### **Alternative Disposition Facility**

Alternative disposition is a Board authorized method of final disposition of human remains other than burial, entombment, burial at sea, cremation or removal from the state, and includes dissolution. Oregon Administrative Rules (OAR) 830-011-0000(2). Oregon Revised Statutes (ORS) 696.010(4)

Alkaline hydrolysis is a final disposition process involving dissolution of human remains by placing the remains in a dissolution chamber containing water and chemical solution including potassium hydroxide or sodium hydroxide, or a combination of both, and introducing heat to break down the remains until bone fragments that may be pulverized and liquid remain. OAR 830-011-0000(1)

An alternative disposition facility is a facility containing equipment designed for the final disposition of human remains through alternative methods authorized by the Board including, but not limited to, dissolution. OAR 830-011-0000(3) Currently, dissolution or alkaline hydrolysis is the only alternative form of final disposition approved by the Board by rule.

An owner or any other person or association of individuals that maintains such a pioneer cemetery shall list the pioneer cemetery with the Oregon Pioneer Cemetery Commission on a form provided by the commission. No fee shall be required from a pioneer cemetery for listing.

A cemetery, other than an operating cemetery or a pioneer cemetery listed with the Oregon Pioneer Cemetery Commission under ORS 97.782, shall be registered with the Oregon Mortuary and Cemetery Board on a form provided by the Board, and is identified as a Registered Cemetery.
