

# Oregon Reportable Diseases

Oregon Administrative Rules (OAR 603-011-0212) require veterinarians to report the following:

1) Any person practicing veterinary medicine in Oregon shall immediately notify the department by telephone (**503-986-4680**) of observing the following abnormalities:

- 1. Any unidentified vesicular disease**
- 2. Any exotic disease or foreign animal disease, even if only suspected**
- 3. Any disease of unknown etiology exhibiting highly pathogenic or lethal effect**

2) Any person practicing veterinary medicine in Oregon shall immediately notify the department by telephone (**503-986-4680**) of clinical evidence of any of the following diseases:

## Reportable Diseases

### **Multi Species Diseases**

Anthrax  
Babesiosis/Piroplasmosis  
Bluetongue  
Brucellosis(abortus, mellitensis, suis)  
Foot and mouth disease  
Pseudorabies  
Rabies  
Vesicular Stomatitis

### **Cattle Diseases**

Bovine spongiform encephalopathy  
Bovine tuberculosis  
Malignant catarrhal fever  
Trichomoniasis

### **Equine Diseases**

Contagious equine metritis  
Equine encephalomyelitis (WWW, EEE, VEE, WNV)  
Equine infectious anemia  
Equine viral arteritis

### **Sheep and Goat Diseases**

Scrapie

### **Swine Diseases**

Classical swine fever  
Swine Influenza

### **Poultry Diseases**

Avian chlamydiosis  
Avian infectious laryngotracheitis  
Exotic Newcastle disease  
Notifiable avian influenza  
Pullorum disease  
Salmonella enteritidis

# **Oregon Notable Livestock Diseases**

In order to facilitate effective livestock disease monitoring, veterinarians working with livestock are requested to report notable diseases on a monthly basis. Veterinarians carrying out this work will receive monthly Animal Health Notes and a summary of surveillance information obtained.

Livestock disease surveillance reports may be made by e-mail linked to a website, or fax. In order to begin monthly reporting, please call 503-986-4680.

## **Notable Diseases**

- by clinical or laboratory diagnosis

### **Multi-Species Diseases**

Clostridial  
Cryptosporidiosis  
Echinococcosis/hydatidosis  
Johne's (newly affected herds or flocks)  
Leptospirosis  
MRSA  
Q Fever (newly affected herds or flocks)  
Salmonella

### **Cattle Diseases**

Anaplasmosis  
Genital Campylobacteriosis  
Bovine Viral Diarrhea  
Enzootic Bovine Leucosis (newly affected herds)  
Infectious Bovine Rhinotracheitis  
Neospora caninum (new herds only)

### **Equine Diseases**

Coital Exanthema (EHV-3)  
Equine Ehrlichiosis  
Equine Herpes Virus  
Equine Influenza  
Pigeon Fever  
Strangles

### **Sheep and Goat Diseases**

Caprine Arthritis/Encephalitis (newly affected flocks)  
Enzootic Abortion (ovine chlamydiosis)  
Ovine Progressive Pneumonia/Maedi  
Visna (newly affected flocks)  
Ovine Pulmonary Adenomatosis

### **Swine Diseases**

Circo Virus  
Porcine Reproductive and Respiratory Syndrome  
Transmissible Gastroenteritis  
Trichinellosis

### **Poultry Diseases**

Avian Infectious Bronchitis  
Duck Virus Enteritis or Hepatitis  
Fowl Cholera  
Fowl Pox  
Infectious Bursal Disease  
Marek's Disease  
Mycoplasma gallisepticum
