be as therein set forth.

30. APPLICANT'S PLUMBING

The applicant's plumbing, which shall include the applicant's service line and all plumbing, piping, fixtures and other appurtenances carrying or intended to carry water, sewer or drainage, shall comply with the plumbing code of the State of Oregon.

Applicants shall install a suitable control valve in the customer service line as close to the meter as possible, the operation of which will control the entire water supply to the premises served. In the event a customer's service is discontinued for any reason, a control valve must be installed, if none exists, as provided by this section.

It shall be a violation of these rules and regulations for the applicant to operate, cause or permit unauthorized operation of the meter stop or any appurtenances on the service connection.

31. WATER MAIN AND CONNECTION INSTALLATION

New water mains and connections shall be installed only on duly dedicated public highways, streets, or roads; being not less than forty (40) feet in width, or by attained utility easement, subject to the discretionary right of the Board to acquire property in any lawful manner for the uses and purposes of the District.

32. WATER SHORTAGE PROVISIONS

In the event a water shortage should occur, and it becomes necessary for water to be conserved, or water use restricted, the Board, by resolution, may place such restrictions and promulgate such regulations in connection therewith as may be necessary until the water shortage is over.

33. REVISION AND MODIFICATION OF RULES, REGULATIONS AND CHARGES

The Board may from time to time, as the occasion may demand or require and in the Board's sole discretion, make such modifications, revisions and additions to the rules and regulations as may be deemed necessary and in the interest of the District. Rates and charges for service, installation of meters, service piping, main extensions and any other item may likewise be revised as necessary and required in the interest of the District.

34. ENTERING INTO CONTRACTUAL ARRANGEMENTS

The Board may from time to time enter into lawful contracts.

35. RESPONSIBILITY FOR EQUIPMENT

- a. Responsibility for customer equipment. The District shall not be liable for any loss or damage of any nature whatsoever caused by any defect in the customer's line, plumbing or equipment, nor shall the District be liable for loss or damage due to interruption of service or temporary changes in pressure. The customer shall be responsible for valves on his premises being turned off when the water service is turned on.
- b. Responsibility for District equipment. District equipment on the customer's premises remains the property of the District and may be repaired, replaced or removed by District employees at any time without consent of the customer. No payment will be made to the property owner for the right to install, maintain, replace or remove District equipment on his or her premises. The property owner must keep vicious dogs or other animals secured or confined to avoid interference with the utility operation and maintenance.
- c. Damage to District equipment. The customer shall be liable for any damage to equipment owned by the District which is caused by an act of the customer, his tenants, agents, employees, contractors, licensees or permittees. Damage to equipment shall include, but not be limited to, breaking of seals and locks, tampering with meters, injury to meters, including, but not limited to, damages by hot water or steam, and damaged meter boxes, curb stops, meter stops and other appurtenances.

36. FIRE HYDRANTS

- a. Operation. No person or persons other than those designated and authorized by the District shall open any fire hydrant belonging to the District, attempt to draw water from it or in any manner damage or tamper with it. Any violation of this regulation will be prosecuted according to law. No tool other than special hydrant wrenches shall be used to operate a hydrant valve. In cases where a temporary service has been granted to receive water through a fire hydrant, an auxiliary external valve will be provided to control the flow of water.

- b. Moving a fire hydrant. When a fire hydrant has been installed in the locations specified by the proper authority, the District has fulfilled its obligation. If a property owner or other party desires to change the size, type or location of the hydrant, he shall bear all costs of such changes. Any changes in the location of a fire hydrant must be approved by the District and the Fire Department.

37. SUSPENSION OF RULES

No employee of the District is authorized to suspend or alter any of the policies, rules and regulations cited herein without specific approval or direction of the Board, except in cases of emergency involving loss of life or property or which would place the water system operation in jeopardy.

38. CONSTITUTIONALITY SAVING CLAUSE

If any clause, sentence, paragraph, section or portion of this ordinance for any reason shall be adjudged invalid by a court of competent jurisdiction, such judgment shall not affect, impair or invalidate the remainder of this ordinance, but shall be confined in its operation to the clause, sentence, paragraph, section or portion of this ordinance directly involved in the controversy in which the judgment is rendered.

39. EMERGENCY CLAUSE

It is hereby adjudged and decreed that existing conditions are such that this ordinance is necessary for the immediate preservation of the public peace, health and safety of the La Pine Water District, and an emergency is hereby declared to exist, and this ordinance shall take effect and be in full force and effect from and after its passage.

Signed by me in open session in authentication of its passage
This _____ day of _____, 2007.

President

Attested:

Secretary

Subject: RE: Technical Advisory Committee members

Importance: High

Larry, I reviewed the list of technical advisory committee members and there are still several changes I would make:

1. Combine your short list of TAC with larger comp plan contact list
2. Then remove 4 media contacts (near bottom of page of larger list)
3. Add the following:
 - a. Charlie Beck, La Pine School District
 - b. Chris Riggs, La Pine Community Action Team/ La Pine Community Kitchen
 - c. Jayne Benner, Chamber of Commerce Econ. Development Committee
 - d. Kathy Canalas, Director of Central Oregon Council on Aging (COCOA)/ Program Coordinator for Senior Center
 - e. Clark Jackson, OECD
 - f. Debbie Price, OHCS
 - g. Roger Olsen and/or Tom Blust, Deschutes County Road Department
 - h. Swede Barber, ODOT Region 10 Maintenance Supervisor (La Pine office)
 - i. Dee Martin, former Deschutes County Road Maintenance supervisor (local resident)
 - j. Janet Brown or other rep from Economic Revitalization Team (ERT)
 - k. Rep from Oregon Employment Department
 - l. Rep from Deschutes County Sheriff Department
 - m. Andy High, COBA
 - n. Rob Roy, Pacific Crest Affordable Housing, LLC
 - o. Mark Radabaugh, DLCD
4. Please invite all to Kick-off with the provision that we will sort out duplicate representation, appropriate contacts, or those not interested in participating prior to the first TAC meeting

Please let me know if you need phone numbers or e-mail addresses and I can help find them. Christine

Subject: Technical Advisory Committee members

Christine,

Hope your having a good couple of days off. This email is for when you get back.

Please let me know if the City wants to have anyone on the Technical Advisory Committee beyond those listed in the RFP, which are the following:

1. Bend-La Pine School District: John Rexford, Deputy Superintendent
2. COIC: TBD
3. Deschutes County Planning Dept: Peter Russell, Sr. Transportation Planner
4. Deschutes County Road Dept: TBD

5. Economic Development for Central Oregon: Eric Strobel, Economic Development Mgr
6. Housing Works: TBD
7. La Pine Chamber: TBD
8. La Pine Sewer District (please let me know who you recommend)
9. La Pine Water District (please let me know who you recommend)
10. La Pine Industrial Group: Lee Smith, General Mgr.
11. La Pine Rural Fire Protection District: Jim Gustafson, Fire Chief
12. La Pine Park and recreation District: Tony DeBone, Chairman of the Board
13. Newberry Habitat for Humanity: Randy Heise, Executive Director

I am preparing a letter for the city to send out requesting that these persons agree to serve on the TAC for the project and inviting them to the Kick-Off meeting next Wednesday. I will get that to you ASAP.

Larry,

I spoke with Jan Swander, Workforce Analyst for the Oregon Employment Department, and she is interested in participating in the comprehensive plan project, either on the technical committee and/or by providing technical assistance. I told her that you would be following up to provide more information on the technical committee process and role. Here is Jan's contact info:

Subject: Re: La Pine Comprehensive Plan Technical Adv...

Christine,

Thank you for your invitation to participate on the La Pine Comprehensive Plan Technical Advisory Committee. I will be the school district's official representative, and I would appreciate if Charlie Beck, our Chief Academic Officer for South County and Paul Eggleston, our Director of Facilities could be included on your project e-mail list. Their contact information is included by cc above.

Unfortunately, I have a calendar conflict with the meeting scheduled for this Wednesday night. Please feel free to send me any handouts or other materials distributed at the meeting. If the information is bulky, it can be dropped off at the South County Education Center at La Pine High, and someone will forward it to me through our internal distribution system.

Congratulations on starting this important project! We look forward to working as an active partner with the City of La Pine.

Regards,
-jr

John M. Rexford
Deputy Superintendent
Bend- La Pine Schools
520 NW Wall
Bend, OR 97701

* GAFO (General merchandise, Apparel, Furniture and Other) represents sales at stores that sell merchandise normally sold in department stores. This category is not included in Total Retail Sales Including Eating and Drinking Places.

Claritas' RMP data is derived from two major sources of information. The demand data is derived from the Consumer Expenditure Survey (CE Survey), which is fielded by the U.S. Bureau of Labor Statistics (BLS). The supply data is derived from the Census of Retail Trade (CRT), which is made available by the U.S. Census.

The difference between demand and supply represents the opportunity gap or surplus available for each retail outlet in the specified reporting geography. When the demand is greater than (less than) the supply, there is an opportunity gap (surplus) for that retail outlet. For example, a positive value signifies an opportunity gap, while a negative value signifies a surplus.

* GAFO (General merchandise, Apparel, Furniture and Other) represents sales at stores that sell merchandise normally sold in department stores. This category is not included in Total Retail Sales Including Eating and Drinking Places.

Claritas' RMP data is derived from two major sources of information. The demand data is derived from the Consumer Expenditure Survey (CE Survey), which is fielded by the U.S. Bureau of Labor Statistics (BLS). The supply data is derived from the Census of Retail Trade (CRT), which is made available by the U.S. Census.

The difference between demand and supply represents the opportunity gap or surplus available for each retail outlet in the specified reporting geography. When the demand is greater than (less than) the supply, there is an opportunity gap (surplus) for that retail outlet. For example, a positive value signifies an opportunity gap, while a negative value signifies a surplus.

Office Supplies, Stationery, Gift Stores-4532	219,358	0	219,358

* GAFO (General merchandise, Apparel, Furniture and Other) represents sales at stores that sell merchandise normally sold in department stores. This category is not included in Total Retail Sales Including Eating and Drinking Places.

Claritas' RMP data is derived from two major sources of information. The demand data is derived from the Consumer Expenditure Survey (CE Survey), which is fielded by the U.S. Bureau of Labor Statistics (BLS). The supply data is derived from the Census of Retail Trade (CRT), which is made available by the U.S. Census.

The difference between demand and supply represents the opportunity gap or surplus available for each retail outlet in the specified reporting geography. When the demand is greater than (less than) the supply, there is an opportunity gap (surplus) for that retail outlet. For example, a positive value signifies an opportunity gap, while a negative value signifies a surplus.

Quarterly Census Employment and Wages Data Files GIS Metadata, User's Guide & Data Dictionary

November 19, 2008

Metadata Summary

Abstract:

Oregon's Quarterly Census Employment and Wages (QCEW) geo-coded coverage with attributes for 2007.

Purpose:

This data are intended for government researchers and policy makers. This data is Confidential and under ORS 657.665. It contains information about employers (wages, number of employees, tax information, ownership and industry types).

Supplemental Information:

Data base is prepared by Oregon Employment Department for US BLS reporting.

Range of Dates/Times: Monthly, Quarterly

Beginning Date: 01/2007

Ending Date: 12/2007

Use Constraints:

This data not intended for surveying purposes and is confidential. Point maps can not be prepared of this data. Data summaries and statistics must include a minimum of 3 units and no single unit can account for more than 80%. This location data was compiled from numerous sources and the quality may be variable. Attributes are incorporated into the database documenting the data sources and the quality. The data and information in the database are provided with the understanding that they are not guaranteed to be usable, timely, accurate, or complete. Users are cautioned to consider carefully the provisional nature of these data and information before using them for decisions that concern personal or public safety or the conduct of business that involves substantial monetary or operational consequences. Conclusions drawn from or actions undertaken on the basis of, such data and information are the sole responsibility of the user.

Neither the State of Oregon nor any agency thereof, nor any of their employees, contractors, or subcontractors, make any warranty, express or implied, nor assume any legal liability or responsibility for the accuracy, completeness, or usefulness of any data, software, information, apparatus, product, or process disclosed, nor represent that its use would not infringe on privately owned rights.

Trade, firm, or product names and other references products and services are provided for information only and do not constitute endorsement or warranty, express or implied, by the State of Oregon, as to their suitability, content, usefulness, functioning, completeness, or accuracy.

*Additional information available in FGDC compliant
metadata distributed with GIS data*

Quarterly Census Employment and Wages

GIS Data User's Guide

Background

The Oregon Employment Department (OED) collects quarterly covered employment and payroll information (Quarterly Census of Employment and Wages [QCEW]). This program, commonly called the QCEW, is based on tax reports submitted quarterly by employers subject to Unemployment Insurance (UI) law and by the program of Unemployment Compensation for Federal Employees (UCFE). Employment is reported by firms for each month using the payroll period that includes the 12th day of each month. Wages are reported for the entire quarter. The data is a point-in-time employment count and not a measure of full-time equivalency (FTE). Additional attributes such as ownership (e.g. private, federal, state, etc.), county, and industry classification codes (historically SIC and currently NAICS) are assigned by the Employment Department.

The QCEW database maintains at least one of three possible addresses: 1) the mailing address, 2) the Unemployment Insurance address (from tax files) and 3) a physical address. The physical addresses are the primary addresses used for geo-coding the data. These are annually edited and maintained by the QCEW program staff. If these addresses have not been provided, mailing and/or Unemployment Insurance addresses are used.

Additional information about the QCEW program is available on-line at www.qualityinfo.org. Additional data on the GIS data files is in the Federal Geographic Data Committee (FGDC) compliant metadata distributed with the GIS data files.

Address Verification

Addresses are verified with Piney Bowes' Finalist software currently running on the IBM 3090 mainframe using a set of Job Control Language (JCL), with calls to Finalist and EZtrieve formatting programs. Finalist is a address verification and quality assurance software system that is fully Coding Accuracy Support System (CASS) certified application by the U.S. Postal Service. Finalists primary objectives are to:

- Verify, standardize and correct addresses
- Add postal carrier information (route, and Zip+4)

Information can be tallied from Finalist that include modifying/correcting zip codes, city names, zip+4 extension, street name, street number range, directional prefix/suffix, street name alias, unit numbers, firm name (if available) and/or non-conventional addresses (PO Box, RR/HC, etc). The scrubbed addresses are passed to the GIS geo-coding programs.

Note that this data is CONFIDENTIAL and subjected to Oregon Revised Statutes. The data can only be used for planning and/or research purposes by another Governmental organization. The appropriate administrative and /or legal authority for the agency is accountable for the data and their signature is recorded on Oregon Employment Form 104. The Oregon Revised Statue related to the agency or political subdivision needs to be specifically identified and well as the intended analysis. This is reviewed by the Oregon Employment Department's Research Director for Approval. This data is governed by ORS 657.665 and any persons violating this agreement (Form 104) are subjected to disqualification of employment and future access/releases of the data and other relevant legal actions.

Geo-Coding Methods

Several methods of geo-coding are used in the QCEW geo-locating process. The primary methods involve using taxlot address point matching, street address matching and centroid matching. We use the highest resolution databases initially and if data does not code, it is passed to the next data source, and subsequently to the lowest resolution data. Future GIS data themes that are being developed to feed into the methods. The data is dynamic and not comparable without assess specific components of the data.

The goal of the methodology was to use a hierarchical approach in identify data and methods for creating the highest resolution database. Other primary goals of the methodology were: 1) ease of replication, 2) easily updatable with new data (GIS and Address), 3) batch programming capabilities. Initially physical addresses are edited and modified by the QCEW program staff. The second step is to geo-code using street centerline address matching. The third step is to geo-code using a centroid mapping method. At each step, data is/can be reviewed to update the physical address. However in many cases, the physical address is not updated but a new database with revised addresses is created. This is because some employers will list their physical address as a description. Examples of this include: at the end of Tower Road, or 5 miles past Blue River Bridge. The employer uses this as their physical address and the QCEW needs to maintain the employer specified address. In many instances numbered address may exist but need to be maintained in a separate data file from the QCEW database.

Street line address matching

Street center line address matching is done in ArcGIS Version 9.x using a customized VBA program. Standard abbreviations are converted in the file for street types, directions, etc. These abbreviations are similar to what Finalist uses for standardization. The scoring processes weights various aspects of the parsed address. These can be adjusted by the analyst to weight various components of the matching methods. A rigid weighting scheme that requires an exact zip code match and moderate to high accuracy in street name/number. The rationale behind this is that initial databases and scores would represent very high match rates for data of known quality.

Data Coverages

Several road centerline and centroid based GIS data file are used in the address matching. Based on a review of point locations (c.f. Benton County road review of TIGER, TeleAtlas, and GDT coverages) and an early assessment of statewide covers the following criteria were determined for data sources:

1. Local Road & Tax lot Coverages (Portland Metro RLIS, Jackson County, Benton County, City of Corvallis, etc)
2. Statewide & National road coverages (TeleAtlas license from Oregon Emergency Management user agreement UA94-008 and Census TIGER 2000 road coverages)
3. Centroid coverages (Zip code based locations and manually digitized data that is match merged to address attributes).

Local Road Coverages

Local road coverages have high resolution accuracy and are maintained by local county, city and regional government. These data files typically have the highest spatial resolution because they are often associated with local planning and/or engineering activities. In addition, the local governments typically update new addresses and road names/address ranges as they are built. In Oregon, there are numerous local road coverages. The Portland Metropolitan regional authority (Metro) has a detailed road centerline file with address ranges that is updated monthly

for Multnomah, Washington and Clackamas counties. This data is updated periodically and OED receives this data and in-turn provides Metro with Geo-coded employer location data for the purpose of transportation planning.

Other counties in Oregon also have detailed road coverages with address ranges that are publicly available. Benton County (and the City of Corvallis) and Jackson County also has detailed road coverages with address ranges. Comparisons of RLIS, Jackson County, and Benton County reveal significant improvement in locations when compared to national and commercial road coverages. Several other counties are also nearing the completion of providing local address ranged centerline file.

Statewide/National Coverages

The Employment Department currently uses multiple statewide road coverages. The first, TIGER, is free from the Census and was recently update in 2000. This file typical only has one feature name with each road. The second is the TeleAtlas Road Data (formerly called ETAK). This coverage is available through and inter-agency agreement with Oregon Emergency Management. This data is provided by a private corporation and has the advantage of containing updated road names in cases where multiple names exist for a road. An example of this is U.S. E. Highway 99 in Portland, which is also known as 99E, Martin Luther King Blvd, Union Ave, or McLoughlin Blvd.

Both the TIGER and TeleAtlas GIS coverages were used for initial geo-coding. Typically the TIGER file had the most problems with street names, since only one feature name is associated with each road. Whereas, the TeleAtlas file did better with street names (since in many locations several names are included) but had more failures on street address ranges. The TeleAtlas file is updated from actual field visits and some of the upper and lower street address ranges were not inclusive of new data. This could be due to new development and/or problems with GIS file updates. The TIGER file uses conceptual ranges that typically begin at 000 and end at 999. While this is more inclusive it can create problems in interpolating along long block or in rural locals. GDT data (from the ESRI Street Map module) is also used for batch geocoding.

Centroid Matching

In some areas the street address matching was completely unsuccessful. This is due to several factors: one set is associated with GIS data files and another set is associated with the address data. GIS issues revolve around insufficient data for creating matches. This is primarily: no street name, no address ranges on the street, street name spelled or labeled differently, etc. Issues with the physical address file are usually no street number, or typographical errors. Since QCEW is edited and reviewed extensively the majority of the non matches are associated with incomplete GIS data. In many of these cases, the physical address has a zip code which is used for the location.

Centroid Data Coverages

Zip code are routes where postal carriers deliver mail. These, by nature are linear feature, but are converting in to areas for mapping and tabulation purposes. The Census developed a coverage called the Zip Code Tabulation Areas (ZCTA) for presenting census zip code data. This can be used for estimating locations. The centroid of the polygon is used for simple mapping of the addressés where only the zip code can used. Several other Zip code coverages are also available include one from NOAA, and several private/commercial products. Overall 50% of the zip code centroids are with 5 miles of the possible location. This data represents a general location and will only be useful in major regional mapping/GIS activities. Some zip codes are unique geographic locations such as large business and some state organizations/agencies. A centroid coverage exists for all unique zip codes in Oregon.

Precision

The precision is primarily evaluated by the data bases used. The overall precision associated with the data is presented in Table 1. This precision was determined by the lead GIS analyst by assessing the data and a sample from previous assessments completed. An example address was compared to the actual location on a recent aerial photograph. Overall the results were similar.

Data Sources used in 2007 file

Table 1. Geographic Precision

Data Source	Example	Precision
Tax Lots	0 feet (on roof top)	+/- 10 ft
Local Roads	48 feet	+/- 50 ft
Statewide Roads – GDT	62 feet	+/- 100 ft
Statewide Roads – ETAK	85 feet	
Statewide Roads – TIGER	811 ft (transposed range on St)	
Zip +4 Extension Centroids	132 feet	+/- 150 ft
Zip +2 Extension Centroids	892 feet	+/- 1000 ft to ¼ mile
Zip Code Centroid	7450 feet (1.4 miles)	1 to 10 miles

Using the GIS Data

When using the GIS data it is important to note attributes related to the geo-coding process and nature of the raw QCEW data. The automated geo-coding process uses various levels of input data and the following attributes should be queried for analyses:

- ATYPE - Address type for data
 - P = Physical Address Field
 - M = Mailing Address Field
 - U = Unemployment Insurance Address Field
- Data Source–Geo-coding methods and data
 - (See above definitions and attribution)

The data user should also note that the multi-establishment may in some cases be geo-coded (MEEI = 2) but never included in payroll and employment numbers (these values are initialized to zero). This may result in slightly higher establishment counts in specific geographies.

Multiple Worksite reporting has changes historically in the data file. Several large breakouts can be notes as:

- Schools (2003)
- State Employment (2004)

Data Tables (dbf for shapefiles)

QCEW Attribute Data Tables

Data files - Annual (i.e. Year 2007)

These are data dumps of annual QCEW data. Data for the last quarter are preliminary and subject to revision.

Parameters are:

OBJECTID	GIS Parameter
UI	UI Numbers (from GIS Link)
RU	Reporting Unit.(from GIS Link)
FIRMNAME	Trade Name of Employer
ADDRESS	Physical Address
CITY	Physical City Name
STATE	State
ZIPCODE	Five digit Postal Zip Code
ZIPEXT	Four digit Postal Zip Code Extension
STFID	Census Unique Identifier
NAICS	North American Industry Classification System
OWNERSHIP	Ownership Code 1 = Federal Government 2 = State Government 3 = Local Government 5 = Private Sector (Includes both domestic and foreign-owned units)
AUX	Auxiliary NAIC Code (not Used Currently)
CNTY	County Code
CNTY-NAME	County Name
CITYLIM	City Limit Code
CITY_LIMIT	City Limit Name
UGB	Urban Growth Boundary Code
UGB_NAME	Urban Growth Boundary Name
YEAR	Year of Data
ATYPE	Address Type
AQTR	Quarter data obtained Code that distinguishes between records for single units, multi-unit master records, and subunits of a multi- establishment employer. Placement in string for each quarter (i.e. 1,2,3,4 digits correspond to time period).
MEI	

- 1 = Single establishment unit
- 2 = Multi-unit master record
- 3 = Subunit establishment level record for a multi-unit employer
- 4 = Multi-establishment employer reporting as a single unit due to unavailability of data, including refusals
- 5 = A subunit record that actually represents a combination of establishments; finer level breakouts are not yet available
- 6 = Known multi establishment employer reporting as a single unit and not solicited for disaggregation because of small employment (< 10 people) in all secondary establishments combined

JAN	Employment
FEB	Employment
MAR	Employment
APR	Employment
MAY	Employment
JUN	Employment
JUL	Employment
AUG	Employment
SEP	Employment
OCT	Employment
NOV	Employment
DEC	Employment
PAYQ1	Payroll Quarter 1 (Jan-Mar)
PAYQ2	Payroll Quarter 2 (Apr-Jun)
PAYQ3	Payroll Quarter 3 (Jul-Sep)
PAYQ4	Payroll Quarter 4 (Oct-Dec)
AVGEMP	Average Annual Employment
TOTPAY	Total Annual Wages
GISDATA	Data Source used in Geo-coding
GSCR	Score from Geocoding process
DISCRPTION	Data Source Description
PRECISION	Precision of Data Source
LATITUDE	Latitude Coordinate
LONGITUDE	Longitude Coordinate

Limiting Factors in Using Covered Employment and Wage Data for Time Series Analysis

The Quarterly Census of Employment and Wages (QCEW) data set – also known as “covered employment” – is not designed to be used for time series analysis, however, within the limitations discussed below, it may be used as a proxy for time series analysis.

The number of firms, count of employment, and total payroll in a given geographic area and/or industry typically change from one month to the next for several reasons. Not all of these reasons are due to economic factors (e.g. business expansions, layoffs, etc.). Occasionally employment levels in a QCEW data set will suddenly shift for reasons unrelated to true economic change. These reasons are listed below, and may limit the legitimacy of time series analysis.

1) Boundary changes.

Geographical boundaries such as Census tracts, zip codes, and urban growth boundaries can change. When they do, employment may change as well. For example, the expansion of a city's limits might capture firms that were previously outside city limits. In this example, the addition of employment within the city limits due to a boundary change is not an indication of economic growth.

Bottom Line: Employment levels within a specific geographic area can shift from one year to the next as a result of changes to urban growth boundaries, zip codes, city limits, Census tracts, or any other administrative or political border.

2) Changes in geocoding methodology.

We are constantly improving our geocoding methodology: We obtain more complete information on firms' locations, and we upgrade our geocoding software to take advantage of new technology. These improvements may cause firms to shift from one geographic area to another. For example, a firm may appear on one side of a road in one year, and on the other side the following year. The firm hasn't actually moved, but is now counted on the other side of a boundary; the shift occurred because we were able to more accurately pinpoint its location.

Bottom Line: Employment levels can rise or fall due to improved geocoding.

3) Non-economic code changes.

Occasionally firms are coded to an incorrect county or industry. When we correct the error (effective the first of the year), it appears as an abrupt shift in an industry's or county's employment. The shift does not represent true economic growth or decline.

Bottom Line: Employment levels can rise or fall due to firms' industry and/or county reclassifications.

4) Multiple worksite reporters.

Many firms have multiple locations within Oregon but report total employment in just one location, such as the company's headquarters. Banks and retail stores are examples. If and when such a firm is able to break out its companywide employment by branch locations, or when we are able to do so using other information available to us, this will cause a shift in employment levels. Industry job counts will decline in the geographic location of the headquarters while increasing in the areas where the branches are located. The opposite will happen when a firm consolidates its multi-location reporting to a single location. Similar changes in reported employment levels can occur when one firm is purchased by another firm in a different location or when the opposite occurs.

Bottom Line: Employment levels within a region can rise or fall when a firm changes the way it reports its multi-site employment.

Additional Information

The GIS file is an ESRI point shape file. The data is in the Oregon State Lambert Projection.

Carolyn Eagan, Regional Economist

Re: Employment Data for Purposes of Preparing the La Pine EOA

The DLCD grant (for preparing La Pine's first Comprehensive Plan) includes development of the Economic Opportunities Analysis to be consistent with State law and the LCDC/OAR Planning Goals. To do this, I tried to use your website to do a geo-coded map of all of the NAIC data for each group and map it myself but I also need number of employees per business, gross earning per position, and gross sales, etc. I spoke with Carolyn B. Eagan, (Regional Economist Workforce and Economic Research Oregon Employment Department Crook, Deschutes, Jefferson Klamath and Lake 541-388-6442 541-388-6453 [Fax] e-mail: Carolyn.B.Eagan@state.or.us) about the details of the report I need. I have generally described the information I need in the attached Form 104.

The goal, of course, is to get a clear understanding of the current number and types of businesses in La Pine. Then, using this and other trend data, I can better address the statutory requirements of doing an EOA and meet Goal 9 and Goal 14. This is similar to the data that Bend requested when they did their EOA for their UGB expansion project.

Thank you for your assistance and cooperation. Please feel free to give me a call if you have any questions.

I have faxed Form 104 and this memo to you as requested.

City of La Pine and Vicinity

Mapping Parameters – *it is okay to use several maps if it works better or is more efficient*

Note: When applying the zone data use the Comprehensive Plan Map zoning or designation.

Vertical Developed Lots

1. Show all lots, regardless of zone or any other designation, that have structures on them with small dots or other marker of your choice
2. Show all lots that have multi-family structures on them. Factor Book codes 232-255 only

Vacant Lands – lands with no improvements at all

Show all vacant land by zone. To do this, can you use a heavy line as the boundary between the various zones and then add an acronym to designate each zone?

Please calculate total acreage of these vacant lands inside and outside City limits.

Redevelopable Lands

1. Show all residential % **good** less than 65% as redevelopable.
2. Show all residential lands that are over ½ acre in size regardless of developed or not.
3. Show all commercial and industrial lands with structures built in 1980 or earlier as redevelopable.
4. Please calculate total acreage for each of the above areas for areas inside and outside City limits.

Not Developable or Already Developed

1. Show all FEMA, NWI wetlands, Public Property, School property, Parks, ROW, lands that do not pay taxes, and RR areas as not developable. Please calculate total acreage for areas inside and outside City limits.
2. Show all residentially zoned lands ½ acre and smaller containing residential structures with % **good** at 66% or greater as developed. Please calculate total acreage for areas inside and outside City limits.
3. Show all commercial and industrial lands with structures built after 1981 as developed. Please calculate total acreage for areas inside and outside City limits.

Other Constraints – *Depending if you have data to supply for each or not*

Show deer winter range and migration corridors on a separate map for sure

Any Fire zones or other constraints?

Vegetation constraints? Protected Species or tree stand data?

Please calculate total acreage for each area for areas inside and outside City limits.

Aerial Map of City Areas?

Does one exist? If it does, we need one.
