

**PARTIAL WAIVER OF REGULATED USE CLOSURE RESTRICTION**

**NORTHWEST OREGON FOREST PROTECTION DISTRICT**

Rogers Basin, Jordan Creek Basin, Trask Basin, & Diamond Mill OHV Area

The regulated use closure restriction prohibiting motorized vehicles including motorcycles and all terrain vehicles on unimproved roads, is hereby waived on State Forest Land, on designated OHV trails in the Rogers Basin, Jordan Creek Basin, Trask Basin, and the Diamond Mill OHV Area within the Northwest Forest Protection District. This area is designated on the attached exhibit that is on file at the Oregon Department of Forestry offices located at Tillamook and Forest Grove.

This waiver is on condition that the Oregon Department of Forestry State Lands personnel insure that the following conditions are complied with:

- Sheriff Deputies will patrol throughout the entire Tillamook State Forest enforcing OHV regulations.
- Oregon Department of Forestry (ODF) Recreation staff will educate trail riders and enforce the fire laws relating to regulated use.
- Trail patrols will be conducted on weekends to educate riders on fire regulations. Volunteer Trail Patrollers will also ride trails to check for fires and have radio communication to report fires.
- Maps and signs will be posted along the Wilson River Highway and Trask River Road at forest entrance points to inform users of location of areas open to unimproved trail riding.
- ODF staff will update the Tillamook State Forest website during the fire season. The website will provide users with maps of areas open to riding and regulations to ride in those areas and be updated if weather and changing conditions alter the riding restrictions.
- ODF Recreation staff will be responsible for public notification of changes in the status of the waiver, for posting of approved signage, and for patrol of the waiver areas.

The waiver will be in effect only during periods when the Industrial Fire Precaution Level (IFPL) in Regulated Use Area NW-3 is at Levels 1 and 2. When the IFPL is at Level 3 or higher, the waiver no longer applies and all public regulated use closure restrictions that are in effect will apply to the Rogers Basin, Jordan Creek Basin, Trask Basin, and Diamond Mill OHV Areas
