11 *Respondent,*

12
13 and

14
15 PACIFIC CONNECTOR GAS PIPELINE LP,
16 *Intervenor-Respondent.*

17
18 LUBA No. 2014-049

19
20 FINAL OPINION
21 AND ORDER

22
23 Appeal from Douglas County.

24
25 William H. Sherlock, Eugene, filed the petition for review and argued on
26 behalf of petitioners. With him on the brief was Hutchinson Cox Coons Orr &
27 Sherlock PC.

28
29 No Appearance by Douglas County.

30
31 Richard H. Allan, Portland, filed the response brief and argued on behalf
32 of intervenor-respondent. With him on the brief were Daniel L. Timmons and
33 Marten Law PLLC.

34
35 BASSHAM, Board Member; RYAN, Board Chair; HOLSTUN, Board
36 Member, participated in the decision.

37
38 AFFIRMED

11/12/2014

1 You are entitled to judicial review of this Order. Judicial review is
2 governed by the provisions of ORS 197.850.

NATURE OF THE DECISION

Petitioners appeal a county decision modifying the alignment of a previously approved natural gas pipeline, and removing a condition of approval that limited use of the pipeline to importing natural gas, facilitating the applicant’s proposal to use the pipeline to export natural gas.

MOTION TO FILE REPLY BRIEF

Petitioners move to file a reply brief to address new matters raised in the response brief. There is no opposition to the motion, and the reply brief is allowed.

FACTS

Intervenor-respondent Pacific Gas Connector Pipeline, LP (intervenor) proposes to build a 232-mile, 36-inch diameter natural gas transmission pipeline between an existing interstate natural gas pipeline near Malin, Oregon, to an approved terminal located in Coos Bay. The terminal is owned by a separate corporate entity, Jordan Cove Energy Project, L.P. (Jordan Cove). While most of the length of the proposed pipeline is outside county jurisdiction or preempted from county regulation by federal law, federal law requires county approval of an eight-mile long portion of the pipeline located within the county’s Coastal Zone Management Area (CMZA). The eight-mile long portion of the pipeline crosses lands zoned Timber Resource (TR), Farm Forest (FF) and Exclusive Farm Use-Grazing (FG). The TR and FF zones allow pipelines as conditional uses, while the FG zone allows a “utility facility necessary for public service” implementing ORS 215.283(1).

Intervenor obtained approval from the Federal Energy Regulatory Commission (FERC) for the 232-mile pipeline. In 2009, the county approved

1 conditional use permits for the pipeline and also approval as a “utility facility
2 necessary for public service” for the eight-mile portion of the pipeline within
3 the CMZA (the 2009 decision). At that time, the Jordan Cove terminal was
4 intended to import natural gas, and had obtained federal approvals as an import
5 terminal. Intervenor’s pipeline was intended to transmit imported natural gas
6 from Jordan Cove’s terminal at Coos Bay to the interstate pipeline at Malin. In
7 its 2009 decision, the county imposed Condition 12, which provided that “[t]his
8 Conditional Use Permit/Utility Facility authorization is limited to the import of
9 natural gas only.” Record 968. Subsequently, in 2011, 2012, and 2013,
10 intervenor sought and obtained extensions to the 2009 decision.

11 Due to radical changes in the national and international gas markets,
12 Jordon Cove decided to change its import terminal to an export terminal. The
13 change to an export terminal required new FERC approvals for both the
14 terminal and intervenor’s pipeline. It also required removing Condition 12.
15 Accordingly, intervenor applied to the county for a major amendment to the
16 2009 conditional use permit and utility facility approval, to remove Condition
17 12. Intervenor also sought to re-align a 1.7 mile long portion of the eight-mile
18 long pipeline within the CMZA, within an area known as Weaver Ridge, in
19 order to avoid difficult terrain. The Weaver Ridge area is zoned TR.

20 On October 17, 2013, the county planning commission conducted a
21 hearing on the application, continued to December 12, 2013. On January 9,
22 2013, the planning commission met to deliberate. One of the seven
23 commissioners, Brosi, decided not to participate because he had not reviewed
24 the complete record. The remaining commissioners voted 3-3 on a motion to
25 deny the request to remove Condition 12, with Commissioners Hawks, Duckett
26 and Murphy voting in favor of denial, and Commissioners Ware, Seonbuchner

1 and Gorigolzarri voting nay. Immediately after that tie vote, the commissioners
2 voted on a motion to approve the request to remove Condition 12, which also
3 resulted in a 3-3 tie. Planning staff advised the commissioners that under
4 Douglas County Land Use and Development Ordinance (LUDO) 2.300.3.j, a
5 tie vote generally results in denial of the application.¹ Accordingly, the
6 commissioners voted 6-0 on a motion to declare that due to lack of a majority,
7 the application failed.

8 On January 10, 2014, county staff sent a notice of public meeting stating
9 that the planning commission would hold a meeting solely to adopt findings to
10 memorialize its action resulting from a lack of a majority decision on the

¹ LUDO 2.300.3.j provides, in relevant part:

“At the conclusion of the hearing, the Approving Authority shall either make a decision and state findings (which may incorporate findings proposed by any party, or by the Director), or may take the matter under advisement. *If a majority of the quorum fail to agree, and there is no lower decision, the matter shall be deemed denied, unless the members present at the hearing vote to reschedule the deliberation.* The Approving Authority may request proposed findings and conclusions from any party to the hearing. The Approving Authority, before finally adopting findings and conclusions, may circulate the same in proposed form to the parties for written comment. All actions taken by the Approving Authority pursuant to adopting findings and conclusions shall be made a part of the record. The decision and findings and conclusions which support the decision of the Approving Authority shall not be final until reduced to writing and signed by the Approving Authority. Within forty-five (45) days of the date of public hearing the Approving Authority shall grant, deny or, in appropriate cases, pursuant to §2.120.3, attach such conditions as may be necessary to carry out the Comprehensive Plan in approving the proposal being heard. The Director shall notify parties of the decision by mail.” (Emphasis added.)

1 application. However, on January 24, 2014, staff sent another notice stating
2 that the meeting was rescheduled to February 5, 2014, and that the purpose was
3 to either (1) adopt findings memorializing the tie vote decision of January 9,
4 2014, or (2) to reschedule deliberations pursuant to LDI 2.300.3.j.

5 At the February 5, 2014 meeting, commissioner Murphy, who had
6 previously voted against removing Condition 12, was not present. After a
7 presentation of options by the planning director, the five then-present
8 commissioners voted 4-1 to re-schedule deliberations, in order to allow
9 Commissioner Brosi to participate in the decision and break any deadlock. On
10 February 20, 2014, all seven commissioners met to deliberate, Commissioner
11 Brosi having now read the record. After new deliberations, the commissioners
12 voted 5-2 to approve the request to remove Condition 12. The commissioners
13 requested that intervenor draft findings for planning commission approval at
14 the March 20, 2014 meeting, and on that date the planning commission adopted
15 a written decision approving the application.

16 Petitioners appealed the planning commission decision to the county
17 board of commissioners. On April 30, 2014, the board of commissioners
18 declined review, and summarily affirmed the planning commission decision as
19 the county's final decision. This appeal followed.

20 **FIRST ASSIGNMENT OF ERROR**

21 LUDO 3.39.200 provides that a conditional use permit becomes invalid
22 if the permit is not exercised within two years of the date of approval. LUDO
23 3.39.300 provides that a conditional use permit may be extended for one year
24 "if it is determined that a change of conditions, for which the applicant was not
25 responsible, would prevent the applicant from commencing his operation
26 within the original time limitation."

1 As noted, the county granted extensions to the conditional use permit in
2 2011, 2012, and 2013, finding in each decision that an extension was warranted
3 under LUDO 3.39.300, because intervenor had not yet obtained all local, state
4 and federal approvals needed to construct the pipeline. Each extension decision
5 was issued administratively, with no notice to persons other than intervenor.
6 None were challenged or appealed.

7 During the proceedings on intervenor's modification application,
8 petitioners argued that the extension decisions were wrongly decided, and in
9 fact the reason why intervenor failed to construct the pipeline within the
10 original two year period was solely due to its intent, in conjunction with its
11 partner Jordan Cove, to convert the import facility to an export facility.
12 Because the extension decisions were wrongly decided, petitioners argue, the
13 2009 conditional use permit expired in 2011, and the county therefore erred in
14 approving a modification of the invalid 2009 permit.

15 The planning commission rejected that argument, concluding that
16 intervenor's request for a major amendment does not afford opponents the
17 opportunity to challenge the prior extensions of the 2009 conditional use
18 permit. Record 13. Petitioners do not challenge that finding in the petition for
19 review, but go directly to the issue of whether the extension decisions were
20 wrongfully decided. Intervenor responds, and we agree, that petitioners'
21 arguments under the first assignment of error are impermissible collateral
22 attacks on final extension decisions that were not appeals and were not before
23 the county and are not before LUBA in this appeal.

24 In the reply brief, petitioners argue that the county was required, in
25 processing intervenor's request for a major amendment, to determine whether
26 the 2009 conditional use permit had been validly extended. Petitioners contend

1 that the 2011, 2012, and 2013 extension decisions were not land use decisions
2 that could have been appealed to LUBA, and therefore those decisions must be
3 viewed as “intermediate” decisions that can be challenged in the appeal of the
4 county’s decision on the request to modify the 2009 conditional use permit.

5 Petitioners do not cite to any code provision or other authority that
6 requires the county to determine, in the present proceeding, that the 2009
7 permit had been validly extended. Regardless of whether the three extension
8 decisions qualified as land use decisions potentially appealable to LUBA, there
9 is no question that they were *final* decisions, not intermediate or interlocutory
10 decisions. Nothing cited to us authorizes or requires the county to revisit the
11 merits of those final extension decisions in the course of the present
12 proceeding. The county did not err in rejecting petitioners’ arguments to the
13 contrary.

14 The first assignment of error is denied.

15 **SECOND ASSIGNMENT OF ERROR**

16 As noted, LUDO 2.300.3.j provides in part that “[i]f a majority of the
17 quorum fail to agree, and there is no lower decision, the matter shall be deemed
18 denied, unless the members present at the hearing vote to reschedule the
19 deliberation.” *See* n 1. Petitioners argue that LUDO 2.300.3.j allows the
20 planning commission to reschedule deliberations after a tied vote only if all of
21 the members who were present at the hearing at which the tie vote occurred are
22 also present at the vote to reschedule deliberations. As explained, the planning
23 commission voted to reschedule deliberations at the February 5, 2014 meeting,
24 but Murphy—one of the commissioners who was present at the January 9, 2014
25 meeting at which the tie vote occurred—was not present at the February 5,
26 2014 meeting. According to petitioners, the county’s “failure to ensure that the

1 deliberation vote included Commissioner Murphy is [a] jurisdictional defect”
2 that requires reversal or remand. Petition for Review 27. We understand
3 petitioners to argue that, having failed to comply with LUDO 2.300.3.j., the
4 planning commission lacked authority to reconsider the application, and only
5 possessed authority to deny the application based on the tie vote.

6 Petitioners do not explain the basis for their assertion that failure to
7 include Commissioner Murphy in the February 5, 2014 vote to reschedule
8 deliberations results in a “jurisdictional defect.” Nothing cited to us in the
9 LUDO or elsewhere provides that the failure of all commissioners who were
10 present at a hearing at which a tie vote occurs to subsequently participate in a
11 vote to reschedule deliberations results in a “jurisdictional defect” or divests
12 the planning commission of jurisdiction to act on an application.

13 Assuming without deciding that the planning commission’s February 5,
14 2014 vote to reschedule deliberations was conducted in a manner that violated
15 LUDO 2.300.3.j, that violation appears to be a procedural error. ORS
16 197.835(9)(a)(B) provides that LUBA may remand a decision where the local
17 government “[f]ailed to follow the procedures applicable to the matter before it
18 in a manner that prejudiced the substantial rights of the petitioner.” Petitioners
19 contend that the planning commission’s violation of LUDO 2.300.3.j denied
20 petitioners “the outcome of the tie vote and the resulting denial of the request
21 to remove Condition 12.” Petition for Review 28.

22 However, the “substantial rights” referenced in ORS 197.835(9)(a)(B)
23 include (1) an adequate opportunity for the petitioners to prepare and submit
24 their case, and (2) a full and fair hearing. *Muller v. Polk County*, 16 Or LUBA
25 771, 775 (1988). In *Muller*, the petitioners argued that the board of county
26 commissioners improperly initiated a review of a planning commission

1 decision in petitioners’ favor, and that petitioners’ “substantial rights” included
2 a right to the favorable decision rendered by the planning commission. We
3 rejected that argument, holding that the scope of “substantial rights” does not
4 include a right to a particular result. *Id.* In the present case, we reject
5 petitioners’ similar argument that their “substantial rights” include a right to the
6 outcome of the tie vote and a denial of the request to remove Condition 12.

7 Petitioners do not argue that the planning commission’s actions in the
8 present case deprived them of an adequate opportunity to prepare and submit
9 their case, or a full or fair hearing. Even if the planning commission’s actions
10 at the February 5, 2014 meeting violated LUDO 2.300.3.j, a question we need
11 not and do not decide, petitioners have not demonstrated that any procedural
12 error prejudiced petitioners’ substantial rights. Therefore, petitioners’
13 arguments under this assignment of error do not provide a basis for reversal or
14 remand.

15 The second assignment of error is denied.

16 **THIRD ASSIGNMENT OF ERROR**

17 In an exclusive farm use zone, the county may approve a “utility facility
18 necessary for public service,” subject to standards at ORS 215.275. ORS
19 215.283(1)(c). However, ORS 215.275(6) provides that the standards in ORS
20 215.275(2) through (5) for determining whether a utility facility is “necessary”
21 do not apply to interstate gas pipelines and associated facilities authorized by
22 and subject to regulation under FERC.

23 A 2.1-mile portion of the pipeline runs through areas zoned FG, which is
24 an exclusive farm use zone. In its application, intervenor proposed no changes
25 to the portion of the pipeline within the FG zone, other than to remove

1 Condition 12, and thus change the direction of the natural gas flowing inside
2 the pipeline.

3 Petitioners contend that the change in direction to facilitate export of
4 natural gas rather than to import natural gas means that the pipeline no longer
5 qualifies as a “utility facility” for purposes of ORS 215.283(1)(c) and LUDO
6 3.3.170, which implements that statute. According to petitioners, to qualify as a
7 “utility facility necessary for public service,” the pipeline must supply natural
8 gas to the citizens of Douglas County. Because the pipeline delivers gas to a
9 single entity (Jordan Cove) for export and eventual delivery to foreign
10 customers, petitioners argue that the pipeline no longer qualifies as a “utility
11 facility necessary for public service.”

12 The board of commissioners rejected that argument, finding:

13 “The Planning Commission determined in the 2009 approval that
14 the [pipeline] is a ‘utility facility necessary for public service,’ and
15 therefore a permitted use in the [FG] zone. Removal of the
16 ‘import only’ condition does not alter that conclusion. Neither the
17 term ‘utility facility’ nor the phrase ‘necessary for public service’
18 hinges on a determination whether the [pipeline] is ‘necessary,’
19 whether it serves the ‘public,’ or whether it serves a local or even a
20 domestic market.” Record 17.

21 In a footnote, the county noted that LUDO 1.090 defines “utility facility” in
22 relevant part as “a facility constructed for a public utility, including but not
23 limited to* * * utility lines * * * necessary for public service (electricity, gas
24 water, telephone, cable) * * *.”

25 On appeal, petitioners point out that LUDO 1.090 also provides a
26 definition of “public utility,” one of the terms included within the code
27 definition of “utility facility.” LDO 1.090 defines “public utility” in relevant
28 part as: “Any corporation * * * that owns, operates, manages or controls all or

1 any part of any plant or equipment * * * for the production, transmission,
2 delivery or furnishing of heat, light, water or power, directly or indirectly to the
3 public.” Under those definitions, petitioners argue, a “utility facility” must be a
4 “public utility,” and further the scope of a “public utility” is limited to entities
5 that provide heat, light, water or power directly or indirectly to the public.
6 While the LUDO provides no definition of “public,” petitioners cite to several
7 public facilities policies in the county comprehensive plan that refer to the
8 “public” in ways that clearly denote the residents of the county. Based on the
9 LUDO definitions and comprehensive plan policy references to the “public,”
10 petitioners argue that as a matter of law the pipeline can qualify as a “utility
11 facility” only if it provides heat, light, water or power directly or indirectly to
12 the residents of the county. Because the pipeline does not provide such
13 services to the county’s residents, petitioners contend that the county erred in
14 concluding that the pipeline is a “utility facility” allowed in the FG zone.

15 Intervenor responds initially that the issue of whether the pipeline no
16 longer qualifies as a utility facility for purposes of ORS 215.283(1)(c) and
17 LUDO 3.3.170 was not raised during the proceedings below, and thus was
18 waived under ORS 197.763(1). In addition, intervenor contends that the issue
19 was not raised in the local notice of appeal to the county board of
20 commissioners, and therefore petitioners failed to exhaust administrative
21 remedies on that issue as required by *Miles v. City of Florence*, 190 Or App
22 500, 506, 79 P3d 382 (2003). In a reply brief, petitioners respond, and we
23 agree, that the issue was sufficiently raised below for purposes of ORS
24 197.763(1) and that the issue was also raised in the local notice of appeal.
25 Record 123, 706. As noted above, the board of commissioners adopted

1 findings responding to this issue, which suggests that the issue was raised with
2 sufficient specificity to allow a response.

3 On the merits, intervenor argues that the county correctly concluded that
4 a “utility facility” within the meaning of ORS 215.283(1)(c) and LUDO
5 3.3.170 is not limited to facilities that provide services to county residents. We
6 agree. Nothing cited to us in ORS 215.283(1)(c) or ORS 215.275 suggests that
7 a “utility facility” authorized by those statutes is limited to facilities that
8 provide services to local or county residents. Indeed, as noted, ORS 215.275(6)
9 specifically includes FERC-regulated interstate natural gas pipelines—which as
10 interstate gas lines may not provide any service at all to any local residents—
11 within the scope of “utility facilities necessary for public service.”

12 Moreover, as intervenor points out, *Brentmar v. Jackson County*, 321 Or
13 481, 900 P2d 1030 (1995), holds that a county may not apply more restrictive
14 local criteria to a use that is allowed under ORS 215.213(1) or ORS
15 215.283(1). The gist of petitioners’ argument is that two county code
16 definitions, combined with usages of the undefined term “public” in the
17 county’s comprehensive plan, must be interpreted together to function as
18 limitations on the scope of “utility facility” as that term is used in ORS
19 215.283(1)(c), effectively limiting such facilities to those that serve county
20 residents. That interpretation is not compelled by the code definitions and
21 comprehensive plan language that petitioners cite, but even if it were, any such
22 local limitations applied to deny a use authorized by ORS 215.283(1)(c) would
23 exceed the county’s authority, under the reasoning in *Brentmar*.²

² Petitioners also argue that the pipeline falls within an exclusion to the definition of “public utility” at ORS 757.005(1)(b)(F), for entities that supply “heat” to a single thermal end user. To the extent we understand the argument,

1 The third assignment of error is denied.

2 **FOURTH ASSIGNMENT OF ERROR**

3 As noted, a natural gas pipeline is a conditional use in the TR zone.
4 Intervenor proposed to realign a 1.7-mile long portion of the pipeline within
5 the TR zone, referred to as the Weaver Ridge area. The rest of the alignment
6 within the CMZA remains the same, with the only change being the removal of
7 Condition 12.

8 LUDO 3.5.125(1) and (3) are conditional use standards that require a
9 finding that the conditional use will not seriously interfere with farm uses or
10 forest practices on adjacent lands, and further requires a finding that the use
11 will not force a significant change in, or significant increase in the cost of,
12 accepted farming or forest practices on adjacent farm or forest lands. The
13 county adopted findings concluding that the Weaver ridge realignment
14 complies with LUDO 3.5.125(1) and (3), incorporating similar findings from
15 the 2009 decision. Record 38-43.

16 Petitioners argue that the county’s findings of compliance with LUDO
17 3.5.125(1) and (3) are inadequate, because they do not address testimony from
18 Neal Brown Family, LLC, which owns FF-zoned property that will be bisected
19 by the pipeline alignment as approved in 2009. The testimony objected that the
20 portion of the pipeline that crosses the Brown property would limit farm and
21 forest uses on their property.

22 However, petitioners do not explain why the county was required to
23 adopt findings addressing the Brown testimony. The 2009 decision approved

it does nothing to demonstrate that the pipeline is not a “utility facility necessary for public service” within the meaning of ORS 215.283(1)(c) and LUDO 3.3.170.

1 the location of the pipeline on the Brown parcel, based on findings that
2 addressed LUDO 3.5.125(1) and (3) and impacts of the pipeline on farm and
3 forest use of the Brown property. The present decision does not approve any
4 change to the portion of the pipeline that crosses the Brown property, other
5 than the removal of Condition 12. However, petitioners do not argue that the
6 removal of Condition 12 has any impacts on farm or forest use of the Brown
7 property. Because the decision before us does not approve any changes that
8 could impact farm or forest use of the Brown property, petitioners have not
9 demonstrated that the county erred in failing to address the Brown testimony.

10 The fourth assignment of error is denied.

11 The county's decision is affirmed.
