

BOARD OF MEDICAL IMAGING

337-010-0045

Temporary Licensee

(1) Temporary License

(a) Students who have successfully completed, or will successfully complete within six months, an approved school's didactic and clinical programs may apply for a temporary license that will be effective upon completion of the approved school's program.

(b) A temporary license is intended to allow graduates of an approved school to gain additional paid medical imaging experience in the applicable imaging modality before completing required credentialing examinations.

(c) With an endorsement to OBMI from the medical imaging program director at a student's school, indicating that the student is in good standing and is in the process of meeting educational requirements for graduation on a date specified, and that the student is competent to work under supervision, a temporary license may be issued which will be valid up to five months prior to the specified course completion date.

(d) A temporary license is valid for 6 months and may be renewed for a single six-month renewal period upon Board approval.

(e) A temporary licensee must apply to the Board for a medical imaging license within 30 days of being awarded a credential in a medical imaging modality by a recognized credentialing organization.

(f) If a temporary licensee is also licensed by the Board in another medical imaging modality, the restrictions of this subsection shall only apply when the individual is functioning as a temporary licensee.

(2) **Temporary Licensee Supervision.** A temporary licensee may only operate the applicable medical imaging modality under the indirect supervision of a licensed physician, or an individual licensed by the Board and credentialed by a credentialing organization in the medical imaging modality identified on the temporary license. For purposes of this ~~subsection~~ rule, indirect supervision means that the supervisor is physically present in the building and available to assist the temporary licensee as needed.

(3) Temporary License to add modality through post-primary pathway:

The post-primary license is intended for current licensees who are completing clinical requirements necessary to add a different licensure modality to their current license. Licensees practicing with a post-primary license must be under direct supervision at all times while practicing the post-primary modality. Supervision must be provided by a physician or technologist fully licensed to practice in the same modality as the post-primary license. All practice completed under the post-primary license must be

specific to the modality on the post-primary temporary license and must be applicable to the post-primary licensee's clinical requirements for the subspecialty being added. Maximum duration for post-primary temporary license is 24 months.

Application process: As part of the application for a post-primary temporary license, the Board may require confirmation of clinical supervision and clinical practice site, and may limit the post-primary temporary licensee to one or more specific practice sites. The Board may require confirmation that the applicant is eligible for credentialing in the new modality, if the relevant clinical experience requirements are met, and may deny an application based upon a lack of evidence of eligibility.
