Subject: Oregon Forestry Rules and Regulations

Dear Oregon Board of Forestry,

Oregon needs to be Natl. Leaders in Private Forestry. Pesticides Kill Fish. Especially Baby Wild Fish. Wild Fish have rights given to them by the US Supreme Court. Current Oregon Board of Forestry Rules are Violating Federal Water Quality Laws. Violating Oregonians and Wild Fish Civil Rights to Clean Water and Air.

Oregon's Current Forestry Practice Rules Do Not Protect Oregonians or Wild Endangered Fish. We Demand Our Civil Rights to Clean Air & Water for All Species of Life. Oregon Lost and the Federal Government Won the Lawsuit.

Oregon must comply with Federal Laws. Whether, the Private Timber Industry likes it or not. Timber have to follow Oregon's Laws. Stop the Toxic Spraying of Private Forest in Oregon. No more massive Clear Cuts with Unlimited Pesticide Use. The Timber Industry continues to Believe they can do what ever they want. That Era is Gone.

Partnership with Watershed Councils and Stewardship Groups all over Oregon to Find Better Solutions Together. Minimal Pesticide Use Hand Sprayed, mostly for Invasive Species Control. Put People to Work Brushing and Thinning the Tree Farms back to Forests using Human Beaver Brushing Oregon Timber Crews. Helps to Prevent Oregon Forest Fires Reducing Costly Fire Suppression Over Runs.

Tree Farms are not Forests. If you don't like Oregon rules, Leave. Somebody else will be willing to Do Private Forestry the Right Way. Wild Fish have Civil Rights. Who knew? Me & You People too.

Thank you for your time and consideration of these critical issues to Oregon.
